Comment: Two respondents suggested that language in current regulations establishing the amount of formula grant funds for minimum allotment States be inserted in the final rules.

Response: The statute is very explicit about the minimum amounts to which States are entitled, leaving little room for elaboration or clarification. Thus, including the suggested language in the regulations would constitute a restatement of the law. We consider such redundacy unnecessary.

Subpart D—Hearings

Section 1386.80 General.

This subpart in the NPRM set forth the requirements regarding the practice and procedure for hearings for States when issues of compliance arise. It also made these provisions applicable to the Protection and Advocacy System.

Comment: Eight respondents commented on the length and detail of those requirements. Their concerns centered around their imposing an undue administrative burden on ADD.

One respondent specifically supported provisions which addressed the recognition of individuals and groups to participate as *amici curiae* in the proceedings.

Response: The Department appreciates the concern expressed about potential administrative burdens. However, experience has shown that most compliance issues are resolved through negotiations during the process of developing and approving State plans. It is rarely necessary to engage in formal hearings. When such cases arise, however, it is important that the practice and procedures for such hearings be clearly delineated, including all essential protections for affected parties. As a result this subpart, except for some minor technical corrections, has been retained in the final rules and is essentially unchanged.

PART 1387

Special Projects—Projects of National Significance

Section 1387.1 General.

This section of the NPRM proposed that all projects supported with funds under Section 145 of the Act be of national significance. Since the 1981 amendments to the Act are quite explicit, we chose not to repeat that language in the regulation and have indicated that pertinent information concerning format, content of application, submittal procedures and priority areas would be included in the consolidated HDS discretionary grant announcement published in the **Federal Register**.

Comment: Four commenters expressed concerns that the developmentally disabled might not be served if projects of national significance were announced in the consolidated HDS **Federal Register** announcement of availability of funds.

They recommended that regulatory language require that funds available under Section 145 must be used for projects related specifically to the developmentally disabled. These commenters also expressed concern that some "cross-cutting" projects awarded with section 145 funds might be too broad to be of value to the developmentally disabled target group.

Response: The Department feels that all projects supported with Section 145 funds in the joint HDS discretionary grant process have directly benefitted or will directly benefit the developmentally disabled and does not concur with the recommendations. However, we have amended this section to include language which reflects the intent of Section 145 of the Act.

Impact Analysis

These proposed regulations have little economic impact since they closely follow the statute. Further, the regulations primarily affect State agencies, which are not considered small entities under the Regulatory Flexibility Act. Therefore, the Secretary certifies, pursuant to 5 U.S.C. 605(b), enacted by the Regulatory Flexibility Act, that this regulation will not have a significant impact on a substantial number of small entities.

For the same reasons, this proposed rule does not meet the threshold requirements contained in Executive Order 12291 and, therefore, does not constitute a major rule.

Recordkeeping and Reporting Requirements

Sections 1386.22 (Triennial Report), 1386.23(a) (Annual Report) and 1386.30–1386.31 and 1386.33–1386.34 (State Plan) of this rule contain information collection requirements. As required by section 3504(h) of the Paperwork Reduction Act of 1980, we submitted a copy of this rule to the Office of Management and Budget (OMB) for its review of these information collection requirements.

There will be no specified format for the submittal of the State plan requirements established in §§ 1386.30–1386.31 and 1386.33–1386.34. States may select any format they wish as long as they comply with the requirements in the Act and in these regulations. These regulations reflect the aims of Executive Order 12372 to allow for State Plan simplification, consolidation or substitution.

List of Subjects

45 CFR Part 1385

Grant programs/education, Grant programs/social programs, Handicapped, Reporting and recordkeeping requirements.

45 CFR Part 1386

Administrative practice and procedure, Grant programs/education, Handicapped, Reporting and recordkeeping requirements.

45 CFR Part 1387

Colleges and Universities, Grant programs/education, Grant programs/social programs, Handicapped, Research.

(Catalog of Federal Domestic Assistance Program, Nos. 13.630 Developmental Disabilities Basic Support; and 13.631 Developmental Disabilities—Special Projects)

Dated: October 26, 1983.

Dorcas R. Hardy,

Assistant Secretary for Human Development Services.

Approved: February 23, 1984.

Margaret Heckler,

Secretary.

For the reasons set forth in the Preamble, Chapter XIII of Title 45 of the Code of Federal Regulations is amended as follows:

1. In Title 45, Chapter XIII, the Subchapter heading for Subchapter I is revised to read as follows:

SUBCHAPTER I—THE ADMINISTRATION ON DEVELOPMENTAL DISABILITIES, DEVELOPMENTAL DISABILITIES PROGRAM

2. Parts 1385, 1386, and 1387 of Chapter XIII of the Code of Federal Regulations are revised as follows:

PART 1385—REQUIREMENTS APPLICABLE TO PARTS 1386, 1387 and 1388

Sec.

1385.1 General.
1385.2 Purpose of the regulations.
1385.3 Definitions.
1385.4 Rights of persons with developmental disabilities.
1385.6 Employment of handicapped individuals.
1385.7 Waivers.
1385.8 Formula for determining allotments.
1385.9 Grants administration requirements.

Authority: Pub. L. 88–164, 77 Stat. 282, as amended by Pub. L. 90–170, 81 Stat. 527; Pub. L. 91–517, 84 Stat. 1316; Pub. L. 94–103, 89

Stat. 486; Pub. L. 95–602, 92 Stat. 2955; Pub. L. 97–35, 95 Stat. 563 (42 U.S.C. 6001 et seq.)

§1385.1 General.

Except as specified in § 1385.4, the requirements in this Part are applicable to programs and projects carried out under Parts 1386, 1387, and 1388:

(a) State Systems for Protection and Advocacy of Individual Rights of Persons with Developmental Disabilities;

(b) State Basic Program for Planning, Administration and Services on Behalf of Persons with Developmental Disabilities;

(c) Special Projects—Projects of National Significance; and

(d) University Affiliated Programs.

§1385.2 Purpose of the regulations.

These regulations implement the Developmental Disabilities Assistance and Bill of Rights Act as amended (42 U.S.C. 6000, et seq.).

§ 1385.3 Definitions.

In addition to the definitions in Section 102 of the Act (42 U.S.C. 6001), the following definitions apply:

Act means the statutory authority for the developmental disabilities programs as enacted in Pub. L. 88–164 and amended by Pub. L. 90–170, Pub. L. 91–517, Pub. L. 94–103, Pub. L. 95–602 and Pub. L. 97–35. It may be cited as the Developmental Disabilities Assistance and Bill of Rights Act.

Commissioner means the Commissioner of the Administration on Development Disabilities, Office of Human Development Services, Department of Health and Human Services or his or her designee.

Department means the U.S. Department of Health and Human Services (HHS).

Fiscal year means the Federal fiscal year unless otherwise specified.

Governor means the chief executive officer of the State or Territory, or his or her designee who has been formally designated to act for the Governor in carrying out the requirements of the Act and these regulations.

Secretary means the Secretary of the Department of Health and Human Services.

§ 1385.4 Rights of persons with developmental disabilities.

(a) Section 111 of the Act, *Rights of Persons with Developmental Disabilities* (42 U.S.C. 6010), is applicable to the programs authorized under the Act, except for the Protection and Advocacy system.

(b) In order to comply with Section 133(b)(5)(C) of the Act (42 U.S.C. 6063(b)(5)(C)), regarding the rights of developmentally disabled persons, the State must meet the requirements of § 1386.30(e)(3) of these regulations.

(c) Applications from university affiliated facilities or for special project grants must also contain an assurance that the human rights of persons assisted by these programs will be protected consistent with Section 111.

§ 1385.6 Employment of handicapped individuals.

Each grantee who receives Federal funding under this Act must meet the requirements of Section 106 of the Act (42 U.S.C. 6005) regarding affirmative action. Failure to comply with Section 106 may result in loss of Federal funds under the Act. If a compliance action is taken, the State will be given reasonable notice and an opportunity for a hearing as provided in Subpart D of Part 1386.

§ 1385.7 Waivers.

Applications for a waiver of the provisions of Section 107 of the Act (42 U.S.C. 6006) with respect to alternative use of facilities constructed with funds under the Act may be granted by the Commissioner if the following criteria are met:

(a) The waiver request provides a basis for alternative use or sale of a facility constructed with funds appropriated under the Act.

(b) The clients served in the facility are or will be served in a facility of equal or higher quality.

(c) If the waiver request is for an alternate use, that use must serve some other public purpose.

§ 1385.8 Formula for determining allotments.

The Commissioner will allocate funds appropriated under the Act for the purpose of the basic State program (see Subpart C—State Plan for Provision of Services for Persons with Developmental Disabilities) and the protection and advocacy system (see Subpart B—State System for Protection and Advocacy of Individual Rights) on the following basis:

(a) Two-thirds of the amount appropriated are allotted to each State according to the ratio the population of each State bears to the population of the United States. This ratio is weighted by the relative per capita income for each State. The data used to compute allotments are supplied by the U.S. Department of Commerce, for the three most recent consecutive years for which satisfactory data are available.

(b) One-third of the amount appropriated is allotted to each State on the basis of the relative need for services of persons with developmental disabilities. The relative need is determined by the number of persons receiving benefits under the Childhood Disabilities Beneficiary Program (Section 202(d)(1)(B)(ii) of the Social Security Act), (42 U.S.C. 402(d)(1)(B)(ii)).

§ 1385.9 Grants administration requirements.

(a) The following parts of Title 45 CFR apply to grants funded under Parts 1386, 1387, and 1388 of this chapter.

45 CFR Part 16—Procedures of the Departmental Grant Appeals Board.
45 CFR Part 46—Protection of Human Subjects.
45 CFR Part 74—Administration of Grants.
45 CFR Part 75—Informal Grant Appeals Procedures.
45 CFR Part 80—Nondiscrimination under Programs Receiving Federal Assistance Through the Department of Health and Human Services—Effectuation of Title VI of the Civil Rights Act of 1964.
45 CFR Part 81—Practice and Procedure for Hearings Act under Part 80 of this title.
45 CFR Part 84—Nondiscrimination on the Basis of Handicap in Programs and Activities Receiving or Benefiting from Federal Financial Assistance.
45 CFR Part 91—Nondiscrimination on the Basis of Age in Programs or Activities Receiving Federal Financial Assistance from HHS.

(b) The Departmental Grant Appeals Board also has jurisdiction over appeals by grantees who have received grants under the University Affiliated program or for a Special Project.

The scope of the Board's jurisdiction concerning these appeals is described in 45 CFR Part 16.

(c) The Departmental Grant Appeals also has jurisdiction to decide appeals brought by the States concerning any disallowances taken by the Commissioner with respect to specific expenditures incurred by States or by contractors or subgrantees of States. This jurisdiction relates to funds provided under the two formula grant programs—the Basic State Grant program and the State Protection and Advocacy system. Appeals filed by States shall be decided in accordance with 45 CFR Part 16.

(d) In making audits, examinations, excerpts and transcripts of records of grantees and subgrantees, including the protection and advocacy system, as provided for in 45 CFR Part 74, the Department will keep information about individual clients confidential to the extent permitted by law and regulations.

PART 1386—FORMULA GRANT PROGRAMS

Subpart A—Basic requirements

Sec.
1386.1 General.
1386.2 Obligation of funds.
1386.3 Liquidation of obligations.
1386.4 Eligibility for services.

Subpart B—State system for protection and advocacy of individual rights

1386.20 Designated State Protection and Advocacy Office.
1386.21 Requirements of the Protection and Advocacy System.
1386.22 Triennial report on the State Protection and Advocacy System.
1386.23 Periodic reports.
1386.24 Federal financial participation.

Subpart C—State plan for provision of services for persons with developmental disabilities

1386.30 State plan requirements.
1386.31 Plan submittal and approval.
1386.32 Financial reports.
1386.33 Protection of employees' interest.
1386.34 Provision of priority services.
1386.35 Federal financial participation: allowable and non-allowable costs for basic State grants.
1386.36 Final disapproval of the State plan or plan amendments.

Subpart D—Practice and Procedure for Hearing Pertaining to States' Conformity and Compliance with Developmental Disabilities Plans, Reports and Federal Requirements

General

1386.80 Definitions.
1386.81 Scope of rules.
1386.82 Records to be public.
1386.83 Use of gender and number.
1386.84 Suspension of rules.
1386.85 Filing and service of papers.

Preliminary Matters—Notice and Parties

1386.90 Notice of hearing or opportunity for hearing.
1386.91 Time of hearing.
1386.92 Place.
1386.93 Issues at hearing.
1386.94 Request to participate in hearing.

Hearing Procedures

1386.100 Who presides.
1386.101 Authority of presiding office.
1386.102 Right of parties.
1386.103 Discovery.
1386.104 Evidentiary purpose.
1386.105 Evidence.
1386.106 Exclusion from hearing for misconduct.
1386.107 Unsponsored written material.
1386.108 Official transcript.
1386.109 Record for decision.

Posthearing Procedures, Decisions

1386.110 Posthearing briefs.
1386.111 Decisions following hearing.
1386.112 Effective date of decision by the Assistant Secretary.

Authority: Pub. L. 88–164, 77 Stat. 282, as amended by Pub. L. 90–170, 81 Stat. 527; Pub. L. 91–517, 84 Stat. 1316; Pub. L. 94–103, 89 Stat. 486; Pub. L. 95–602, 92 Stat. 2955; Pub. L. 97–35, 95 Stat. 563 (42 U.S.C. 6000 et seq.).

Subpart A—Basic Requirements

§ 1386.1 General.

All rules under this subpart are applicable to both the Protection and Advocacy System and State Basic Support Program.

§ 1386.2 Obligation of funds.

(a) Funds which the Federal Government allots under this Part during a Federal fiscal year are available for obligation by States only within the same Federal fiscal year.

(b)(1) A State incurs an obligation for acquisition of personal property or for the performance of work on the date it makes a binding, legally enforceable, written commitment.

(2) A State incurs an obligation for personal services, for services performed by public utilities, for travel or for rental of real or personal property on the date it receives the services, its personnel takes the travel, or it uses the rented property.

(c)(1) Protection and Advocacy offices may elect to treat entry of an appearance in judicial and administrative proceedings on behalf of a person with developmental disabilities as a basis for obligating funds for the litigation costs. The amount of the funds obligated must not exceed a reasonable estimate of the costs, and the way the estimate was calculated must be documented.

(2) For the purpose of this paragraph, litigation costs mean expenses for court costs, depositions, expert witness fees, travel in connection with a case and similar costs and costs resulting from litigation in which the agency has represented a developmentally disabled person (e.g. monitoring court orders, consent decrees), but not for salaries of employees of the Protection and Advocacy system. All funds made available to the State Basic Support Program and to the P&A System obligated under this paragraph are subject to the requirement of paragraph (a) of this section. These funds, if reobligated, may be reobligated only within the same fiscal year in which the funds were originally obligated.

§ 1386.3 Liquidation of obligations.

(a) All obligations incurred pursuant to a grant made under the Act for a specific Federal fiscal year, must be liquidated within two years of the close of the Federal fiscal year in which the grant was awarded.

(b) The Commissioner may waive the requirements in paragraph (a) of this section when State law impedes implementation or the amount of obligated funds to be liquidated is in dispute.

(c) Funds attributable to obligations which are not liquidated in accordance with the provisions of this section revert to the Federal Government.

§ 1386.4 Eligibility for services.

(a) All persons who meet all of the criteria of the definition of developmental disability set forth in Section 102 of the Act (42 U.S.C. 6001) are eligible for available and appropriate services.

(b) In addition, a person who met the definition of developmental disability as provided in Pub. L. 94–103 and who was actually receiving one or more services under the Act during the period October 1, 1968 through November 30, 1978, is eligible to continue to receive same services, provided that person's Individual Habilitation Plan (IHP) indicates a continuing need for same services.

Subpart B—State System for Protection and Advocacy of Individual Rights

§ 1386.20 Designated State Protection and Advocacy Office.

(a) The Governor or other State official or entity so empowered must designate the State official or public or private agency to be accountable for the proper use of funds and conduct of the State Protection and Advocacy system.

(b) An agency of the State or private agency providing direct services, including guardianship services may not be designated as a Protection and Advocacy agency.

(c) In the event that an entity outside of the State government is designated to carry out the program, the designating official or entity must assign a responsible State official to receive, on behalf of the State, notices of disallowances and compliance actions as the State is accountable for the proper and appropriate expenditure of Federal funds.

§ 1386.21 Requirements of the Protection and Advocacy System.

(a) In order for a State to receive Federal financial participation for Protection and Advocacy activities under this subpart, as well as the Basic Support Program (subject C), the Protection and Advocacy system must meet the requirements of Section 113(a) of the Act (42 U.S.C. 6012(a)) and that system must be operational.

(b) The client's record is the property of the Protection and Advocacy system

which must protect it from loss, damage, tampering, or use by unauthorized individuals. The Protection and Advocacy system must:

(1) Keep confidential all information contained in a client's records including information contained in an automated data bank; this requirement in no way limits or restricts access by the Department or other authorized Federal officials to the client's records or other records of the protection and advocacy system for purposes of carrying out the responsibilities of their offices. It also does not limit access by parents or legal guardians of minors unless prohibited by State law, court order or the rules of attorney-client privilege.

(2) Have written policies governing access to duplication of, and release of information from the client's record; and

(3) Obtain written consent from the client, if competent, or his or her guardian, before it releases information to individuals not otherwise authorized to receive it.

§ 1386.22 Triennial report on the State protection and advocacy system.

In order to receive Federal financial assistance for a State's Protection and Advocacy system:

(a) At least once every three years the Protection and Advocacy office must submit through the designating official or entity to the appropriate Regional Office of the Department, a report describing the system. The report may be in the format of the State's choice. Unless State law provides differently, the report must be signed by the designating official or entity.

(b) The triennial report on the State Protection and Advocacy system must state how requirements of Section 113(a)(1) and (2) of the Act are being met and address those items contained in the request for information outline to be issued by the Department.

(c) The Department will not terminate or deny funding of the Protection and Advocacy system until it has given the State reasonable notice and opportunity for a hearing in accordance with Subpart D of this Part.

(Approved by the Office of Management and Budget under control number 0980–0053 expiration date 6/30/85)

§ 1386.23 Periodic reports.

In addition to the triennial report, the State Protection and Advocacy Agency must submit:

(a) An annual report describing the activities carried out under the system and any changes made in the system during the previous year and addresses such other items as prescribed by the Secretary and approved under the Paperwork Reduction Act. Those items contained in the request for information submitted for approval to OMB. The report may be in the format of the State's choice.

(Approved by the Office of Management and Budget under control number 0980–0160 expiration date 12/31/86)

(b) Quarterly financial status reports from the Protection and Advocacy Agency which are due 30 days after the close of each quarter of the Federal fiscal year, except for the final report which is due 90 days following the close of the fiscal year.

(Approved by the Office of Management and Budget under control number 0980–0054)

§ 1386.24 Federal financial participation: Allowable and nonallowable costs for Protection and Advocacy System.

(a) Federal financial participation is allowable for costs incurred, in accordance with the Act and regulations:

(1) For carrying out activities described in the State's triennial report on the State Protection and Advocacy system (see § 1386.22); and

(2) For providing information and referral services to persons who contact the system for aid whether or not those persons are developmentally disabled.

(b) Federal financial participation is not allowable for:

(1) Costs incurred for activities on behalf of persons with developmental disabilities to solve problems not directly related to their disabilities and which are faced by the general populace, e.g., drawing wills and initiating or defending divorce actions; and

(2) Costs not allowed under other applicable statutes, Departmental regulations and issuances of the Office of Management and Budget.

Subpart C—State Plan for Provision of Services for Persons with Developmental Disabilities

§ 1386.30 State plan requirements.

(a) In order to receive Federal financial assistance under this Subpart, Councils and States must prepare, submit and have in effect a State plan which meets the requirements of Section 133(b) and Section 137(b) of the Act (42 U.S.C. 6063(b) and 6067(b)) and these regulations.

(b) Failure to comply with State plan requirements may result in loss of Federal funds as described in Section 135 of the Act (42 U.S.C. 6065).

(c) the State plan may be submitted in any format the State selects as long as the items contained in the Act are addressed. The plan must:

(1) Identify the program unit(s) responsible for administration of the plan within the designated State agency or agencies;

(2) Identify the priority areas selected by the Council and by the State in which 65% of Federal allotment will be expended.

(Approved by the Office of Management and Budget under control number 0980–0162 expiration date 3/31/87)

(d) The State plan must be reviewed at least once every three years.

(e) The State plan must contain assurances that:

(1) The State will comply with all applicable Federal statutes and regulations in effect during the time that the State is receiving formula grant funding;

(2) The State meets the requirements regarding individual habilitation plans as set forth in Section 112 of the Act (42 U.S.C. 6011); and

(3) The human rights of developmentally disabled persons will be protected consistent with Section 111.

(4) The State planning council has a staff assignment to assist it in carrying out its function and responsibilities identified in the Act and the staff consist of at least a director and such support staff as the State in consultation with the Council has deemed necessary.

§ 1386.31 Plan submittal and approval.

(a) The State plan must be submitted to the appropriate Regional Office of the Department 45 days prior to the fiscal year for which it is applicable. Unless State law provides differently, the State plan and amendments or related documents must be approved by the Governor or the Governor's designee as may be required by any applicable Federal issuances.

(b) Failure to submit an approvable State plan or amendment prior to the Federal fiscal years for which it is applicable may result in the loss of Federal financial participation. Costs resulting from obligations incurred during the period of the fiscal year for which an approved plan is not in effect are not eligible for Federal financial participation.

(c) The Commissioner must approve any State plan or plan amendment provided it meets the requirements of the Act and these regulations.

(d) Amendments to the State plan are required when substantive changes are contemplated in plan content.

§ 1386.32 Financial reports.

The State must submit quarterly financial status reports on the programs funded under this part and must be

submitted by either the Governor or the appropriate State financial official. These reports are due 30 days following the close of each quarter except for the final report which is due 90 days following the close of the Federal fiscal year.

(Approved by the Office of Management and Budget under control number 0980–0055)

§ 1386.33 Protection of employee's interests.

(a) Based on Section 133(b)(7) of the Act (42 U.S.C. 6063(b)(7)), the State plan must provide for fair and equitable arrangements to protect the interest of all institutional employees affected by actions under the plan to provide alternative community living arrangements. Specific arrangements for the protection of affected employees must be developed through negotiations between the appropriate State authorities and employees or their representatives. Fair and equitable arrangements must include procedures that provide for the impartial resolution of disputes between the State and an employee concerning the interpretation, application, and enforcement of protection arrangements. The State must inform employees of the State's decision to provide alternative community living arrangements.

(b) To the maximum extent practicable, fair and equitable arrangements must include provisions for:

(1) The preservation of rights and benefits;

(2) Guaranteeing employment to employees affected by action under the plan to provide alternative community living arrangements; and

(3) Employee training and retraining programs.

§ 1386.34 Provision of priority services.

(a) As part of the State plan requirements in Section 133(b)(4)(A) of the Act (42 U.S.C. 6063(b)(4)(A)), a State must identify its selection of at least one, but not more than two priority areas defined in Section 102(8)(B) of the Act (42 U.S.C. 6001(8)(B)), although the second selection may be in an area not identified in the Act but which is of special significance to the individual State.

(b) In order to select more than two priority areas when the appropriation level does not exceed $90,000,000 (See Section 133(b)(4)(B)(ii)(II) of the Act (42 U.S.C. 6063(b)(4)(ii)(II)), the Commissioner, upon written application from the State, may approve a waiver of the priority service limitations described in paragraph (a) of this section and allow for an additional priority area to be designated. (See Section 133(b)(4)(C) of the Act (42 U.S.C. 6063(b)(4)(C)).

(c) The use of 65% of the State allotment in selected priority areas (as required by Section 133(b)(4)(B) of the Act) is a mechanism to assist the State developmental disabilities program in concentrating on planning, coordinating, and providing technical assistance.

§ 1386.35 Allowable and non-allowable costs for basic State grants.

(a) Under this Subpart, Federal financial participation is available in costs resulting from obligations incurred under the approved State plan for the necessary expenses of the approved State plan for the necessary expenses of the State Council, the administration and operation of the State plan, and training of personnel.
and operation of the State plan, and training of personnel.

(b) Expenditures which are not allowable for Federal financial participation are:

(1) Costs incurred by institutions or other residential or non-residential programs which do not comply with the Congressional findings with respect to the developmentally disabled in Section 111 of the Act (42 U.S.C. 6010):

(2) Costs incurred for activities not provided for in the approved State plan; and

(3) Costs not allowed under other applicable statutes. Departmental regulations or issuances of the Office of Management and Budget.

§ 1386.36 Final disapproval of the State plan amendments or plan amendments.

The Department will disapprove any State plan or plan amendment only after the following procedures have been complied with:

(a) The State plan has been submitted to the appropriate HHS Regional Office, and the Regional Office and State have been unable to resolve their differences.

(b) The Regional Office has prepared a detailed written analysis of its reasons for recommending disapproval and has transmitted its analyses and all other relevant material to the Commissioner, and has provided the State Council and State agency with copies of the material.

(c) The Commissioner, after review of the records and the recommendation of the Regional Office, has determined whether the State plan, in whole or in part, is not approvable. Notice of this determination has been sent to the State and contains appropriate references to the records, provisions of the statute and regulations, and all relevant interpretations of applicable laws and regulations. The notification of the decision must inform the State of its right to appeal in accordance with 45 CFR Part 1386, Subpart D.

(d) The Commissioner's decision has been forwarded to the State Council and agency by certified mail with a return receipt requested.

(e) A State has filed its request for a hearing with the Assistant Secretary for Human Development Services (ASHDS) within 21 days of the receipt of the decision. The request for a hearing must be sent by certified mail to the ASHDS. The date of mailing the request is considered the date of filing if it is supported by independent evidence of mailing, otherwise the date of receipt shall be considered the date of filing.

Subpart D—Practice and Procedure for Hearings Pertaining to States' Conformity and Compliance With Developmental Disabilities Plans, Reports, and Federal Requirements

General

§ 1386.80 Definitions.

For purposes of this Subpart:

"*Assistant Secretary*" means the Assistant Secretary for Human Development Services (HDS) or a presiding officer.

ADD means Administration on Developmental Disabilities, Office of Human Development Services.

Presiding officer means anyone by the Assistant Secretary to conduct any hearing held under this Subpart. The term includes the Assistant Secretary if the Assistant Secretary presides over the hearing.

§ 1386.81 Scope of rules.

(a) The rules of procedure in this Subpart govern the practice for hearings afforded by the Department to States pursuant to Sections 113, 133, and 135 of the Act. (42 U.S.C. 6012, 6063 and 6065.)

(b) Nothing in this Part is intended to preclude or limit negotiations between the Department and the State, whether before, during, or after the hearing to resolve the issues which are, or otherwise would be, considered at the hearing. Negotiations, and resolution of issues are not part of the hearing, and are not governed by the rules in this Subpart, except as otherwise provided in this Subpart.

§ 1386.82 Records to be public.

All pleadings, correspondence, exhibits, transcripts of testimony, exceptions, briefs, decisions, and other documents filed in the docket in any proceeding are subject to public inspection.

§ 1386.83 Use of gender and number.

As used in this Subpart, words importing the singular number may extend and be applied to several persons or things, and vice versa. Words importing either gender may be applied to the other gender or to organizations.

§ 1386.84 Suspension of rules.

Upon notice to all parties, the Assistant Secretary may modify or waive any rule in this Subpart, unless otherwise expressly provided, upon determination that no party will be unduly prejudiced and justice will be served.

§ 1386.85 Filing and service of papers.

(a) All papers in the proceedings must be filed with the HDS Hearing Clerk in an original and two copies. Only the originals of exhibits and transcripts of testimony need be filed.

(b) Copies of papers in the proceedings must be served on all parties by personal delivery or by mail. Service on the party's designated representative is deemed service upon the party.

Preliminary Matters—Notice and Parties

§ 1386.90 Notice of hearing or opportunity for hearing.

Proceedings are commenced by mailing a notice of hearing or opportunity for hearing from the Assistant Secretary to the State council and the designated State agency, or to the State protection and advocacy office or official. The notice must state the time and place for the hearing, and the issues which will be considered. The notice must be published in the **Federal Register.**

§ 1386.91 Time of hearing.

The hearing must be scheduled not less than 30 days nor more than 60 days after the date notice of the hearing is mailed to the State.

§ 1386.92 Place.

The hearing must be held at a date, time, and place determined by the Assistant Secretary with due regard for the convenience and necessity of the parties or their representatives.

§ 1386.93 Issues at hearing.

(a) Prior to a hearing, the Assistant Secretary may notify the State in writing of additional issues which will be considered at the hearing. That notice must be published in the **Federal Register.** If that notice is mailed to the State less than 20 days before the date of the hearing, the State or any other party, at its request, must be granted a postponement of the hearing to a date 20 days after the notice was mailed, or such later date as may be agreed to by the Assistant Secretary.

(b) If any issue is resolved in whole or in part, but new or modified issues are presented, the hearing must proceed on the new or modified issues.

(c)(1) If at any time, whether prior to, during, or after the hearing, the Assistant Secretary finds that the State has come into compliance with Federal requirements on any issue in whole or in part, he or she must remove the issue from the proceedings in whole or in part as may be appropriate. If all issues are removed the Assistant Secretary must terminate the hearing.

(2)(i) Prior to the removal of an issue, in whole or in part, from a hearing involving issues relating to the conformity with Federal requirements of State plan or report on the description of the protection and advocacy system with Federal requirements, the Assistant Secretary must provide all parties other than the Department and the State (see § 1386.94(b)) with the Statement of his or her intention to remove an issue from the hearings and the reasons for that decision. A copy of the proposed State plan provision or report on the description of the protection and advocacy system on which the State and the Assistant Secretary have settled must be sent to the parties. The parties must have an opportunity to submit in writing within 15 days their views as to, or any information bearing upon, the merits of the proposed provision and the merits of the reasons for removing the issue from the hearing.

(d) In hearings involving questions of noncompliance of a State's operation of its program with the State plan or system description, or with Federal requirements, the same procedure set forth in paragraph (c)(2) of this Subsection must be followed with respect to any report or evidence resulting in a conclusion by the Assistant Secretary that a State has achieved compliance.

(e) The issues considered at the hearing must be limited to those issues of which the State is notified as provided in § 1386.90 and paragraph (a) of this Section, and new or modified issues described in paragraph (b) of this Section, and may not include issues or parts of issues removed from the proceedings pursuant to paragraph (c) of this Section.

§ 1386.94 Request to participate in hearing.

(a) The Department, the State council, the designated State agency, and the State protection and advocacy office, as appropriate, are parties to the hearing without making a specific request to participate.

(b)(1) Other individuals or groups may be recognized as parties if the issues to be considered at the hearing have caused them injury and their interests are relevant to the issues in the hearing.

(2) Any individual or group wishing to participate as a party must file a petition with the HDS Hearing Clerk within 15 days after notice of the hearing has been published in the **Federal Register**, and must serve a copy on each party of record at that time in accordance with § 1386.85(b). The petition must concisely state (i) petitioner's interest in the proceeding, (ii) who will appear for petitioner, (iii) the issues petitioner wishes to address and (iv) whether petitioner intends to present witnesses.

(3) Any party may file comments within 5 days of receipt of such petition.

(4) The presiding officer must promptly determine whether each petitioner had the requisite interest in the proceedings and shall permit or deny participation accordingly. Where petitions to participate as parties are made by individuals or groups with common interest, the presiding officer may request all of the petitioners to designate a single representative, or he or she may recognize one or more of the petitioners to represent all of them. The presiding officer must give each petitioner written notice of the decision on its petition. If any petition is denied, the presiding officer must briefly state the grounds for denial.

(c)(1) Any interested person or organization wishing to participate as amicus curiae must file a petition with the HDS Hearing Clerk before the commencement of the hearing. The petition must concisely state (i) the petitioner's interest in the hearing, (ii) who will represent the petitioner, and (iii) the issues on which petitioner intends to present argument. The presiding officer may grant the petition if he or she finds that the petitioner has a legitimate interest in the proceedings, that such participation will not unduly delay the outcome and may contribute materially to the proper disposition of the issues.

(2) An amicus curiae may present a brief oral statement at the hearing at the point in the proceedings specified by the presiding officer. It may submit a written statement of position to the presiding officer prior to the beginning of a hearing and must serve a copy on each party. It may also submit a brief or written statement at such time as the parties submit briefs and must serve a copy on each party.

Hearing Procedures

§ 1386.100 Who presides.

(a) The presiding officer at a hearing must be the Assistant Secretary or someone designated by the Assistant Secretary.

(b) The designation of a presiding officer must be in writing. A copy of the designation must be served on all parties and amici curiae.

§ 1386.101 Authority of presiding officer.

(a) The presiding officer has the duty to conduct a fair hearing, avoid delay, maintain order, and make a record of the proceedings. The presiding officer has all powers necessary to accomplish these ends, including, but not limited to, the power to:

(1) Change the date, time, and place of the hearing, upon notice to the parties. This includes the power to continue the hearing in whole or in part;

(2) Hold conferences to settle or simplify the issues in a proceeding, or to consider other matters that may aid in the expeditious disposition of the proceedings;

(3) Regulate participation of parties and amici curiae and require parties and amici curiae to state their positions with respect to the issues in the proceeding;

(4) Administer oaths and affirmations,

(5) Rule on motions and other procedural items on matters pending before him or her, including issuance of protective orders or other relief to a party against whom discovery is sought;

(6) Regulate the course of the hearing and conduct of counsel therein;

(7) Examine witnesses;

(8) Receive, rule on, exclude, or limit evidence or discovery;

(9) Fix for the time for filing motions, petitions, briefs, or other items in matters pending before him or her,

(10) If the presiding officer is the Assistant Secretary, make a final decision;

(11) If the presiding officer is a person designated by the Assistant Secretary, examiner, certify the entire record, including recommended findings and proposed decision, to the Assistant Secretary;

(12) Take any action authorized by the rules in the Subpart or 5 U.S.C. 551–559; and

(b) The presiding officer does not have authority to compel the production of witnesses, papers, or other evidence by subpoena.

(c) If the presiding officer is a person designated by the Assistant Secretary, examiner, his or her authority is to render a recommended decision with respect to program requirements which are to be considered at the hearing. In case of any noncompliance, he or she shall recommend whether Federal financial participation should be withheld with respect to the entire State plan or the report of the system description, or whether Federal financial participation should be withheld only with respect to those parts of the program affected by such noncompliance.

§ 1386.102 Rights of parties.

All parties may:

(a) Appear by counsel, or other authorized representative, in all hearing proceedings;

(b) Participate in any prehearing conference held by the presiding officer,

(c) Agree to stipulations of facts which will be made a part of the record;

(d) Make opening statements at the hearing;

(e) Present relevant evidence on the issues at the hearing;

(f) Present witnesses who then must be available for cross-examination by all other parties;

(g) Present oral arguments at the hearing;

(h) Submit written briefs, proposed findings of fact, and proposed conclusions of law, after the hearing.

§ 1386.103 Discovery.

The Department and any party named in the Notice issued pursuant to § 1386.90 has the right to conduct discovery (including depositions) against opposing parties as provided by the Federal Rules of Civil Procedure. There is no fixed rule on priority of discovery. Upon written motion, the presiding officer must promptly rule upon any objection to discovery action. The presiding officer also has the power to grant a protective order or relief to any party against whom discovery is sought and to restrict or control discovery so as to prevent undue delay in the conduct of the hearing. Upon the failure of any party to make discovery, the presiding officer may issue any order and impose any sanction other than contempt orders authorized by Rule 37 of the Federal Rules of Civil Procedure.

§ 1386.104 Evidentiary purpose.

The hearing is directed to receiving factual evidence and expert opinion testimony related to the issues in the proceeding. Argument will not be received in evidence; rather, it must be presented in statements, memoranda, or briefs, as directed by the presiding officer. Brief opening statements, which shall be limited to a statement of the party's position and what it intends to prove, may be made at hearings.

§ 1386.105 Evidence.

(a) *Testimony.* Testimony by witnesses at the hearing is given orally under oath or affirmation. Witnesses must be available at the hearing for cross-examination by all parties.

(b) *Stipulations and exhibits.* Two or more parties may agree to stipulations of fact. Such stipulations, or any exhibit proposed by any party, must be exchanged at the prehearing conference or at a different time prior to the hearing if the presiding officer requires it.

(c) *Rules of evidence.* Technical rules of evidence do not apply to hearings conducted pursuant to this subpart, but rules or principles designed to assure production of the most credible evidence available and to subject testimony to test by cross-examination are applied where reasonably necessary by the presiding officer. A witness may be cross-examined on any matter material to the proceeding without regard to the scope of his or her direct examination. The presiding officer may exclude irrelevant, immaterial, or unduly repetitious evidence. All documents and other evidence offered or taken for the record is open to examination by the parties and opportunity must be given to refute facts and arguments advanced on either side of the issues.

§ 1386.106 Exclusion from hearing for misconduct.

Disrespectful, disorderly, or contumacious language or contemptuous conduct, refusal to comply with directions, or continued use of dilatory tactics by any person at the hearing before a presiding officer shall constitute grounds for immediate exclusion of such person from the hearing by the presiding officer.

§ 1386.107 Unsponsored written material.

Letters expressing views or urging action and other unsponsored written material regarding matters in issue in a hearing is placed in the correspondence section of the docket of the proceeding. This material is not deemed part of the evidence or record in the hearing.

§ 1386.108 Official transcript.

The Department will designate the official reporter for all hearings. The official transcript of testimony taken, together with any stipulations, exhibits, briefs, or memoranda of law filed with them is filed with the Department Transcripts of testimony in hearings may be obtained from the official reporter by the parties and the public at rates not to exceed the maximum rates fixed by the contract between the Department and the reporter. Upon

notice to all parties, the presiding officer may authorize corrections to the transcript which involve matters of substance. Transcripts must be taken by stenotype machine and not be voice recording devices, unless otherwise agreed by all of the parties and the presiding officer.

§ 1386.109 Record for decision.

The transcript of testimony, exhibits, and all papers and requests filed in the proceedings, except the correspondence section of the docket, including rulings and any recommended or initial decision, constitute the exclusive record for decision.

Posthearing Procedures, Decisions

§ 1386.110 Posthearing briefs.

The presiding officer must fix the time for filing posthearing briefs. This time may not exceed 30 days after termination of the hearing and receipt of the transcript. Briefs may contain proposed fundings of fact and conclusions of law. If permitted, reply briefs may be filed no later than 15 days after filing of the posthearing briefs.

§ 1386.111 Decisions following hearing.

(a) If the Assistant Secretary is the presiding officer, he or she must issue a decision within 60 days after the time for submission of posthearing briefs has expired.

(b)(1) If the presiding officer is a person designated by the Assistant Secretary, he or she must, within 30 days after the time for submission of posthearing briefs has expired, certify the entire record to the Assistant Secretary including recommended findings and proposed decision. The Assistant Secretary must serve a copy of the recommended findings and proposed decision upon all parties and amici.

(2) Any party may, within 20 days, file exceptions to the recommended findings and proposed decision and supporting brief or statement with the Assistant Secretary.

(3) The Assistant Secretary must review the recommended decision and, within 60 days of its issuance, issue his or her own decision.

(c) If the Assistant Secretary concludes:

(1) In the case of a hearing under Sections 113, 133 and 135 of the Act that a State plan or report on the State's protection and advocacy system does not comply with Federal requirements, he or she shall also specify whether the State's total allotment for the fiscal year will not be authorized for the State or whether, in the exercise of his or her discretion, the allotment will be limited to parts of the State plan or the report not affected by the noncompliance.

(2) In the case of a hearing pursuant to Section 135 of the Act that the State is not complying with requirements of the State plan or the report on the description of the State's protection and advocacy system, he or she must also specify whether Federal financial participation will not be made available to the State or whether, in the exercise of his or her discretion. Federal financial participation will be limited to categories under the State plan or the report on the description of the State's protection and advocacy system not affected by such noncompliance. The Assistant Secretary may ask the parties for recommendations or briefs or may hold conferences of the parties on these questions.

(d) The decision of the Assistant Secretary under this Section is the final decision of the Secretary and constitutes "final agency action" within the meaning of 5 U.S.C. 704 and the "Secretary's action" within the meaning of Section 138 of the Act. The Assistant Secretary's decision must be promptly served on all parties and amici.

§ 1386.112 Effective date of decision by the Assistant Secretary.

(a) If, in the case of a hearing pursuant to Section 135 of the Act, the Assistant Secretary concludes that a State plan or the report on the description of the State's protection and advocacy system does not comply with Federal requirements, and the decision provides that the allotment will be authorized but limited to parts of the State plan or the report on the description of the State's protection and advocacy system not affected by such noncompliance, the decision must specify the effective date for the authorization of the allotment.

(b) In the case of a hearing pursuant to Section 113, 133 if the Assistant Secretary concludes that the State is not complying with requirements of the State plan or report on the description of the State's protection and advocacy system, the decision that further payments will not be made to the State, or that payments will be limited to parts of the State plan or the report on the description of the State's protection and advocacy system not affected, must specify the effective date for the withholding of Federal funds.

(c) The effective date may not be earlier than the date of the decision of the Assistant Secretary and may not be later than the first day of the next calendar quarter.

(d) The provision of this section may not be waived pursuant to § 1386.84.

PART 1387—SPECIAL PROJECT—PROJECTS OF NATIONAL SIGNIFICANCE

Sec.

1387.1 General requirements.

Authority: Pub. L. 88–164, 77 Stat. 282, as amended by Pub. L. 91–517, 84 Stat. 1316, Pub. L. 94–103, 89 Stat. 486. Pub. L. 95–802. 92 Stat 9555. Pub. L. 97–35. 95 Stat. 583 (42 U.S.C. 8000 et seq.).

§ 1387.1 General requirements.

(a) All projects funded under this Part must be of national significance and serve or relate to the developmentally disabled to comply with Section 145 of the Act.

(b) The requirements concerning format and content of the application, submittal procedures, eligible applicants and priority areas of services will be published in program announcements in the **Federal Register.**

(c) Projects of national significance must be exemplary models and hold potential for replication.

Part VI

Department of Labor

Wage and Hour Division, Employment Standards Administration

29 CFR Part 530

Employment of Homeworkers in Certain Industries; Proposal To Repromulgate Permanent Rule Rescinding Restriction on Homework in the Knitted Outerwear Industry

DEPARTMENT OF LABOR

Wage and Hour Division, Employment Standards Administration

29 CFR Part 530

Employment of Homeworkers in Certain Industries

AGENCY: Wage and Hour Division, ESA, Labor.

ACTION: Notice of proposed rulemaking.

SUMMARY: On October 9, 1981, the Department of Labor published a final rule rescinding the restriction on the employment of homeworkers in the knitted outerwear industry. The Department's action was taken after consideration of oral testimony received at hearings held pursuant to the **Federal Register** Notice of December 5, 1980 and one of more than 10,000 written comments received as the result of the Notice of Proposed Rulemaking of May 5, 1981.

A suit filed challenging the rescission of the homework restriction, and the United States District Court for the District of Columbia upheld the Department's rule. On November 29, 1983, the U.S. Court of Appeals for the D.C. Circuit reversed the district court and vacated the rule on the ground that the explanation provided by the Department in support of rescission of the restriction was inadequate. The court directed that the matter be returned to the Department for such further proceedings as might be appropriate.

After further consideration, and on the basis of its enforcement experience since November, 1981, the Department proposes to repromulgate a permanent rule rescinding the restriction on homework in the knitted outerwear industry.

Interested persons are invited to submit written comments relevant to this proposal. Comments submitted in connection with the 1981 hearings or the May 1981 **Federal Register** Notice will be made part of the record in this rulemaking. Persons who submitted comments at that time need comment now only if they have new or additional information.

DATE: Comments should be received on or before April 26, 1984.

ADDRESS: Send written comments to William M. Otter, Administrator, Wage and Hour Division, Employment Standards Administration, Room S–3502, U.S. Department of Labor, 200 Constitution Ave., NW., Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT:

Herbert J. Cohen, Deputy Administrator, Wage and Hour Division, Employment Standards Administration, Room S–3502, U.S. Department of Labor, 200 Constitution Ave., NW., Washington, D.C. 20210. 202–523–8305. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:

Background

Section 11(d) of the Fair Labor Standards Act (FLSA) provides that the Secretary of Labor is "authorized to make such regulations and orders regulating, restricting, or prohibiting industrial homework as are necessary or appropriate to prevent the circumvention or evasion of and to safeguard the minimum wage rate prescribed in this Act." Pursuant to this authority, the Secretary has issued regulations, published as Part 530 of Title 29 of the Code of Federal Regulations. As originally issued in the 1940's, these regulations restricted the employment of industrial homeworkers in seven industries: knitted outerwear; women's apparel; jewelry manufacturing; gloves and mittens; button and buckle manufacturing; handkerchief manufacturing; and embroideries. Homework has been permitted in all other industries.

The restrictions essentially provide that the production of goods in these industries cannot be carried on by employees in or about a home, apartment, tenement, or room in a residential establishment except by a certified homeworker. Under specified conditions, an employer may obtain a certificate for employees who are unable to adjust to factory work because of age or physical or mental disability or who are unable to leave home because their presence is required to care for an invalid there. Individuals may also be employed as industrial homeworkers in the restricted industries under the supervision of a sheltered workshop without obtaining a certificate under Part 530.

These restrictions were promulgated following a series of public hearings on the seven industries, held from 1941 through 1943. In 1980, in light of the fact that the homeworker restrictions had been in effect for almost 40 years, the Department decided to review the status of industrial homework. Accordingly, in the **Federal Register** of December 5, 1980 (45 FR 80555), the Department published a notice of hearings to obtain information concerning the employment of homeworkers. The hearings were held on January 13 and 14, 1981 in Burlington, Vermont and on February 17 and 18, 1981 in Washington, D.C. The purpose of the hearings was to obtain information with respect to the situation in industrial homework and the extent to which the regulations were still necessary to safeguard the minimum wage. In addition to the oral testimony, written comments were submitted through March 23, 1981.

The testimony heard and comments received reflected, among other things, concern regarding the feasibility of enforcement of the minimum wage and overtime requirements in the homework setting, the extent to which wages among homeworkers equal or exceed the minimum wage, the effect of the restrictions on employment opportunities, and the competitive effect of homework on firms not employing homeworkers.

Based on the testimony and comments, the Department published a proposal in the **Federal Register** on May 5, 1981 (46 FR 25108) to remove the existing restrictions on homework in all seven industries. Interested persons were invited to submit written comments relevant to the proposal on or before June 4, 1981. The period for comment was subsequently extended to July 4, 1981 (46 FR 29485). Comments were received from more that 10,000 individuals, organizations, and agencies.

On October 9, 1981, after reviewing the entire record, the Department rescinded the restriction on the employment of homeworkers in the knitted outerwear industry (46 FR 50348). The restrictions in the six other industries were retained. Along with this action, the Department announced that it would undertake a concerted compliance effort among employers of homeworkers.

In reaching this decision, the Department determined that it would be feasible to enforce the minimum wage requirements of the Act in the knitted outerwear industry without a ban on homework and that retention of the ban would curtail employment opportunities in the industry.

After issuance of the new rule, a number of organizations filed a suit seeking an injunction against rescission of the homework ban. The district court upheld the Department's rule, but the court of appeals reversed, vacating the rescission of the restriction. *International Ladies' Garment Workers' Union* v. *Donovan*, 722 F.2d 795 (D.C. Cir. 1983). The court of appeals held that the Department had failed to articulate adequately the reasons for its action, and that the rulemaking process had therefore not conformed to the requirements of the Administrative procedure Act. The case was remanded to the district court with instructions to

return the matter to the Department for such further proceedings as might be appropriate, and to reinstate the restriction against homework unless properly modified consistent with the opinion of the court. The court of appeals issued its mandate on February 29, 1984, reimposing the ban after a period of two years during which homework in the knitted outerwear industry was lawful.

The Department has concluded that it is appropriate to institute a new rulemaking proceeding at this time. The Department's tentative view at this time, as explained below, is that a rescission or modification of the homework ban in the knitted outerwear industry would be consistent with the purposes of the Fair Labor Standards Act. The Act authorizes restrictions on homework only to the extent "necessry or appropriate" to protect the minimum wage. Section 11(d). The Department tentatively believes it can effectively enforce the minimum wage provisions of the Act in the knitted outerwear industry without totally banning homework there. Accordingly, the Department is proposing to repromulgate a permanent final rule rescinding the homework ban in that industry.

The Department has also published today, separately, an emergency temporary rule suspending the ban on homework for a period of 120 days for those individuals who were employed as homeworkers in the knitted outerwear industry during the period when the Department's final rule lifting the homework ban was in effect (from November 8, 1981 through February 29, 1984). See Part VII of this issue. The emergency temporary rule is intended to avoid the hardship and disruption which would result from reimposition of the ban on homework for those individuals currently employed as homeworkers in the knitted outerwear industry during the period while the Department proceeds with the permanent rulemaking process.

The Department will carefully consider all comments and other relevant evidence it receives pursuant to the proposal it publishes today, before issuing a permanent final rule. The present rulemaking is limited to the knitted outerwear industry. The Department will consider instituting at a later date a separate rulemaking proceeding regarding homework in the six other industries where restrictions have been imposed.

The Department's present view is that it can effectively enforce the Act in the homework sector of the knitted outerwear industry, and that it has done so over the past two years. Federal law does not prohibit homework in the great majority of industries in this country; only in seven industries has it ever been restricted pursuant to Section 11(d) of the FLSA. Moreover, knitted outerwear is a very small industry, with only about 63,000 total employees in 1981. This compares with a universe of more than 50 million employees subject to the FLSA. The relatively small scale of the industry increases the Department's ability to conduct an effective enforcement program in the knitted outerwear industry.

A restriction on homework is permissible under the FLSA only when necessary to safeguard the minimum wage. Section 11(d) 29 U.S.C. 211(d). A restriction is simply one tool among many the Department has available to enforce the Act. It is a harsh tool because it deprives persons of the right they would otherwise have to work in their own homes if they so choose. Many Americans prefer to work at home because it is more convenient. Others would be unable to work at all if not permitted to work at home. For these reasons, the Department at present believes that homework should not be restricted in an industry, unless there is clear evidence that the Act cannot effectively be enforced by other means.

Particularly in view of the Department's enforcement experience, described below, in the many industries in which homework has been lawfully practiced for decades, the Department believes that it should not continue to employ the extraordinary enforcement mechanism of a total ban on homework in an industry in which there appear to be no enforcement problems that are unique or insurmountable. In light of the fact that homework may be freely engaged in by the vast majority of workers, and that enforcement is possible in the knitted outerwear industry, a total prohibition against homework appears to unfairly and arbitrarily deprive the individuals involved of a basic prerogative—the opportunity to work at home.

Since 1981, the Department has pursued a vigorous concerted enforcement program to detect violations of the Act among homeworkers as an alternative to the imposition of restrictions against homework. In the period from October 1, 1981 to December 31, 1983, a total of 591 investigations of employers utilizing homeworkers were conducted as compared with approximately 75 to 80 such investigations during the previous six-year period. This is an increase of approximately 1900% in the number of homework investigations conducted annually. The Department has investigated all complaints received involving homework, and it has actively sought, through a variety of information sources, to make sure that homework activity, wherever it occurs, is in compliance with the FLSA. Information is obtained from unions, manufacturers' associations, local newspapers, crafts newsletters, and lists of firms that have requested subminimum wage certificates for homework under FLSA Regulations 29 CFR Part 524 or 525 or homework handbooks, as well as from homeworkers themselves.

The Department has also taken steps to update and improve procedures and techniques for homework investigations. As part of this effort, a task force of experienced compliance officers from offices located in areas of the country that are major garment centers was assembled to develop specialized policies and operating procedures for conducting investigations in the garment industry. These procedures, which were issued to the entire Wage-Hour enforcement staff, included definitions of industry terminology and job classifications, identification of common industry practices and potential violations, and detailed guidance on effective investigation techniques. Timestudy training material was also made available to compliance officers. Selected field enforcement staff received detailed training in timestudy techinques, in order to enhance the Department's ability, in the absence of accurate time records, to reconstruct the hours worked by homeworkers, to determine whether they are properly paid under the FLSA. The Department has made the scheduling and conduct of special "directed" (i.e. noncomplaint) investigations of homework firms a top priority.

Since institution of the Department's concerted enforcement program in 1981, there has been a steady increase in the percentage of homework employers investigated found to be in compliance with the monetary provisions of the FLSA. The overall compliance rate for homework employers investigated by the Department was 52% in fiscal year 1982, 56% in 1983, and 68% during the first quarter of 1984.

Furthermore, a significant percentage of homework investigations have been initiated as a result of complaints. Such complaints, whether from employees or competitors, have provided a productive basis for investigation of employers operating in violation of the FLSA. Of the 591 investigations of employers utilizing homeworkers which the Department has conducted . ince the

beginning of its concerted compliance effort, 39 percent were based on complaints.

The investigative results also suggest that the prohibition against homework in the restricted industries has not been especially effective. The Department's enforcement activities since 1981 have disclosed many firms operating in the restricted industries that are using homeworkers. Of the 391 investigations referenced above, 195 were of firms in the six restricted industries. Moreover, a prohibition probably makes it more difficult to identify firms in the industry that use homeworkers, since such firms would be inclined to conceal their existence. Because the homework practices of such firms would be unlawful *per se*, such firms would have a reduced incentive to comply with the Act's monetary provisions. Indeed, the results of the Department's concerted enforcement program to date indicate that the compliance rate for homework employers in the restricted industries is slightly lower (51%) than for homework employers in unrestricted industries (58%).

Additional considerations support the Department's present view that enforcement of the Act does not require outright prohibition of homework in the knitted outerwear industry. As noted above, the knitted outerwear industry employs a very small share of the American workforce. Even if the number of workers performing homework in this industry were to increase substantially as a result of deregulation, effective investigation and enforcement would be feasible.

The Department's concerted homework enforcement program suggests that the rate of compliance among homework employers is not at present exceptionally low, as some have contended. Rather, it appears to be roughly comparable to that found in all covered industries. Of the 591 homework firms investigated, 56% were found to be in compliance with the FLSA. The compliance rate was 40% for investigations arising from complaints, and 66% for noncomplaint investigations. Of the 396 homework firms investigated in the unrestricted industries, 58% were found to be in compliance (41% in complaint investigations and 69% in non-complaint investigations).

Wage-Hour investigations in all industries during fiscal years 1981 through 1983 revealed a 34% to 36% compliance rate (25% and 27% for complaint investigations and 52% to 56% for noncomplaint investigations).

The compliance rate found among homework employers in the knitted outerwear industry (39% overall: 11% for complaint investigations and 53% for non-complaint investigations), although somewhat lower than in other homework industries, is comparable to the 34% to 36% compliance rate found for all covered employers investigated. Persons who have contended that minimum wage violations are pervasive in homework industries have relied on factors which are inherent in the nature of homework itself. They have advanced no reasons for concluding that enforcement problems relating to homework would be different in the knitted outerwear industry than in other industries where homework is permitted. The Department therefore believes that the compliance rate found among all homework firms investigated is probably more indicative of enforcement feasibility than the rate found in knitted outerwear investigations alone. In any event, as noted above, the compliance rate found in knitted outerwear investigations is comparable to that found in Wage-Hour investigations overall. This equivalence itself supports the Department's belief that enforcement of the Act in the homework sector of the knitted outerwear industry is feasible.

Comparison of the compliance rate in investigations of homework employers with that of industry as a whole is inexact because, industrywide, the available figures include a small percentage of investigations under government contract labor standards statutes as well as the FLSA. Moreover, industrywide, only a small proportion of employers were selected for investigation, while, as a result of the concerted homework enforcement program, it is likely that a higher share of homework employers were investigated. Nonetheless, the evidence indicates that the compliance rate among homework employers, including those in the knitted outerwear industry, is not exceptionally low, but rather appears to be roughly comparable with industry as a whole.

In his 1942 findings, the Administrator noted three particular difficulties associated with industrial homework which, in his view, rendered minimum wage enforcement infeasible: (1) the difficulty of identifying and locating homeworkers; (2) the difficulty of accurately ascertaining hours worked by homeworkers; and (3) the length of time required to conduct investigations of homework. Initially, we noted that the premise underlying the 1942 findings was that violations were ubiquitous among homework employers. The Department's recent experience indicates that there is no current basis in fact for this premise; the compliance rate among employers of homeworkers, as noted above, appears to be roughly proportional to that among other employers.

Based on the results of its enforcement program since 1981, the Department currently believes, for a number of reasons, that the difficulties noted in 1942 can be dealt with short of the drastic remedy of banning all homework in the knitted outerwear industry. First, the Department can locate homeworkers and had done so. As noted above, some 591 investigations involving homeworkers have been conducted since 1981, using a variety of information sources. Twenty-eight firms, employing approximately 474 homeworkers, have been identified in the knitted outerwear industry.

Second, the Department has not found accurate record-keeping to be an insurmountable problem in homework investigations. The Department has had considerable experience with investigations in industries where time clocks are not maintained and employees are not closely supervised; the problem is no different in kind in homework. In such cases the Department's compliance officers rely on personal interviews with employees as well as personal observations concerning the time required to produce an article and other investigative techniques referred to above. In homework, these procedures are supplemented by a Departmental regulation requiring all homeworkers to maintain special handbooks recording their hours worked and units produced. See 29 CFR 516.31(c).

Third, while it is apparent that thorough investigation of homework is time-consuming, the Department has committed substantial resources for this purpose and intends to continue vigorous enforcement. As a result of the concerted enforcement program, enforcement of the Act in the homework setting is far more effective now than was the case in the years preceding the 1981 rescission of the homework ban in the knitted outerwear industry. Moreover, as noted above, knitted outerwear is a relatively small industry, and the number of homeworkers engaged in knitted outerwear manufacture is not likely to exceed the Department's enforcement capabilities.

Finally, the suggestion has been made that rescission of homework restrictions in the knitted outerwear industry would result in the hiring and exploitation of illegal aliens and other immigrants. The enforcement implications of the presence of illegal aliens as employees

is a matter with which the Department has had considerable experience; the enforcement problems in homework are not significantly different in kind from those found in other types of employment. Since 1978 the Department has earmarked resources for targeting investigations of employers in specific industries and geographic areas who are believed likely to be employing illegal aliens under terms violative of Federal labor laws. The Department relies heavily upon information provided by the Immigration and Naturalization Service in scheduling these investigations; in turn, it provides appropriate information to the INS. In addition, in recognition of language barriers that are frequently present when dealing with legal as well as illegal aliens, the Department employs bilingual enforcement personnel who are proficient in Spanish, Chinese, Haitian Creole, Vietnamese and other foreign languages.

Although the Department is presently proposing a rescission of restrictions on homework in the knitted outerwear industry, the Department will give careful consideration to alternatives, including retaining the restrictions or adopting a proposal of lesser scope, such as one of the following:

A. Remove the restrictions on knitted outerwear homework in rural areas but retain restrictions for urban areas

Under this alternative proposal, only persons residing in rural areas, as defined by the Secretary, would be permitted to engage in knitted outerwear homework. The considerations favoring this approach appear to include the following: persons residing in areas remote from cities commonly live at considerable distances from available factory employment. Even where factories exist in the general vicinity, public transportation is often limited or non-existent. Especially in northern parts of the country, winter weather conditions may impede access to factory sites. Need to tend to wood stoves and farm animals is also a special factor pertinent to rural residents. For these reasons, it is arguable that persons residing in such areas may be particularly dependent on homework as a source of employment.

Considerations weighing against this alternative include the problem of devising a workable definition of "rural" vs. "urban" that would avoid inequitable treatment of employees. There are "urban" areas in States that are generally considered to be "rural" in nature. And there are "rural" areas in States that would generally be characterized as "urban". There is also a lack of evidence that minmum wage or overtime violations are less prevalent among rural than among urban homeworkers. In addition, it is unclear that the needs of workers are similar in all "rural" areas of the country, or that these needs are essentially different from those of workers in "urban" areas, so as to justify differential treatment.

Finally, as noted above, the Act authorizes the Department to restrict homework only to the extent necessary to safeguard the minimum wage. The Department believes that effective enforcement of the minimum wage provisions of the Act is possible in the homework sector of the knitted outerwear industry in both urban and rural areas. Therefore the essential predicate for a prohibition against homework in urban areas may be lacking.

B. Expand the conditions for granting certificates permitting homework employment in the knitted outerwear industry

Under this alternative proposal, the present system for granting special certificates authorizing homework in the knitted outerwear industry would be expanded to include various additional categories of need, such as the following: need to care for children or other family members in the home; lack of accessible factory employment; lack of public transportation; and economic need. The perceived advantage of this alternative is that it would target the specific needs expressed by homework, without broadly validating all such work.

Disadvantages would appear to include the difficulty of defining what constitutes a legitimate need and avoiding inequities among workers. In addition, a certificate program might engender substantial paperwork for the public. It would also appear difficult to police the program to guard against abuses, yet provide necessary flexibility to take into account individual circumstances.

C. Transfer homework certification and enforcement responsibilities to the States

It has been suggested that the Department delegate responsibility for homeworker certification and enforcement to the States. The Department notes that its existing regulations provide that it may designate a State agency to act as its authorized representative for the purpose of issuing or denying homework certificates. 29 CFR 530.10. In deciding whether to issue a homework certificate, the State agency applies the same standards that the Department would apply. These are set forth in the regulations. See 29 CFR 530.4. Existing regulations also authorize the Department to enter into an agreement with a State agency, providing that the agency will conduct investigations for compliance with the FLSA. 29 CFR Part 515. In conducting investigations, the State agency must conform to the Department's enforcement policies and to the provisions of the Department's Inspection Manual. 29 CFR 515.5.

The question whether the Department or the States should administer the homeworker certification process is essentially procedural. Resolution of the question does not answer the substantive policy issue of the conditions under which certificates should be issued. Therefore, commenters addressing the States' role in the certification process are urged to provide their views regarding the substantive issue as well.

The Department will consider all proposals which it receives. It notes, however, that there are legal limits on the extent to which it may delegate its authority under the FLSA. Commenters supporting increased State responsibility in the homework area should consider this factor. The Department also notes that its proposed rule lifting the federal ban on homework in the knitted outerwear industry would not affect a State's right to impose homework restrictions in the industry under state law, if it chooses to do so.

D. License employers utilizing homeworkers in the knitted outerwear industry

Under this alternative proposal, all employers of homeworkers in the knitted outerwear industry would be required to obtain licenses from the Department. In theory, this would put in place a control mechanism whereby the Department would have a record of all such employment, and thereby be in a better position to insure FLSA compliance.

A contervailing consideration is that only law-abiding employers might apply for such licenses, thereby undercutting the purpose of the requirement. A licensing requirement could also generate a paperwork burden.

Conclusion

The Department currently is inclined to believe that removal of the ban on homework in the knitted outerwear industry is warranted. The Department's experience suggests that it has the ability to enforce the protections of the Act with respect to this category of

workers as effectively as it does for other industries.

The Department invites comments on this proposal and on alternatives. The Department requests that commenters do not merely state whether they favor or oppose the proposed rule or a particular alternative, but that they provide their reasons, and any supporting information which they possess. The Department also requests that commenters supporting adoption of an alternative proposal provide their views as to how the terms used in the alternative proposal would be defined and by what mechanisms the alternative would be implemented and administered. Finally, commenters should bear in mind that the Department's authority to restrict homework is limited to those measures which are "necessary or appropriate to prevent the circumvention or evasion of and to safeguard the minimum wage * * *" Commenters should address matters relevant to this statutory objective, rather than general conceptions of appropriate public policy.

The Department invites comments particularly with respect to the following:

1. The appropriateness and/or feasibility of the present proposal to remove the ban on homework in the knitted outerwear industry;

2. The appropriateness and/or feasibility of alternatives A through D above; and

3. The appropriateness and/or feasibility of other alternatives to the present proposal.

Further comments are also invited on the subject matter of the May 5, 1981 proposal, i.e., 1) the impact of the current proposal, or alternative proposals, on the minimum wage provisions of the Act; 2) the impact of the current proposal, or alternative proposals, on the knitted outerwear industry, including firms which do not employ homeworkers; and 3) the impact of this proposal, or alternative proposals, on small businesses. However, *commenters may be assured that all comments submitted in response to the May 5, 1981 proposal as well as the entire record of the January and February 1981 hearings, will be considered and made a part of the record of the present rulemaking, and that only new or additional information need be submitted.*

The entire record of this proceeding will be made available for inspection during office hours at Room C–4316, Frances Perkins Building, 200 Constitution Ave., NW., Washington, D.C. 20210.

Classification

This rule is not classified as a "major rule" under Executive Order 12291 on Federal Regulation, because it is not likely to result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign based enterprises in domestic or export markets. Therefore, no regulatory impact analysis is required.

Furthermore, the Department certifies that the rule will have no "significant economic impact . . . upon a substantial number of . . . small [business] entities" within the meaning of § 3(a) of the Regulatory Flexibility Act, Pub. L. No. 96–354, 91 Stat. 1164 (5 U.S.C. 605(b)).

This conclusion is based upon all information presently available to the Department, including the entire record compiled by the Department in the 1981 rulemaking proceedings. Accordingly, no initial regulatory flexibility analysis is required.

Paperwork Reduction Act

Because this rule does not require the collection or retention of information, it is not subject to section 3504(h) of the Paperwork Reduction Act, 44 U.S.C. 3504(h).

This document was prepared under the direction and control of William M. Otter, Administrator, Wage and Hour Division, U.S. Department of Labor.

List of Subjects in 29 CFR Part 530

Employment, Investigations, Labor, Law enforcement, Minimum wages, Wages.

Accordingly, the following action is proposed: The prohibition of homework in the knitted outerwear industry under 29 CFR 530.1(f) and 530.2, the text of which appeared in the July 1, 1981 edition of the *Code of Federal Regulations* and is contained in Appendix A to this document, and which was reinstated as a result of the Court of Appeals ruling, effective February 29, 1984, is removed.

(Sec. 11, 52 Stat. 1066; (29 U.S.C. 211) unless otherwise noted; Secretary's Order No. 16–75, 40 FR 55913, December 2, 1975; and Employment Standards Order No. 78–1, 43 FR 51469, November 3, 1978)

Signed at Washington, D.C., this 23rd day of March, 1984.

William M. Otter,

Administrator.

Appendix A

The text of 29 CFR 530.1(f) and 530.2 which appeared in the July 1, 1981, edition of the Code of Federal Regulations reads as follows:

§ 530.1 Definitions.

* * * * *

(f) The knitted outerwear industry is defined as follows: The knitting from any yarn or mixture of yarns and the further manufacturing, dyeing or other finishing of knitted garments, knitted garment sections, or knitted garment accessories for use as external apparel or covering which are partially or completely manufactured in the same establishment as that where the knitting process is performed; and the manufacture of bathing suits from any purchased fabric: *Provided*; That the manufacturing, dyeing or other finishing of the following shall not be included:

(1) Knitted fabric, as distinguished from garment sections or garments, for sale as such.

(2) Fulled suitings, coatings, topcoatings, and overcoatings.

(3) Garments or garment accessories made from purchased fabric, except bathing suits.

(4) Gloves or mittens.

(5) Hosiery.

(6) Knitted garments or garment accessories for use as underwear, sleeping wear, or negligees.

(7) Fleece-lined garments made from knitted fabric containing cotton only or containing any mixture of cotton and not more than 25 percent, by weight, of wool or animal fiber other than silk.

(8) Knitted shirts of cotton or any synthetic fiber or any mixture of such fibers which have been knit on machinery of 10-cut or fine: *Provided*, That this exception shall not be construed to exclude from the knitted outerwear industry and the manufacturing, dyeing, or other finishing of knitted shirts made in the same establishment as that where the knitting process is performed, if such shirts are made wholly or in part of fibers other than those specified in this clause, or if such shirts of any fiber are knit on machinery coarser than 10-cut.

* * * * *

§ 530.2 Restriction of homework.

No work in the industries defined in paragraphs (d) through (j) of § 530.1 shall be done in or about a home, apartment, tenement, or room in a residential establishment unless a special homework certificate issued and in effect pursuant to this part has been obtained for each homeworker or unless the homeworker is so engaged under the supervision of a Sheltered Workshop, as defined in § 525.1 of this chapter.

Part VII

Department of Labor

Wage and Hour Division, Employment Standards Administration

29 CFR Part 530

Employment of Homeworkers in Certain Industries; Emergency Rule Temporarily Suspending Ban on Homework for Certain Employees in the Knitted Outerwear Industry

DEPARTMENT OF LABOR

Wage and Hour Division, Employment Standards Administration

29 CFR Part 530

Employment of Homeworkers in Certain Industries

AGENCY: Wage and Hour Division, ESA, Labor.

ACTION: Emergency rule temporarily suspending the ban on homework for certain employees in the knitted outerwear industry.

SUMMARY: On October 9, 1981, the Department of Labor published a final rule rescinding the restriction on the employment of homeworkers in the knitted outerwear industry. A suit was filed challenging the rescission of the homework restriction, and the United States District Court for the District of Columbia upheld the Department's rule. On November 29, 1983 the U.S. Court of Appeals for the D.C. Circuit reversed the district court and vacated the rule on the ground that the explanation provided by the Department in support of rescission of the restriction was inadequate. The court directed that the matter be returned to the Department for such further proceedings as might be appropriate. The court's mandate issued on February 29, 1984; as a result, the restriction on homework in the knitted outerwear industry is now in effect.

In accordance with the court's decision, the Department is today publishing two documents. The first is a proposed rule permanently rescinding the restriction on homework in the knitted outerwear industry appearing elsewhere in this issue. The second is this final rule, which temporarily suspends the restriction on homework for those persons who were employed as homeworkers in the knitted outerwear industry during the period when the Department's final rule lifting the homework restriction was in effect (from November 8, 1981 through February 29, 1984). This suspension is intended to avoid the disruption and economic hardship to homework employees that would result from reinstatement of the restriction during the pendency of the permanent rulemaking proceedings.

DATES: This rule becomes effective March 27, 1984. It will remain in effect not longer than 120 days thereafter.

FOR FURTHER INFORMATION CONTACT: Herbert J. Cohen, Deputy Administrator, Wage and Hour Division, Employment Standards Administration, Room S–3502, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210. 202–523–8305. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:

Background

Section 11(d) of the Fair Labor Standards Act (FLSA) provides that the Secretary of Labor is "authorized to make such regulations and orders regulating, restricting, or prohibiting industrial homework as are necessary or appropriate to prevent the circumvention or evasion of and to safeguard the minimum wage rate prescribed in this Act." Pursuant to this authority, the Secretary has issued regulations, published as Part 530 of Title 29 of the Code of Federal Regulations. As originally issued in the 1940's, these regulations restricted the employment of industrial homeworkers in seven industries: knitted outerwear; women's apparel; jewelry manufacturing; gloves and mittens; button and buckle manufacturing; handkerchief manufacturing; and embroideries. Homework has been permitted in all other industries.

On May 5, 1981, the Department published a proposal to remove the existing restrictions on homework in all seven industries (46 FR 25108). On October 9, 1981, after reviewing a record which was developed during public hearings in Burlington, Vermont, and Washington, D.C. and which included comments received from more than 10,000 individuals, organizations, and agencies, the Department of Labor rescinded the restriction on homework in the knitted outerwear industry (46 FR 50348). A more extensive discussion of the background of those rulemaking proceedings is contained in the Department's Notice of Proposed Rulemaking appearing elsewhere in this issue which is being published today simultaneously with the issuance of this emergency rule.

After issuance of the new rule, a number of organizations filed a suit seeking an injunction against rescission of the homework ban. Individual homeworkers in the knitted outerwear industry intervened in defense of the Department's rule. The district court upheld the rule, but the court of appeals reversed, vacating the rescission of the restriction. *International Ladies' Garment Workers' Union* v. *Donovan*, 722 F.2d 795 (D.C. Cir. 1983). The court of appeals held that the Department had failed to articulate adequately the reasons for its action, and that the rulemaking process had therefore not conformed to the requirements of the Administrative Procedure Act. The case was remanded to the district court with instructions to return the matter to the Department for such further proceedings as might be appropriate, and to reinstate the restriction against homework unless properly modified consistent with the opinion of the court. The court of appeals subsequently denied the intervenors' petition for rehearing and also denied the Department's motion for a stay of the mandate pending consideration of a petition for a writ of certiorari. The Chief Justice subsequently denied a further motion filed by the intervenors to stay issuance of the mandate. The mandate issued February 29, 1984, reimposing the ban after a period of two years during which homework in the knitted outerwear industry was lawful.

Pursuant to the opinion of the court of appeals, the Department is today publishing separately a proposed rule permanently rescinding the ban on homework in the knitted outerwear industry. The Department has tentatively concluded that it can effectively enforce the minimum wage in the homework sector of the knitted outerwear industry, and that rescission is therefore fully consistent with Section 11(d) and the purposes of the FLSA. The Department will carefully consider all comments and other relevant evidence it receives in response to the proposed rule before issuing a permanent rule regarding homework.

In view of the pendency of the Department's proposed rule rescinding the ban on knitted outerwear homework, reinstatement of the ban at this time is likely to result in substantial unnecessary economic disruption and hardship to persons in the industry who are currently dependent on such homework for their livelihood. The Department has received petitions filed on behalf of a number of homeworkers requesting that it issue an emergency rule permitting them to continue working in their homes pending the completion of permanent rulemaking proceedings resolving the status of homework in the knitted outerwear industry.

Because of the prospect that irreparable harm to home knitters will otherwise occur, the Department is today issuing an emergency rule, pursuant to Section 11(d) of the Fair Labor Standards Act, suspending the homework ban in the knitted outerwear industry for a period of 120 days for those persons who were employed as homeworkers in the knitted outerwear industry at any time during the period when the Department's final rule rescinding the homework ban was in

effect (from November 8, 1981 through February 29, 1984).

During the previous rulemaking, the Department estimated that there were approximately 1,000 homeworkers in the knitted outerwear industry. Subsequently, in the course of its concerted program to enforce the minimum wage and overtime provisions of the Act among homeworkers, the Department identified 28 firms employing approximately 474 homeworkers in the knitted outerwear industry. If homework is made unlawful, the individuals currently employed at home in the knitted outerwear industry will lose their current jobs. The only exception would be those few individuals who could qualify for a special certificate permitting homework under the exceptional circumstances set forth in the Department's regulations at 29 CFR 530.4.

Evidence adduced in the earlier rulemaking proceedings, moveover, indicates that many homeworkers in the knitted outerwear industry may find it difficult or impossible to obtain other work outside the home. Even a temporary loss of employment is likely to cause substantial hardship to the individual affected. These concerns are reflected in the petitions for issuance of an emergency rule filed with the Department on behalf of individual home knitters, some of whom are intervenors in the litigation. These individual petitioners relate that they will suffer severe and irreparable hardship in the form of lost employment and income if they are unable to continue working in their homes.

Finally, if homework is banned, firms in the knitted outerwear industry that have employed homeworkers will be forced to go out of business, or to shift to an alternative mode of production. Should homework again become lawful, these firms may not find it practicable to resume operations involving homework. Thus, the loss of job opportunities could be permanent.

The prospect that the ban on homework may be permanently rescinded or modified in the near future makes the hardship which reimposition of the ban at this time would cause to those individuals who are currently engaged as home knitters doubly unfortunate. Surely, if the Department may issue a final rule permanently rescinding or modifying the ban on homework in the knitted outerwear industry within a few months, it is inappropriate to close down the whole homework sector for the industry at this time and to throw the hundreds of individuals involved out of work. The Department believes that the better and more equitable course is to preserve the status quo for those individuals during the brief period in which it conducts rulemaking proceedings. If, at that time, the Department reimposes the ban, it can do so with adequate notice to the public.

The legal authority supporting issuance of a final rule of limited duration to deal with exigent circumstances is found in the Administrative Procedure Act (A.P.A.), 5 U.S.C. 553(b)(B), which provides a "good cause" exception to notice-and-comment rulemaking. See *Council of Southern Mountains, Inc.* v. *Donovan*, 653 F.2d 573, 580 (D.C. Cir. 1981). That provision permits rulemaking without comment when "the agency for good cause finds . . . that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest." 5 U.S.C. 553(b)(B). The APA also provides that a substantive rule may be immediately effective when it relieves a restriction, or for good cause. 5 U.S.C. 553(d)(1), (3).

As applied by the courts, the "good cause" provision may properly be invoked when the following criteria are satisfied: (1) The rule responds to an emergency created by forces beyond the agency's control; (2) the agency states the reasons why "good cause" exists; (3) the rule is effective for a finite period of time and (4) the agency acts diligently to implement a permanent rule pursuant to A.P.A. notice-and-comment procedures. See, *e.g.*, *National Federation of Federal Employees* v. *Devine*, 671 F.2d 607, 610–612 (D.C. Cir. 1982); *Council of Southern Mountains, supra*, 653 F.2d at 580–582; *American Federation of Government Employees* v. *Block*, 655 F.2d 1153, 1155–1159 (D.C. Cir. 1981) ("good cause" found where agency acted in response to judicial directive, to avoid disruptive effect of relying on antiquated guidelines).

These criteria are met by the circumstances now present with respect to homework in the knitted outerwear industry. First, as discussed above, there is an emergency threatening severe disruption to those individuals who had lawfully engaged in homework in the knitted outerwear industry. This emergency arose when the court of appeals denied the Department's motion for a stay out of the court's mandate pending a determination whether to seek Supreme Court review, and the Court thereafter issued its mandate, reinstating the former ban. Second, as discussed above, cogent reasons support promulgation of an emergency rule to alleviate the disruption that would otherwise occur while the Department conducts further rulemaking consistent with the Court's decision. Third, the emergency rule is for a period of at most 120 days. Thus, any disadvantage that occurs to interested parties as the result of implementation of the emergency rule will be eliminated at the expiration of that time. Finally, the notice of proposed rulemaking accompanying issuance of this emergency rule evidences the Department's good faith in acting as quickly as possible to remedy the defects identified by the Court in the rescission of the homework ban. Therefore, the "good cause" exception may properly be invoked in this instance.

The Department notes, in addition, that the public has already commented extensively on the earlier rescission proposals. *ILGWU, supra*, 722. F.2d at 804. The purpose of the A.P.A. provision requiring an opportunity to comment therefore, has, as a practical matter, been fulfilled in some measure. *Cf. Consumer Energy Council of America* v. F.E.R.C., 673 F.2d 524, 446 (D.C. Cir. 1981) ("The value of notice and comment prior to repeal of a final rule is that it ensures that an agency will not undo all that it accomplished through its rulemaking without giving all parties an opportunity to comment on the wisdom of repeal.") Moreover, further comments on the Department's new proposal to permanently lift the ban on homework in the knitted outerwear industry are solicited in the accompanying notice of proposed rulemaking.

The Department finds additional legal grounds supporting issuance of this emergency rule in the Supreme Court's recent decision in *Motor Vehicle Manufacturers Association* v. *State Farm Mutual Automobile Insurance Co.*, 103 S.Ct. 2856 (1983), where the court distinguished between evidence sufficient to justify *rescission* of the standard at issue and evidence sufficient to justify *suspension* of that standard pending further consideration. 103 S.Ct. at 2870 n.15, 2874 n.21. The Department's view is that sufficient evidence, set forth herein, is available at this time to justify suspending the ban on homework on an emergency basis while the agency proceeds with its consideration of whether to rescind the ban permanently in light of the comments submitted in response to its new proposal.

The Department's decision to issue this emergency rule suspending the homework ban is based on its current belief, supported by the information detailed below, that it can effectively enforce the Act in the homework sector of the knitted outerwear industry during the next 120 days, and that it has done

so over the past two years. Federal law does not prohibit homework in the great majority of industries in this country; only in seven industries has it ever been restricted pursuant to Section 11(d) of the FLSA. Moreover, knitted outerwear is a very small industry, with only about 63,000 total employees in 1981. This compares with a universe of more than 50 million employees subject to the FLSA. The relatively small scale of the industry increases the Department's ability to conduct an effective enforcement program in the knitted outerwear industry during the next 120 days.

A restriction on homework is permissible under the FLSA only when necessary to safeguard the minimum wage. Section 11(d), 29 U.S.C. 211(d). A restriction is simply one tool among many the Department has available to enforce the Act. It is a harsh tool because it deprives persons of the right they would otherwise have to work in their own homes if they so choose. Many Americans prefer to work at home because it is more convenient. Others would be unable to work at all if not permitted to work at home. For these reasons, the Department is disinclined to restrict homework in an industry, unless there is clear evidence that the Act cannot effectively be enforced by other means.

Particularly in view of the Department's enforcement experience, described below, in the many industries in which homework has been lawfully practiced for decades, the Department, during the next 120 days, believes that it should not employ the extraordinary enforcement mechanism of a total ban on homework in an industry in which there appear to be no enforcement problems that are unique or insurmountable. In light of the fact that homework may be freely engaged in by the vast majority of workers who are employed in non-restricted industries, and that enforcement is possible in the knitted outerwear industry, a total prohibition against homework in the knitted outerwear industry appears to unfairly and arbitrarily deprive individuals currently engaged as homeknitters of a basic prerogative—the opportunity to work at home.

Since 1981, the Department has pursued a vigorous concerted enforcement program to detect violations of the Act among homeworkers as an alternative to the imposition of restrictions against homework. In the period from October 1, 1981 to December 31, 1983, a total of 591 investigations of employers utilizing homeworkers were conducted, as compared with approximately 75–80 such investigations during the previous six-year period. This is an increase of approximately 1900% in the number of homework investigations conducted annually. The Department has investigated all compliants received involving homework, and it has actively sought, through a variety of information sources, to make sure that homework activity, wherever it occurs, is in compliance with the FLSA. Information is obtained from unions, manufactures' associations, local newspapers, crafts newsletters, and lists of firms that have requested subminimum wage certificates for homework under FLSA Regulations 29 CFR Part 524 or 525 or homework handbooks, as well as from homeworkers themselves. The Department has made the scheduling and conduct of special "directed" (i.e., noncomplaint) investigations of homework firms a top priority.

The Department has also taken steps to update and improve procedures and techniques for homework investigations. As part of this effort, a task force of experienced compliance officers from offices located in areas of the country that are major garment centers was assembled to develop specialized policies and operating procedures for conducting investigations in the garment industry. These procedures, which were issued to the entire Wage-Hour enforcement staff, included definitions of industry terminology and job classifications, identification of common industry practices and potential violations, and detailed guidance on effective investigation techniques. Timestudy training material was also made available to compliance officers. Selected field enforcement staff received detailed training in timestudy techniques, in order to enhance the Department's ability, in the absence of accurate time records, to reconstruct the hours worked by homeworkers, to determine whether they are properly paid under the FLSA.

Since institution of the Department's concerted enforcement program in 1981, there has been a steady increase in the percentage of homework employers investigated found to be in compliance with the monetary provisions of the FLSA. The overall compliance rate for homework employers investigated by the Department was 52% in fiscal year 1982, 56% in 1983, and 68% during the first quarter of 1984.

Furthermore, a significant percentage of homework investigations have been initiated as a result of complaints. Such complaints, whether from employees or competitors, have provided a productive basis for investigation of employers operating in violation of the FLSA. Of the 591 investigations of employers utilizing homeworkers which the Department has conducted since the beginning of its concerted compliance effort, 39 percent were based on complaints.

The investigative results also suggest that the prohibition against homework in the restricted industries has not been especially effective. The Department's enforcement activities since 1981 have disclosed many firms operating in the restricted industries that are using homeworkers. Of the 591 investigations referenced above, 195 were of firms in the six restricted industries. Moreover, a prohibition probably makes it more difficult to identify firms in the industry that use homeworkers, since such firms would be inclined to conceal their existence. Because the homework practices of such firms would be unlawful *per se*, such firms would have a reduced incentive to comply with the Act's monetary provisions. Indeed, the results of the Department's concerted enforcement program to date indicate that the compliance rate for homework employers in the restricted industries is slightly lower (51%) than for homework employers in unrestricted industries (58%).

The Department's concerted homework enforcement program suggests that the rate of compliance among homework employers is not at present exceptionally low, as some have contended. Rather, it appears to be roughly comparable to that found in all covered industries. Of the 591 homework firms investigated, 56% were found to be in compliance with the FLSA. The compliance rate was 40% for investigations arising from complaints, and 66% for noncomplaint investigations. Of the 396 homework firms investigated in the unrestricted industries, 58% were found to be in compliance (41% in complaint investigations, and 69% in noncomplaint investigations).

Wage-Hour investigations in all industries during fiscal year 1981 through 1983 revealed a 34% to 36% compliance rate (25% to 27% for complaint investigations and 53% to 56% for non-complaint investigations).

The compliance rate found among homework employers in the knitted outerwear industry (39% overall: 11% for complaint investigations and 53% for non-complaint investigations) although somewhat lower than in other homework industries, is comparable to the 34% to 36% compliance rate found for all covered employers investigated.

Moreover, persons who have contended that minimum wage violations are pervasive in homework industries have relied on factors which are inherent in the nature of homework itself. They have advanced no reasons for concluding that enforcement problems relating to homework would be different in the knitted outerwear industry than in other industries where homework is permitted. The Department therefore believes that the compliance rate found among all homework firms investigated is probably more indicative of enforcement feasibility than the rate found in knitted outerwear investigations alone. In any event, as noted above, the compliance rate found in knitted outerwear investigations is comparable to that found in Wage-Hour investigations overall. This equivalence itself supports the Department's belief that enforcement of the Act in the homework sector of the knitted outerwear industry is feasible.

Comparison of the compliance rate in non-complaint investigations of homework employers with that of industry as a whole is inexact because, industrywide, the available figures include a small percentage of investigations under government contract labor standards statutes as well as the FLSA. Moreover, industrywide, only a small proportion of employers were selected for investigation, while, as a result of the concerted homework enforcement program, it is likely that a higher share of homework employers were investigated. Nonetheless, the evidence indicates that the compliance rate among homework employers, including those in the knitted outerwear industry, is not exceptionally low, but rather appears to be roughly comparable with industry as a whole.

In his 1942 findings, the Administrator noted three particular difficulties associated with industrial homework which, in his view, rendered minimum wage enforcement infeasible: (1) The difficulty of identifying and locating homeworkers; (2) the difficulty of accurately ascertaining hours worked by homeworkers; and (3) the length of time required to conduct investigation of homework. Initially, we note that the premise underlying the 1942 findings was that violations were ubiquitous among homework employers. The Department's recent experience indicates that there is no current basis in fact for this premise; the compliance rate among employers of homeworkers, as noted above, appears to be roughly proportional to that among other employers.

Based on the results of its enforcement program since 1981, the Department currently believes, for a number of reasons, that the difficulties noted in 1942 can be dealt with short of the drastic remedy of banning all homework in the knitted outerwear industry. First, the Department can locate homeworkers, and has done so. As noted above, some 591 investigations involving homeworkers have been conducted since 1981, using a variety of information sources. Twenty-eight firms, employing approximately 474 homeworkers, have been identified in the knitted outerwear industry.

Second, the Department has not found accurate recordkeeping to be an insurmountable problem in homework investigations. The Department has had considerable experience with investigations in industries where time clocks are not maintained and employees are not closely supervised; the problem is no different in kind in homework. In such cases the Department's compliance officers rely on personal interviews with employees as well as personal observations concerning the time required to produce an article and other investigative techniques referred to above. In homework, these procedures are supplemented by a Departmental regulation requiring all homeworkers to maintain special handbooks recording their hours worked and units of production. See 29 CFR 516.31(c).

Third, while it is apparent that thorough investigation of homework is time-consuming, the Department has committed substantial resources for this purpose and intends to continue vigorous enforcement. As a result of the concerted enforcement program, enforcement of the Act in the homework setting is far more effective now than was the case in the years preceding the 1981 rescission of the homework ban in the knitted outerwear industry. Moreover, as noted above, knitted outerwear is a relatively small industry, and the number of homeworkers currently engaged in knitted outerwear manufacture is not likely to exceed the Department's enforcement capabilities.

Finally, the suggestion has been made that rescission of homework restrictions in the knitted outerwear industry would result in the hiring and exploitation of illegal aliens and other immigrants. The Department has had considerable experience with the general enforcement implications of the presence of illegal aliens as employees. The enforcement problems in homework are not significantly different in kind from those found in other types of employment. Since 1978 the Department has earmarked resources for targeting investigations of employers in specific industries and geographic areas who are believed likely to be employing illegal aliens under terms violative of Federal labor laws. The Department relies heavily upon information provided by the Immigration and Naturalization Service in scheduling these investigations; in turn, it provides appropriate information to the INS. In addition, in recognition of language barriers that are frequently present when dealing with legal as well as illegal aliens, the Department employs bilingual enforcement personnel who are proficient in Spanish, Chinese, Haitian Creole, Vietnamese and other foreign languages.

In the permanent rulemaking proceedings instituted today, the Department will give careful consideration to alternatives such as retaining the homework restrictions or adopting a proposal of lesser scope than a complete rescission of the restriction. However, none of the currently known alternatives could be implemented feasibly in the short time period during which this emergency rule will be in effect. Furthermore, none of these alternatives would fully serve the Department's purpose of preventing unnecessary hardship by maintaining the status quo for employees in the industry pending a decision whether to permanently rescind the ban on homework. These alternatives include the following:

A. Remove the restrictions on knitted outerwear homework in rural areas but retain restrictions for urban areas

Under this alternative proposal, only persons residing in rural areas, as defined by the Secretary, would be permitted to engage in knitted outerwear homework. There are a number of considerations, discussed in the preamble to the proposed permanent rule, which would have to be weighed carefully before the proposal could be implemented. In particular, the process of defining rural areas for purposes of the rule would require careful study and could not feasibly be completed during the brief period in which this emergency rule will be in effect.

Moreover, as noted above, the Act authorizes the Department to restrict homework only to the extent necessary to safeguard the minimum wage. The Department believes that effective enforcement of the minimum wage provisions of the Act is possible in the homework sector of the knitted outerwear industry over the next 120

days in both urban and rural areas; therefore, it appears neither necessary nor appropriate to ban homework in urban areas in the knitted outerwear industry at this time.

B. Expand the conditions for granting certificates permitting homework employment in the knitted outerwear industry

Under this alternative proposal, the present system for granting special certificates would be expanded to include various additional categories of need, such as one or more of the following: need to care for children or other family members in the home; lack of accessible factory employment; lack of public transportation; economic need. The time needed to study this alternative and to give it definite content precludes its adoption as an emergency rule. Moreover, in light of the possibility that rulemaking may lead to a complete rescission of the ban on homework within the next few months, expansion of the certificate system at this time would be premature.

C. Transfer homework certification and enforcement responsibilities to the States

It has been suggested that the Department delegate responsibility for homeworker certification and enforcement to the States. The Department notes that its existing regulations provide that it may designate a state agency to act as its authorized representative for the purpose of issuing or denying homework certificates. 29 CFR 530.10.

The transfer of responsibility for certification and enforcement from one level of government to another is a complex matter which could not feasibly be accomplished on an emergency basis, effective at once. The development of standards, drafting of federal-state agreements, and training of state personnel are incompatible with the time constraints inherent in emergency rulemaking.

D. License employers utilizing homeworkers in the knitted outerwear industry

Under this alternative proposal, all employers of homeworkers in the knitted outerwear industry would be required to obtain licenses from the Department. Apart from the infeasibility of immediately implementing this proposal, it does not seem sensible to establish a licensing system which, depending upon the outcome of the rulemaking process, may become unnecessary in a few months.

Again, the Department emphasizes that it will review and consider all alternative proposals in the course of the rulemaking proceedings.

Conclusion

Pursuant to Section 553(b)(B) of the Administrative Procedure Act, the Department finds that there is good cause for dispensing with notice and public comment concerning this final rule. The disruption among homeworkers currently engaged in the knitted outerwear industry constitutes an emergency which is beyond the control of the Department. The Department also notes that this rule is for a short and definite duration. The regular rulemaking proceedings will be completed by the expiration of the 120 day period, at which time the emergency in the knitted outerwear industry will be ended.

Finally, the Department finds that this emergency rule is a rule which relieves a restriction within the meaning of Section 553(d)(1) of the Administrative Procedure Act. Therefore, this rule shall become effective immediately rather than 30 days after its publication. In the event that it is necessary under Section 553(d)(3) of the Act, the Department also finds that there is good cause for waiving the 30-day delay in effectiveness, for the same reasons set forth regarding waiver of prior notice and opportunity for public comment.

Classification

This rule is not classified as a "major rule" under Executive Order 12291 on Federal Regulation, because it is not likely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign based enterprises in domestic or export markets. Therefore, no regulatory impact analysis is required.

Furthermore, the Department certifies that the rule will have no "significant economic impact . . . upon a substantial number of . . . small [business] entities" within the meaning of section 3(a) of the Regulatory Flexibility Act. Pub. L. No. 96–354, 91 Stat. 1164 (5 U.S.C. 605(b)).

Paperwork Reduction Act

Because this rule does not require the collection or retention of information, it is not subject to section 3504(h) of the Paperwork Reduction Act, 44 U.S.C. 3504(h).

This document was prepared under the direction and control of William M. Otter, Administrator, Wage and Hour Division, U.S. Department of Labor.

List of Subjects in 29 CFR Part 530

Employment, Investigations, Labor, Law enforcement, Minimum wages, Wages.

Accordingly, the following action is taken: The prohibition of homework in the knitted outerwear industry under 29 CFR 530.1 (f) and 530.2, the text of which appeared in the July 1, 1981, edition of the Code of Federal Regulations and is contained in Appendix A to this document, and which was reinstated as a result of the Court of Appeals ruling, effective February 29, 1984, is suspended for a period of 120 days for those individuals who were employed as homeworkers in the knitted outerwear industry at any time during the period from November 8, 1981 through February 29, 1984.

(Sec. 11, 52 Stat. 1066; (29 U.S.C 211) unless otherwise noted; Secretary's Order No. 16–75, 40 FR 55913, December 2, 1975; and Employment Standards Order No. 78–1, 43 FR 51469, November 3, 1978)

Signed at Washington, D.C., this 23rd day of March, 1984.

William M. Otter,

Administrator.

Appendix A

The text of 29 CFR 530.1(f) and 530.2 which appeared in the July 1, 1981 edition of the Code of Federal Regulations reads as follows:

§ 530.1 Definitions.

* * * * *

(f) The knitted outerwear industry is defined as follows: The knitting from any yarn or mixture of yarns and the further manufacturing, dyeing or other finishing of knitted garments, knitted garment sections, or knitted garment accessories for use as external apparel or covering which are partially or completely manufactured in the same establishment as that where the knitting process is performed; and the manufacture of bathing suits from any purchased fabric: *Provided*, That the manufacturing, dyeing or other finishing of the following shall not be included:

(1) Knitted fabric, as distinguished from garment sections or garments, for sale as such.

(2) Filled suitings, coatings, topcoatings, and overcoatings.

(3) Garments or garment accessories made from purchased fabric, except bathing suits.

(4) Gloves or mittens.

(5) Hosiery.

(6) Knitted garments or garment accessories for use as underwear, sleeping wear, or negligees.

(7) Fleece-lined garments made from knitted fabric containing cotton only or

containing any mixture of cotton and not more than 25 percent, by weight, of wool or animal fiber other than silk.

(8) Knitted shirts of cotton or any synthetic fiber or any mixture of such fibers which have been knit on machinery of 10-cut or fine: *Provided,* That this exception shall not be construed to exclude from the knitted outerwear industry and the manufacturing, dyeing, or other finishing of knitted shirts made in the same establishment as that where the knitting process is performed, if such shirts are made wholly or in part of fibers other than those specified in this clause, or if such shirts of any fiber are knit on machinery coarser than 10-cut.

* * * * * *

§ 530.2 Restriction of homework.

No work in the industries defined in paragraphs (d) through (j) of § 530.1 shall be done in or about a home, apartment, tenement, or room in a residential establishment unless a special homework certificate issued and in effect pursuant to this part has been obtained for each homeworker or unless the homeworker is so engaged under the supervision of a Sheltered Workshop, as defined in § 525.1 of this chapter.

(Secretary's Order No. 16–75, dated Nov. 25, 1975 (40 FR 55913); Employment Standards Order No. 76–2, dated Feb. 23, 1976 (41 FR 9016))

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Executive Order 12469 of March 26, 1984

East-West Foreign Trade Report

By the authority vested in me as President by the Constitution and the statutes of the United States of America, including section 301 of Title 3 of the United States Code (3 U.S.C. 301), and section 411(c) of the Trade Act of 1974 (19 U.S.C. 2441(c)), in order to provide for more efficient reporting to the Congress, it is hereby ordered as follows:

Section 1. The reporting functions of the East-West Foreign Trade Board under section 411(c) of the Trade Act of 1974 (19 U.S.C. 2441(c)), as transferred to the President by section 5(c) of Reorganization Plan No. 3 of 1979 (19 U.S.C. 2171 note), are delegated to the United States Trade Representative.

Sec. 2. This order is effective upon publication in the **Federal Register**.

Rules and Regulations

Federal Register
Vol. 49, No. 61
Wednesday, March 28, 1984

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Part 427

Oat Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) hereby revises and reissues the Oat Crop Insurance Regulations (7 CFR Part 427), effective for the 1984 and succeeding crop years by: (1) Changing the policy to make it easier to read and understand; (2) eliminating the reduction in production guarantee for unharvested acreage; (3) eliminating the substitute crop provision; (4) adding a 60-day claim for indemnity provision; (5) clarifying the provision determining production to count when small grains are growing with other planted or volunteer crops; (6) adding a section regarding appraisals following the end of the insurance period for unharvested acreage; (7) changing the cancellation and termination for indebtedness dates; (8) revising the unit definition to provide for unit determination when the acreage report is filed; (9) adding three sections concerning descriptive headings, determinations, and notices; and (10) making format and language corrections for purposes of clarification.

In addition, FCIC issues a new subsection in the oat crop insurance regulations to contain the control numbers assigned by the Office of Management and Budget (OMB) to information collection requirements of these regulations. The intended effect of this rule is to update the policy for insuring oats in accordance with Departmental Regulations 1512–1, requiring a review of the regulations as to need, currency, clarity, and effectiveness, and to comply with OMB regulations requiring publication of OMB control numbers assigned to information collection requirements in these regulations.

EFFECTIVE DATE: April 27, 1984.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250. Telephone (202) 447–3325.

The Impact Statement describing the options considered in developing this action and the impact of implementing each option is available upon request from Peter F. Cole.

SUPPLEMENTARY INFORMATION: This action has been reviewed under USDA procedures established in Departmental Regulation 1512–1 (December 15, 1983). This action constitutes a review under such procedures as to the need, currency, clarity, and effectiveness of these regulations. The sunset review date established for these regulations is February 1, 1987.

Merritt W. Sprague, Manager, FCIC, has determined that: (1) This action is not a major rule as defined by Executive Order No. 12291 (February 17, 1981), (2) this action will not increase the Federal paperwork burden for individuals, small business, and other persons, and (3) this action conforms to the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), and other applicable law.

The title and number of the Federal Assistance program to which these regulations apply are: Title-Crop Insurance; Number 10.450.

As set forth in the final rule related notice to 7 CFR Part 3015, Subpart V (48 FR 29116, June 24, 1983), the Federal Crop Insurance Corporation's program and activities, requiring intergovernmental consultation with State and local officials, are excluded from the provisions of Executive Order No. 12372.

It has been determined that this action is exempt from the the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Impact Statement was prepared.

On Wednesday, April 13, 1983, FCIC published an interim rule at 48 FR 15869, revising and reissuing the Oat Crop Insurance Regulations (7 CFR Part 427) in accordance with the provisions of Departmental Regulation 1512–1. Public comment was solicited following the publication and the regulations were scheduled for review; however, no comments were received. In reviewing these regulations prior to issuing this final rule, it was determined that the control numbers assigned by OMB to information collection requirements should be added to the regulations in addition to two other sections regarding determinations and notices. None of these additions have any effect on the terms and conditions of the policy for insuring oats as contained in the regulations but merely serve to clarify determinations made by FCIC and notices required by the policy, and to comply with OMB regulations.

With the exception of the additions referred to above, the interim rule as published is hereby adopted as a final rule.

List of Subjects in 7 CFR Part 427

Crop Insurance, Oats.

Final Rule

Accordingly, pursuant to the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Federal Crop Insurance Corporation hereby revises and reissues the Oat Crop Insurance Regulations (7 CFR Part 427), effective for the 1984 and succeeding crop years, to read as follows:

PART 427—OAT CROP INSURANCE

Subpart—Regulations for the 1984 and Succeeding Crop Years

Sec.

427.1 Availability of oat crop insurance.
427.2 Premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed.
427.3 OMB control numbers.
427.4 Creditors.
427.5 Good faith reliance on misrepresentation.
427.6 The contract.
427.7 The application and policy.
Appendix A, Counties designated for oat crop insurance.

Authority: Secs. 506, 516, Pub. L. 75–430, 52 Stat. 73, 77, as amended (7 U.S.C. 1506, 1516).

§ 427.1 Availability of oat in crop insurance.

Insurance shall be offered under the provisions of this subpart on oates in counties within limits prescribed by, and in accordance with the provisions of the

Federal Crop Insurance Act, as amended. The counties shall be designated by the Manager of the Corporation from those approved by the Board of Directors of the Corporation. Before insurance is offered in any county, there shall be published by appendix to this part the names of the counties in which oat insurance will be offered.

§ 427.2 Premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed.

(a) The Manager shall establish premium rates, production guarantees, coverage levels, and prices at which indemnities shall be computed for oates which shall be shown on the county actuarial table on file in the service office and may be changed from year to year.

(b) At the time the application for insurance is made, the applicant shall elect a coverage level and price at which indemnities shall be computed from among those levels and prices shown on the actuarial table for the crop year.

§ 427.3 OMB control numbers.

The information collection requirements contained in these regulations (7 CFR Part 427) have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Nos. 0563–0003 and 0563–0007.

§ 427.4 Creditors.

An interest of a person in an insured crop existing by virtue of a lien, mortgage, garnishment, levy, execution, bankruptcy, or an involuntary transfer shall not entitle the holder of the interest to any benefit under the contract except as provided in the policy.

§ 427.5 Good faith reliance on misrepresentation.

Notwithstanding any other provision of the oat insurance contract, whenever (a) an insured person under a contract of crop insurance entered into under these regulations, as a result of a misrepresentation or other erroneous action or advice by an agent or employee of the Corporation: (1) Is indebted to the Corporation for additional premiums, or (2) has suffered a loss to a crop which is not insured, or for which the insured person is not entitled to an indemnity because of failure to comply with the terms of the insurance contract, but which the insured person believes to be insured, or believed the terms of the insurance contract to have been complied with or waived, and (b) the Board of Directors of the Corporation, or the Manager in cases involving not more than $100,000 finds: (1) That an agent or employee of the Corporation did in fact make such misrepresentation or take other erroneous action or give erroneous advice, (2) that said insured persons relied thereon in good faith and (3) that to require the payment of the additional premiums or to deny such insured's entitlement to the indemnity would not be fair and equitable, such insured person shall be granted relief the same as if otherwise entitled thereto.

§ 427.6 The contract.

(a) The insurance contract shall become effective upon the acceptance by the Corporation of a duly executed application for insurance. The contract shall cover the oat crop as provided in the policy. The contract shall consist of the application, the policy, and the provisions of the county actuarial table. Any changes made in the contract shall not affect its continuity from year to year. The forms referred to in the contract are available at the service office.

§ 427.7 The application and policy.

(a) Application for insurance on a form prescribed by the Corporation may be made by any person to cover such person's insurable share in the oat crop as landlord, owner-operator, or tenant. The application shall be submitted to the Corporation at the service office on or before the applicable closing date for the county on file in the service office.

(b) The Corporation may discontinue the acceptance of applications in any county upon its determination that the insurance risk involved is excessive, and also, for the same reason, to reject any individual application. The Manager of the Corporation is authorized in any crop year to extend the closing date for submitting applications or contract changes in any county, by placing the extended date on file in the service office in the county and publishing a notice in the **Federal Register** upon the Manager's determination that no selectivity will result during the period of such extension: *Provided, however,* That if adverse conditions should develop during such period, the Corporation will immediately discontinue the acceptance of applications.

(c) Oat contracts in effect for the 1983 crop year are amended by the substitution of the 1984 contract and are continuous unless terminated in accordance with their terms. A new application is not required by these regulations for the 1984 crop year.

(d) The application for the 1984 and succeeding crop years is found at Subpart D of Part 400—General Administrative Regulations (7 CFR 400.37, § 400.38; first published at 48 FR 1023, January 10, 1983) and may be amended from time to time for subsequent crop years. The provisions of the Oat Insurance Policy for the 1984 and succeeding crpp years, are as follows:

Department of Agriculture

Federal Crop Insurance Corporation

Oat—Crop Insurance Poilcy

(This is a continuous contract. Refer to Section 15.)

Agreement to insure: We shall provide the insurance described in this policy in return for the premium and your compliance with all applicable provisions.

Throughout this policy, "you" and "your" refer to the insured shown on the accepted Application and "we," "us," and "our" refer to the Federal Crop Insurance Corporation.

Terms and Conditions

1. Causes of loss.

a. The insurance provided is against unavoidable loss of production resulting from the following causes occurring within the insurance period:

(1) Adverse weather conditions;
(2) Fire;
(3) Insects;
(4) Plant disease;
(5) Wildlife;
(6) Earthquake; or
(7) Volcanic eruption;

unless those causes are excepted, excluded, or limited by the actuarial table or section 9e(6).

b. We shall not insure against any loss of production due to:

(1) The neglect or malfeasance of you, any member of your household, your tenants, or employees;

(2) The failure to follow recognized good oat farming practices;

(3) Damage resulting from the impoundment of water by any governmental, public or private dam or reservoir project; or

(4) Any cause not specified in section 1a as an insured loss.

a. Crop, acreage, and share insured.

a. The crop insured shall be oats seeded for harvest as grain, oats seeded in the same manner for harvest as silage or hay, and grain mixtures in which oats are the predominant grain; which are grown on insured acreage and for which a guarantee and premium rate are provided by the actuarial table.

b. The acreage insured by each crop year shall be oats planted on insurable acreage as designated by the actuarial table and in which you have a share, as reported by you or as determined by us, whichever we shall elect.

c. The insured share shall be your share as landlord, owner-operator, or tenant in the insured oats at the time of planting.

d. We do not insure any acreage:

(1) Planted with flax or vetch;

(2) Where the farming practices carried out are not in accordance with the farming

pratices for which the premium rates have been established;

(3) Which is irrigated and an irrigated practice is not provided by the actuarial table unless you elect to insure the acreage as nonirrigated by reporting it as insurable under section 3;

(4) which is destroyed and it is practical to replant to oats but such acreage is not replanted;

(5) Initially planted after the final planting date contained in the actuarial table unless you agree in writing on our form, to coverage reduction;

(6) Of volunteer oats; or

(7) Planted to a type or variety of oats not established as adapted to the area or excluded by the actuarial table.

e. Where insurance is provided for an irrigated practice:

(1) You shall report as irrigated only the acreage for which you have adequate facilities and water, at the time of planting, to carry out a good oat irrigation practice; and

(2) Any loss of production caused by failure to carry out a good oat irrigation practice, except failure of the water supply from an unavoidable cause occurring after the beginning of planting, shall be considered as due to an uninsured cause. The failure or breakdown of irrigation equipment or facilities shall not be considered as a failure of the water supply from an unavoidable cause.

f. Acreage which is planted for the development or production or hybrid seed or for experimental purposes is not insured unless we agree in writing to insure such acreage.

g. We may limit the insured acreage to any acreage limitation established under any Act of Congress, if we advise you of the limit prior to planting.

3. Report of acreage, share, and practice.

You shall report on our form:

a. All the acreage of oats in the county in which you have a share;

b. The practice; and

c. Your share at the time of planting.

You shall designate separately any acreage that is not insurable. You shall report if you do not have a share in any oats planted in the county. This report shall be submitted annually on or before the reporting date established by the actuarial table. We may determine all indemnities on the basis of information you have submitted on this report. If you do not submit this report by the reporting date, we may elect to determine by unit the insured acreage, share, and practice or we may deny liability on any unit. Any report submitted by you may be revised only upon our approval.

4. Production guarantees, coverage levels, and prices for computing indemnities.

a. The production guarantees, coverage levels, and prices for computing indemnities are in the actuarial table.

b. Coverage level 2 will apply if you do not elect a coverage level.

c. You may change the coverage level and price election on or before the closing date for submitting applications for the crop year as established by the actuarial table.

5. Annual premium.

a. The annual premium is earned and payable at the time of planting. The amount is computed by multiplying the production guarantee times the price election, times the premium rate, times the insured acreage, times your share at the time of planting, times the applicable premium adjustment percentage contained in the following table.

PREMIUM ADJUSTMENT TABLE [1]

[Percent adjustments for favorable continuous insurance experience]

[1] For premium adjustment purposes, only the years during which premiums were earned shall be considered.
[2] Loss Ratio means the ratio of indemnity(ies) paid to premium(s) earned.
[3] Only the most recent 15 crop years shall be used to determine the number of "Loss Years". (A crop year is determined to be a "Loss Year" when the amount of indemnity for the year exceeds the premium for the year.)

b. Interest shall accrue at the rate of one and one-half percent (1½%) simple interest per calendar month, or any part thereof, on any unpaid premium balance starting on the first day of the month following the first premium billing date.

c. Any premium adjustment applicable to the contract shall be transferred to:

(1) The contract of your estate or surviving spouse in case of your death;

(2) The contract of the person who succeeds you if such person had previously participated in the farming operation; or

(3) Your contract if you stop farming in one county and start farming in another county.

d. If participation is not continuous, any premium shall be computed on the basis of previous unfavorable insurance experience but no premium reduction under section 5e shall be applicable.

6. Deductions for debt.

Any unpaid amount due us may be deducted from any indemnity payable to you

or from any loan or payment due you under any Act of Congress or program administered by the United States Department of Agriculture or its Agencies.

7. Insurance period.

a. Insurance attaches when the oats are planted except that in counties with an April 15 cancellation date, insurance on fall planted oats shall attach April 16 following planting, provided there is an adequate stand on this date to produce a normal crop.

b. Insurance ends at the earliest of:

(1) Total destruction of the oats;

(2) Combining, threshing, harvesting for silage or hay, or removal from the field;

(3) Final adjustment of a loss; or

(4) The date shown below of the calendar year in which oats are normally harvested:

(a) Alaska—September 25;

(b) All other states—October 31.

8. Notice of damage or loss.

a. In case of damage of probable loss:

(1) You must give us written notice if:

(a) During the period before harvest, the oats on any unit are damaged and you decide not to further care for or harvest any part of them;

(b) You want our consent to put the acreage to another use;

(c) You want to harvest the oats for silage or hay, (After such notice is given, we shall appraise the potential grain production. *However*, if we are unable to do so before harvest, you may harvest the crop provided representative samples are left for appraisal purposes); or

(d) After consent to put acreage to another use is given, additional damage occurs. Insured acreage may not be put to another use until we have appraised the oats and given written consent. We shall not consent to another use until it is too late to replant. You must notify us when such acreage is put to another use.

(2) If you anticipate a loss on any unit, you must give us notice:

(a) At least 15 days before the beginning of harvest; or

(b) Immediately, if probable loss is later determined, and a representative sample of the unharvested wheat (at least 10 feet wide and the entire length of the field) must be left intact for a period of 15 days from the date of notice, unless we give you written consent to harvest the sample.

(3) In addition to the notices required by this section, if you are going to claim an indemnity on any unit, we must be given notice not later than 30 days after the earliest of:

(a) Total destruction of the oats on the unit;

(b) Harvest of the unit; or

(c) The calendar date for the end of the insurance period.

b. You must obtain written consent from us before you destroy any of the oats which are not to be harvested.

c. We may reject any claim for indemnity if any of the requirements of this section or section 9 are not complied with.

9. Claim for indemnity.

a. Any claim for indemnity on a unit shall be submitted to us on our form not later than 60 days after the earliest of:

(1) Total destruction of the oats on the unit;

(2) Harvest of the unit; or

(3) The calendar date for the end of the insurance period.

b. We shall not pay any indemnity unless you:

(1) Establish the total production of oats on the unit and that any loss of production has been directly caused by one or more of the insured causes during the insurance period; and

(2) Furnish all information we require concerning the loss.

c. The indemnity shall be determined on each unit by:

(1) Multiplying the insured acreage by the production guarantee;

(2) Subtracting therefrom the total production of oats to be counted (see section 9e);

(3) Multiplying the remainder by the price election; and

(4) Multiplying this result by your share.

d. If the information reported by you results in a lower premium than the actual premium determined to be due, the indemnity shall be reduced proportionately.

e. The total production to be counted for a unit shall include all harvested and appraised production.

(1) Mature oat production:

(a) Which otherwise is not eligible for quality adjustment and which grades No. 4 or better shall be reduced .12 percent for each .1 percentage point of moisture in excess of 14.0 percent; or

(b) Which, due to insurable causes, does not grade No. 4 or better, or is graded smutty, garlicky, or ergoty, in accordance with the Official United States Grain Standards, shall be adjusted by:

(i) Dividing the value per bushel of such oats by the price per bushel of U.S. No. 2 oats; and

(ii) Multiplying the result by the number of bushels of such oats.

The applicable price for No. 2 oats shall be the local market price on the earlier of the day the loss is adjusted or the day such oats were sold.

(2) Any mature production from other crops growing in the oats shall be counted as oats on a weight basis.

(3) Appraised production to be counted shall include:

(a) Potential production lost due to uninsured causes and failure to follow recognized good oat farming practices;

(b) Not less than the guarantee for any acreage which is abandoned or put to another use without our prior written consent or damaged solely by an uninsured cause; and

(c) Any unharvested production.

(4) Any appraisal we have made on insured acreage for which we have given written consent to be put to another use shall be considered production unless such acreage:

(a) Is not put to another use before harvest of oats becomes general in the county;

(b) Is harvested; or

(c) Is further damaged by an insured cause before the acreage is put to another use.

(5) We may determine the amount of production of any unharvested oats on the basis of field appraisals conducted after the end of the insurance period.

(6) When you have elected to exclude hail and fire as insured causes of loss and the oats are damaged by hail or fire, appraisals for uninsured causes shall be made in accordance with Form FCI–78, "Request To Exclude Hail And Fire".

(7) The commingled production of units will be allocated to such units in proportion to our liability on the harvested acreage of each unit.

f. You shall not abandon any acreage to us.

g. You may not bring suit or action against us unless you have complied with all policy provisions. If a claim is denied, you may sue us in the United States District Court under the provisions of 7 U.S.C. 1508(c). You must bring suit within 12 months of the date notice of denial is mailed to and received by you.

h. We shall pay the loss within 30 days after we reach agreement with you or entry of a final judgment. In no instance will we be liable for interest or damages in connection with any claim for indemnity, whether we approve or disapprove such claim.

i. If you die, disappear, or are judicially declared incompetent, or if you are an entity other than an individual and such entity is dissolved after the oats are planted for any crop year, any indemnity shall be paid to the person(s) we determine to be beneficially entitled thereto.

j. If you have other fire insurance and fire damage occurs during the insurance period, and you have not elected to exclude fire insurance from this policy, we shall be liable for loss due to fire only for the smaller of:

(1) The amount of indemnity determined pursuant to this contract without regard to any other insurance; or

(2) The amount by which the loss from fire exceeds the indemnity paid or payable under such other insurance. For the purposes of this section, the amount of loss from fire shall be the difference between the fair market value of the production on the unit before the fire and after the fire.

10. Concealment or fraud.

We may void the contract on all crops insured without affecting your liability for premiums or waiving any right, including the right to collect any amount due us if, at any time, you have concealed or misrepresented any material fact or committed any fraud relating to the contract. Such voidance shall be effective as of the beginning of the crop year with respect to which such act or omission occurred.

11. Transfer of right to indemnity on insured share.

If you transfer any part of your share during the crop year, you may transfer your right to an indemnity. The transfer must be on our form and approved by us. We may collect the premium from either you or your transferee or both. The transferee shall have all rights and responsibilities under the contract.

12. Assignment of indemnity.

You may assign to another party your right to an indemnity for the crop year only on our form and with our approval. The assignee shall have the right to submit the loss notices and forms required by the contract.

13. Subrogation. (Recovery of loss from a third party.)

Because you may be able to recover all or a part of your loss from someone other than us,

you must do all you can to preserve any such rights. If we pay you for your loss then your right of recovery shall at our option belong to us. If we recover more than we paid you plus our expenses, the excess shall be paid to you.

14. Records and access to farm.

You shall keep, for two years after the time of loss, records of the harvesting, storage, shipment, sale or other disposition of all oats produced on each unit including separate records showing the same information for production from any uninsured acreage. Any person designated by us shall have access to such records and the farm for purposes related to the contract.

15. Life of contract: Cancellation and termination.

a. This contract shall be in effect for the crop year specified on the application and may not be canceled for such crop year. Thereafter, the contract shall continue in force for each succeeding crop year unless canceled or terminated as provided in this section.

b. This contract may be canceled by either you or us for any succeeding crop year by giving written notice on or before the cancellation date preceding such crop year.

c. This contract shall terminate as to any crop year if any amount due us on this or any other contract with you is not paid on or before the termination date preceding such crop year for the contract on which the amount is due. The date of payment of the amount due:

1. If deducted from an indemnity claim shall be the date you sign the claim; or

2. If deducted from payment under another program administered by the United States Department of Agriculture shall be the date the payment was approved.

d. The cancellation and termination dates are:

State and county	Cancellation and termination dates
New Mexico except Taos County; Oklahoma; and Texas.	August 31.
Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina and Tennessee.	September 30.
Arizona; California except Del Norte, Humboldt, Lassen, Modoc, Plumas, Shasta, Siskiyou and Trinity Counties.	October 31.
Del Norte, Humboldt, Lassen, Modoc, Plumas, Shasta, Siskiyou and Trinity Counties, California; Taos County, New Mexico; and all other states.	April 15.

e. If you die or are judicially declared incompetent, or if you are an entity other than an individual and such entity is dissolved, the contract shall terminate as of the date of death, judicial declaration, or dissolution. *However,* if such event occurs after insurance attaches for an crop year, the contract shall continue in force through the crop year and terminate at the end thereof. Death of a partner in a partnership s all dissolve the partnership unless the partnership agreement provides otherwise. If two or more persons having a joint interest are insured jointly, death of one of the persons shall dissolve the joint entity.

f. The contract shall terminate if no premium is earned for five consecutive years.

16. Contract changes.

We may change any terms and provisions of the contract from year to year. If your price election at which indemnities are computed is no longer offered, the actuarial table will provide the price election which you shall be deemed to have elected. All contract changes shall be available at your service office by December 31 preceding the cancellation date for counties with an April 15 cancellation date and by May 31 preceding the cancellation date for all other counties. Acceptance of any changes shall be conclusively presumed in the absence of a notice from you to cancel the contract.

17. Meaning of terms.

For the purposes of oat crop insurance:

a. "Actuarial table" means the forms and related material for the crop year approved by us which are available for public inspection in your service office, and which show the production guarantees, coverage levels, premium rates, prices for computing indemnities, practices, insurable and uninsurable acreage, and related information regarding oat insurance in the county.

b. "County" means the county shown on the application and any additional land located in a local producing area bordering on the county, as shown by the actuarial table.

c. "Crop year" means the period within which the oats are normally grown and shall be designated by the calendar year in which the oats are normally harvested.

d. "Harvest" of oats on the unit means the completion of combining, threshing or cutting for hay or silage.

e. "Insurable acreage" means the land classified as insurable by us and shown as such by the actuarial table.

f. "Insured" means the person who submitted the application accepted by us.

g. "Person" means an individual, partnership, association, corporation, estate, trust, or other business enterprise or legal entity, and wherever applicable, a State, a political subdivision of a State, or any agency thereof.

h. "Service office" means the office servicing your contract as shown on the application for insurance or such other approved office as may be selected by you or designated by us.

i. "Tenant" means a person who rents land from another person for a share of the oats or a share of the proceeds therefrom.

j. "Unit" means all insurable acreage of oats in the county on the date of planting for the crop year:

(1) In which you have a 100 percent share; or

(2) Which is owned by one entity and operated by another entity on a share basis.

Land rented for cash, a fixed commodity payment, or any consideration other than a share in the oats on such land shall be considered as owned by the lessee. Land which would otherwise be one unit may be divided according to applicable guidelines on file in your service office or by written agreement with us. Units will be determined when the acreage is reported. Errors in reporting such units may be corrected by us to conform to applicable guidelines when adjusting a loss. We may consider any acreage and share thereof reported by or for your spouse or child or any member of your household to be your bona fide share or the bona fide share of any other person having an interest therein.

18. Descriptive headings.

The descriptive headings of the various policy terms and conditions are formulated for convenience only and are not intended to affect the construction or meaning of any of the provisions of the contract.

19. Determinations.

All determinations required by the policy shall be made by us. If you disagree with our determinations, you may obtain reconsideration of or appeal those determinations in accordance with Appeal Regulations.

20. Notices.

All notices required to be given by you must be in writing and received by your service office within the designated time unless otherwise provided by the notice requirement. Notices required to be given immediately may be by telephone or in person and confirmed in writing. Time of the notice will be determined by the time of our receipt of the written notice.

Appendix A—Counties Designated for Oat Crop Insurance

In accordance with the provisions of 7 CFR 427.1, the following counties are designated for oat crop insurance:

Alabama

Baldwin

Arkansas

Arkansas

California

Modoc
Siskiyou

Colorado

Alamosa

Idaho

Kootenai

Illinois

Boone
Bureau
Carroll
De Kalb
Henry
Jo Daviess
Kane
Knox
LaSalle
Lee
McHenry
Mercer
Ogle
Stephenson
Warren
Whiteside
Will
Winnebago

Iowa

(All counties)

Kansas

Dickinson

Cook

Done in Washington, D.C., on February 13, 1984.

Peter F. Cole,

Secretary, Federal Crop Insurance Corporation.

Dated: March 5, 1984.

Approved by:

Edward Hews,

Acting Manager.

[FR Doc. 84-8371 Filed 3-27-84; 8:45 am]
BILLING CODE 3410-08-M

Agricultural Marketing Service

7 CFR Part 1150

Dairy Promotion Program; Decision Establishing Final Order Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final decision establishes a Dairy Research and Promotion Order to implement a national program for dairy product promotion, research and nutrition education as provided for in Title I, subtitle B, of the Dairy and Tobacco Adjustment Act of 1983. The program will be funded by a mandatory 15-cent per hundredweight assessment on all milk marketed by producers in the 48 contiguous States and will be administered by a board of 36 dairy farmers appointed by the Secretary.

The order defines the powers and duties of the National Dairy Promotion and Research Board, provides for collection of the 15–cent per hundredweight assessment, specifies the objective of board activities, and provides a mechanism for terminating the activities of the board if the program is defeated in any producer referendum. Additional subparts set forth the rules to govern petitions to modify or to be exempted from the order and the procedures used to certify those milk producer organizations eligible to submit nominations for board membership to the Secretary.

EFFECTIVE DATES: All provisions, except the collection of assessments specified in § 1150.152, are effective on and after April 1, 1984. The collection of assessments in effective on and after May 1, 1984.

FOR FURTHER INFORMATION CONTACT: Clayton H. Plumb, Chief, Order Formulation Branch, Dairy Division, Agricultural Marketing Service. U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–6274.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Invitation to submit proposals: Issued December 6, 1983; published, December 9, 1983 (48 FR 55132).

Procedure for certification of milk producer organizations: Issued January 27, 1984; published, February 2, 1984 (49 FR 4068).

Invitation to submit comments and notice of public meeting: Issued January 27, 1984; published February 2, 1984 (49 FR 4080).

This final rule has been reviewed under Executive Order 12291 and has been designated as a "major" rule since it would have an annual impact on the economy of more than $100 million. Also, this action could have a significant economic impact on a substantial number of small entities. Consequently, a combined regulatory impact analysis and regulatory flexibility analysis has

been prepared and is available for review to the public by contacting the person named above.

In information collection requirements that are included in this rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980, (44 U.S.C. Chapter 35) and have been assigned OMB Control Number 0581–0147.

Statutory Authority for Final Rule

This final rule is issued pursuant to Title I, subtitle B, of the Dairy and Tobacco Adjustment Act of 1983, Pub. L. 98–180, 97 Stat. 1128 as approved November 29 1983. The declared policy of this statute is to provide for the establishment of an orderly procedure for financing (through assessments on all milk produced in the United States for commercial use) and carrying out a coordinated program of promotion designed to strengthen the dairy industry's position in the marketplace and to maintain and expand domestic and foreign markets and uses for fluid milk and dairy products produced in the United States.

The statue mandates a deduction of 15-cents per hundredweight from the proceeds of the sale of all milk marketed commercially by producers in the 48 contiguous States. These deductions are to be remitted to a National Dairy Promotion and Research Board established for administration of appropriate plans or projects for advertisement and promotion of the sale and consumption of dairy products, for research projects related thereto, for nutrition education projects, and for the disbursement of necessary funds for such purpose. Where it can be established that milk producers are participating in active, ongoing qualified State or regional dairy product promotion or nutrition education programs intended to increase consumption of milk and dairy products generally, such producers shall receive credit in determining the assessment due from such producers for contributing to such programs of up to 10 cents per hundredweight of milk marketed.

In addition, the statute mandates that the Secretary issue a promotion order to become effective not later than 90 days after publishing a proposed order for public comment, which occurred February 2, 1984. Also, within the 60-day period immediately preceding September 30, 1985, the Secretary must conduct a referendum among producers for the purpose of ascertaining whether the promotion order shall be continued.

Preliminary Statement

Title I, subtitle B, of the Dairy and Tobacco Adjustment Act of 1983 (Pub. L. 98–180), which was enacted on November 29, 1983, authorizes the establishment of a national program for dairy product promotion, research and nutrition education to be funded by a mandatory assessment on all milk marketed by producers in the 48 contiguous States. The Act also specifies the timetable for implementation of an order to establish the program. The Secretary was required to publish a proposed order within 30 days after it was received and provide an opportunity for public comment. After notice and opportunity for public comment, the Secretary must issue a dairy products promotion and research order to become effective not later than 90 days following publication of the proposal.

To implement this procedure, the Department solicited proposals from interested parties. This invitation to submit proposals was issued on December 6, 1983, and published in the **Federal Register** on December 9, 1983 (48 FR 55132). Interested parties were given until January 6, 1984, to submit proposals.

In response to this notice, one complete proposed order was received. In addition, other more limited proposals concerning certain aspects of the program were received that raised issues and questions concerning the order and its application. The proposed order along with the issues and questions were published in the **Federal Register** on February 2, 1984 (49 FR 4080). Interested parties were asked to submit comments on the proposed order by February 24, 1984. In addition, the Department conducted a public meeting in Alexandria, Virginia, on February 14 and 15, 1984, to give interested parties an opportunity to discuss all issues raised by the proposed order. The record of this public meeting and all comments received from interested parties were utilized in the development of these final rules.

In addition to the proposed order, other rules were necessary to implement the program on the timely basis required by the enabling legislation. The Act requires that the eligibility of any organization to nominate milk producers to serve on the Board must be certified by the Secretary. Interim rules were necessary to implement the application and certification process with respect to the eligibility of organizations to nominate Board members. It was found that because of a statutory deadline, it was impracticable, unnecessary and contrary to the public interest to give preliminary notice and opportunity for public comment prior to issuance of the rules and good cause was also found for not postponing the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553).

The emergency interim final rule provided the procedure for organizations to apply for certification by the Secretary of their eligibility to represent milk producers and to nominate milk producers to serve as members of the National Dairy Promotion and Research Board. Any organization whose membership consisted primarily of milk producers was invited to apply for certification.

In order to be eligible for certification to make nominations to the initial Board, applications for certification were to be received by the Department by March 5, 1984.

Additional rules concerning the procedure for conducting referenda to determine producer approval will be developed at a later time since the initial referendum is not required by the Act until the 60-day period immediately preceding September 30, 1985.

As previously stated, the Dairy and Tobacco Adjustment Act of 1983 mandates the implementation of a national dairy promotion plan. In addition, the legislation specifies many of the provisions to be included in the dairy promotion and research order. The major issues raised in comments and at the public meeting concerned matters of statutory interpretation or operations not addressed by the Act. Most of the comments addressed one or more of the issues set forth in the proposed order document: nature of authorized advertising, Board membership, qualification of State and regional programs, collection of assessments, and expenditures of funds. Consequently, each of these issues will be addressed in the decision which follows.

The decision is divided into seven major issues. The first six deal with the dairy research and promotion order and the seventh with the additional regulatory provisions to implement the program. The major issues identified in this proceeding are:

1. Nature of authorized advertising.
2. Definitions and miscellaneous provisions.
3. Structure of the Board.
4. Powers and duties of the Board.
5. Expenses and collection of assessments.
6. Qualification of State and regional programs.
7. Additional regulatory provisions.

Findings and Conclusions

Following are the findings and conclusions on the major issues set forth above.

1. Nature of Authorized Advertising

The order should not specifically prohibit the expenditure of program funds to promote milk and dairy products on a brand or trade name basis. The initial decision on brand or trade name advertising should be left to the National Dairy Promotion and Research Board, which has the responsibility to administer the order and to conduct a coordinated national program for milk and dairy product promotion, research and nutrition education. The Board should have the authority to consider, and to recommend to the Secretary, possible methods and plans or projects for implementing a promotion program for milk and dairy products on a brand or trade name basis. The Board would have to determine that any such program would tend to generally increase the consumption of milk and dairy products and that such program could be carried out in an equitable manner and without using unfair or deceptive practices. As discussed later, this issue also involves the criteria and procedure for determining if State or regional dairy product promotion programs that provide for brand advertising should be qualified so that producers who fund such programs would be eligible for credits, thereby reducing the amount of their mandatory assessment to fund the national program.

This issue stimulated substantial controversy and was addressed by a large number of interested parties both at the public meeting and in written comments to the Department. Generally, producers propose a generic promotion program with an absolute prohibition against brand name advertising in the order. On the other hand, processors, generally proprietary firms, oppose any prohibition in the order to exclude advertising that makes reference to private brands or trade names and propose that such advertising be specifically provided for in the order.

The Milk Industry Foundation and International Association of Ice Cream Manufacturers (MIF) and other interested parties contend that the expenditure of program funds on brand advertising cannot be prohibited in the order since the Act does not prohibit brand advertising. They contend that both the statutory provisions and the legislative history of the Act make it unlawful for the Secretary to arbitrarily exclude brand advertising in the order and thereby prohibit the Board from determining whether any specific advertising program would tend to achieve the purposes of the Act. These parties also maintain that brand advertising, rather than being directed towards brand preference, can be effective in increasing total sales of milk and dairy products. They further maintain that brand advertising, in conjunction with a generic program, would encourage processor involvement in promoting dairy products. They maintain that, although generic programs have been successful, they could have been more successful if they had been fully coordinated with the marketing plans and strategies of processors. In this regard, brand advertising advocates offered various general guidelines to implement a jointly funded promotional program. Basically, the concept involves matching processor dollars for promotional programs with dairy farmer funds from the national program. Processors maintained that their contributions would be either in excess of what is currently spent by processors for promotion, or in excess of some prior established norm of advertising expenditures for various categories of milk and dairy products. Thus, they maintain that an incentive would be created for the expenditure of additional funds to promote milk and dairy products, and that such a jointly funded program would be most effective in increasing overall sales. Thus, processors conclude that a jointly funded program would have the greatest impact in carrying out the objectives of the Act to finance and carry out a coordinated program of promotion designed to strengthen the dairy industry's position in the marketplace.

The National Milk Producers Federation (NMPF) and other interested parties (including producers, processors and representatives of State and regional promotion programs) oppose the expenditure of program funds to promote milk and dairy products on a brand or trade name basis. They maintain that brand advertising results in sales shifts among brands and does not result in an overall increase in sales. Therefore, they maintain that the funding of brand advertising programs would not be consistent with the objective of the Act to increase the overall sales of milk and dairy products. Producer groups further emphasize that the Act requires that the program be funded by producer contributions, and that producers do not want their funds to be used by processors to promote their own private brands of milk and dairy products. These parties also maintain that it would be impossible to administer any brand advertising program in an equitable manner under the national program. They question how the Board would determine what processors and what brands would receive producer funds for promotion. They maintain that excluded processors would be placed at a competitive disadvantage and that the Board would be subject to extensive litigation by such companies. Producers also maintain that attempting to allocate program funds among all processors and thousands of brands would result in a dissipation of producer contributions to subsidize the advertising of processors. With respect to the concept of processors matching new advertising dollars with producer funds, producers question what procedure would be used to determine what processors would have spent for advertising in the absence of producer contributions. Producers maintain that if the Board has to contend with all the administrative problems inherent in a national program that provides for brand advertising, rapid implementation of an effective dairy product promotion program would be impossible. Producers contend that Congress intended that an effective program to increase consumption of milk and dairy products be implemented expeditiously as evidenced by the specific and limited time span contained in the Act for adoption of a program. Producers also maintain that rapid implementation is necessary to have an ongoing, effective program prior to the initial, required referendum. Producers conclude that the function of the national program is to use producer funds to increase the overall consumption of milk and dairy products through a generic promotion program and that such a program is consistent with the intent and requirements of the Act.

A review of the points raised by the proponents and opponents of brand advertising reveals four significant points. First of all, the Act is silent with respect to the use of program funds to promote milk and dairy products on a brand or trade name basis. Second, the program is funded by producers through a mandatory assessment on all milk marketed and, from the views and comments submitted by producers and their cooperative associations, they do not want to fund a program that promotes milk and dairy products on a brand or trade name basis. Third, there are difficult administrative, enforcement, and legal problems inherent with the implementation of brand or trade name advertising under a national promotion program that cannot

readily be resolved. Fourth, the intent of the enabling legislation must be construed to promote an overall increase in sales of milk and dairy products when viewed in the context of the entire Dairy and Tobacco Adjustment Act that is principally concerned with curtailing the high surplus of milk production and dairy products.

The first of the above points is controlling and, thus, the order should not contain an outright prohibition to the use of national program funds to promote milk and dairy products on a brand or trade name basis. To do so would prohibit the Board from even considering promotional programs that use brand or trade names that might be developed in the future and be beneficial to the entire industry. In effect, the Board will not be foreclosed from considering all options, which appears to be the primary concern of processors at this time.

The remaining three major points were raised by producers in opposition to brand or trade name advertising. At the present time, producers do not wish to fund a brand advertising program because they do not believe that this would result in an overall increase in sales of milk and dairy products. In this regard, nothing has been presented to the Department through all the views and comments received from which it could be concluded that brand advertising has a positive impact on total sales of milk and dairy products. Accordingly, there should be nothing in the order that would require the Board to expend program funds for a brand name advertising program. In fact, it should be the Board's option not to even consider such programs at the national level. If in the future, however, the Board wishes to consider brand advertising programs, it should be able to do so.

The initial decision with respect to this issue should rest with the Board as it is responsible for conducting a coordinated national program for dairy product promotion. As provided in the order, the Board will have the authority to consider, and to recommend to the Secretary, possible methods and plans or projects for implementing promotion programs for milk and dairy products on a brand or trade name basis. Before implementing such a program, the Board would have to determine, and establish to the Secretary, that any such program would tend to generally increase the total sales of milk and dairy products and that such program could be administered and carried out in an equitable manner and without using unfair or deceptive practices.

As stated previously, this issue also involves the procedure and criteria to be used in determining whether State and regional programs should be qualified for credit purposes under the national program. The Act specifies that producers can obtain a credit for funding qualified programs, thereby reducing the amount of their mandatory contribution that is to accrue to the national program. Consequently, a determination must be made with respect to whether State and regional programs that expend funds for promoting milk and dairy products on a brand or trade name basis will be qualified for credit purposes. The order contained herein provides that the Board must address the issue of whether such programs should be qualified. Until such time as the Board, and ultimately the Secretary, approves such a program, any State or regional program that promotes milk and dairy products on a brand or trade name basis will not be qualified, and producers funding such programs will not be credited for their contributions to such programs.

Generally, the parties that support brand advertising under the national program also support qualification of State and regional programs that fund brand advertising programs. They maintain that it is not the intent of the Act to disrupt active and ongoing State and regional promotional programs or to require that such programs conform to the same type of activities that may be conducted under the national program. They emphasize that the Act requires that nothing in the Act "may be construed to preempt or supersede any other program relating to dairy product promotion organized and operated under the laws of the United States or any State."

Parties that opposed brand advertising under the national program generally opposed the qualification of State or regional programs that provide for brand advertising for virtually the same reasons presented in the discussion of the nature of authorized advertising under the national program. Basically, producers perceive the crediting of brand advertising under local programs as a dissipation of national program funds to subsidize the advertising of processors for their own benefit and for the benefit of their producer suppliers.

It is clear that the Act does not require, for qualification purposes, that State and regional programs conduct activities that are identical to those that may be conducted under the national program. However, it is evident that brand advertising conducted at the State or regional level would represent a significant departure from the generic promotion program that NMPF urged under the national program because of the numerous problems inherent in the administration and enforcement of brand or trade name advertising under the national program. Also, such problems associated with brand or trade name advertising that were discussed relative to the national program apply equally as well to State and regional programs. Consequently, a determination must be made on whether State or regional programs should be qualified if brand advertising is conducted.

The order contained herein provides the Secretary with the authority to determine which State and regional programs should be qualified for credit purposes. The qualification procedure and the criteria to be used are discussed under issue number 6. However, with respect to the brand advertising issue, the Board must be given the duty to review such programs and recommend to the Secretary whether they should be qualified for credit purposes. The Board has been given the authority to conduct a coordinated national program, and therefore should be given the opportunity to have an input with respect to the qualification of programs that conduct brand advertising. Generally, the requirements that the Board would need to consider to implement a national advertising program would serve as a benchmark in its deliberations on the qualification of State and regional programs.

The discussion of the nature of advertising under the national program indicated that the Board would have the option to determine when and if brand advertising should be considered. However, there is a greater sense of urgency with respect to the issue at the State and regional level. This is because the order is to be fully operational on May 1, 1984, and because assessments on May production will be due on June 30. Consequently, those responsible for remitting the assessments to the Board will have to know which programs are qualified for credit purposes. Because of the urgency involved, the order provides that, until such time as the Board reviews and makes a recommendation on the issue, any State or regional programs that expend funds to promote milk and dairy products on a brand or trade name basis will not be qualified programs.

From the information contained in views and comments received by the

Department, it appears that promotional programs operated under State or Federal laws do not engage in promoting milk and dairy products on a brand or trade name basis. Consequently, most, if not all, of such programs would be qualified programs. Other regional programs, however, that are operated by processors do emphasize their own particular brands or trade names. Such programs will not be qualified until such time as the Board recommends and the Secretary concurs that they should be qualified. Such a determination on the record is consistant with the record at this point in time. There is no demonstration to substantiate that such programs have a positive impact in increasing total sales of milk and dairy products.

2. Definitions and Miscellaneous Provisions

The order includes definitions of nineteen terms. These definitions are helpful tools in regulatory construction and make the order language simplier and easier to understand. Twelve of these terms are defined in the Act. Of the twelve, eight (department, milk, person, dairy products, fluid milk products, producer, research, and nutrition education) are reproduced verbatim from the Act. Proponents of the order recommended that the definitions of dairy products, research and nutrition education differ slightly from the way they appear in the Act. Proponents asserted that these minor changes would clarify what was interpreted as ambiguous statutory language.

Several interested parties objected to the proposed definition of "dairy products." They contended that the proposal to tie "dairy products" to the published standards of identity would unnecessarily restrict the range of products that could be promoted by the Board. One party stated that the proposed definition conflicted with the Board's statutory duty to study casein because casein is not defined in the standards of identity. It is concluded that the definition of "dairy products" should be identical to the definition included in the Act. This definition eliminates any possible regulatory conflicts and gives the Board flexibility to develop programs to promote a wide range of products.

Likewise, the definitions of research and nutrition education are reproduced from the Act. This approach avoids any possibility that the order would be interpreted to place a different meaning on these terms than is intended in the Act.

Four terms are given definitions that are slightly different from the way they appear in the Act. The definitions of "Board" and "United States" are changed by replacing the statutory citations with order citations and the title of the Board is added. The term "Secretary" is broadened to include officers and employees of the Department delegated to act for the Secretary. The definition of "promotion" is changed by adding the word "generally." The change is designed to emphasize that promotion efforts of the Board should be directed toward increasing overall demand for dairy products. These minor alterations were suggested by the producer proponents and no interested parties objected.

Seven terms are defined in the order that do not appear as definitions in the statute: Act, fiscal period, eligible organization, qualified State or regional program, plans and projects, marketing, and cooperative association. These definitions were offered to simplify drafting of the regulatory language. With minor editorial changes, they are adopted as proposed. No parties commented on these definitions.

The final order also contains certain miscellaneous provisions concerning penalties, proceeding after termination, personal liability of Board members and employees, patents and copyrights, amendments, separability, and compliance with the Paperwork Reduction Act. These provisions are necessary because they restate specific statutory requirements and they provide completeness for ease of administration. Other than the provision for penalties and compliance with the Paperwork Reduction Act, they were submitted by the proponents and no interested parties opposed their adoption.

The penalty provision of section 119(b) of the Act is included in § 1150.156 of the order. Although the statute allows these penalties to be imposed on persons who violate the order even if the provisions are not included in the order, including the penalty provision in the order will serve to give all parties additional notice of the consequences of willful violations of the order.

Sections 1150.181 and 1150.182 provide a mechanism for concluding the business of the Board if the program is defeated in a producer referendum. Since continuation of the program is subject to producer approval, the order should contain a method for closing out the program in an orderly fashion. These provisions were proposed by the producer proponents and no interested parties opposed their adoption. Therefore, they are adopted as proposed, with minor editorial changes.

Section 1150.183 is designed to limit the personal liability of Board members and Board employees for actions taken in their official capacities. This protection from liability would not extend to acts of dishonesty or willful misconduct. This provision was proposed by the National Milk Producers Federation. No additional comments were received on this topic. This provision is included in the order to clarify the personal and official responsibilities of Board members and employees.

The order contains a provision to protect the interests of the Board and the U.S. Government in patents, trademarks and copyrights that result from plans or projects funded by the Board. The language adopted in § 1150.184 was proposed by NMPF. Kraft, Inc., requested that the language be clarified to emphasize that patents and copyrights that relate to a company's branded products that may result from jointly-funded programs remain the property of the company. It is not necessary to address the issue raised by Kraft at this time. The protection of private brand or trade names and any associated patents or copyrights should be addressed in any joint program agreements that are entered into by the Board and private industry. The order need only assert the Board's property interest in materials developed with its funds. Therefore § 1150.184 is adopted as proposed.

Section 1150.186 states that if any part of the order is declared invalid, the remaining provisions shall not be affected. This provision is necessary to allow the program to operate until any legal questions are resolved or changes can be implemented to correct legal deficiencies. No interested party other than the proponent commented on this provision. Since the provision is necessary to effectuate operations of the program, it is adopted as proposed.

Sections 1150.185 and 1150.187 address legal requirements for implementing the order or amendments to the order. The Act gives the Secretary authority to amend the order. Since the Act is silent with regard to procedures to amend the order, it is concluded that any amendments must be promulgated under the informal rulemaking provisions of the Administrative Procedure Act (5 U.S.C. 553). Amendments can be proposed by the Board, the Secretary, eligible organizations, cooperatives, or any interested party. Proposed amendments would be subject to the notice and

comment provisions of the Administrative Procedure Act. The Secretary would have the authority to issue interim final rules in emergency situations. Also, regulations issued under the Act are subject to the requirements of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Sections 1150.185 and 1150.187 are included so that the order complies with these statutory requirements.

3. Structure of the Board

The Act states that the program will be administered by a Board of not less than 36 milk producers appointed by the Secretary. Interested parties raised several issues concerning the structure of this producer Board, including geographic representation, nominations, and conflicts of interest. This part of the decision sets forth the order provisions that establish the Board and its operational procedures and discusses the concerns raised by interested parties.

Section 1150.131 establishes the National Dairy Promotion and Research Board of 36 milk producers. The Act requires that Board members be nominated to represent specific geographic regions and that each member represent an equal proportion of total U.S. milk production. The NMPF proposal adopted in this decision divides the nation into 13 geographical regions. Each region is assigned between one and six Board positions, depending on the volume of milk production. Analysis of this proposal shows that each Board member, in fact, represents approximately one thirty-sixth of the nation's milk supply, which complies with the statutory requirement.

A representative of Farmers Union Milk Marketing Cooperative objected to the variable number of Board members from each region. He suggested that the regions be drawn so that they represent equal amounts of the nation's milk production. Essentially, he proposed that the order provide for six regions, each having six Board positions. In written comments, he withdrew the proposal for alternative regions with regard to Board membership. Farmers Union did submit an alternative proposal concerning membership of the Board's executive committee. This proposal is discussed in the section of this decision on Powers and Duties of the Board.

Other interested parties suggested that Board positions be reserved for consumers, handlers, and other nonmilk producer groups. The Act requires all Board members to be milk producers. Therefore, these suggestions cannot be considered.

The NMPF proposal for a 36-member Board of milk producers representing 13 geographic regions meets the statutory requirements. Since there were no other proposals regarding Board membership that comply with the Act, the NMPF proposal is adopted.

NMPF also proposed that every three to five years, the Board be required to reapportion the Board positions to reflect regional changes in milk production. This provision would assure that the Board would continue to represent milk production across the country. Since this provision is certainly within the spirit of the Act and no opposition comments were received, it is adopted with minor editorial changes.

The Act states that Board members shall serve terms of three years and that no member may serve more than two consecutive terms. Also, the Act states that the initial appointments will be divided proportionately into one-, two-, and three-year terms. Section 1150.132 restates these requirements with some minor clarification. For simplicity, the order states that all terms will expire on April 30 of the designated year, so that all terms will begin on the anniversary of the date when the order became fully effective, May 1, 1984. Also, the order allows a retiring Board member to remain in office until his/her successor is appointed. These minor changes are added for ease of administration. In addition, it is appropriate and consistent with the Act for the Secretary to designate the one-, two-, and three-year terms for the initial Board. These abbreviated terms of service will count as a full term for purposes of the two-term limit.

The Act states that Board members shall be appointed from nominations submitted by eligible organizations. Eligible organizations are organizations that represent dairy farmers as outlined in § 114 of the Act and in §§ 1150.270 through 1150.278 of this Part. If the Secretary determines that a substantial number of producers are not members of, or their interests are not represented by, any eligible organization, then the Secretary may select Board members from nominations made by such producers in the manner authorized by the Secretary.

The proposal made by NMPF essentially repeated the statutory language. The proposal also included a paragraph that would allow eligible organizations for any region to caucus and select a single nominee for each position. In addition, the proposal did not include a mechanism for obtaining nominations from producers not represented by the eligible organizations. Although these proposals do not directly contradict the statute, they would restrict the number of nominees from which the Secretary would select Board members.

The Act gives the Secretary authority to appoint the Board. The Department contends that any regulatory language that tends to restrict the number of nominees to less than two for each Board position contradicts the statutory authority granted to the Secretary. Consequently, the paragraph of § 1150.133 dealing with caucuses of eligible organizations is amended to encourage caucus participants to nominate more than one individual for each position. Also, language is added to allow the Secretary to solicit nominations from milk producers through general farmer organizations or by other means when the Secretary determines that a substantial number of producers are not represented by the eligible organizations. These changes are designed to preserve the Secretary's authority to appoint Board members from a broad list of nominees.

The NMPF proposal also included a provision to have the Department announce anticipated vacancies and require that nominations be submitted to the Secretary sixty days before the anticipated vacancy. No interested parties commented on this provision. This provision is consistent with the Act and is adopted with one change which specifies that the Department should announce vacancies at least 120 days prior to the expiration of terms.

The order should contain a procedure for filling unexpected vacancies. The procedure proposed by NMPF in § 1150.136 of the proposed order would have required the Secretary to select a replacement Board member from a restricted list of previous nominees. For the same reasons given earlier, the authority granted the Secretary to appoint the Board implies a certain flexibility to choose individuals without being restricted to a single nominee. Therefore, the final order contains less restrictive language in § 1150.136.

The order should provide some guidance on potential conflicts of interest of Board members. This issue was raised in the proposed order document and in the oral and written comments. Most interested parties did not believe that conflicts of interest would be a major problem. There was little support from interested parties for a rule which would prohibit a Board member from serving on the board of another dairy promotion organization while serving on the national Board. In fact, several persons suggested that such dual board membership be encouraged

to aid in the coordination of efforts between the national Board and State and regional programs.

Since qualified State and regional programs benefit from this program through the workings of the credit system for producer participation and some of these programs might receive some direct funding from the Board, dual board memberships do raise a possibility of potential conflicts of interest. Without some limit on dual board membership activity, the Board would be open to criticism from the media, interested dairy organizations, and the general public.

Conflict of interest problems can be avoided if members of the Board disclose all relationships they may have with other dairy promotion organizations or an organization that has any relationship with the Board. In addition to disclosure, it is necessary for any member of the Board to abstain from any Board discussion or voting on a matter that involves an organization with whom the Board member has an ongoing relationship. The combination of disclosure and disqualification on matters that may give an appearance of a conflict of interest would diffuse the problem. Consequently, § 1150.134 contains a requirement that nominees agree to the practice of disclosure and disqualification as a condition of appointment.

The proposed § 1150.135 dealing with acceptance of Board positions has been integrated into the nomination process along with the rule on conflicts of interest discussed above. This editorial change simply provides that nominees must agree to serve at the time of nomination. This will speed the appointment process and avoid unnecessary delays.

Section 1150.137 outlines basic procedures for the conduct of Board meetings. The language has been changed from the proposal to clarify the basic rules. All Board members must be given notice of meetings. A majority of the members shall constitute a quorum at any meeting. Any action of the Board requires concurring votes from a majority of the members present. Business can be conducted with affirmative votes of a majority of the Board by mail, telephone or telegraph in emergency situations if all members are notified and given the opportunity to participate and the action is confirmed promptly in writing. Procedures to supplement these basic rules can be adopted by the Board.

Section 1150.138 restates the statutory provision that Board members serve without compensation. The members will be reimbursed for their necessary and reasonable expenses as approved by the Secretary. This provision was proposed by NMPF and no interested parties opposed its adoption.

4. Powers and Duties of the Board

The provisions of §§ 1150.139 and 1150.140 of the proposed order generally restated the powers and duties specified in section 113 of the Act. Most of the items covered in these sections generated few comments from interested parties and are adopted as proposed. The Board's major responsibility is to develop a program to promote the use of fluid milk and dairy products. The Board can undertake this responsibility itself or it can contract with other parties. In the end, the Board must develop a program along with related budgets and submit both to the Secretary for approval, and carry out those programs approved by the Secretary. The Board must provide the Secretary with notice of all of the meetings, an annual audit, and any other information the Secretary requests.

Also, the Board is given the power to administer the order and to make rules and regulations to effectuate that administration. The Board may disseminate information to dairy farmers and eligible organizations and must publish an annual report of its activities. The Board must require certain information of its contractors and the contractors must agree to make all books and records concerning the contract available for audit by the Board or the Secretary. The Board is directed to encourage coordination among all organizations that promote dairy products.

Three issues concerning powers and duties of the Board did generate comments from interested parties: composition of the executive committee, advisory committees, and Board staff. In addition, two paragraphs have been added to § 1150.140 for completeness.

Composition of the Board's executive committee was a significant issue at the public meeting and in written comments. The Act states that the Board shall appoint an executive committee whose membership "shall equally reflect each of the different regions in the United States in which milk is produced." NMPF proposed that the executive committee be made up of one member from each of the proposed 13 geographic regions used to determine Board membership. A representative of Farmers' Union Milk marketing Cooperative objected to this proposal because the executive committee members would not represent equal portions of the nation's milk production. The spokesman was concerned that the dairy industry of Wisconsin and the Upper Midwest would be underrepresented on the executive committee. Ten members of Congress submitted comments supporting the Farmers' Union position.

In written comments, Farmers' Union changed their position, proposing that the order not specify the size of the executive committee, but that the Board be given the discretion to appoint an executive committee that "shall equally reflect each of the different regions in the United States in which milk is produced, taking into account the geographic distribution of milk production volume." In addition, Farmers' Union recommended that the word "Area" be substituted for "region" to remove any structural parallel between this section and § 1150.131 dealing with Board membership.

The Act requires the Board to establish an executive committee. However, the size and composition of this committee are not specified because the term "region" is not defined by the Act. Since "region" is not defined with regard to Board membership or executive committee membership, the executive committee structure proposed by NMPF is not required by the Act. Consequently, the final order in § 1150.140(b) requires the Board to establish an executive committee whose membership in the words of the Act "shall equally reflect each of the different regions in the United States in which milk is produced." This language gives the Board flexibility to establish an executive committee of any size that is found to be workable and meets the criteria established by the Act.

NMPF proposed that the Board be given authority to establish advisory committees and to pay the reasonable expenses and fees of the members of such committees. MIF and other industry representatives proposed that the order mandate two advisory committees of industry representatives (one of chief executive officers and one of marketing executives) to be appointed by the Secretary. Although the Act would seem to permit the establishment of advisory committees by the Board, there is no statutory support for the proposal to have members of such committees appointed by the Secretary. Therefore, the MIF proposal cannot be adopted. The order adopted by this decision gives the Board authority to appoint advisory committees and pay their associated costs as proposed by NMPF.

The Act speaks of employees of the Board and thus, by implication, gives the Board authority to hire a staff. The

NMPF proposal gives the Board the authority to appoint or employ such persons as it may deem necessary. One interested party commented on this proposal and suggested that the Board be required to hire a full-time executive director. The Act gives the authority to implement the national dairy promotion program to the Board. The Board should be granted as much flexibility as possible within statutory limits to develop and administer the program as it deems appropriate. The order should give the Board authority to hire a staff but should not dictate the structure of that staff. The Secretary will, however, retain general budgetary oversight over all Board operations.

The Act gives the Board power to receive, investigate and report to the Secretary complaints of violations. This language is repeated in § 1150.139(d) of the order. This provision gives the Board primary responsibility to initiate enforcement of the order.

In addition to the powers and duties already discussed, it is necessary to add two paragraphs to the duties section proposed by NMPF. The first, § 1150.140(f), restates the statutory requirement that the Board undertake studies dealing with use of fluid milk and dairy products by the military and the feasibility of converting surplus nonfat dry milk into casein. The other, § 1150.140(d), states that the Board have an affirmative duty to review all State and regional programs that promote milk and dairy products with brand name advertising and recommend to the Secretary whether these programs should be classified as qualified programs. The rationale for this provision was outlined in the discussion of branded advertising.

5. Expenses and Collection of Assessments

The order specifies that the Board is authorized to incur certain expenses that shall be paid from assessments. The provisions pertaining to expenses are adopted as proposed by NMPF. No views or comments were received to indicate any major dissatisfaction or problems with the proposed provisions.

As proposed, the Board is authorized to incur such expenses as the Secretary finds are reasonable for the Board to exercise its powers and perform its duties in accordance with the order. After the first full year of operation of the order, the Board's administrative expenses are not to exceed 5 percent of the projected revenue of that fiscal year. In addition, the order specifies that the Board must reimburse the Secretary for administrative costs incurred after the order has been promulgated by the Department. Such administrative costs incurred by the Department include the cost of conducting the required referendum, and any subsequent referendum that might be conducted, to determine whether producers approve the continuation of the order. In addition, the Department's administrative costs include the cost of the reports and studies that are required in section 301(4) of Title III of the Dairy and Tobacco Adjustment Act of 1983. Specifically, this includes the cost of the annual reports that the Secretary must submit to Congress not later than July 1, 1985, and July 1 of each year thereafter, which must include an independent analysis of the effectiveness of the Dairy Research and Promotion Order contained herein.

The assessment provisions represent a major operational section of the order and are contained in § 1150.152. The section, as originally proposed by NMPF, contained provisions to specify who is responsible for making payments to the Board, the rate of such payment, the manner by which producers may obtain credits for participation in another program, when payments must be made, charges on overdue accounts and authority for the Secretary to establish temporary rules to act in place of the Board during the initial implementation period prior to the appointment of the Board.

The order provisions in this section have been altered significantly from the provisions proposed by NMPF. These changes, however, are primarily structural changes to simplify and clarify the reading and meaning of the provisions. Certain provisions have been deleted and others have been placed on other sections. The major concepts of the NMPF proposal, however, are carried out in the revision of the section.

As required by the Act, all producers whose milk is produced in the United States are subject to a mandatory assessment to provide the funds necessary to carry out the order. The provisions specify that persons who pay producers must collect and remit an assessment to the Board, while producers who market milk of their own farm production must remit an assessment directly to the Board.

Several interested parties suggested alternatives that would require that all assessments be remitted to the Secretary rather than the Board, or that State promotion programs collect assessments from persons who pay producers and, in turn, pay the appropriate assessments to the Board. These alternatives are not adopted because the Act specifically states who shall collect the assessments and that these parties shall remit the assessments to the Board.

The provisions specify that the rate of assessment is 15 cents per hundredweight, but that a producer can obtain a credit of up to 10 cents per hundredweight for contributions to a qualified State or regional program. However, for milk produced during May 1984, the credit can be up to 15 cents per hundredweight under certain conditions. NMPF proposed that the maximum 15-cent credit apply through May 29, 1984, and this has been extended through the entire month. Such extension will simplify the process for persons who are responsible for remitting the assessment to the Board in that they will have to be concerned only with one rate for the entire month.

The provisions that specify the action that must be taken by producers in order to receive a credit for contributions to another program have been modified from those proposed by NMPF in order to simplify the credit process for both producers and handlers.

NMPF proposed that producers certify that they are participating in another program. Such language implied that producers would be required to file a form with the paying handler that identified the other program and the rate of contributions. This requirement would have applied to all producers who are not represented by a cooperative association that could make a certification on behalf of its members.

This process has been modified to specify that a producer who can establish participation in a qualified State or regional program shall receive a credit. A producer will be able to establish participation in a number of different ways. This would include an authorized deduction for participation in another program that is already in existence, a State law that requires a deduction by a handler to fund a qualified program, or a statement to the paying handler by a qualified program indicating that certain producers are participating in such program. Also, as in the NMPF proposal, a cooperative association could establish the participation of its members with paying handlers. It is anticipated that only those producers who make individual payments to a qualified program (other than through a payroll deduction) will have to file a certification with the paying handler. Forms will be provided for this purpose. Also, the qualified program will have to validate the producer's participation. Even in these instances, however, a producer will not have to individually establish

participation in a qualified program if such program takes the initiative to inform the paying handler of the producer's participation. Persons who market milk and dairy products of their own farm production to consumers will have to establish participation in another program with the Board, and participation must be validated by the qualified program in order to receive credit for such participation. Overall, this process of establishing participation in qualified programs should reduce the paperwork burden for both producers and handlers as it incorporates within the credit process payment and funding processes that are already in place.

The NMPF proposed order contained provisions that required certain specific actions by qualified programs that provide for refunds. These included requiring the qualified program to send any requested refunds to the Board, to notify producers that their requested refunds were sent to the Board, and to send any requested refunds to other qualified programs if so designated by the producer. These provisions have been removed from this section of the order as the primary requirement for qualifying a program that provides for refunds is contained in the provisions concerning the qualification of State and regional programs. Basically, in order to be qualified, such programs must agree to send requested refunds to the Board at the time they would normally make the refund to the producer. Other conditions (such as sending a notice to producers or sending funds to other programs) have been deleted since they intrude into the operations of other programs. However, qualified State and regional programs will have the option to send requested refunds to other qualified programs if they desire to do so and are requested to take such action by the producer. Such option is contained in the provisions concerning the qualification of such programs.

As proposed by NMPF, the order provides that the Secretary can act in place of the Board during the initial implementation period of the order. However, this authority is interpreted to apply also in the event the Board has not adopted operating rules at the time that the initial assessments must be remitted under the provisions. In the event that the Secretary must act in place of the Board, an additional provision providing for adjustments of accounts has been established in another section of the order. The provisions apply to the Department and the Board and are necessary to handle overpayments and underpayments.

A provision of the NMPF proposal granting temporary authority for the Secretary to issue credits on behalf of the Board has been deleted. Neither the Secretary nor the Board issues credits. Credits are authorized by the order when the paying handler is determining the amount of money to remit to the Board (or initially to the Secretary), and are based, up to the maximum amount authorized by the order, on the basis of a producer's actual participation in a qualified program.

The order, as was proposed by NMPF, contains a provision that applies a charge on overdue accounts. No opposition was presented to such provision and it is necessary to provide a compliance incentive. In addition, the Act provides for specific penalties for noncompliance and these have been included in the order. Both of these provisions, however, have been deleted from the assessments section and are provided for in another section.

The issue of who has the responsibility to enforce the collection of assessments is not addressed within the assessment provisions of the order. However, a discussion of this issue is appropriate here.

The NMPF proposed that assessments and reports be submitted to the Board, but that no Board member or any other producer have access to confidential information. The proposal specified that the Board had the responsibility to report complaints of violations to the Secretary, but that books and records of handlers must be made available only to the Secretary. The implication of the proposal is that the Secretary would have the primary responsibility to enforce the collection of assessments. MIF further proposed that no confidential information of a handler be disclosed to Board members, agents, appointees or employees of the Board.

Contrary to the above proposals, the Board should have the initial responsibility or duty to enforce the collection of assessments. The Act specifies that assessments shall be remitted to the Board by persons who pay producers. In order to verify the assessments, reports must necessarily also be submitted to the Board. The Act also specifies that the Board is responsible for reporting complaints of violations. Since the Board must report violations and receive reports, the Board has the initial responsibility with respect to any violations of the order. Also, section 113(k) of the Act contemplates review of handler reports by employees of the Board because these employees are subject to the penalty provisions of the Act for disclosure of confidential information.

The order provides the Board with the authority to conduct a fully coordinated dairy promotion, research, and nutrition education program. For the program to be effective, and in view of the reasons presented above, the Board must have the authority for the initial enforcement of the order provisions. Consequently, the order provides that the Board has the responsibility to enforce the terms and provisions of the order, including the collection of assessments. The Board, however, would have the option to request the assistance of the Secretary to carry out this function since the Act gives the Secretary authority to initiate legal action to enforce the order. Furthermore, the order provides that a handler's books and records shall be made available to employees of the Board, as well as to the Secretary. Any person who willfully violates any provision of the order by refusing to provide needed information or by releasing confidential information is subject to the penalty provision of the Act. It is noted, however, that no Board member shall have access to such confidential information.

6. Qualified State and Regional Programs

Coordination between the national dairy promotion program and existing State and regional programs is given high priority by the Act. To facilitate coordination, the Act allows producers to subtract their contributions to qualified State or regional programs from the 15-cent per hundredweight assessment payable to the national program.This credit system, as previously discussed, allows existing programs to preserve their source of funds and help the national program carry out a coordinated dairy promotion effort.

In addition to the credit mechanism, the Act in section 121(a) states that nothing in the Act may be construed to preempt or supersede any other program relating to dairy product promotion organized and operated under the laws of the United States or any State. This statutory policy statement implies that the order should provide State and regional programs with as much freedom to continue their present operations as is consistent with a coordinated effort.

The Act does not provide any detailed definition of State and regional programs. It only states that for contributions to be eligible for credits, the program must be "active," "ongoing," and "qualified." The NMPF proposal gives the Secretary authority to

determine qualification. The standards for qualification were (1) the program conduct promotion, research, and nutrition education activities as defined by the order, (2) be active and ongoing, (3) be financed by producers, (4) conduct a program over a major portion of a State or region, (5) not utilize private brand or trade names in advertising, and (6) for programs that allow refunds to producers, an assurance that the refunds would be sent to the national program or another qualified program. Only the prohibition on brand advertising drew significant opposition, although the requirement to be "active and ongoing" and the treatment of refunds generated discussion at the public meeting and in written comments.

The issue of brand advertising has been discussed previously in this decision. It has been determined that authority to qualify State and regional programs will rest with the Secretary, but the Board will be designated to review all programs that conduct brand advertising to determine if they tend to increase the overall demand for milk and dairy products. The Board will send a recommendation on each program to the Secretary who will make the final decision. This procedure will allow the Board to develop a uniform approach to the issue of brand advertising.

NMPF proposed that qualification be granted only to programs that operated in a major portion of a State or region. The Department received opposition comments from producer funded programs that operate in major metropolitan areas that do not provide services over a large geographic area. These programs asserted that they make a significant contribution to dairy promotion and should not be denied qualification because they operate within a small geographic area. The Department does not interpret the statute to mean that these programs should be denied qualification. In addition, the language submitted by NMPF was vague and would be difficult to administer. Therefore, this requirement was deleted from the final order.

Several State and regional programs that are funded by deduction from producer payrolls allow producers to request and receive a refund of their contributions. All programs operated under Federal milk orders provide for refunds as do some State sponsored programs. Coordinating these "voluntary" programs with the mandatory national program is a difficult task. The order must provide a mechanism that assures that every producer will contribute at least 15 cents per hundredweight to promote dairy products without preempting the operation of existing voluntary programs. As outlined in the discussion of collection of assessments, the simplest and most direct way of accomplishing this goal is to require that all voluntary programs that petition to be qualified so their producer contributors can receive the credit, agree to forward producer refunds (up to 10 cents per hundredweight) to the National Board or at the option of the program and producers, to another qualified program. Although this procedure does preempt some State laws with regard to refunds, this is the only approach that assures that all producers contribute 15 cents per hundredweight to promotion efforts without forcing producers to contribute 15 cents directly to the national program while continuing to fund State or regional programs or denying qualified status to such voluntary programs. Both of the alternatives would be inconsistent with the policy directive to encourage a coordinated promotion effort.

NMPF originally proposed that programs must have been active and ongoing on the date of enactment of the Act to be eligible for qualification. At the public meeting, the proponent amended the proposal to exempt from this provision programs operated under State or Federal law. This exemption was proposed so that the order would not conflict with section 121(a) of the Act dealing with preemption of programs organized under State or Federal law. Four members of the United States Senate submitted comments stating that the intent of the statute was to accommodate programs active at the time of enactment but not programs initiated after that date.

The Department agrees with the interpretation of the statute put forward by NMPF. The Act was designed to accommodate only existing State or regional programs. However, section 121(a) dealing with preemption must be weighed against the other statutory language. The NMPF proposal is a reasonable compromise of these conflicting parts of the Act.

As stated previously, this order attempts to apply the same standards to State and regional programs as are applied to the national program. The Act in section 113(j) prohibits the Board from using any funds to influence governmental policy or action. To provide consistency among all programs, this prohibition should be applied to State and regional programs. This requirement is included as § 1150.153(b)(6).

7. Additional Regulatory Provisions

In addition to the order provisions discussed in the first six sections of this decision, certain additional regulations are necessary to implement the national dairy promotion program. These are the procedure for certification of milk producer organizations and the rules of practice governing proceedings on petitions to modify or to be exempted from the order.

The rules of practice governing proceedings on petitions to modify or to be exempted from the order appear in §§ 1150.250 through 1150.252. They were included as a Departmental proposal in the proposed order and notice of public meeting document. No interested party submitted comments on these proposed procedures. Therefore, they are adopted as proposed.

The rules for certification of milk producer organizations appear as §§ 1150.270 through 1150.278. Previously, they were published as an emergency interim final rule. This emergency treatment was necessary because of the implementation deadline imposed by the Act. Interested parties were given an opportunity to comment on the interim rule. No comments were received. The rationale for these rules which were published in the emergency interim final rule document (49 FR 4068) is adopted by this decision. The interim rules are annexed to this order and made final.

Additional Findings

It is hereby found and determined that because of a statutory deadline, it is impractical, unnecessary and contrary to the public interest to delay the effective date of the issuance of these rules for 30 days after their publication in the **Federal Register.** In order to carry out the statutory timetable for implementation of the order, it is necessary that all of the provisions contained in this Part 1150 be effective on April 1, 1984, except that the provisions in § 1150.152 shall be effective on May 1, 1984.

List of Subjects in 7 CFR Part 1150

Milk, Dairy products, Promotion and advertising, Research.

Title 7 of the Code of Federal Regulations, Chapter X is amended by adding to Part 1150 "Subpart—Dairy Research and Promotion Order" and "Subpart—Rules of Practice Governing Proceedings on Petitions to Modify or to be Exempted From an Order" and revising "Subpart—Procedure for Certification of Milk Producer Organizations" to read as follows:

PART 1150—DAIRY PROMOTION PROGRAM

Subpart—Dairy Research and Promotion Order

Definitions

Sec.
1150.101 Act.
1150.102 Department.
1150.103 Secretary.
1150.104 Board.
1150.105 Person.
1150.106 United States.
1150.107 Fiscal period.
1150.108 Eligible organization.
1150.109 Qualified State or regional program.

Subpart—Dairy Research and Promotion Order

Definitions

§ 1150.101 Act.

"Act" means Title I, Subtitle B, of the Dairy and Tobacco Adjustment Act of 1983, Pub. L. 98–180, 97 Stat. 1128, as approved November 29, 1983, and any amendments thereto.

§ 1150.102 Department.

"Department" means the United States Department of Agriculture.

§ 1150.103 Secretary.

"Secretary" means the Secretary of Agriculture of the United States or any other officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in the Secretary's stead.

§ 1150.104 Board.

"Board" means the National Dairy Promotion and Research Board established pursuant to § 1150.131.

§ 1150.105 Person.

"Person" means any individual, group of individuals, partnership, corporation, association, cooperative or other entity.

§ 1150.106 United States.

"United States" means the 48 contiguous States in the continental United States.

§ 1150.107 Fiscal period.

"Fiscal period" means the calendar year or such other annual period as the Board may determine.

§ 1150.108 Eligible organization.

"Eligible organization" means any organization which has been certified by the Secretary pursuant to §§ 1150.270 through 1150.278 of this Part.

§ 1150.109 Qualified State or regional program.

"Qualified State or regional program" means any State or regional dairy product promotion, research or nutrition education program which is certified as a qualified program pursuant to § 1150.153.

§ 1150.110 Producer.

"Producer" means any person engaged in the production of milk for commercial use.

§ 1150.111 Milk.

"Milk" means any class of cow's milk produced in the United States.

§ 1150.112 Dairy products.

"Dairy products" means products manufactured for human consumption which are derived from the processing of milk, and includes fluid milk products.

§ 1150.113 Fluid milk products.

"Fluid milk products" means those milk products normally consumed in liquid form as a beverage.

§ 1150.114 Promotion.

"Promotion" means actions such as paid advertising, sales promotion, and publicity to advance the image and sales of, and demand for, dairy products generally.

§ 1150.115 Research.

"Research" means studies testing the effectiveness of market development and promotion efforts, studies relating to the nutritional value of milk and dairy products, and other related efforts to expand demand for dairy products.

§ 1150.116 Nutrition education.

"Nutrition education" means those activities intended to broaden the understanding of sound nutritional principles, including the role of milk and dairy products in a balanced diet.

§ 1150.117 Plans and projects.

"Plans and projects" means promotion, research and nutrition education plans, studies or projects pursuant to §§ 1150.139, 1150.140 and 1150.161.

§ 1150.118 Marketing.

"Marketing" means the sale or other disposition in commerce of dairy products.

§ 1150.119 Cooperative association.

"Cooperative association" means any cooperative marketing association of producers which is organized under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act".

National Dairy Promotion and Research Board

§ 1150.131 Establishment and membership.

(a) There is hereby established a National Dairy Promotion and Research Board of thirty-six members. For purposes of nominating producers to the Board, the United States shall be divided into thirteen geographic regions and the number of Board members from each region shall be as follows:

(1) One member from region number one comprised of the following States: Washington and Oregon.

(2) Four members from region number two comprised of the following State: California.

(3) Two members from region number three comprised of the following States: Arizona, Colorado, Idaho, Montana, Nevada, Utah and Wyoming.

(4) Two members from region number four comprised of the following States: Arkansas, Kansas, New Mexico, Oklahoma and Texas.

(5) Four members from region number five comprised of the following States: Minnesota, North Dakota and South Dakota.

(6) Six members from region number six comprised of the following State: Wisconsin.

(7) Three members from region number seven comprised of the following States: Illinois, Iowa, Missouri and Nebraska.

(8) Two members from region number eight comprised of the following States: Alabama, Kentucky, Louisiana, Mississippi and Tennessee.

(9) Three members from region number nine comprised of the following States: Indiana, Michigan, Ohio and West Virginia.

(10) Two members from region number ten comprised of the following States: Florida, Georgia, North Carolina, South Carolina and Virginia.

(11) Three members from region number eleven comprised of the following States: Delaware, Maryland, New Jersey and Pennsylvania.

(12) Three members from region number twelve comprised of the following State: New York.

(13) One member from region number thirteen comprised of the following States: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island and Vermont.

(b) The Board shall be composed of milk producers appointed by the Secretary either from nominations submitted pursuant to § 1150.133 or in accordance with § 11150.136. A milk producer may be nominated only to represent the region in which such producer's milk is produced.

(c) At least every five years, and not more than every three years, the Board shall review the geographic distribution of milk production volume throughout the United States and, if warranted, shall recommend to the Secretary a reapportionment of regions and/or a modification of the number of members from regions in order to best reflect the geographic distribution of milk production volume in the United States.

(d) The number of members for each region which shall serve on the Board shall be determined by dividing the total pounds of milk produced in the United States for the calendar year previous to the date of review by 36 which provides a factor of pounds of milk per member, and then dividing the total pounds of milk for each region by such factor.

(e) In determining the volume of milk produced in the United States, the Board and the Secretary shall utilize the information received by the Board pursuant to § 1150.171 and data published by the Department.

§ 1150.132 Term of office.

(a) The members of the Board shall serve for terms of three years, except that the members appointed to the initial Board shall serve proportionately, for terms of one, two and three years.

(b) Each member of the Board shall serve until April 30 of the year in which his/her term expires, except that a retiring member may serve until a successor is appointed.

(c) No member shall serve more than two consecutive terms.

§ 1150.133 Nominations.

Nominations for members of the Board shall be made in the following manner:

(a) Upon effectuation of this provision, the Secretary shall solicit nominations for the initial Board from all eligible organizations. If the Secretary determines that a substantial number of producers are not members of, or their interests are not represented by, such eligible organizations, the Secretary shall also solicit nominations from such producers through general farmer organizations or by other means.

(b) After the appointment of the initial Board, the Secretary shall announce at least 120 days in advance when a Board member's term is expiring and shall solicit nominations for that position in the manner described in § 1150.133(a). Nominations for such position should be submitted to the Secretary not less than 60 days prior to the expiration of such term.

(c) An eligible organization may submit nominations only for positions on the Board that represent regions in which such eligible organization can establish that it represents a substantial number of producers. If there is more than one Board position for any such region, the organization may submit nominations for each position.

(d) Where there is more than one eligible organization representing producers in a specific region, they may caucus and jointly nominate producers for each position representing that region on the Board for which a member is to be appointed. If joint agreement is not reached with respect to any such nominations, or if no caucus is held, each eligible organization may submit to the Secretary nominations for each appointment to be made to represent that region.

§ 1150.134 Nominee's agreement to serve.

Any producer nominated to serve on the Board shall file with the Secretary at the time of the nomination a written agreement to:

(a) Serve on the Board if appointed;

(b) Disclose any relationship with any organization that operates a qualified State or regional program or has a contractual relationship with the Board; and

(c) Withdraw from participation in deliberations, decision-making, or voting on matters where paragraph (b) applies.

§ 1150.135 Appointment.

From the nominations made pursuant to § 1150.133, the Secretary shall appoint the members of the Board on the basis of representation provided for in § 1150.131(a).

§ 1150.136 Vacancies.

To fill any vacancy occasioned by the death, removal, resignation, or disqualification of any member of the Board, the Secretary shall appoint a successor from the most recent list of nominations for the position or from nominations made by the Board.

§ 1150.137 Procedure.

(a) A majority of the members shall constitute a quorum at a properly convened meeting of the Board. Any action of the Board shall require the concurring votes of at least a majority of those present. The Board shall establish rules concerning timely notice of meetings.

(b) The Board may take action upon the concurring votes of a majority of its members by mail, telephone, or telegraph when in the opinion of the chairman of the Board such action must be taken before a meeting can be called.

Action taken by this emergency procedure is valid only if all members are notified and provided the opportunity to vote and any telephone vote is confirmed promptly in writing. Any action so taken shall have the same force and effect as though such action had been taken at a properly convened meeting of the Board.

§ 1150.138 Compensation and reimbursement.

The members of the Board shall serve without compensation but shall be reimbursed for necessary and reasonable expenses, including a per diem allowance as recommended by the Board and approved by the Secretary, incurred by them in the performance of their duties under this subpart.

§ 1150.139 Powers of the Board.

The Board shall have the following powers:

(a) To receive and evaluate, or on its own initiative develop, and budget for plans or projects to promote the use of fluid milk and dairy products as well as projects for research and nutrition education and to make recommendations to the Secretary regarding such proposals;

(b) To administer the provisions of this subpart in accordance with its terms and provisions;

(c) To make rules and regulations to effectuate the terms and provisions of this subpart;

(d) To receive, investigate, and report to the Secretary complaints of violations of the provisions of this subpart;

(e) To disseminate information to producers or eligible organizations through programs or by direct contact utilizing the public postage system or other systems;

(f) To select committees and subcommittees of Board members, and to adopt such rules for the conduct of its business as it may deem advisable;

(g) To establish advisory committees of persons other than Board members and pay the necessary and reasonable expenses and fees of the members of such committees;

(h) To recommend to the Secretary amendments to this subpart; and

(i) With the approval of the Secretary, to invest, pending disbursement pursuant to a plan or project, funds collected through assessments authorized under § 1150.152 in, and only in, obligations of the United States or any agency thereof, in general obligations of any State or any political subdivision thereof, in any interest-bearing account or certificate of deposit of a bank that is a member of the Federal Reserve System, or in obligations fully guaranteed as to principal and interest by the United States.

§ 1150.140 Duties of the Board.

The Board shall have the following duties:

(a) To meet not less than annually, and to organize and select from among its members a chairman and such other officers as may be necessary;

(b) To appoint from its members an executive committee whose membership shall equally reflect each of the different regions in the United States in which milk is produced, and to delegate to the committee authority to administer the terms and provisions of this subpart under the direction of the Board and within the policies determined by the Board;

(c) To appoint or employ such persons as it may deem necessary and define the duties and determine the compensation of each;

(d) To review all programs that promote milk and dairy products on a brand or trade name basis that have requested certification pursuant to § 1150.153, and to recommend to the Secretary whether such request should be granted;

(e) To develop and submit to the Secretary for approval, promotion, research, and nutrition education plans or projects resulting from research or studies conducted either by the Board or others;

(f) To solicit, among other proposals, research proposals that would increase the use of fluid milk and dairy products by the military and by persons in developing nations, and that would demonstrate the feasibility of converting surplus nonfat dry milk to casein for domestic and export use;

(g) To prepare and submit to the Secretary for approval, budgets on a fiscal period basis of its anticipated expenses and disbursements in the administration of this subpart, including probable costs of promotion, research and nutrition education plans or projects, and also including a general description of the proposed promotion, research and nutrition education programs contemplated therein;

(h) To maintain such books and records, which shall be available to the Secretary for inspection and audit, and prepare and submit such reports from time to time to the Secretary as the Secretary may prescribe, and to make appropriate accounting with respect to the receipt and disbursement of all funds entrusted to it;

(i) With the approval of the Secretary, to enter into contracts or agreements with national, regional or State dairy promotion and research organizations or other organizations or entities for the development and conduct of activities authorized under §§ 1150.139 and 1150.161, and for the payment of the cost thereof with funds collected through assessments pursuant to § 1150.152. Any such contract or agreement shall provide that:

(1) The contractors shall develop and submit to the Board a plan or project together with a budgets or budget which shall show the estimated cost to be incurred for such plan or project;

(2) Any such plan or project shall become effective upon approval of the Secretary; and

(3) The contracting party shall keep accurate records of all of its transactions and make periodic reports to the Board of activities conducted and an accounting for funds received and expended, and such other reports as the Secretary or the Board may require. The Secretary or employees of the Board may audit periodically the records of the contracting party;

(j) To prepare and make public, at least annually, a report of its activities carried out and an accounting for funds received and expended;

(k) To have an audit of its financial statements conducted by a certified public accountant in accordance with generally accepted auditing standards, at least once each fiscal period and at such other times as the Secretary may request, and to submit a copy of each such audit report to the Secretary;

(l) To give the Secretary the same notice of meetings of the Board, committees of the Board and advisory committees as is given to such Board or committee members in order that the Secretary, or a representative of the Secretary, may attend such meetings;

(m) To submit to the Secretary such information pursuant to this subpart as may be requested; and

(n) To encourage the coordination of programs of promotion, research and nutrition education designed to strengthen the dairy industry's position in the marketplace and to maintain and expand domestic and foreign markets and uses for fluid milk and dairy products produced in the United States.

Expenses and Assessments

§ 1150.151 Expenses.

(a) The Board is authorized to incur such expenses (including provision for a reasonable reserve) as the Secretary finds are reasonable and likely to be incurred by the Board for its maintenance and functioning and to enable it to exercise its powers and

perform its duties in accordance with the provisions of this subpart. However, after the first full year of operation of the order, administrative expenses incurred by the Board shall not exceed 5 percent of the projected revenue of that fiscal year. Such expenses shall be paid from assessments collected pursuant to § 1150.152.

(b) The Board shall reimburse the Secretary, from assessments collected pursuant to § 1150.152, for administrative costs incurred by the Department after May 1, 1984.

§ 1150.152 Assessments.

(a) Each person making payment to a producer for milk produced in the United States and marketed for commercial use shall collect an assessment on all such milk handled for the account of the producer at the rate of 15 cents per hundredweight of milk for commercial use or the equivalent thereof and shall remit the assessment to the Board.

(b) Any producer marketing milk of that producer's own production in the form of milk or dairy products to consumers, either directly or through retail or wholesale outlets, shall remit to the Board an assessment on such milk at the rate of 15 cents per hundredweight of milk for commercial use or the equivalent thereof.

(c) In determining the assessment due from each producer pursuant to § 1150.152 (a) and (b), a producer who is participating in a qualified State or regional program(s) shall receive a credit for contributions to such program(s), but not to exceed the following amounts:

(1) In the case of contributions for milk marketed on or before May 31, 1984, up to the actual rate of contribution that was in effect under such program(s) on November 29, 1983, not to exceed 15 cents per hundredweight of milk marketed.

(2) In all other cases, the credit shall not exceed 10 cents per hundredweight of milk marketed.

(d) In order for a producer described in § 1150.152(a) to receive the credit authorized in § 1150.152(c), either the producer or a cooperative association on behalf of the producer must establish to the person responsible for remitting the assessment to the Board that the producer is contributing to a qualified State or regional program. Producers who contribute to a qualified program directly (other than through a payroll deduction) must establish with the person responsible for remitting the assessment to the Board, with validation by the qualified program, that they are making such contributions.

(e) In order for a producer described in § 1150.152(b) to receive the credit authorized in § 1150.152(c), the producer and the applicable qualified State or regional program must establish to the Board that the producer is contributing to a qualified State or regional program.

(f) The collection of assessments pursuant to § 1150.152 (a) and (b) shall begin with respect to milk marketed on and after the effective date of this section and shall continue until terminated by the Secretary. If the Board is not constituted by the date the first assessments are to be collected, the Secretary shall have the authority to receive the assessments on behalf of the Board. The Secretary shall remit such assessments to the Board when it is constituted.

(g) Each person responsible for the remittance of the assessment pursuant to § 1150.152 (a) and (b) shall remit the assessment to the Board not later than the last day of the month following the month in which the milk was marketed.

(h) Money remitted to the Board shall be in the form of a negotiable instrument made payable to "National Dairy Promotion and Research Board." Remittances and reports specified in § 1150.171 shall be mailed to the location designated by the Secretary or the Board.

§ 1150.153 Qualified State or regional dairy product promotion, research or nutrition education programs.

(a) Any organization which conducts a State or regional dairy product promotion, research or nutrition education program may apply to the Secretary for certification of qualification so that producers may receive credit pursuant to § 1150.152(c) for contributions to such program.

(b) In order to be certified by the Secretary as a qualified program, the program must:

(1) Conduct activities as defined in §§ 1150.114, 1150.115, and 1150.116 that are intended to increase consumption of milk and dairy products generally;

(2) Except for programs operated under the laws of the United States or any State, have been active and ongoing before enactment of the Act;

(3) Be financed primarily by producers, either individually or through cooperative associations;

(4) Not use a private brand or trade name in its advertising and promotion of dairy products unless the Board recommends and the Secretary concurs that such preclusion should not apply;

(5) Certify to the Secretary that any requests from producers for refunds under the program will be honored by forwarding to either the Board or a qualified State or regional program designated by the producer that portion of such refunds equal to the amount of credit that otherwise would be applicable to that program pursuant to § 1150.152(c); and

(6) Not use program funds for the purpose of influencing governmental policy or action.

§ 1150.154 Influencing governmental action.

No funds collected by the Board under this subpart shall in any manner be used for the purpose of influencing governmental policy or action, except to recommend to the Secretary amendments to this subpart.

§ 1150.155 Adjustment of accounts.

Whenever the Board or the Department determines through an audit of a person's reports, records, books or accounts or through some other means that additional money is due the Board or that money is due such person from the Board, such person shall be notified of the amount due. The person shall then remit any amount due the Board by the next date for remitting assessments as provided in § 1150.152. Overpayments shall be credited to the account of the person remitting the overpayment and shall be applied against amounts due in succeeding months.

§ 1150.156 Charges and penalties.

(a) *Late-payment charge.* Any unpaid assessments to the Board pursuant to § 1150.152 shall be increased 1.5 percent each month beginning with the day following the date such assessments were due. Any remaining amount due, which shall include any unpaid charges previously made pursuant to this section, shall be increased at the same rate on the corresponding day of each month thereafter until paid. For the purpose of this section, any assessment that was determined at a date later than prescribed by this subpart because of a person's failure to submit a report to the Board when due shall be considered to have been payable by the date it would have been due if the report had been filed when due. The timeliness of a payment to the Board shall be based on the applicable postmark date or the date actually received by the Board, whichever is earlier.

(b) *Penalties.* Any person who willfully violates any provision of this subpart shall be assessed a civil penalty by the Secretary of not more than $1,000 for each such violation and, in the case of a willful failure to pay, collect, or remit the assessment as required by this subpart, in addition to the amount due, a

penalty equal to the amount of the assessment on the quantity of milk as to which the failure applies. The amount of any such penalty shall accrue to the United States and may be recovered in a civil suit brought by the United States. The remedies provided in this section shall be in addition to, and not exclusive of, other remedies that may be available by law or in equity.

Promotion, Research and Nutrition Education

§ 1150.161 Promotion, research and nutrition education.

(a) The Board shall receive and evaluate, or on its own initiative develop, and submit to the Secretary for approval any plans or projects authorized in §§ 1150.139, 1150.140 and this section. Such plans or projects shall provide for:

(1) The establishment, issuance, effectuation, and administration of appropriate plans or projects for promotion, research and nutrition education with respect to milk and dairy products; and

(2) The establishment and conduct of research and studies with respect to the sale, distribution, marketing and utilization of milk and dairy products and the creation of new products thereof, to the end that marketing and utilization of milk and dairy products may be encouraged, expanded, improved or made more acceptable. Included shall be research and studies of proposals intended to increase the use of fluid milk and dairy products by the military and by persons in developing nations and proposals intended to demonstrate the feasibility of converting nonfat dry milk to casein for domestic and export use.

(b) Each plan or project authorized under § 1150.161(a) shall be periodically reviewed or evaluated by the Board to insure that the plan or project contributes to an effective program of promotion, research and nutrition education. If it is found by the Board that any such plan or project does not further the purposes of the Act, the Board shall terminate such plan or project.

(c) No plan or project authorized under § 1150.161(a) shall make use of unfair or deceptive acts or practices with respect to the quality, value or use of any competing product.

Reports, Books and Records

§ 1150.171 Reports.

Each producer marketing milk of that producer's own production directly to consumers and each person making payment to producers and responsible for the collection of the assessment under § 1150.152 shall be required to report at the time for remitting assessments to the Board such information as may be required by the Board or by the Secretary. Such information may include but not be limited to the following:

(a) The quantity of milk purchased, initially transferred or which, in any other manner, are subject to the collection of the assessment;

(b) The amount of assessment remitted;

(c) The basis, if necessary, to show why the remittance is less than the number of hundredweights of milk multiplied by 15 cents; and

(d) The date any assessment was paid.

§ 1150.172 Books and records.

Each person who is subject to this subpart, and other persons subject to § 1150.171, shall maintain and make available for inspection by employees of the Board and the Secretary such books and records as are necessary to carry out the provisions of this subpart and the regulations issued hereunder, including such records as are necesssary to verify any reports required. Such records shall be retained for at least two years beyond the fiscal period of their applicability.

§ 1150.173 Confidential treatment.

All information obtained from such books, records or reports under the Act and this subpart shall be kept confidential by all persons, including employees and former employees of the Board, all officers and employees and all former officers and employees of the Department, and by all officers and all employees and all former officers and employees of contracting agencies having access to such information, and shall not be available to Board members. Only those persons having a specific need for such information in order to effectively administer the provisions of this subpart shall have access to such information. In addition, only such information so furnished or acquired as the Secretary deems relevant shall be disclosed by them, and then only in a suit or administrative hearing brought at the discretion, or upon the request, of the Secretary, or to which the Secretary or any officer of the United States is a party, and involving this subpart. Nothing in this section shall be deemed to prohibit:

(a) The issuance of general statements based upon the reports of the number of persons subject to this subpart or statistical data collected therefrom, which statements do not identify the information furnished by any person; and

(b) The publication, by direction of the Secretary, of the name of any person who has been adjudged to have violated this subpart, together with a statement of the particular provisions of the subpart violated by such person.

Miscellaneous

§ 1150.181 Proceedings after termination.

(a) Upon the termination of this subpart, the Board shall recommend not more than five of its members to the Secretary to serve as trustees for the purpose of liquidating the affairs of the Board. Such persons, upon designation by the Secretary, shall become trustees of all the funds and property owned, in the possession of, or under the control of the Board, including unpaid claims or property not delivered or any other claim existing at the time of such termination.

(b) The said trustees shall:

(1) Continue in such capacity until discharged by the Secretary;

(2) Carry out the obligations of the Board under any contract or agreements entered into by it pursuant to § 1150.140(i);

(3) From time to time account for all receipts and disbursements and deliver all property on hand, together with all books and records of the Board and of the trustees, to such persons as the Secretary may direct; and

(4) Upon the request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such persons full title and right to all of the funds, property, and claims vested in the Board or the trustees pursuant to this subpart.

(c) Any person to whom funds, property, or claims have been transferred or delivered pursuant to this subpart shall be subject to the same obligation imposed upon the Board and upon the trustees.

(d) Any residual funds not required to defray the necessary expenses of liquidation shall be turned over to the Secretary to be used, to the extent practicable, in the interest of continuing one or more of the promotion, research or nutrition education plans or projects authorized pursuant to this subpart.

§ 1150.182 Effect of termination or amendment.

Unless otherwise expressly provided by the Secretary, the termination of this subpart or of any regulation issued pursuant hereto, or the issuance of any amendment to either thereof, shall not:

(a) Affect or waive any right, duty, obligation, or liability which shall have

arisen or which may hereafter arise in connection with any provision of this subpart or any regulation issued thereunder;

(b) Release or extinguish any violation of this subpart or any regulation issued thereunder; or

(c) Affect or impair any rights or remedies of the United States, or of the Secretary, or of any person, with respect to any such violation.

§ 1150.183 Personal liability.

No member or employee of the Board shall be held personally responsible, either individually or jointly, in any way whatsoever to any person for errors in judgment, mistakes, or other acts of either commission or omission of such member or employee, except for acts of dishonesty or willful misconduct.

§ 1150.184 Patents, copyrights, inventions and publications.

Any patents, copyrights, trademarks, inventions or publications developed through the use of funds collected under the provisions of this subpart shall be the property of the U.S. Government as represented by the Board, and shall, along with any rents, royalties, residual payments, or other income from the rental, sale, leasing, franchising, or other uses of such patents, copyrights, inventions, or publications, inure to the benefit of the Board. Upon termination of this subpart, § 1150.181 shall apply to determine disposition of all such property.

§ 1150.185 Amendments.

The Secretary may from time to time amend provisions of this part. Any interested person or organization affected by the provisions of the Act may propose such amendments to the Secretary.

§ 1150.186 Separability.

If any provision of this subpart is declared invalid or the applicability thereof to any person or circumstances is held invalid, the validity of the remainder of this subpart or the applicability thereof to other persons or circumstances shall not be affected thereby.

§ 1150.187 Paperwork Reduction Act assigned number.

The information collection and recordkeeping requirements contained in §§ 1150.133, 1150.152, 1150.153, 1150.171, 1150.172 and 1150.273 of these regulations (7 CFR Part 1150) have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Control Number 0581–0147.

Subpart—Rules of Practice Governing Proceedings on Petitions To Modify or To Be Exempted From an Order

§ 1150.250 Words in the singular form.

Words in this subpart in the singular form shall be deemed to import the plural, and vice versa, as the case may demand.

§ 1150.251 Definitions.

As used in this subpart:

(a) "Act" means Title I, Subtitle B, of the Dairy and Tobacco Adjustment Act of 1983, Pub. L. 98–180, 97 Stat. 1128, as approved November 29, 1983, and any amendments thereto;

(b) "Department" means the United States Department of Agriculture;

(c) "Secretary" means the Secretary of Agriculture of the United States, or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in the Secretary's stead;

(d) "Judge" means any administrative law judge in the Office of Administrative Law Judges, United States Department of Agriculture;

(e) "Administrator" means the Administrator of the Department's Agricultural Marketing Service, or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in the Administrator's stead;

(f) "Federal Register" means the publication provided for by the Federal Register Act, approved July 26, 1935 (44 U.S.C. 1501–1511), and acts supplementing and amending it;

(g) "Order" means any regulation or any amendment thereto which may be issued pursuant to the Act;

(h) "Person" means any individual, group of individuals, partnership, corporation, association, cooperative, or other entity subject to an order or to whom an order is sought to be made applicable, or on whom an obligation has been imposed or is sought to be imposed under an order;

(i) "Proceeding" means a proceeding before the Secretary arising under Section 118(a) of the Act;

(j) "Hearing" means that part of the proceeding which involves the submission of evidence;

(k) "Party" includes the Department;

(l) "Hearing clerk" means the hearing clerk, United States Department of Agriculture, Washington, D.C.;

(m) "Presiding officer" means the administrative law judge conducting a proceeding under the Act;

(n) "Presiding officer's report" means the presiding officer's report to the Secretary and includes the presiding officer's proposed (1) findings of fact and conclusions with respect to all material issues of fact, law or discretion, as well as the reasons or basis therefor, (2) order, and (3) rulings on findings, conclusions and orders submitted by the parties; and

(o) "Petition" includes an amended petition.

§ 1150.252 Institution of proceeding.

(a) *Filing and service of petitions.* Any person subject to an order desiring to complain that any order or any provision of any such order or any obligation imposed in connection therewith is not in accordance with law, shall file with the hearing clerk, five copies of a petition in writing addressed to the Secretary, requesting a modification of such order or to be exempted from such order. Promptly upon receipt of the petition, the hearing clerk shall transmit a true copy thereof to the Administrator and the Department's General Counsel, respectively.

(b) *Contents of petitions.* A petition shall contain:

(1) The correct name, address, and principal place of business of the petitioner. If the petitioner is a corporation, such fact shall be stated, together with the name of the State of incorporation, the date of incorporation, and the names, addresses, and respective positions held by its officers and directors; if an unincorporated association, the names and addresses of its officers, and the respective positions held by them; if a partnership, the name and address of each partner;

(2) Reference to the specific terms or provisions of the order, or the interpretation or application thereof, which are complained of;

(3) A full statement of the facts (avoiding a mere repetition of detailed evidence) upon which the petition is based, and which it is desired that the Secretary consider, setting forth clearly and concisely the nature of the petitioners' business and the manner in which petitioner claims to be affected by the terms or provisions of the order or the interpretation or application thereof, which complained of;

(4) A statement of the grounds on which the terms or provisions of the order or the interpretation or application thereof, which are complained of, are challenged as not in accordance with law; and

(5) Requests for the specific relief which the petitioner desires the Secretary to grant.

(c) *An application to dismiss petition—Filing, contents, and responses thereto.* If the Administrator is of the opinion that the petition, or any portion thereof, does not substantially comply, in form or content, with the Act or with the requirements of paragraph (b) of this section, the Administrator may, within 30 days after the filing of the petition, file with the hearing clerk an application to dismiss the petition, or any portion thereof, on one or more of the grounds stated in this paragraph. Such application shall specify the grounds of objection to the petition and if based, in whole or in part, on allegations of fact not appearing on the face of the petition, shall be accompanied by appropriate affidavits or documentary evidence substantiating such allegations of fact. The application may be accompanied by a memorandum of law. Upon receipt of such application, the hearing clerk shall cause a copy thereof to be served upon the petitioner, together with a notice stating that all papers to be submitted in opposition of such application, including any memorandum of law, must be filed by the petitioner with the hearing clerk not later than 20 days after the service of such notice upon the petitioner. Upon the expiration of the time specified in such notice, or upon receipt of such papers from the petitioner, the hearing clerk shall transmit all papers which have been filed in connection with the application to the Secretary for his consideration.

(d) *Further proceedings.* Further proceedings on petitions to modify or to be exempted from any order shall be governed by §§ 900.52(d)(2) through 900.71 of this title (Rules of Practice Governing Proceedings on Petitions To Modify or To Be Exempted From Marketing Orders) and as may hereafter be amended, and the same are incorporated herein and made a part hereof by reference. However each reference to "marketing order" in the title shall mean "order."

Subpart—Procedure for Certification of Milk Producer Organizations

§ 1150.270 General.

Organizations must be certified by the Secretary that they are eligible to represent milk producers and to participate in the making of nominations of milk producers to serve as members of the National Dairy Promotion and Research Board as provided in the Dairy and Tobacco Adjustment Act of 1983. Certifications of eligibility required of the Secretary shall be conducted in accordance with this subpart.

§ 1150.271 Definitions.

As used in this subpart:

(a) "Act" means Title I, Subtitle B, of the Dairy and Tobacco Adjustment Act of 1983, Pub. L. 98–180, 97 Stat. 1128, as approved November 29, 1983, and any amendments thereto;

(b) "Department" means the United States Department of Agriculture;

(c) "Secretary" means the Secretary of Agriculture of the United States, or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated to act in the Secretary's stead;

(d) "Dairy Division" means the Dairy Division of the Department's Agricultural Marketing Service;

(e) "Producer" means any person engaged in the production of milk for commercial use;

(f) "Dairy products" means products manufactured for human consumption which are derived from the processing of milk, and includes fluid milk products; and

(g) "Fluid milk products" means those milk products normally consumed in liquid form as a beverage.

§ 1150.272 Responsibility for administration of regulations.

The Dairy Division shall have the responsibility for administering the provisions of this subpart.

§ 1150.273 Application for certification.

Any organization whose membership consists primarily of milk producers may apply for certification. Applicant organizations should supply information for certification using as a guide "Application for Certification of Organizations," Form DA–26. Form DA–26 may be obtained from the Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250.

§ 1150.274 Certification standards.

(a) Certification of eligible organizations shall be based, in addition to other available information, on a factual report submitted by the organization, which shall contain information deemed relevant and specified by the Secretary for the making of such determination, including the following:

(1) Geographic territory covered by the organization's active membership;

(2) Nature and size of the organization's active membership including the total number of active milk producers represented by the organization;

(3) Evidence of stability and permanency of the organization;

(4) Sources from which the organization's operating funds are derived;

(5) Functions of the organization; and

(6) The organization's ability and willingness to further the aims and objectives of the Act.

(b) The primary considerations in determining the eligibility of an organization shall be whether its membership consists primarily of milk producers who produce a substantial volume of milk, and whether the primary or overriding interest of the organization is in the production or processing of fluid milk and dairy products and promotion of the nutritional attributes of fluid milk and dairy products.

(c) The Secretay shall certify any organization which he finds meets the criteria under this section and his determination as to eligibility shall be final.

§ 1150.275 Inspection and investigation.

The Secretary shall have the right, at any time after an application is received from an organization, to examine such books, documents, papers, records, files, and facilities of an organization as he deems necessary to verify the information submitted and to procure such other information as may be required to determine whether the organization is eligible for certification.

§ 1150.276 Review of certification.

Certifications issued pursuant to this subpart are subject to termination or suspension if the organization does not currently meet the certification standards. A certified organization may be requested at any time to supply the Dairy Division with such information as may be required to show that the organization continues to be eligible for certification. Any information submitted to satisfy a request pursuant to this section shall be subject to inspection and investigation as provided in § 1150.275.

§ 1150.277 Listing of certified organizations.

A copy of each certification shall be furnished by the Dairy Division to the respective organization. Copies also shall be filed in the Dairy Division where they will be available for public inspection.

§ 1150.278 Confidential treatment.

All documents and other information submitted by applicant organizations and otherwise obtained by the Department by investigation or examination of books, documents, papers, records, files, or facilities shall be kept confidential by all employees of

the Department. Only such information so furnished or acquired as the Secretary deems relevant shall be disclosed by them, and then only in the issuance of general statements based upon the applications of a number of persons, which do not identify the information furnished by any one person.

Effective date: All provisions contained in this Part 1150, except the provision in § 1150.152, are effective on and after April 1, 1984. The provisions in § 1150.152 are effective on and after May 1, 1984.

Signed at Washington, D.C., on: March 23, 1984.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 83-138]

Ports Designated for the Importation of Animals

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule.

SUMMARY: This document amends the regulations concerning ports designated for the importation of animals by adding Los Angeles, California, to the list of air and ocean ports having Veterinary Services (VS) inspection and quarantine facilities necessary for a quarantine station for the importation of animals. The facility will begin receiving animals on or about April 4, 1984. It is necessary to add Los Angeles to this list to reflect the existence of the VS facility at Los Angeles so that importers can make arrangements for the importation of animals.

This document also announces that it will be necessary to allow quarantine space at the VS facility at Los Angeles on a priority basis for horses that are to participate in the 1984 Olympics in Los Angeles in order to efficiently handle their entry into the United States.

DATES: Effective date of this interim rule is March 28, 1984. Written comments must be received on or before May 29, 1984.

ADDRESS: Written comments concerning this interim rule should be submitted to Thomas O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Written comments received may be inspected at Room 728 of the Federal Building between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Dr. M. P. Dulin, Veterinary Services, APHIS, USDA, Room 843, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8170.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR Part 92 (referred to below as the regulations), among other things, list ports which are designated for the importation of animals and birds into the United States. Paragraph (a) of § 92.3 of the regulations lists air and ocean ports having Veterinary Services (VS) inspection and quarantine facilities necessary for quarantine stations. Prior to the effective date of this document, Newburgh, New York, Miami, Florida, and Honolulu, Hawaii, were the only ports listed as air and ocean ports.

VS inspection and quarantine facilities necessary for a quarantine station for animals are being completed in Los Angeles. The facilities are scheduled to begin allowing air and ocean importations of animals on or about April 4, 1984. Therefore, this document amends § 92.3(a) of the regulations to add Los Angeles, California, as an air and ocean port for the importation of animals to reflect the existence of the VS facility at Los Angeles so that importers can make arrangements for the importation of animals.

Quarantine Space for Olympic Horses

It is anticipated that approximately 350 horses will be entering the United States from mid June through early August to participate in the 1984 Olympics in Los Angeles. In order to efficiently handle the entry of these animals into the United States, it will be necessary to allow quarantine space at the VS facility at Los Angeles on a priority basis for horses entering the United States for participation in the Olympics. It appears that during the time of the Olympics the space at the VS quarantine facility will be needed almost exclusively for horses imported for the Olympics.

Executive Order 12291 and Regulatory Flexibility Act

This action has been reviewed in conformance with Executive Order 12291 and has been determined to be not a "major rule." The Department has determined that this action will not have an annual effect on the economy of $100 million or more; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; and will not cause significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this rulemaking action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

In addition to air and ocean ports, the regulations list Canadian border ports, Mexican border ports, and a number of other ports where Veterinary Services maintains facilities for the importation of certain animals. The regulations also provide a mechanism for allowing the importation of horses or birds at ports with privately operated facilities.

It appears that the addition of the port of Los Angeles to the list of air and ocean ports will not have a significant impact on the importation of animals into the United States. However, it provides another alternative facility for importation of animals and will reduce costs of importation for certain importers. Currently, almost all of the animals imported in the United States at Los Angeles are horses which are imported at one privately operated facility. This addition of a VS facility at the port of Los Angeles will impact on this privately operated facility.

Under these circumstances, Mr. Bert W. Hawkins, Administrator of the Animal and Plant Health Inspection Service, has determined that this action will not have significant economic impact on a substantial number of small entities.

Effective Date

Pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that prior notice and other public procedure are unnecessary and contrary to the public interest with respect to the addition of Los Angeles, California, to the list of air and ocean ports in § 92.3(a), and that good cause is found for making this action effective upon publication in the **Federal Register**. Comments concerning the addition of Los Angeles are being solicited for 60 days after publication of the document.

It is necessary to make this rule effective as soon as possible in order to relieve unnecessary restrictions and to reflect the existence of the VS facility at Los Angeles so that importers of animals

can make arrangements to utilize the facility for the importation of animals.

List of Subjects in 9 CFR Part 92

Animal diseases, Canada, Imports, Livestock and livestock products, Mexico, Poultry and poultry products, Quarantine, Transportation, Wildlife.

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

Accordingly, 9 CFR Part 92 is amended as follows:

In § 92.3(a), the material following the colon is amended to read: "Los Angeles, California (quarantine space at Los Angeles will be allowed on a priority basis for horses entering the United States for participation in the 1984 Olympics); Miami, Florida; Honolulu, Hawaii; and Newburgh, New York."

Authority: Sec. 2, 32 Stat. 792, as amended; secs. 2, 4, and 11, 76 Stat. 129, 130, 132, (21 U.S.C. 111, 134a, 134c, and 134f); 7 CFR 2.17, 2.51, and 371.2(d).

Done at Washington, D.C., this 23rd day for March, 1984.

J. K. Atwell,

Deputy Administrator, Veterinary Services.

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Parts 7, 9, 11, 12, 16, 21, 25, 27, 29, 31, and 32

[Docket No. 84-10]

OMB Control Numbers

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Final rule.

SUMMARY: This final rule adds the Office of Management and Budget (OMB) control numbers for information collection requirements contained in Office of the Comptroller of the Currency (Office) interpretive rulings and regulations. This action is necessary to alert the public that the Office has complied with the applicable legal requirements for each collection of information requirements.

EFFECTIVE DATE: March 28, 1984.

FOR FURTHER INFORMATION CONTACT: John Ference, Financial/Regulatory Analyst, Legislative and Regulatory Analysis Division (202) 447-1177, Office of the Comptroller of the Currency, 490 L'Enfant Plaza, East SW., Washington, D.C. 20219.

SUPPLEMENTARY INFORMATION:

Background

On March 31, 1983, OMB published in the **Federal Register** (48 FR 13666), a final rule pertaining to 5 CFR Part 1320 (Controlling Paperwork Burdens on the Public). That regulation requires that all collection of information requirements that have been submitted to OMB for clearance, and that have not been disapproved by OMB, display a currently valid OMB control number.

Purpose

This final rule ascribes OMB control numbers to information collection requirements contained in Office interpretive rulings and regulations. In order to avoid any public confusion regarding the status of a collection of information requirement contained in an Office regulation and to comply with the requirements of 12 CFR Part 1320, the Office is issuing this final rule.

Reason for not allowing notices and comment.

Notice and opportunity for public comment was not provided because this final rule is a rule of agency practice, contains only technical changes, and is simply informative and beneficial in nature. No burden of any kind is imposed, and no change in practice or procedure is involved. Notice and public procedure for this final rule are therefore unnecessary. Any delay in providing the information contained in this final rule could result in confusion and thereby be contrary to the public interest. The exceptions to notice and public procedure stated in 5 U.S.C. 553(b)(3) (A) and (B) apply.

Regulatory Flexibility Act

Since this final rule is not subject to notice and public comment procedure, preparation of a Regulatory Flexibility Analysis is not required. The Comptroller of the Currency believes however, that this final rule will avoid confusion and will not have any particular effect on small entities.

Executive Order 12291.

The Office has determined that this final rule is not subject to Executive Order 12291 because it relates to agency management.

List of Subjects in 12 CFR Parts 7, 9, 11, 12, 16, 21, 25, 27, 29, 31, and 32

National banks, OMB control numbers, Reporting and recordkeeping requirements.

Authority and Issuance

For the reasons set forth in the preamble, the Comptroller of the Currency amends 12 CFR Chapter I, Parts, 7, 9, 11, 12, 16, 21, 25, 27, 29, 31, and 32 as follows:

PART 7—[AMENDED]

1. The authority citation for Part 7 reads as follows:

Authority: 12 U.S.C. 1 *et seq.;* 12 U.S.C. 93a.

§ 7.3025 [Amended]

2. Section 7.3025 is amended by adding, after the regulatory text, the following:

(Approved by the Office of Management and Budget under control number 1557-0153)

§ 7.3100 [Amended]

3. Section 7.3100 is amended by adding, after the regulatory text, the following:

(Approved by the Office of Management and Budget under control number 1557-0154)

§ 7.5225 [Amended]

4. Section 7.5225 is amended by adding, after the regulatory text, the following:

(Approved by the Office of Management and Budget under control number 1557-0069)

§ 7.6100 [Amended]

5. Section 7.6100 is amended by adding, after the regulatory text, the following:

(Approved by the Office of Management and Budget under control number 1557-0155)

PART 9—[AMENDED]

6. The authority citation for Part 9 reads as follows:

Authority: Sec. 1, 77 Stat. 668; 12 U.S.C. 92a; and R.S. 5240 as amended (12 U.S.C. 481), unless otherwise noted.

§ 9.18 [Amended]

7. Section 9.18 is amended by adding, after the regulatory text, the following:

(The collection of information requirements contained in this section were approved by the Office of Management and Budget as follows: Section 9.18(b)(1)—OMB control number 1557-0141; § 9.18(b)(5)—OMB control number 1557-0140)

PART 11—[AMENDED]

8. The authority citation for Part 11 reads as follows:

Authority: 15 U.S.C. 781, 78m, 78n, 78p, 78w)

9. Section 11.1 is revised to read as follows:

§ 11.1 Scope and OMB control number.

(a) *Scope.* This part is issued by the Comptroller of the Currency pursuant to section 12(i) of the Securities Exchange Act of 1934 (15 U.S.C. 78) (the "Act") and applies to all securities subject to registration pursuant to section 12(b) or section 12(g) of the Act by a national bank or a bank operating under the Code of Law for the District of Columbia ("bank"). The effective date of this part shall be September 30, 1975.

(b) *OMB control number.* The collection of information requirements contained in this Part were approved by the Office of Management and Budget under OMB control number 1557–0106.

PART 12—[AMENDED]

10. The authority citation for Part 12 reads as follows:

Authority: 12 U.S.C. 24 and 12 U.S.C. 92a.

11. Section 12.1 is revised to read as follows:

§ 12.1 Scope and OMB control number.

(a) *Scope.* This part is issued by the Comptroller of the Currency pursuant to 12 U.S.C. 24 and 12 U.S.C. 92a and contains rules applicable to recordkeeping and confirmation requirements for certain transactions effected by national banks.

(b) *OMB control number.* The collection of information requirements contained in this Part were approved by the Office of Management and Budget under OMB control number 1557–0142.

PART 16—[AMENDED]

12. The authority citation for Part 16 reads as follows:

Authority: 12 U.S.C. 1 *et seq.*

13. Section 16.1 is revised to read as follows:

§ 16.1 Authority and OMB control numbers.

(a) *Authority.* This part is issued under the general authority of the national banking laws, R.S. 324 *et seq.* as amended; 12 U.S.C. 1 *et seq.*, and contains rules applicable to the offering of securities.

(b) *OMB control numbers.* The collection of information requirements contained in this part were approved by the Office of Management and Budget and assigned OMB control numbers as follows: Offering Circular—OMB control number 1557–0120; Abbreviated Offering Circular—OMB control number 1557–0121; Offering Document—OMB control number 1557–0122; and Notice of Nonpublic Sales and Exchanges (Notice of Exempt Transactions)—OMB control number 1557–0123.

PART 21—[AMENDED]

14. The authority citation for Part 21 reads as follows:

Authority: 12 U.S.C. 1881–1884.

§ 21.5 [Amended]

15. Section 21.5 is amended by adding, after the regulatory text, the following:

(Approved by the Office of Management and Budget under control number 1557–0072)

PART 25—[AMENDED]

16. The authority citation for Part 25 reads as follows:

Authority: Community Reinvestment Act of 1977 (Title VIII, Pub. L. 95–128, 91 Stat. 1147 (12 U.S.C. 2901 *et seq.*)); 12 U.S.C. 21, 22, 26, 27, 30, 36, 161, 215, 215a, 481, 1814, 1816, 1828(c), unless otherwise noted.

17. Section 25.1 is revised to read as follows:

§ 25.1. Authority and OMB control number.

(a) *Authority.* The Comptroller of the Currency ("Comptroller") issues this part under the authority of the Community Reinvestment Act of 1977 (title VIII of Pub. L. 95–128), and under provisions of title 12 of the United States Code authorizing the Comptroller to charter national banks (sections 21, 22, 26, and 27), to issue certificates to national banks to commence or resume the business of banking (sections 1814, 1816), to consider applications from national banks to relocate a main office (section 30) or to establish or relocate a branch office (section 36), to consider applications for a merger, consolidation, acquisition of assets, or assumption of liabilities where the acquiring, assuming, or resulting bank is a national bank (sections 215, 215a, 1828(c)), to acquire reports of condition (section 161), and to conduct examinations of national banks (section 481).

(b) *OMB control number.* The collection of information requirements contained in this part were approved by the Office of Management and Budget under OMB control number 1557–0159.

PART 27—[AMENDED]

18. The authority citation for Part 27 reads as follows:

Authority: 15 U.S.C. 1691 *et seq.*; 12 U.S.C. 1818; 12 U.S.C. 1 *et seq.*; 12 U.S.C. 161; 12 U.S.C. 481; 42 U.S.C. 3601 *et seq.*; 5 U.S.C. 301; 12 CFR 202.

19. Section 27.1 is revised to read as follows:

§ 27.1. Scope and OMB control number.

(a) *Scope.* This part applies to the activities of national banks and banks located in the District of Columbia, and their subsidiaries, which make home loans for the purpose of purchasing, construction-permanent financing, or refinancing of residential real property.

(b) *OMB control number.* The collection of information requirements contained in this part were approved by the Office of Management and Budget under OMB control number 1557–0160.

PART 29—[AMENDED]

20. The authority citation for Part 29 reads as follows:

Authority: 12 U.S.C. 1 *et seq.*; 12 U.S.C. 93a; and 12 U.S.C.371.

§ 29.7 [Amended]

21. Section 29.7 is amended by adding, after the regulatory text, the following:

(Approved by the Office of Management and Budget under control number 1557–0139)

§ 29.9 [Amended]

22. Section 29.9 is amended by adding, after the regulatory text, the following:

(Approved by the Office of Management and Budget under control number 1557–0139)

PART 31—[AMENDED]

23. The authority citation for Part 31 reads as follows:

Authority: 12 U.S.C. 375a(4), 375(b)(2), 1817(k), and 1972(2)(G)(ii), as amended.

24. Section 31.4 is revised to read as follows:

§ 31.4. Authority and OMB control number.

(a) *Authority.* This subpart is issued by the Comptroller of the Currency pursuant to 12 U.S.C 1817(k) and 12 U.S.C. 1972(2)(G)(ii), as amended.

(b) *OMB control number.* The collection of information requirements contained in this subpart were approved by the Office of Management and Budget under OMB control number 1557–0070.

§ 31.6 [Amended]

25. Section 31.6 is amended by removing the parenthetical OMB control number sentence that follows the regulatory text.

PART 32—[AMENDED]

26. The authority citation for Part 32 reads as follows:

Authority: 12 U.S.C. 1 *et seq.*; 12 U.S.C. 84; and 12 U.S.C. 93a.

§ 32.1 Authority, purpose and scope.

27. Section 32.1 is amended by revising the title to read as set forth above and by removing paragraph (d).

§ 32.5 [Amended]

28. Section 32.5 is amended by adding, after the regulatory text, the following:

(Approved by the Office of Management and Budget under control number 1557–0147)

Dated: March 7, 1984.

C. T. Conover,

Comptroller of the Currency.

BILLING CODE 4810–33–M

FEDERAL RESERVE SYSTEM

12 CFR Part 220

[Docket No. R–0389]

Credit by Brokers and Dealers; Complete Revision and Simplification of Regulation T Deferral of Effective Date

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Deferral of effective date.

SUMMARY: The Board is extending, until June 30, 1984, the effective date for compliance with the completely revised Regulation T (governing credit extended by brokers and dealers), which was adopted by the Board on May 16, 1983 (48 FR 23161). The effective date was deferred once before to March 31, 1984 in light of unforeseen operational problems encountered by broker-dealers in conforming their computer systems to the requirements of the revised regulation (48 FR 51768). The Board has been apprised that not all broker-dealers will be able to resolve such problems by March 31, 1984. It is, therefore, deferring until June 30, 1984, the effective date of the newly revised Regulation T.

DATE: The effective date for the revised Regulation T (12 CFR Part 220) is deferred until June 30, 1984.

FOR FURTHER INFORMATION CONTACT: Robert Lord, Attorney, Division of Banking Supervision and Regulation, (202) 452–2781.

SUPPLEMENTARY INFORMATION: On May 16, 1983 the Board adopted a completely revised Regulation T, governing credit extended by brokers and dealers (48 FR 23161, May 24, 1983). The new regulation was to become effective on November 21, 1983 or any earlier date after June 20, 1983, at the option of the creditor. Subsequent to the adoption of revised Regulation T, however, several major broker-dealers informed the Board that due to unforeseen difficulties in programing their computer systems, they would need more time than originally expected to conform their accounts to the requirements of the new regulation. In requesting a deferred effective date, broker-dealers pointed to, among other things, the special temporary computer programs which had to be developed in order to provide support for the AT&T divestiture transactions. The broker-dealers have stated that an enormous amount of program and systems modifications are needed to adequately support the highly complex cash and margin transactions in the stock of AT&T and the seven new regional companies formed as a result of the divestiture, and for transactions in AT&T options. Because of these operational problems, the effective date of the newly-revised Regulation T was deferred until March 31, 1984 (48 FR 51768 November 14, 1983).

The Board has recently been apprised that not all broker-dealers will be able to adopt their computer systems to the newly revised Regulation by March 31, 1984. Since a significant number of customer accounts will be affected by this inability to comply with the Regulation by March 31, 1984, the Board hereby defers the effective date of the regulation to June 30, 1984. Although the effective date has been deferred to June 30, the Board expects creditors make a good faith effort to comply with the new regulation as soon after March 31, 1984 as possible.

List of Subjects in 12 CFR Part 220

Banks, banking, Brokers, Credit, Federal Reserve System, Margin, Margin requirements, Investments, Reporting and recordkeeping requirements, Securities.

By order of the Secretary of the Board of Governors, acting under delegated authority, March 23, 1984.

William W. Wiles,

Secretary of the Board.

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 371

[Docket No. 40306–23]

Clarification of Export Licensing Policy—General License GLR; Return or Replacement of Certain Commodities

AGENCY: Office of Export Administration, International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: This rule, which neither expands nor limits the provisions of the Export Administration Regulations, amends the Regulations to clarify the procedures for use of General License GLR. This clarification emphasizes that Country Groups S and Z are excluded from the GLR procedures.

EFFECTIVE DATE: March 28, 1984.

FOR FURTHER INFORMATION CONTACT: Larry Hanrahan, Office of Export Administration (Telephone: (202) 377–3856).

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

In connection with various rulemaking requirements, the Office of Export Administration has determined that:

1. Under section 13(a) of the Export Administration Act of 1979 (Pub. L. 96–72, 50 U.S.C. app. 2401 *et seq.*) ("the Act"), this rule is exempt from the public participation in rulemaking procedures of the Administrative Procedure Act. This rule does not impose new controls on exports, and is therefore exempt from section 13(b) of the Act, which expresses the intent of Congress that where practicable "regulations imposing controls on exports" be published in proposed form.

2. This rule does not impose a burden under Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

3. This rule is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 3501 601 *et seq.*

4. This rule is not a major rule within the meaning of section 1(b) of Executive Order 12291 (46 FR 13193, February 19, 1981), "Federal Regulation."

Therefore, this regulation is issued in final form. Although there is no formal comment period, public comments on this regulation are welcome on a continuing basis.

List of Subjects in 15 CFR Part 371

Exports.

PART 371—[AMENDED]

Accordingly, the Export Administration Regulations (15 CFR Parts 368–399) are amended by adding a sentence to the end of the introductory paragraph of § 371.17 reading as follows:

§ 371.17 General license GLR; return or replacement of certain commodities.

* * * This GLR procedure applies to all Country Groups except S and Z.

Authority: Section 13 and 15, Pub. L. 96–72, 93 Stat. 503, as amended (50 U.S.C. app. 2401 *et seq.*); Executive Order No. 12214 (45 FR 29783, May 6, 1980). Executive Order No. 12541 of December 20, 1983 (48 FR 56563, December 22, 1983).

Dated: March 6, 1984.

John K. Boidock,

Director, Office of Export Administration, International Trade Administration.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 271

[Docket No. RM79-76-172; Texas-21 Addition Order No. 364]

High-Cost Gas Produced From Tight Formations: Texas

Issued March 27, 1984.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced for tight formations as high-cost gas which may receive (18 CFR 271.703 (1983)). This rule established procedures form formations as high-cost gas which may receive established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This final order adopts the recommendation of the Railroad Commission of Texas that an additional area of the James Limestone Formation located in Shelby County, Texas be designated as a tight formation under § 271.703(d).

EFFECTIVE DATE: This rule is effective April 26, 1984.

FOR FURTHER INFORMATION CONTACT: Elisabeth Pendley, (202) 357-8476, or Walter W. Lawson, (202) 357-8556.

Final Rule

The Commission hereby amends § 271.703(d) of its regulations (18 CFR 271.703(d) (1983)) to include the James Limestone Formation as a designated tight formation eligible for incentive pricing under § 271.703. The amendment was proposed in a Notice of Proposed Rulemaking by the Director, Office of Pipeline and Producer Regulation, issued February 28, 1983 (48 FR 32510, March 4, 1983)[1] based on a recommendation by the Railroad Commission of Texas (Texas) in accordance with § 271.703, that the James Limestone Formation, located in Hidalgo County, Texas be designated as a tight formation.

Evidence submitted by Texas supports the assertion that the James Limestone Formation, located in Shelby County, Texas meets the guidelines contained in § 271.703(c)(2).[2] The Commission adopts the Texas recommendation.

This amendment shall become effective April 26, 1984.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

In consideration of the foregoing, Part 271 of Subchapter H, Chapter I, Code of Federal Regulations, is amended as set forth below.

By the Commission.

Lois D. Cashell,

Acting Secretary.

PART 271—[AMENDED]

Section 271.703 is amended to read as follows:

1. The authority citation for Part 271 reads as follows:

Authority: Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.;* Natural Gas Policy Act of 1978, 15 U.S.C. 3301-3432; Administrative Procedure Act, 5 U.S.C. 553.

2. Section 271.703 is amended by revising paragraph (d)(92) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(92) *James Limestone Formation in Texas.* RM79-76-172 (Texas-21).

(i) *Southern Shelby and Northern San Augustine Counties.*—(A) *Delineation of formation.* The James Limestone Formation is found in northern San Augustine County and southern Shelby County, in Railroad District No. 6 in Texas. The area includes 67,900 acres surrounding and extending northwest of the city of San Augustine, Texas.

(B) *Depth.* The top of the James Limestone Formation ranges from −6,700 feet subsea in the north to −7,750 feet subsea in the south, with a thickness of approximately 202 feet.

(ii) *Shelby County.*—(A) *Delineation of Formation.* The James Limestone Formation is located in Shelby County, Railroad Commission District 6, East Texas. The James Limestone Formation is included as a subdivision of the Trinity Group of Lower Cretaceous (Commanchean) Age.

(B) *Depth.* The James Limestone Formation ranges from approximately −5,100 feet subsea in the North to −6,700 feet subsea in the south. The James Limestone overlies the Pine Island Shale and underlies the Bexar Shale.

BILLING CODE 6717-01-M

18 CFR Part 271

[Docket No. RM79-76-220; Texas 10—Addition III; Order No. 366]

High-Cost Gas Produced From Tight Formations; Texas

Issued March 27, 1984.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703) (1983)). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This final order adopts the recommendation of the State of Texas that an additional area of Edwards Limestone Formation located in Karnes County, Texas, be designated as a tight formation under § 271.703(d).

EFFECTIVE DATE: This rule is effective April 26, 1984.

FOR FURTHER INFORMATION CONTACT: Kevin R. Rees, (202) 357-5420 or Walter Lawson, (202) 357-8556.

[1] The notice also included the James Limestone Formation in Nacogdoches County. On January 4, 1984 Texas requested that the Nocogdoches County section of the tight formation be excluded until additional data is submitted. Comments on the proposed rule were invited and one comment supporting the recommendation was received. No party requested a public hearing and no hearing was held.

[2] The Commission previously designated a portion of the James Limestone Formation in San Augustine and Shelby Counties as a tight formation in Order No. 246 (Texas-21) on August 4, 1982.

Final Rule

The Commission hereby amends § 271.703(d) of its regulations (18 CFR 271.703(d) (1983)) to include an additional area of the Edwards Limestone Formation as a designated tight formation eligible for incentive pricing under § 271.703. The amendment was proposed in a Notice of Proposed Rulemaking by the Director, Office of Pipeline and Producer Regulation, issued December 6, 1983 (48 FR 54,651)[1] based on a recommendation by the Texas Railroad Commission (Texas) in accordance with § 271.703, that the Edwards Limestone Formation, located in Karnes County, Texas, be designated as a tight formation.

Evidence submitted by Texas supports the assertion that the additional area of the Edwards Limestone Formation located in Karnes County, Texas, meets the guidelines contained in § 271.703(c)(2). The Commission adopts the Texas recommendation.

This amendment shall become effective April 26, 1984.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

In consideration of the foregoing, Part 271 of Subchapter H, Chapter I, Code of Federal Regulations, is amended as set forth below.

By the Commission.

Lois D. Cashell,

Acting Secretary.

PART 271—[AMENDED]

1. The authority for Part 271 reads as follows:

Authority: Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.;* Natural Gas Policy Act, 15 U.S.C. 3301–3432; Administrative Procedure Act, 5 U.S.C. 553.

2. Section 271.703 is amended by adding paragraph (d)(48)(iv) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(48) *The Edwards Limestone Formation in Texas.*

RM79–76–220 (Texas 10). * * *

(iv) *Karnes County.*—(A) *Delineation of formation.* The Edwards Limestone Formation is located in Karnes County, Texas, Railroad Commission District 2. The designated area is all that portion of the Kennedy S.W. (Edwards) Field within the area encompassed by a circle 1.5 miles radially distant from and centered upon the Estelle Rolf Gas Unit No. 2, Well No. 2. The Estelle Rolf Gas Unit No. 2, Well No. 2 is located in the Carlos Martinez Survey A–6, Estelle Rolf lease, at a point 660 feet from the southwest leaseline and 1,250 feet from the southeast leaseline.

(B) *Depth.* The top of the designated portion of the Edwards Limestone Formation ranges from 12,500 feet to 13,500 feet below sea level. The average depth to the top of the Edwards Limestone Formation in the designated area is 13,042 feet.

[FR Doc. 84–8238 Filed 3–27–84; 8:45 am]

[Docket No. RM79–76–211; Virginia–2; Order No. 365]

High-Cost Gas Produced From Tight Formations; Virginia

Issued March 27, 1984.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions which present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas which may receive an incentive price (18 CFR 271.703 (1983)). This rule established procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This final order adopts the recommendation of the Commonwealth of Virginia, Department of Labor and Industry, Division of Mines and Quarries that the Lower Mississippian Little Valley Formation located in Scott and Washington Counties, Virginia, be designated as a tight formation under § 271.703(d).

EFFECTIVE DATE: This rule is effective April 26, 1984.

FOR FURTHER INFORMATION CONTACT: Tom Rattray, (202) 357–5447 or Walter W. Lawson, (202) 357–8556.

Final Rule

The Commission hereby amends § 271.703(d) of its regulations (18 CFR 271.703(d)(1983)) to include the lower Mississippian Little Valley Formation as a designated tight formation eligible for incentive pricing under § 271.703. The amendment was proposed in a Notice of Proposed Rulemaking by the Director, Office of Pipeline and Producer Regulation, issued October 5, 1983 (48 FR 46071, October 11, 1983) [1] based on a recommendation by the Commonwealth of Virginia, Department of Labor and Industry, Division of Mines and Quarries (Virginia) in accordance with § 271.703, that a portion of the Lower Mississippian Little Valley Formation, located in Scott and Washington Counties, Virginia, be designated as a tight formation.

Evidence submitted by Virginia supports the assertion that the Lower Mississippian Little Valley Formation located in Scott and Washington Counties, Virginia, meets the guidelines contained in § 271.703(c)(2). The Commission adopts Virginia's recommendation.

This amendment shall become effective April 26, 1984.

List of Subjects in 18 CFR Part 271

Natural gas, Incentive price, Tight formations.

In consideration of the foregoing, Part 271 of Subchapter H, Chapter I, Code of Federal Regulations, is amended as set forth below.

By the Commission.

Lois D. Cashell,

Acting Secretary.

PART 271—[AMENDED]

Section 271.703 is amended as follows:

1. The authority citation for Part 271 reads as follows:

Authority: Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.;* Natural Gas Policy Act of 1978, 15 U.S.C. 3301–3432; Administrative Procedure Act, 5 U.S.C. 553.)

2. Section 271.703 is amended by adding paragraph (d)(160) to read as follows:

§ 271.703 Tight formations.

* * * * *

(d) *Designated tight formations.*

* * * * *

(160) *Lower Mississippian Little-Valley Formation in Virginia.* RM79–76–211 (Virginia—2).

[1] Comments on the proposed rule were invited and none were received. No party requested a public hearing and no hearing was held.

(i) *Delineation of formation.* The Lower Mississippian Little Valley Formation is found in Scott and Washington Counties, Virginia. The designated area consists of approximately 89 square miles comprising all of the Mendota and Wallace quadrangles south of the Holston River in Virginia.

(ii) *Depth.* The average depth to the top of the Lower Mississippian Little Valley Formation is 3,191 feet. The formation has an average thickness of 673 feet.

Correction

In FR Doc. 84-3915 beginning on page 5614 in the issue of Tuesday, February 14, 1984, make the following correction: In column two, sixth line from the bottom, "45 FR 42036" should read "45 FR 40236".

BILLING CODE 1505-01-M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 9

[T.D. ATF-169; Reference Notice No. 477]

Southeastern New England Viticultural Area

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Treasury.

ACTION: Final rule, Treasury decision.

SUMMARY: This rule establishes a viticultural area located in Connecticut, Rhode Island, and Massachusetts known as "Southeastern New England." This final rule is the result of a petition submitted by Mr. James Mitchell, of Sakonnet Vineyards, Little Compton, Rhode Island, and of written comments received in response to the proposed regulation.

The Bureau of Alcohol, Tobacco and Firearms believes the establishment of Southeastern New England as a viticultural area and its subsequent use as an appellation of origin in wine labeling and advertising will allow wineries to designate their specific grape-growing area and will help consumers identify the wines they purchase.

EFFECTIVE DATE: April 27, 1984.

FOR FURTHER INFORMATION CONTACT: Charles N. Bacon, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, Washington, DC 20226, Telephone: (202) 566-7626.

SUPPLEMENTARY INFORMATION:

Background

ATF regulations in 27 CFR Part 4 allow the establishment of definite viticultural areas. These regulations also allow the name of an approved viticultural area to be used as an appellation of origin on wine labels and in wine advertisements. Section 9.11, Title 27, CFR, defines an American viticultural area as a delimited grape-growing region distinguishable by geographical features. Under 27 CFR 4.25a(e)(2), any interested person may petition ATF to establish a grape-growing region as an American viticultural area. Approved American viticultural areas are listed in 27 CFR Part 9.

Petition for Southeastern New England. Mr. James Mitchell, of Sakonnet Vineyards, Little Compton, Rhode Island, petitioned for a viticultural area located in coastal Connecticut, Rhode Island and Massachusetts.

In response to this petition, ATF proposed the Southeastern New England viticultural area in Notice No. 477 on August 4, 1983 (48 FR 35462). In that notice, ATF solicited comments on alternative names or boundaries for the proposed viticultural area. Notice No. 477 also proposed a "Martha's Vineyard" viticultural area which will be the subject of a separate Treasury decision.

Comments. ATF received two written responses to the proposed Southeastern New England viticultural area. One comment submitted by Professor Everett R. Emino, Department of Plant Science of the University of Connecticut at Storrs, sought inclusion of the entire coastal plain of Connecticut within the viticultural area. He stated this area experiences the same climate as the portions of Rhode Island and Massachusetts within the proposed area. He also noted that establishment of the proposed area would unfairly disadvantage the Connecticut wine industry relative to Rhode Island and Massachusetts.

Mrs. Hugh P. Connell of Crosswoods Vineyards, North Stonington, Connecticut, submitted a written comment seeking the inclusion of the coastal plain of Connecticut between the Mystic and Connecticut Rivers. This area extends 10 miles inland from Long Island Sound, and experiences a climate similar to the proposed viticultural area.

Name

The name "Southeastern New England" is descriptive of the land adjoining coastal bodies of water in eastern Connecticut, Rhode Island, and Massachusetts south of the Boston area. It has been used by the New England River Basins Commission to describe this portion of New England. No comments were addressed to the name, and ATF is adopting "Southeastern New England" as the name of the viticultural area.

Geographic Criteria

Climate distinguishes the Southeastern New England viticultural area from adjacent areas in New England and New York. The U.S. Weather Service categorizes this area as the coastal division of Connecticut, Rhode Island, and Massachusetts. Its climate is moderated by proximity to coastal bodies of water including Long Island Sound, Block Island Sound, Narragansett Bay, Rhode Island Sound, Buzzards Bay, Cape Cod Bay, and Massachusetts Bay.

The entire Southeastern New England viticultural area experiences a low Region I climate on the scale used by Winkler and Amerine of the University of California to measure degree days.

Geographic criteria for inclusion within the Southeastern New England viticultural area include a growing season of 180 days or longer, average annual precipitation of 44 inches, average daily temperatures of 30° F. in January, 70° F. in July, and a mean daily range of temperatures during the growing season of 20° F. or less.

Comments from both the University of Connecticut and from Crosswoods Vineyards favored extending the viticultural area westerly into Connecticut beyond the Mystic River. The comment from Crosswoods Vineyards indicated that the coastal region of Connecticut extends into Fairfield County to the New York boundary, and generally reaches no more than 10 miles inland from Long Island Sound. Their evidence shows that the growing season of 180 days or more generally follows the coastal division in Connecticut, but is wider in the eastern part of the State while narrowing significantly toward the New York border. Other evidence shows the

coastal plain has a mean annual temperature of between 50 and 51° F., and that its rainfall varies between 44 and 50 inches per year.

No comments were submitted relative to the climate in Rhode Island or Massachusetts.

Boundaries

Using the geographical criteria presented above, and following the coastal regions of Massachusetts, Rhode Island, and Connecticut, Notice No. 477 proposed boundaries for the Southeastern New England viticultural area. This area included New London County east of the Mystic River and South of the 41° 30′ latitude line; Washington, Bristol and Newport Counties and a small portion of Providence County; and Massachusetts south and east of the Amtrak mainline and the Neponset River. All offshore islands between the Neponset River and the Mystic River were included within the proposed area.

Based on the above comments relating to geographic criteria of Connecticut's coastal plain, ATF is extending the viticultural area west to the Quinnipiac River. The boundary begins in New Haven Harbor, follows Connecticut Highways 80, 9, and 82 east to Norwich, follows Connecticut Highway 2 east to Highway 165, and then follows Connecticut and Rhode Island Highway 165 east to U.S. Interstate 95. The remainder of the boundaries are as proposed in Notice No. 477. All offshore islands (including Martha's Vineyard) between the Neponset and Quinnipiac Rivers are included within the viticultural area. For an exact description of the boundary, see § 9.72 set out below.

Although there is evidence that the coastal plain of Connecticut extends through Fairfield County to the New York boundary, ATF notes this plain narrows significantly toward the western end of the State. At the same time, the western coastal plain is heavily urbanized west of the Quinnipiac River. ATF has, therefore, not included the western portion of the coastal plain in the viticultural area.

General Information

Within the Southeastern New England viticultural area there are nine bonded wineries with others being established. It is estimated that there are between 200–300 acres of grapes with additional acreage planned in the near future. Vineyards are widely distributed and consist of both French Hybrid grapes and Vinifera grapes, especially Chardonnay, White Riesling, and Pinot Noir. Overall, the Southeastern New England viticultural area covers approximately 2,930 square miles or 1,875,200 acres.

Approval of the Southeastern New England viticultural area in no way affects the Martha's Vineyard viticultural area which was also proposed in Notice No. 477. A separate final rule will be issued for that area. The proposed Martha's Vineyard viticultural area is included within the Southeastern New England viticultural area.

Miscellaneous

ATF does not wish to give the impression that by approving Southeastern New England as a viticultural area, it is approving or endorsing the quality of the wine from the area. ATF is approving this area as being distinct and not better than other areas. By approving this area, wine producers are allowed to claim a distinction on labels and advertisements as to the origin of the grapes. Any commercial advantage gained can only come from consumer acceptance of Southeastern New England wines.

Regulatory Flexibility Act

The notice of proposed rulemaking which resulted in this final rule contained a certification under the provisions of section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that if promulgated as a final rule, it would not have a significant impact on a substantial number of small entities. Therefore, the requirement contained in the Regulatory Flexibility Act (5 U.S.C. 603, 604) for a final regulatory flexibility analysis does not apply to this final rule.

Compliance With Executive Order 12291

It has been determined that this final regulation is not a "major rule" within the meaning of Executive Order 12291 of February 17, 1981, because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Paperwork Reduction Act

The provisions of the Paperwork Reduction Act of 1980, Pub. L. 96–511, 44 U.S.C. Chapter 35, and its implementing regulations, 5 CFR Part 1320, do not apply to this final rule because no requirement to collect information is imposed.

Drafting Information

The principal author of this document is Charles N. Bacon, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 9

Administrative practices and procedures, Consumer protection, Viticultural areas, and Wine.

Authority and Issuance

Accordingly, under the authority contained in 27 U.S.C. 205, the Director is amending 27 CFR Part 9 as follows:

PART 9—AMERICAN VITICULTURAL AREAS

Paragraph 1. The table of sections in 27 CFR Part 9 is amended by adding § 9.72 which reads as follows:

* * * * *

Subpart C—Approved American Viticultural Areas

Paragraph 2. Subpart C is amended by adding § 9.72 which reads as follows:

§ 9.72 Southeastern New England.

(a) *Name.* The name of the viticultural area described in this section is "Southeastern New England."

(b) *Approved maps.* The approved maps for determining the boundary of the Southeastern New England viticultural area are three U.S.G.S. maps. They are entitled:

(1) "Boston, Mass.; N.H.; Conn.; R.I.; Maine", scaled 1:250,000, edition of 1956, revised 1970;

(2) "Hartford, Conn.; N.Y.; N.J.; Mass.", scaled 1:250,000, edition of 1962, revised 1975; and

(3) "Providence, R.I.; Mass.; Conn.; N.Y.", scaled 1:250,000, edition of 1947, revised 1969.

(c) *Boundaries.* The Southeastern New England viticultural area is located in the counties of New Haven, New London, and Middlesex in Connecticut; in the counties of Bristol, Newport, Providence, and Washington, in Rhode Island; and in the counties of Barnstable, Bristol, Dukes, Nantucket, Norfolk, and Plymouth in Massachusetts. The beginning point is found on the "Hartford" U.S.G.S. map in New Haven Harbor;

(1) Then north following the Quinnipiac River to U.S. Interstate 91;

(2) Then east following U.S. Interstate 91 to Connecticut Highway 80;

(3) Then east following Connecticut Highway 80 to Connecticut Highway 9 near Deep River;

(4) Then north following Connecticut Highway 9 to Connecticut Highway 82;

(5) Then north, east, south and east following Connecticut Highway 82 and 182 to Connecticut Highway 2 in Norwich;

(6) Then east following Connecticut Highway 2 to Connecticut Highway 165;

(7) Then east following Connecticut and Rhode Island Highway 165 to Interstate Highway 95 near Millville;

(8) Then north following Interstate Highway 95 to the Kent County-Washington County boundary;

(9) Then east following the Kent County-Washington County boundary into Narragansett Bay;

(10) Then north through Narragansett Bay, the Providence River, and the Blackstone River to the Rhode Island-Massachusetts State boundary;

(11) Then east and south following the Rhode Island-Massachusetts State boundary to the Norfolk-Bristol (Mass.) County boundary;

(12) Then northeast following the Norfolk-Bristol (Mass.) County boundary to the Amtrak right-of-way (Penn Central on map) northeast of Mansfield;

(13) Then north following the Amtrak right-of-way to the Neponset River immediately east of the Norwood Memorial Airport;

(14) Then northeast following the Neponset River into Dorchester Bay;

(15) Then east following the Norfolk-Suffolk County boundary, and the Plymouth-Suffolk County boundary into Massachusetts Bay;

(16) Then returning to the point of beginning by way of Massachusetts Bay, the Atlantic Ocean, Block Island Sound and Long Island Sound; and including all of the offshore islands in Norfolk, Plymouth, Barnstable, Nantucket, Dukes, and Bristol Counties, Massachusetts; all offshore islands in Rhode Island; and all offshore islands in Connecticut east of the Quinnipiac River.

Signed: March 2, 1984.

Stephen E. Higgins,

Director.

Approved: March 12, 1984.

Edward T. Stevenson,

Deputy Assistant Secretary (Operations).

BILLING CODE 3910-01-M

Department of the Army; Corps of Engineers

33 CFR Part 209

Shipping Safety Fairways, Port Hueneme, California

AGENCY: Army Corps of Engineers, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Army is deleting the regulations which establish a shipping safety fairway in the approach to Port Hueneme, California. This shipping safety fairway has been established by the U.S. Coast Guard under its authorities and accordingly, the fairway established by the Army is no longer needed.

EFFECTIVE DATE: These rules are effective on March 28, 1984.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph T. Eppard, Office of the Chief of Engineers, ATTN: DAEN–CWO–N, Washington, D.C. 20314 or telephone (202) 272–0199.

SUPPLEMENTARY INFORMATION: The Corps of Engineers has determined that notice of proposed rulemaking is unnecessary and that these rules shall be effective upon publication in the **Federal Register** since these rules have been replaced by rules published by the Coast Guard in 33 CFR 166.300. Port Hueneme Shipping Safety Fairways were established by the Corps of Engineers in 33 CFR 209.138 under authority of the Outer Continental Shelf Lands Act (67 Stat. 463; 43 U.S.C. 1333(e)). The Corps established the fairways as specific areas where fixed structures would not be permitted. Pursuant to the Ports and Waterways Safety Act, the Coast Guard was

subsequently given specific authority to establish vessel routing measures, including fairways. The Coast Guard published final rules establishing the Port Hueneme Shipping Safety Fairway in the **Federal Register** on 24 October 1983 (48 FR 49018–19) in 33 CFR 166.300. Accordingly, the regulations which establish the Port Hueneme Shipping Safety Fairway in 33 CFR 209.138 are no longer necessary and are revoked.

Note.—The Corps of Engineers has determined that this document does not contain a major rule requiring a regulatory impact analysis under Executive Order 12291 because it will not result in an annual effect on the economy of $100 million or more and it will not result in a major increase in costs or prices. The Corps also certifies that this rule will not have a significant economic impact on a substantial number of entities and thus, does not require the preparation of a regulatory flexibility analysis.

List of Subjects in 33 CFR Part 209

Marine safety, Shipping safety fairways, Anchorage areas.

PART 209—[AMENDED]

Section 209.138 is removed from 33 CFR as follow:

§ 209.138 Shipping Safety Fairway in the Pacific Ocean at Port Hueneme, California [Removed].

Authority: 43 U.S.C. 1333(e).

Dated: February 8, 1984.

John F. Wall,

Major General, USA, Director of Civil Works.

BILLING CODE 3710-92-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-5-FRL 2524-6]

Approval and Promulgation of Implementation Plans; Michigan

AGENCY: Enviromental Protection Agency (EPA).

ACTION: Final disapproval.

SUMMARY: On December 17, 1982 (47 FR 56518), EPA proposed to approve a State Consent Order No. 16–1982 for Great Lakes Steel (GLS), a Division of the National Steel Corporation (National Steel), as a revision to the Michigan State Implementation Plan (SIP). On February 18, 1983 (48 FR 7210), EPA published a supplemental proposed rulemaking notice, announcing the availability of the short term ambient equivalence demonstration and presented the results of its review. EPA has reviewed all public comments received and is today announcing its disapproval of Michigan's proposed SIP revision request for GLS because the proposal does not satisfy all the requirements of EPA's proposed Emissions Trading Policy Statement (ETPS), (April 7, 1982, 47 FR 15076).

DATE: This action is effective April 27, 1984.

ADDRESSES: Copies of the SIP revision and other materials relating to this rulemaking are available at the following addresses (It is recommended that you telephone the contact person listed below, before visiting the Region V Office):

Environmental Protection Agency, Air and Radiation Branch, Region V, Regulatory Analysis Section, 230 South Dearborn Street, Chicago, Illinois 60604

Michigan Department of Natural Resources, Air Quality Division, 7150 Harris Drive, Lansing, Michigan 48909

Written comments should be sent to:

Gary Gulezian, Chief, Regulatory Analysis Section (5AR–26), Air and Radiation Branch, Environmental Protection Agency, 230 South Dearborn, Chicago, Illinois 60604

FOR FURTHER INFORMATION CONTACT: Toni Lesser, Regulatory Specialist. Regulatory Analysis Section (5AR–26), Air and Radiation Branch, Region V, Environmental Protection Agency, 230 South Dearborn, Chicago, Illinois 60604, (312) 886–6037.

SUPPLEMENTARY INFORMATION: On June 24, 1982, the State of Michigan submitted Consent Order No. 16–1982 for GLS, as a revision to the Michigan SIP. The Consent Order contained an alternate emission control plan (AECP) or "bubble" requiring that all controls be implemented by December 31, 1982. GLS is a Division of National Steel, which operates integrated iron and steel making facilities in Ecorse and Zug Island in River Rouge, Michigan. These plants are located in the Detroit Total Suspended Particulate (TSP) primary nonattainment area. EPA's approval of the control strategy for the Detroit primary TSP nonattainment area is discussed in the May 22, 1981, **Federal Register** (46 FR 27923).

On December 17, 1982 (47 FR 56518), EPA proposed approval of Michigan's request for a revision to its SIP for GLS's AECP. In that notice, EPA also indicated that the short-term ambient equivalence demonstration for GLS was scheduled to be completed during the public comment period of the proposed rulemaking and that the public would be given an opportunity to review the results of the short-term modeling prior to EPA's final rulemaking. On February 18, 1983 (48 FR 7210), EPA published a supplemental proposed rulemaking announcing the availability of the short-term ambient equivalence demonstration and EPA's review of the demonstration. That notice also provided an additional public comment period on all elements of the GLS revision.

The December 17, 1982 (47 FR 56518), and February 18, 1983 (48 FR 7210), **Federal Register** notices, along with EPA's technical support document of September 10, 1982, contain a detailed description of the GLS AECP. EPA's technical support document of September 28, 1983 contains a detailed presentation of the issues and responses to the public comments received.

During the two comment periods, EPA received a total of 11 comments and one additional comment letter by National Steel after the close of the second comment period. Despite the fact that this comment was received after the close of the public comment period, it was considered by EPA in the development of its final rulemaking. Nine of the comments did not raise technical issues but cited economic benefits of the GLS AECP. EPA cannot consider comments relating to the economic benefits of a proposed bubble SIP revision if the proposed SIP revision does not protect the National Ambient Air Quality Standards (NAAQS) and comply with the April 7, 1982, proposed ETPS. A summary of EPA's response to the remaining comments is presented below.

Comment: The State of Michigan objected to EPA's statement that Consent Order No. 16–1982 provides an AECP or "bubble" which will result in reduction of particulate emissions in the Detroit primary nonattainment area. The commenter states that the Michigan Air Pollution Control Commission (MAPCC) rules contain no provisions for particulate bubbles.

Response: The State was correct in citing that it has no explicit provisions for approving particulate bubbles. However, EPA believes that the appropriate criteria for reviewing a SIP revision of this type, which involves increasing emissions at some points and decreasing emissions at other points, and which is not accompanied by a demonstration that the NAAQS will be attained and maintained are contained in the proposed ETPS.

Comment: The Natural Resources Defense Council (NRDC) stated that the modeling analysis done in support of the GLS bubble proposal, by a combination of errors in data and programming and

the use of invalid and undocumented assumptions, understates the ambient impact of this SIP revision. Specifically, NRDC notes the following problems in the short-term ambient equivalence demonstration:

(a) The impacts of all process sources are considerably understated due to the use of erroneously low emission rates for these sources;

(b) The choice of particle size distributions underestimates the impacts of the basic oxygen furnace (BOF) shop and blast furnace casthouses, and overstates the impacts from open dust sources;

(c) The Universal Transverse Mercator (UTM) coordinates (i.e. source location) input for the casthouses and open dust sources are in error; and

(d) TSP impacts for similar sources from previous EPA studies suggest much higher impacts than those predicted by GLS for its process sources.

Response: EPA agrees that National Steel's inadvertent input of improper process source emission rates into the ISC model resulted in a severe underestimate of the TSP concentrations from the process sources. EPA subsequently performed an analysis correcting this error as well as the incorrect source coordinates. The reanalysis showed substantial impacts from the casthouses which are unlikely to be offset by any credit for control greater than the Reasonably Available Control Technology (RACT) level on the Zug Island open dust sources. In addition, a significant increase in TSP concentrations as defined by the ETPS (i.e., greater than 10/$\mu g/m^3$ on a 24-hour basis) due to less-than-RACT controls at the No. 2 BOF Shop was predicted. If particle size distributions assumed for similar type sources at a steel million Ohio are input to the ISC model, the predicted TSP concentration increases are enhanced further. EPA recognizes that National Steel failed to document the support for the particle size distributions but, at the time of the initial analysis, EPA did not consider these inputs to be critical to the demonstration because of the low magnitude of the predicted concentrations.

The correction of the errors in the short-term ambient equivalence demonstration leads to the conclusion that the GLS bubble, as presently configured, does not satisfy the ambient tests specified in the proposed ETPS and technical clarifying memorandum (February 17, 1983). Therefore, without a demonstration that greater-than-RACT level emissions will not significantly contribute to periods of violations of the TSP NAAQS, EPA cannot approve the proposed bubble.

EPA has reviewed the NRDC's criticism of certain emission factor assumptions relating to the process fugitive sources involved in the proposed bubble. In regard to the blast furnace casthouses, EPA agrees with NRDC that an uncontrolled emission factor of 0.6 lb/ton of hot metal is more technically supportable than the 0.5 lb/ton used. For the electric arc furnace shop, EPA again agrees with the commenter that RACT for secondary emission control can achieve 0.005 gr/dscf instead of the 0.02 gr/dscf assumed. For the bubble overall, correction of these assumptions results in: (1) An increase in total uncontrolled emissions, (2) a reduction in the RACT emission baseline, and (3) a total emissions trade of less than one-for-one. If these changes were made to the input for the short-term modeling, they would undoubtedly make more unfavorable the already significant adverse modeled impacts.

EPA has considered the NRDC's criticism of the emission factor assumptions used for the No. 2 BOF shop. While it does not agree with NRDC's position regarding the uncontrolled factors, EPA does acknowledge that some revision to the factors used might be justified. EPA has undertaken a thorough review of this subject in regard to BOFs in general and will make the results of that study available at a later date. Regarding the assumptions which EPA used for BOF charging and tapping control under the bubble, EPA here also acknowledges that some revision might be justified based on further detailed study of the shop. However, EPA has not undertaken such a study because the other problems with the bubble as discussed in this notice make the bubble unapprovable.

Comment: NRDC commented that the modeling fails to demonstrate that the plan as revised is adequate to attain the primary air quality standards because the modeling does not consider the impacts from all of the emission sources in the area affected by GLS's plants. NRDC believes SIP relaxations must be supported by a demonstration that the SIP as revised is adequate to protect the ambient standards. Also, NRDC contends that a large enough meteorological data base (e.g., five years) should be used so that variations in meteorology from year to year are not ignored in judging the SIP's adequacy and that there is no justification for the limited modeling requirements in EPA's ETPS for areas such as Wayne County, where the standards have not been attained and the SIP has not been approved as adequate to attain the standards.

Response: EPA solicited public comment on the generic issue raised by the commenter of whether emission trades should be allowed in areas where the standards have not been attained and/or the SIP has not been approved or shown to be sufficient to attain and maintain the standards, (August 31, 1983, 48 FR 39580). At the time the agency proposed to approve this SIP revision, its position on this issue was that such trades could be considered if they provided emission reductions and ambient concentrations equivalent to those obtained if the sources complied with RACT. This was based on the view that a showing of ambient equivalence to a RACT baseline would be adequate to assure that a bubble would not interfere with attainment or reasonable further progress toward attainment. The Level II modeling procedures specified in the proposed ETPS address only the sources involved in the trade and require only a limited meteorological data base. As explained in the proposed ETPS, EPA believes this limited modeling is adequate to demonstrate ambient equivalence to the appropriate baseline in certain circumstances. However, since National Steel has not demonstrated the required ambient equivalence, EPA must disapprove this bubble.

Comment: National Steel commented that since, after the submission of the original AECP the blast furnace casthouses have been controlled, they will likely propose a revised, much more limited, bubble involving control of emissions from the Zug Island roads in lieu of additional controls on the No. 2 BOF. National Steel believes this trade satisfies the requirements in the April 7, 1982, ETPS for a Level II air quality equivalence demonstration by meeting the following two conditions:

1. There is no increase in baseline emissions.

2. There is no significant air quality impact at the receptor of maximum impact on either an annual or 24-hour basis.

Response: Before EPA can formally entertain a revised AECP involving only roof monitor emissions from the No. 2 BOF Shop while excluding consideration of any blast furnace casthouse emissions, the State of Michigan must make such a request to EPA. Bubbles are revisions to the State's SIP and must be formally submitted to EPA as any other revision request. EPA's analysis and that summarized by the commenter suggest that an alternative bubble proposal involving only the No. 2 BOF

Shop would result in TSP concentrations increases over RACT levels near or above the 10ug/m³ significance level as defined by the ETPS.

Comment: National Steel commented that recent analysis of ambient air quality data indicates that the area around the Ecorse plant, which includes the No. 2 BOF Shop, meet EPA's criteria for redesignation to attainment for the primary TSP NAAQS.

Response: Before EPA could redesignate this area to primary attainment, a demonstration must be provided which shows that:

(a) Legally enforceable, permanent emission reductions are responsible for the recent air quality improvement,

(b) The available monitoring data are representative of the worst case air quality in the area, and

(c) Existing sources in the area to be redesignated do not significantly contribute to violations of the primary standards elsewhere in the surrounding area.

These requirements are consistent with the Agency's redesignation criteria noted in the memorandum "Section 107 Designation Policy Summary," dated April 21, 1983, and no such demonstration has been provided to EPA for this area.

Comment: NRDC commented that paving and dust suppressant applications are reasonably available and cost-effective control techniques, that would provide greater emission reduction than a program of watering, which EPA determined was the minimum requirement of the rule.

Response: EPA believe that is was incorrect to assume that watering was the minimum RACT requirement of Michigan's Rules 336.1371 and 336.1372. In approving these rules on November 15, 1982 (47 FR 51398), EPA was affirming that RACT for open dust sources is represented by a range of control techniques from which an appropriate program must be formulated based on site-specific considerations. EPA notes that in this regard the agency expects to solicit comment soon on whether it should withdraw its approval of the Michigan Rules.

EPA now believes that the site-specific factors that warrant the consideration of different control techniques under the rule must be presented by the State or company in a demonstration that any alternative program for which emission trading credits are sought does in fact offer emission reduction greater-than-RACT. In this case, no such demonstration or site-specific information regarding the cost-effectiveness of the alternative control program was submitted by the State or the company to allow EPA to determine whether it meets the definition of RACT or goes beyond the RACT requirements and therefore provides potential emission reduction credit. Because of the lack of such a demonstration, EPA does not believe that it is possible to consider the AECP as a program which provides for emission reductions beyond those required by RACT. EPA now believes that in the absence of site-specific information to the contrary, the RACT baseline should be set at the level achievable by the AECP, since the control techinques that would be used under the AECP are among those listed under the RACT-based Michigan rule.

In summary, EPA has reviewed all comments received and is taking final action to disapprove Michigan's proposed SIP revision request for GLS since the proposal does not satisfy all the requirements of EPA's proposed ETPS.

Under Executive Order 12291, today's action is not "Major". It has been submitted to the Office of Management and Budget (OMB) for review. Any comments from OMB to EPA, and any EPA response, are available for public inspection at the EPA Region V Office listed above.

Under section 307(b)(1) of the Clean Air Act, petitions for Judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit May 29, 1984. This action may not be challenged later in proceeding to enforce its requiremets. (See 307(b)(2))

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon nonoxide, Hydrocarbons, Intergovernmental relations.

This notice is issued under authority of sections 110 and 172 of the Clean Air Act, as amended (42 U.S.C. 7410 and 7502).

Dated: March 22, 1984.

William D. Ruckelshaus,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

40 CFR Part 52 is amended by adding paragraph (c) to § 52.1173 to read as follows:

Subpart X—Michigan

§ 52.1173 Control Strategy: Particulates

* * * * *

(c) *Disapprovals.* EPA disapproves the following specifi revisions to the Michigan Plan:

(1) The State submitted Consent Order No. 16–1982 on June 24, 1982, Great Lakes Steel, a Division of the National Steel Corporation as a revision to the Michigan State Implementation Plan. EPA disapproves this revision, because it does not satisfy all the requirements of EPA's proposed Emission Trading Policy Statement of April 7, 1982 (47 FR 15076).

Pesticide Guidelines; Notification to the Secretary of Agriculture of Final Regulation Specifying the Data Requirements for Registration of Pesticide Products

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule—related notice.

SUMMARY: Notice is given that the Administrator of EPA has forwarded to the Secretary of the U.S. Department of Agriculture a final regulation specifying the data requirements for the registration of pesticide products under the Federal Insecticide, Fungicide and Rodenticide Act.

FOR FURTHER INFORMATION CONTACT: Fred S. Betz, Hazard Evaluation Division (TS–769), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2 Room 821A, Arlington, Virginia 22202, (Tel. 703–557–9307).

SUPPLEMENTARY INFORMATION: Sec. 25(a)(2)(A) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (Pub. L. 92–516, 86 Stat. 973; Pub. L. 94–140, 89 Stat. 753; 7 U.S.C. 136 et seq.) provides that the Administrator shall provide the Secretary of Agriculture with a copy of any final regulation at least 30 days prior to signing it for publication in the **Federal Register**. If the Secretary comments in writing to the Administrator regarding any such proposed regulation within 15 days after receiving it, the Administrator shall publish in the **Federal Register** (with the final regulation) the comments of the Secretary, if requested by the Secretary, and the response of the Administrator concerning the Secretary's comments. If the Secretary does not comment in writing to the Administrator within 15 days after receiving it, the Administrator may sign

such regulation for publication in the Federal Register at any time after such 15-day period notwithstanding the foregoing 30-day time requirement. The time requirements may, however, be waived or modified to the extent agreed upon by the Administrator and the Secretary.

In accordance with Sec. 25(a)(3) of FIFRA, EPA has also furnished a copy of this final regulation to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition and Forestry of the Senate.

This regulation is designated as Part 158 of 40 CFR, and is titled "Data Requirements for Registration".

(Sec. 25 [Pub. L. 92–515, 86 Stat. 973; Pub. L. 94–140, 89 Stat. 753 (7 U.S.C. 136 et seq.)])

Dated: March 7, 1984.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

40 CFR Part 180

[PP 3F2865/R651; PH–FRL 2553–2]

Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Bentazon

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for the combined residues of the herbicide bentazon and its 6- and 9-hydroxy metabolites in or on the raw agricultural commodities sorghum, grain; sorghum, forage; and sorghum, fodder. This regulation to establish maximum permissible residues of the herbicide in or on these commodities was requested pursuant to a petition by BASF Wyandotte Corp.

EFFECTIVE DATE: Effective on March 28, 1984.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

By mail: Robert J. Taylor, Product Manager (PM) 25, Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

Office location and telephone number: Rm. 243, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–1800).

SUPPLEMENTARY INFORMATION: EPA issued a notice published in the Federal Register of June 8, 1983 (48 FR 26535), which announced that BASF Wyandotte Corp., 100 Cherry Hill Rd., P.O. Box 181, Parsippany, NJ 07054, had filed pesticide petition 3F2865 with the Agency proposing to amend 40 CFR 180.355 by establishing tolerances for the combined residues of the herbicide bentazon (3-isopropyl-1-*H*-3,1,3-benzothiadazin-4-(3H)-one-2,2-dioxide) and its 6- and 8-hydroxy metabolities in or on the commodities sorghum fodder and grain at 0.05 part per million (ppm) and sorghum forage at 0.20 ppm.

No comments were received in response to this notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerances are sought. The toxicology data considered in support of the tolerances include several acute studies; a 90-day dog-feeding study with a no-observed-effect level (NOEL) of 7.5 milligrams per kilogram per day (mg/kg/day); a teratology study (rat) with no observed teratogenic effects at 200 mg/kg/day (highest dose tested) and a NOEL of 66.7 mg/kg/day for maternal toxicity and fetotoxic effects; a 3-generation reproduction study (rat) with a NOEL greater than 9 mg/kg; an 18-month mouse-feeding study with no observed oncogenic effects at all levels tested (0, 100, 350, 1,600 ppm); a 2-year rat-feeding study with a systemic NOEL of 17.5 mg/kg/day and no observed oncogenic effects at all levels tested (0, 100, 350, 1,600 ppm); and a dominant-lethal mouse study negative at 195 mg/kg/day (highest dose tested).

The acceptable daily intake (ADI) is based on the 2-year rat-feeding study (NOEL of 17.5 mg/kg/day) and using a 100-fold safety factor is calculated to be 1.1750 mg/kg/day. The maximum permitted intake (MPI) for a 60-kg human is calculated at 10.5 mg/day. The theoretical maximum residue contribution (TMRC) for existing tolerances for a 1.5-kg diet is calculated to be 0.0584 mg/day. The current action will use less than 1 percent of the ADI. Published tolerances use 0.56 percent of the ADI.

A teratology study in a second species, a chronic study in a second species, and additional mutagenicity data are lacking. The company has been notified and has agreed to perform the studies.

The nature of the residue is adequately understood, and an adequate analytical method, gas chromatography using a sulfur-specific flame photometric detector, is available for enforcement purposes. There are currently no actions pending against the continued registration of this chemical. The established tolerances for residues in eggs, meat, milk, or poultry are adequate to cover secondary residues resulting from the proposed use as delineated in 40 CFR 180.6(a)(2).

Based on the above information considered by the Agency, it is concluded that the tolerances established by amending 40 CFR Part 180 will protect the public health and are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this regulation in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)))

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: March 14, 1984.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, 40 CFR 180.355(a) is amended by adding and alphabetically inserting the new raw agricultural commodities, to read as follows:

§ 180.355 Bentazon; tolerances for residues.

(a) * * *

Commodities	Parts per million
Sorghum, fodder	0.05
Sorghum, forage	0.20
Sorghum, grain	0.05

40 CFR Part 271

[SW-3-FRL 2554-1]

West Virginia; Phase I and II, Components A and B, Interim Authorization of the State Hazardous Waste Management Program

AGENCY: Environmental Protection Agency.

ACTION: Approval of State Program.

SUMMARY: Pursuant to the Resource Conservation and Recovery Act of 1976 (RCRA) provisions, the State of West Virginia has applied for Interim Authorization Phase I and Phase II, Components A and B. The Environmental Protection Agency (EPA) has reviewed West Virginia's application for Phases I and II, Components A and B, Interim Authorization, and has determined that West Virginia's hazardous waste program is substantially equivalent to the Federal program.

The State of West Virginia is hereby granted Interim Authorization for Phases I and II, Components A and B to operate the State's hazardous waste program in lieu of the Federal program.

EFFECTIVE DATE: March 28, 1984.

FOR FURTHER INFORMATION CONTACT: Anthony J. Donatoni, Chief, State Programs Section, Waste Management Branch, U.S. EPA Region III, 6th and Walnut Streets, Philadelphia, PA 19106 (215) 597-7937.

SUPPLEMENTARY INFORMATION:

Background

In the May 19, 1980 **Federal Register** (45 FR 33063) the Environmental Protection Agency promulgated regulations, pursuant to Subtitle C of the Resource Conservation and Recovery Act of 1976 (RCRA) as amended, to protect human health and the environment from the improper management of hazardous waste. Includes in these regulations, which became effective November 19, 1980, were provisions for a transitional stage in which States would be granted interim authorization. The Interim Authorization program is being implemented in two phases corresponding to the two stages in which the underlying Federal program has taken effect. Phase I of the Federal program, published in the May 19, 1980 **Federal Register** (45 FR 33063), includes regulations pertaining to the identification and listing of hazardous wastes; standards applicable to generators and transporters of hazardous waste, including a manifest system; and the "interim status" standards applicable to existing hazardous waste management facilities before they receive permits.

In the January 26, 1981 **Federal Register** (26 FR 7965), the Environmental Protection Agency announced the availability of portions of the second phase of Interim Authorization. Phase II of the Federal program includes permitting procedures and standards for hazardous waste management facilities. EPA made the second phase of Interim Authorization available in components in order to authorize State programs as expeditiously as possible and because some of the standards for hazardous waste treatment, storage, and disposal facilities (40 CFR Part 264) have been promulgated at different times. Component A, published in the **Federal Register** January 12, 1981 (46 FR 2802), contains standards for permitting containers, tanks, surface impoundments, and waste piles. Component B, published in the **Federal Register** January 23, 1981 (46 FR 7666), contains standards for permitting hazardous waste incinerators. Component C, published in the **Federal Register** July 26, 1982 (47 FR 32274), contains standards for permitting surface impoundments, waste piles, land treatment facilities and landfills. These Component C standards for permitting surface impoundments and waste piles superseded the Component A standards for permitting storage and treatment in surface impoundments and waste piles published on January 12, 1981. The State of West Virginia applied for Phase I and Phase II, Components A and B, Interim Authorization which would enable them to permit storage and treatment in containers and tanks and to permit hazardous waste incinerators in lieu of the Federal program.

On September 15, 1983, EPA published a notice in the **Federal Register** inviting the public to comment on West Virginia's application for Interim Authorization, Phases I and II, Components A and B, at a public hearing on October 18, 1983. This notice also invited the public to submit written comments on West Virginia's application to Region III by October 25, 1983. Notice was also given in eight major daily newspapers in West Virginia and was mailed to persons on both the State and EPA mailing lists.

Discussion

The State of West Virginia submitted an application for Phase I and Phase II, Components A and B, Interim Authorization on August 19, 1983. Although the application was complete, the State had not yet addressed some of the comments submitted by EPA on the earlier draft application. At the public hearing, the State indicated their intent to make certain revisions to its regulations to conform to the Federal program. These revisions were accomplished by the issuance of emergency regulations. The rule making process has also been initiated for permanent regulations. The State has agreed to voluntarily and immediately relinquish Interim Authorization if permanent regulations, substantially equivalent to the Federal program, do not become effective prior to the expiration of the emergency regulations. West Virginia has now adequately addressed EPA's comments and has made needed conforming revisions to the Memorandum of Agreement and the Attorney General's Statement. The State's program is substantially equivalent to the Federal program.

Responsiveness Summary

Region III held the public hearing on West Virginia's application for Phase I and Phase II, Components A and B, Interim Authorization, in Charleston, WV. Sixteen (16) members of the public attended, in addition to Region III and State agency representatives. Two presentations were made at the hearing; the first by a represenatative of the Environmental Control Committees of the West Virginia Manufacturers Association and the State Chamber of Commerce, and the second by a representative of the West Virginia Citizen Action Group and the West Virginia Highlands Conservancy. Both commenters were generally supportive of the State receiving Interim Authorization. Subsequent to the hearing, both commenters submitted written documentation further outlining their comments raised at the hearing. In addition, one written comment was received from the legal representative of the Appalachian Power Company and the Ohio Power Company, which did not oppose Interim Authorization. The public comment period closed on October 25, 1983.

Response

One comment questioned whether the Air Pollution Control Commission

(APCC) had exceeded its statutory authority under the Hazardous Waste Management Act (HWMA) when it promulgated regulations on the identification and listing of hazardous waste, a responsibility designated to the Director of the Department of Natural Resources (DNR) in Section 20–5E–6 of the HWMA. The regulations of the APCC have been amended to include by reference the criteria, characteristics and lists of hazardous waste in DNR's regulations.

Another comment questioned the suitability of the APCC having promulgated its regulation to manage hazardous waste facilities under the authority of both W. Va. Code Chapter 16, Article 20, and W. Va. Code Chapter 20, Article 5E. The Attorney General has certified that Article 20, Section 5E (the Hazardous Waste Management Act) provides authority for the required elements of an approved program. He also certified that the enforcement authority under Article 20, Section 5E, will be fully available. EPA believes that the additional citation of Chapter 16, Article 20, as authority for this regulation does not preclude interim authorization.

There was a comment indicating concern that the application was based upon regulations that were no longer jointly promulgated. Both DNR and the Water Resources Board originally issued Series VII of the regulations. Subsequently, the Board withdrew its participation in the regulations (except for a groundwater protection standard). The Attorney General has certified that the program being approved is supported by statutory authority and EPA has determined that the State program is substantially equivalent to the Federal program.

In 1982, DNR conducted a survey of hazardous waste generators, transporters and treatment, storage, and disposal facilities. Information from this survey was used to estimate available revenue to the State in its application for Interim Authorization. One comment expressed concern about the accuracy of the data as to the number of facilities, quantity of waste reported, and the possible revenues to be generated from permit application fees. EPA has carefully reviewed the current budget and believes it is adequate to effectively implement the hazardous waste program, even if such discrepancies exist. During FY 1984, DNR will investigate any discrepancies in the report and correct any errors accordingly.

Another comment objected to the fact that the State's regulatory program is more stringent than the Federal program in some areas. However, under Section 3009 of RCRA, the State has the authority to adopt regulations which are more stringent. Therefore, EPA cannot disapprove State programs solely on the basis that they are more stringent than the Federal program.

There was some concern raised regarding the authority of West Virginia's Hazardous Waste Management Act (HWMA). However, in his statement, the West Virginia Attorney General certified that, in his opinion, the HWMA is adequate for Interim Authorization and that regulations promulgated pursuant to HWMA are substantially equivalent to the analogous Federal regulations. EPA has accepted this opinion.

Another comment concerned the development of a form for the Part B permit application by APCC prior to EPA authorization. EPA does not have a form for these applications and, therefore, does not require the State to develop one. Both EPA and the State require the permit applicant to submit information outlined in the permitting regulations as part of the Part B permit application.

One commenter questioned the resources which the State has allocated to the hazardous waste management program (and the subsequent effects on West Virginia's permitting and compliance inspection efforts). EPA believes that the State has an acceptable resource base to qualify for Phase I and Phase II, Components A and B, Interim Authorization. Furthermore, it is EPA's opinion that West Virginia has the appropriate number of staff and skill mix to adequately perform compliance monitoring inspections and process storage and incineration permits during FY 1984. The Agency will be carefully assessing the performance of the State in conducting the delegated program and the results of this evaluation will be factored into our decision on Final Authorization.

There was one comment on DNR's revision of hazardous waste number D007 in Section 3.03.05, Table I, from Chromium (VI) to Chromium (total). EPA's listing is for total chromium. The State currently lists total chromium. Therefore, West Virginia's regulation is equivalent to the Federal regulation. The State chose to change its listing after EPA identified this difference between the State and Federal listings.

Another concern was raised that the application should be amended to include the recently negotiated Memorandum of Understanding (MOU) between the Department of Highways (DOH) and DNR. The responsibilities of DOH and DNR are outlined in the Program Description which is a part of the application. The MOU has been made a part of the State's file.

DNR's authority to regulate the transportation of hazardous waste by air was questioned. However, Section 5 of DNR's regulation adopts and incorporates by reference 40 CFR Part 263, as applicable to air transportation. The West Virginia Attorney General certified that Section 20–5E–6(12) empowers the Director "to promulgate such other rules and regulations as necessary to effectuate the purpose of the Act," and that "this statutory authority is sufficient and does allow the Director of DNR to promulgate such rules and regulations governing the transportation of hazardous waste by water and air as may be necessary to make the West Virginia program equivalent to and consistent with the federal program." EPA has accepted this opinion.

Decision

I have determined that West Virginia's program is substantially equivalent to the Federal program for Phase I and Phase II, Components A and B, Interim Authorization, as defined in 40 CFR Part 271, Subpart B (formerly 40 CFR Part 123, Subpart F). In accordance with Section 3006(c) of RCRA, West Virginia is hereby granted Interim Authorization to operate its hazardous waste program in lieu of Phase I and Phase II, Components A and B of the Federal hazardous waste program.

Compliance With Executive Order 12291

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this authorization will not have a significant economic impact on a substantial number of small entities. The authorization suspends the applicability of certain Federal regulations in favor of West Viriginia's program, thereby eliminating duplicative requirements for handlers of hazardous waste in the State. It does not impose any new burdens on small entitities. This rule, therefore, does not require a regulatory flexibility analysis.

List of Subjects in 40 CFR Part 271

41 CFR Part 101-49

[FPMR Amdt. H-148]

Redefinition of "Minimal Value" Associated With the Receipt and Retention of Foreign Gift Items

AGENCY: Office of Federal Supply and Services, GSA.

ACTION: Final rule.

SUMMARY: In accordance with Pub. L. 95-105, this regulation amends FPMR Part 101-49 by redefining the "minimal value" associated with the receipt and retention of foreign gifts by United States officials from foreign governments from $140 to $165.

EFFECTIVE DATE: March 28, 1984.

FOR FURTHER INFORMATION CONTACT: Mr. Stanley M. Duda, Director, Utilization Division (703-577-0807).

SUPPLEMENTARY INFORMATION: GSA has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

List of Subjects in 41 CFR Part 101-49

Utilization, Donation, and Disposal of foreign gifts and decorations, Decorations, Medals, Awards, Foreign relations, Government property.

PART 101-49—UTILIZATION, DONATION, AND DISPOSAL OF FOREIGN GIFTS AND DECORATIONS

Title 41, Part 101-49 of the Code of Federal Regulations is amended as follows:

1. **Authority:** Sec. 205(c) 63 Stat. 390; 40 U.S.C. 486(c); Sec. 515, 91 Stat. 862; 5 U.S.C. 7342.

2. Section 101-49.001-5 is amended by revising the introductory text to read as follows:

§ 101-49.001-5 Minimal value.

"Minimal value" means a retail value in the United States at the time of acceptance of $165 or less, except that:

* * * * *

Dated: February 10, 1984.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 2, 81, and 83

[Docket No. 83-664, FCC 84-15]

Frequency Allocations and Treaty Matters; General Rules and Regulations; Stations on Shipboard in the Maritime Services; Stations on Land in the Maritime Services and Alaska-Public Fixed Stations

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document amends the rules by changing the use of marine VHF Channel 88 in the Puget Sound area and its approaches, within 75 miles of the U.S./Canada border. Currently, this Channel is available for commercial use (ship-to-ship). The commercial use has caused harmful interference to Canadian public correspondence stations near the border, according to the British Columbia Telephone Company. We are therefore amending the rules to make Channel 88 available to ships within 75 miles of the border for public correspondence with Canadian coast stations. This action is intended to rectify the interference problem in the interest of both the Canadian and the U.S. maritime community. This document includes two other minor changes involving Limited Coast and Marine Utility station eligibility requirements and A3A emission specifications. This last change removes an unnecessary regulation which has burdened manufacturers and licensees.

EFFECTIVE DATE: February 27, 1984.

Report and Order (Proceeding Terminated)

In the matter of amendment of Parts 2, 81, and 83 of the Commission's rules concerning the use of marine VHF Channel 88 in the Puget Sound area, eligibility for Limited Coast and Marine Utility stations, and deletion of all A3A emission requirements; PR Docket No. 83-664, FCC 84-15.

Adopted: January 16, 1984.

Released: January 19, 1984.

By the Commission.

Summary

1. In this Report and Order we are amending the Commission's rules to discontinue use of simplex marine VHF Channel 88A (157.425 MHz) for commercial intership communications in the Pudget Sound waters[1] within 75 miles of the United States/Canada border. Instead, ships within this 75 miles area will be allowed to use Channel 88 for public correspondence with Canadian coast stations. In this proceeding we are also clarifying the rules concerning eligibility for Limited Coast and Marine Utility stations and deleting the requirement that single sideband radios be capable of operating in the A3A mode. We released a *Notice of Proposed Rule Making* (NPRM, FCC 83-299, 48 FR 32610) in this proceeding on July 12, 1983.

Marine Ch. 88

2. Marine Channel 88 consists of a frequency pair: a ship station transmit frequency (157.425 MHz) and a coast station transmit frequency (162.025 MHz). The ship station frequency, which may also be used in a simplex mode, is sometimes referred to as Channel 88A. Channel 88A may be used by commercial fishing vessels and their associated aircraft (e.g., fish spotting). In 1976 the Commission amended its rules to allow public correspondence use of Channel 88 in the Great Lakes and the

[1] For purposes of this rule making proceeding, the "Puget Sound" includes the area of the Puget Sound and the Strait of Juan de Fuca and its approaches.

St. Lawrence Seaway between U.S. vessels and Canadian coast stations.

3. The Commission proposed to change the use of Channel 88A in the Puget Sound in response to a petition from the North Pacific Marine Radio Council (NPMRC). Enclosed with the NPMRC's correspondence was a letter from the British Columbia Telephone Co. (B. C. Telephone Co.) alleging that U.S. vessels were causing interference on 157.425 MHz. The B. C. Telephone Company uses the frequency pair for public correspondence, in accordance with the international Radio Regulations. A long comment period was allowed to insure that commercial interests which might be affected by this change would have an opportunity to file comments after reading or hearing about the NPRM from the local media. The local FCC field office disseminated copies of the NPRM to a broad population of local interests. The NPRM also received wide media coverage in the Seattle area where over 500 copies were distributed.

4. No one filed comments opposing the reallocation of Channel 88A in the Puget Sound. Thus we infer that this change in the rules will have little or no impact on our licensees. As stated previously in the NPRM, there are ten other channels which will remain available for commercial intership communications. With the adoption of this amendment, the rules governing the use of Channel 88 in the Puget Sound area, the Great Lakes, and the St. Lawrence Seaway will be consistent.

Limited Coast/Marine Utility Station Eligibility Requirements

5. In the NPRM, we proposed to rewrite the rules (Section 81.351) governing the eligibility requirements for Limited Coast stations and Marine Utility stations to specifically include companies servicing radio equipment on non-commercial vessels. This rule amendment was proposed in response to a number of requests from such users. This minor rule amendment did not generate any adverse public comment and is therefore being made.

A3A Emission

6. The third change proposed in the NPRM concerned the requirement in Parts 81 and 83 of our rules that single sideband radios have an A3A emission capability. Manufacturers of this equipment stated the there is no need for such voice single sideband reduced carrier operation. Rockwell International Corporation (Rockwell) filed comments in support of the Commission's proposal to remove the A3A capability. Rockwell pointed out that the International Telecommunication Union at its 1983 Mobile Services World Administrative Radio Conference eliminated similar requirements from its Radio Regulations. We are therefore removing this obsolete requirement from our rules as part of our general effort to eliminate unnecessary and outmoded regulations. However, there will be no prohibition against the continued manufacture and use of equipment with this emission capability, and existing equipment will not be affected in any way. We also have taken this opportunity to reorganize and clarify § 83.137 (Modulation requirements) which previously contained, among other things, the A3A requirement.

8. We have determined the Section 603 and 604 of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354) do not apply to this rule making proceeding because it limits the use of only one channel in the Puget Sound waters. There are ten other channels available for this use, and the limitation only affects the part of the sound within 75 miles of the U.S./Canada border. Therefore, it will not have a significant economic impact on a substantial number of small entities. The other two changes will have a small beneficial effect on large and small business alike.

9. Regarding questions on matters convered in this document contact Maureen Cesaitis, (202) 632–7175.

10. Accordingly, it is ordered, That under the authority contained in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(r), the Commission's rules are amended as set forth in the Appendix, effective February 27, 1984.

11. It is further ordered, That a copy of this Order shall be sent to the Chief Counsel for Advocacy of the Small Business Administration.

12. It is further ordered, That this proceeding in terminated.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Parts 2, 81, and 83 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS GENERAL RULES AND REGULATIONS

Section 2.106 is modified by revising footnote US223 as follows:

§ 2.106 Table of frequency allocations.

* * * * *

United States Footnotes

* * * * *

US223 Within 75 miles of the United States/Canada border on the Great Lakes, the St. Lawrence Seaway, and the Puget Sound and the Strait of Juan de Fuca and its approaches, use of coast transmit frequency 162.025 MHz and ship station transmit frequency 157.425 MHz (VHF maritime mobile service Channel 88) may be authorized for use by the maritime service for public correspondence.

* * * * *

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA-PUBLIC FIXED STATIONS

§ 81.142 [Amended]

1. Section 81.142 is amended by removing paragraph (c)(3).

2. Section 81.351 is amended by adding new paragraphs (a)(7) through (a)(9), removing paragraph (b), and redesignating paragraph (c) as paragraph (b), and revising it, as follows:

§ 81.351 Supplemental eligibility requirements.

(a) * * *

(7) A person controlling moorage facilities,

(8) A person performing the function of service and supply to vessels other than commercial transport vessels,

(9) A nonprofit corporation or association organized to provide noncommercial communications to vessels other than commercial transport vessels.

(b) Each application for station authorization for a limited coast station or a marine-utility station shall be accompanied by a written statement in detail sufficient to indicate clearly the applicant's eligibility under paragraph (a) of this section.

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

1. Section 83.137 is amended by revising paragraphs (a), (b) and (c) introductory text and (c)(3), by adding a new paragraph (c)(4) and (d), and by removing paragraphs (e), (f), (g), (h), (i), and (j), including the footnote.

§ 83.137 Modulation requirements.

(a) Transmitters must comply with the following emission requirements:

(1) Transmitters using A3 emission shall be capable of proper technical operation with modulation of 75 percent on peaks but not more than 100 percent on negative peaks. Each such transmitter shall be so adjusted that the transmission of speech and the international radiotelephone alarm

signal, if provision is made for transmission of the signal, normal produce peak modulation percentages within those limits.

(2) Transmitters using F3 emission in the band 156–162 MHz, or emissions F1, F3, F4 in the band 218–220 MHz, shall be capable of proper technical operation with a frequency deviation of ±5 kHz, which is defined as 100 percent modulation. In general, transmitters shall be adjusted so that transmission of speech normally produces peak modulation percentages between 75 and 100 percent.

(b) Radiotelephone transmitters shall automatically prevent modulation in excess of 100 percent when using A3 or F3 emissions. This requirement shall not apply to survival craft station transmitters or to transmitters not required to be type accepted or with a transmitter power not exceeding 3 watts. In the event the operation of any licensed radiotelephone transmitter causes harmful interference to any authorized radio service by reason of excessive modulation, the Commission may, in its discretion, require that the use of such transmitter be discontinued until it will automatically prevent modulation in excess of 100 percent.

(c) Single sideband transmitters shall be capable of operating as follows:

* * * * *

(3) In single sideband operation, the sideband on the higher frequency side of the carrier frequency shall be transmitted.

(4) Single sideband transmitters shall automatically limit the peak envelope power to the authorized transmitter power.

(d)(1) Emergency position indicating radiobeacon (EPIRB) stations operating on the frequencies 121.5 and 243 MHz shall employ a distinctive emission consisting of amplitude modulation of the carrier with an audio frequency sweeping downward over a range of not less than 700 Hz, within the range 1600 to 300 Hz, with a sweep rate between 2 and 4 times per second. The modulation applied to the carrier shall be in accordance with that specified in the Radio Technical Commission for Aeronautics (RTCA) Document Numbers D0–145 or D0–146.

(2) EPIRB stations operating on the frequencies 156.75 and 156.8 MHz shall employ the international Radiotelephone Two Tone Alarm signal to frequency modulate the carrier frequencies.

(i) The EPIRB signal transmitted on the frequencies 156.75 and 156.8 MHz shall consist of two substantially sinusolidal audio frequency tones transmitted alternately. One tone shall have frequency of 2200 Hz and the other a frequency of 1300 Hz, the duration of each tone shall be 250 milliseconds. The frequency tolerance of the tones and the tolerance of the tone duration shall be ±5 percent.

(ii) An EPIRB sequence consists of 6 time periods of specified durations. The EPIRB shall transmit during 4 of the time periods and remain silent during the other 2. The nominal period of each successive sequence shall be increased by extending the duration of the "off" periods (t_4 to t_6) during which the device is not transmitting a signal. The duration to t_4 and t_6 shall be incrementally increased in proportion to the time the device is continuously activated. The duration of each time period with a ±5% tolerance, the number of sequences, and the frequency are specified in the table below.

Time period	Transmission frequency in MHz.	Duration in seconds (No. of sequences)
1	1.5	156.8
2	14.5	156.75
3	1.5	156.8
4	(1) 40.0	None
	(2) 80.0	
	(3) 160.0	
	(4) 320.0	
5	14.5	156.75
6	(5)	None

(1) 16 sequences.
(2) 32 sequences.
(3) 64 sequences.
(4) 83.2 sequence.
(5) Same as time period 4.

2. Section 83.351 is amended by revising paragraphs (b) (33) and (44) to read as follows:

§ 83.351 Frequencies available.

* * * * *

(b) * * *

(33) Except within 75 miles of the United States/Canada border in the area of the Puget Sound and the Strait of Juan de Fuca and its approaches, the Great Lakes, and the St. Lawrence Seaway, available for intership and commercial communications. Except in the Puget Sound and the Strait of Juan de Fuca and its approaches and the Great Lakes, also available for communications between commercial fishing vessels and associated aircraft while engaged in commercial fishing activities.

* * * * *

(44) Within 75 miles of the United States/Canada border, in the area of the Puget Sound and the Strait of Juan de Fuca and its approaches, on the Great Lakes, and the St. Lawrence Seaway, 157.425 MHz is half of the duplex pair designated as Channel 88. In this area, Channel 88 is available for use by ship stations for public correspondence communications only.

* * * * *

3. In Section 83.1012, paragraph (b) is amended by adding new language to footnotes 1 and 2, the revised footnotes read as follows:

§ 83.1012 (VHF Marine Rule 12) What channels may I use?

* * * * *

(b) * * *

[1] Not available in the Great Lakes, the St. Lawrence Seaway, or the Puget Sound and the Strait of Juan de Fuca and its approaches.

[2] Only for use in Great Lakes, St. Lawrence Seaway, and Puget Sound and the Strait of Juan de Fuca and its approaches.

Radio broadcasting.

Report and Order Proceeding Terminated

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Gulf Breeze, Florida), MM Docket No. 83–493, RM–4393.

Adopted: March 12, 1984.
Released: March 21, 1984.

By the Chief, Policy and Rules Division.

1. The Commission has before it the *Notice of Proposed Rule Making*, 48 FR 27567, published June 16, 1983, issued in response to a petition for rule making filed by Eugene Hobdy ("Hobdy") proposing to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules, by assigning FM Channel 237A to Gulf Breeze, Florida, as its first FM channel assignment. In repsonse to the *Notice*, Hobdy filed comments and restated his intention to apply for FM Channel 237A at Gulf Breeze. Supporting comments were filed by Breeze Broadcasting Corp. also

indicating an interest in applying. Capitol Broadcasting Corp. ("Capitol"), licensee of FM Station WKSJ, Mobile, Alabama, filed opposing comments and a counterproposal. Reply comments were filed by Hobdy.

2. Channel 237A can be assigned to Gulf Breeze in conformity with the Commission's minimum distance separation requirements at a site located approximately 5.6 miles northeast of the city. As stated in the *Notice*, this restriction is necessary to avoid short-spacing to the present site of Station WKSJ–FM (Channel 235), Mobile, Alabama.

3. In its comments, Capitol states that on July 5th, 1983, it filed an application to change the transmitter site of WKSJ–FM. Capitol argues that the assignment of Channel 237A to Gulf Breeze will preclude the proposed relocation of WKSJ because of a 26.6 mile short-spacing. As a counterproposal, Capitol suggests that pursuant to the proposed guidelines in Docket No. 80–90, there are several channels available in Gulf Breeze which would allow both the relocation of WKSJ–FM and the assignment of a new channel to Gulf Breeze.

4. In reply comments, Hobdy opposes the counterproposal on the grounds that requested channel assignments in Docket 80–90 may not be made for several years and proposals for Gulf Breeze would have to compete with numerous other proposals within the general rule making. Consequently, Hobdy asserts, if the counterproposal is adopted it may be several years before Gulf Breeze would have an available FM channel. Hobdy concludes that, Section 307(b) of the Communications Act of 1934, as amended, requires that a move of the WKSJ transmitter-antenna site must wait until the Docket 80–90 standards are adopted so that Hobdy's proposal to bring a first FM service to Gulf Breeze may be adopted immediately.

5. We agree with Hobdy, that Capitol's reliance on the channels that will be made available pursuant to Docket 80–90 is premature. Although the Commission adopted a *Report and Order* in BC Docket 80–90, which will authorize new frequencies nationwide, those rules are not effective as yet. The Commission is expecting to make these rules effective early this year. Thereafter, the public will be notified when petitions based on 80–90 rules would be accepted.

6. Concerning Capitol's counterproposal, the issue here is whether Capitol's site preference should be permitted to take precedence over an assignment which could provide Gulf Breeze with its first local FM service? In *Lockhart, Texas*, we held *inter alia*, that a site preference for an existing station is not sufficient justification to deny a first assignment to another city. See, *Report and Order*, 81 F.C.C. 2d 171 (1980). We believe *Lockhart* is controlling here. Capitol offers no evidence demonstrating how the public interest will be better served by its proposed move. Furthermore the new channel availability envisioned under the rules adopted in BC Docket 80–90 would delay service at Gulf Breeze for an undetermined period. Thus we believe the public would be benefitted by the assignment of FM Channel 237A to Gulf Breeze, as its first assignment.

7. Accordingly, pursuant to authority contained in Sections 4(i), 5(c)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is ordered, That effective May 29, 1984, the FM Table of Assignments, § 73.202(b) of the Commission's Rules, is amended as follows for the community listed:

City	Channel No.
Gulf Breeze, Florida	237A

8. It is further ordered that this proceeding is terminated.

9. For further information concerning this proceeding contact Arthur D. Scrutchins, Mass Media Bureau, (202) 634–6530.

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

BILLING CODE 6712–01–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 652

[Docket No. 21130–239]

Atlantic Surf Clam and Ocean Quahog Fisheries

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Final rule; technical amendment opening area to fishing.

SUMMARY: NOAA issues this technical amendment deleting from regulations the previously closed area known as the "Philadelphia and du Pont closure," thereby reopening an area closed to surf clam and ocean quahog fishing due to environmental degradation. The area is being reopened because studies conducted by the U.S. Public Health Service show that the level of shellfish contamination has dropped to the extent that shellfish in the area no longer pose a health risk. Reopening of the area will allow fishermen to harvest any legal-sized surf clams or ocean quahogs which may occur in the area.

EFFECTIVE DATE: March 28, 1984.

FOR FURTHER INFORMATION CONTACT: Bruce Nicholls, Surf Clam Management Coordinator, National Marine Fisheries Service, Northeast Region, State Fish Pier, Gloucester, Massachusetts 01930; telephone 617–281–3600.

SUPPLEMENTARY INFORMATION: Final regulations implementing Amendment 3 to the Fishery Management Plan for Atlantic Surf Clam and Ocean Quahog Fisheries were published on January 29, 1982 (47 FR 4268). Section 652.23(a) of the regulations provides for the closure of areas to surf clam and ocean quahog fishing because of adverse environmental conditions. That section also provides that the areas will remain closed until the Secretary of Commerce determines that the adverse environmental conditions have been corrected. One of the identified closed areas, described at § 652.23(a)(3), is the ocean dumpsite known as the Philadelphia and du Pont Closure. The area was closed to shellfishing in 1976 because of the presence of chemical and sewage sludge contaminants. Waste disposal in the area ceased in 1980. The Public Health Service of the Department of Health and Human Services is the agency which monitors recovery of degraded dumpsite areas. Sampling was conducted by the Northeast Technical Services Unit of that agency in 1983, which analysed for the presence of coliform bacteria and found excellent bacteriological water quality. The analysis showed that water conditions had nearly returned to pre-dumping conditions, and that shellfish harvesting in the area no longer posed a health risk. Accordingly, the Public Health Service has cancelled its notice of closure of the area to shellfish harvesting, and the Secretary is reopening the area to surf clam fishing as stipulated in the surf clam fishery regulations. Also, § 652.23 of the implementing regulations is amended by deleting § 652.23(a)(3) and redesignating (a)(4) as (a)(3).

This action is taken under the authority of 50 CFR Part 652 and is taken in compliance with Executive Order 12291.

List of Subjects in 50 CFR Part 652

Fisheries, Reporting and recordkeeping requirements.

Proposed Rules

Federal Register
Vol. 49, No. 61
Wednesday, March 28, 1984

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

SMALL BUSINESS ADMINISTRATION

13 CFR Part 107

Accounting Standards and Financial Reporting Requirements for Small Business Investment Companies

AGENCY: Small Business Administration.

ACTION: Notice of extension of comment period on advance notice of proposed rulemaking.

SUMMARY: On February 10, 1984, SBA published in the **Federal Register** an Advance Notice of proposed rulemaking regarding Accounting Standards and Financial Reporting Requirements for Small Business Investment Companies (see 49 FR 5230)

That publication provided that comments on the advance notice would be received for a period of 60 days from date of publication. This notice extends the comment period pertaining to the advance notice for an additional 30 days due to request from industry for additional time.

DATE: Comments on the above-referenced proposed rule must be received by May 10, 1984.

ADDRESS: Written comments should be directed to Mr. Thomas C. Bresnan, Staff Accountant, Small Business Administration, Office of Finance and Investment, 1441 L Street, NW., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas C. Bresnan, telephone (202) 653–6782.

SUPPLEMENTARY INFORMATION: In order to provide more time for public comment on the above-referenced proposed rule, SBA is hereby extending the comment period relative to the proposal for an additional 30 days. The public is encouraged to supply comments in writing to the address indicated above so that a complete record on this important advance notice can be established.

Dated: March 19, 1984.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 832 3100]

Adria Laboratories, Inc.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed Consent Agreement.

SUMMARY: In settlement of alleged violation of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require a Dublin, Ohio manufacturer and seller of over-the-counter drugs, among other things, to cease promoting "Efficin," or any other over-the-counter internal analgesic containing magnesium salicylate, by representing that the product contains no aspirin or by comparing the product's safety to any product containing aspirin, unless such representations are accompanied by prescribed disclosure warnings and substantiated by reliable and competent scientific evidence.

DATE: Comments must be received on or before May 29, 1984.

ADDRESS: Comments should be directed to: FTC/S, Office of the Secretary, Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: FTC/PA, T. Bringier McConnell, Washington, D.C. 20580, (202) 724–1096.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with an accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with Section 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

Before Federal Trade Commission

[File No. 832–3100]

Agreement Containing Consent Order To Cease and Desist

In the matter of Adria Laboratories, Inc., a corporation.

The Federal Trade Commission having initiated an investigation of certain acts and practices of Adria Laboratories, Inc. ("Adria"), a corporation, and it now appearing that Adria, hereinafter sometimes referred to as proposed respondent, is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated,

It is hereby agreed by and between Adria Laboratories, Inc., its duly authorized officer, its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent Adria Laboratories, Inc. is a corporation organized, existing and doing business under and by virtue of the laws of the State of Delaware with its office and principal place of business located at 5000 Post Road, in the City of Dublin, State of Ohio.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The

Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent of the factual allegations of the proposed complaint, except for jurisdictional facts, or that the law has been violated as alleged in the draft complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I

It is ordered that respondent Adria Laboratories, Inc. a corporation, its successors and assigns, and its officers, agents, representatives, and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, labeling, offering for sale, sale, or distribution of Efficin or any other over-the-counter internal analgesic containing magnesium salicylate affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from representing, directly or by implication, that the product contains no aspirin, or any other representation, directly or by implication, comparing the product's safety to any product containing aspirin, unless the following statement is clearly and promiently disclosed:

A. "Efficin (or other product's name) has side effects similar to aspirin."

B. If Efficin's (or other product's) label discloses that consumers should not take the product if they have stomach distress, ulcers or bleeding problems except under the direction and supervision of a physician, respondent may substitute the following statement for the disclosure required in PART I(A): "Efficin (or other product's name) is similar to aspirin. Read label including warnings."

C. If Efficin's (or other product's) package insert discloses that consumers should not take the product if they have stomach distress, ulcers or bleeding problems except under the direction and supervision of a physician, respondent may substitute the following statement for the disclosure required in Part I(A): "Efficin (or other product's name) is similar to aspirin. Read and save package insert including warnings."

D. Such other statment approved by the Federal Trade Commission in advance, or

E. Such other statement as respondent can demonstrate (based on consumer surveys whose design is adequate and previously approved by the Federal Trade Commission) will convey the same messages as conveyed by the statement in Parts I(A), I(B), or I(C) as applicable.

Provided that it shall not violate this Part to distribute packages of Efficin that were fully packaged as of October 18, 1983, that do not contain a disclosure statement required by this Part.

II

A. It is further ordered that respondent, its successors and assigns, and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division, or other device, in connection with the advertising, labeling, packaging, offering for sale, sale, or distribution of any over-the-counter drug product affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from making any representation, directly or by implication, concerning the safety of such product or from comparing any such product to any product or products of one or more competitors concerning safety, unless, at the time of such representation, respondent possesses and relies upon a reasonable basis for such representation, consisting of reliable and competent scientific evidence that substantiates each such representation.

B. To the extent the evidence of a reasonable basis consists of scientific or professional tests, analyses, research, studies or any other evidence based on expertise of professionals in the relevant area, such evidence shall be "reliable and competent" for purposes of Part II (A) only if those tests, analyses, research, studies, or other evidence are conducted and evaluated in an objective manner by persons qualified to do so, using procedures generally accepted in the profession or science to yield accurate and reliable results.

III

It is further ordered that respondent notify the Commission at least thirty (30) days prior to any proposed change in respondent such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

IV

It is further ordered that respondent shall forthwith distribute a copy of this order to each of its operating divisions involved in the marketing of over-the-counter drugs.

V

It is further ordered that respondent shall, within sixty (60) days after this order becomes final, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order.

VI

It is further ordered that, for the period of three years after it last disseminated the advertisements of the products covered by this order, respondent shall maintain accurate records:

1. Of all materials that were relied upon by respondent in disseminating any representation covered by this order.

2. Of all test reports, studies, surveys, or demonstrations in its possession or control or of which it has knowledge that contradict any representation made by respondent that is covered by this order.

These records may be inspected by the staff of the Commission upon reasonable notice.

Analysis Of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Adria Laboratories, Inc. ("Adria").

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The complaint charges the respondent Adria with disseminating advertisements containing several false, misleading and unsubstantiated representations regarding Efficin. The complaint alleges that, contrary to fact, respondent's advertisements claimed that Efficin is not associated with most of the side effects and contraindications as aspirin. In addition, the complaint charges respondent with advertising the claims that use of Efficin poses a lesser risk of suffering the side effects associated with aspirin than does use of aspirin and that the side effects associated with both aspirin and Efficin are less severe with Efficin than with aspirin. The advertisements represented, directly or by implication, that respondent had a reasonable basis for these claims when in fact respondent did not rely on a reasonable basis for them. Accordingly, disseminating these representations constitutes unfair or deceptive acts or practices.

The complaint also alleges that Adria's advertising for Efficin failed to disclose that Efficin is similar to aspirin, and that the ingredient in Efficin has been associated with many of the same side effects and contraindications as aspirin. In light of respondent's claims about the relative safety of Efficin over aspirin, respondent's failure to disclose the similarities between Efficin and aspirin in its advertising is an omission of a material fact, and consequently this advertising is false within the meaning of Section 12 of the Federal Trade Commission Act.

The consent order contains various provisions designed to remedy the alleged advertising violations.

Part I of the order prohibits Adria from promoting Efficin or any other over-the-counter internal analgesic containing magnesium salicylate by representing that the product contains no aspirin or by making any representation that otherwise compares the product's safety to any product containing aspirin unless certain information is clearly and prominently disclosed. Specifically, one of the three following disclosures must be made.

(1) "Efficin (or other product's name) has side effects similar to aspirin."

(2) If Efficin's (or other product's) label discloses that consumers should not take the product if they have stomach distress, ulcers or bleeding problems except under the direction and supervision of a physician, respondent may substitute the following statement: "Efficin (or other product's name) is similar to aspirin. Read label including warning."

(3) If Efficin's (or other product's) package insert discloses that consumers should not take the product if they have stomach distress, ulcers or bleeding problems except under the direction and supervision of physician, respondent may substitute the following statement: "Efficin (or other product's name) is similar to aspirin. Read and save package insert including warnings."

Alternatively, Adria may use any disclosure approved in advance by the Commission or any statement that respondent can demonstrate (based on adequately designed consumer surveys approved in advance by the Commission) will convey the same message as the statements specified in the Paragraph I of the order. Part I permits Adria to distribute Efficin which was fully packaged as of October 18, 1983, without making the disclosures on the product packaging that would otherwise be required by Part I. Any advertising disseminated during the period this inventory is distributed, however, would not be exempted from the disclosure requirements contained in Part I. Rather, the order proviso, together with the requirements found in Part I, requires Adria to make the disclosure statement set out in Paragraph I(A) (or an equivalent statement, pursuant to Paragraphs I(D) or I(E)) in connection with any advertising claims covered by Part I of the order.

Paragraph II (A) of the order prohibits Adria from promoting Efficin or any other over-the-counter internal analgesic containing magnesium salicylate by making any representation, directly or by implication, concerning the safety of the product or comparative safety of competitive products unless respondent has a reasonable basis for these representations. Paragraph II(A) also specifies that a reasonable basis consists of reliable and competent scientific evidence that substantiates each representation. To the extent that respondent's reasonable basis consists of scientific or professional tests and studies Paragraph II(B) requires that they be conducted and evaluated objectively by qualified persons using generally accepted procedures.

Paragraph III requires respondent to notify the Commission at least thirty (30) days prior to any proposed change in respondent that may affect compliance obligations arising out of the order.

Paragraph IV requires respondent to distribute a copy of the order to each of its operating divisions involved in the marketing of over-the-counter drugs.

Paragraph V requires respondent to file a compliance report with the Commission sixty (60) days after the order becomes final.

Paragraph VI requires respondent to maintain records of all substantiation related to the requirements of the order for three (3) years after the dissemination of any advertisements. These records may be inspected by Commission staff on reasonable notice.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Emily H. Rock,

Secretary.

BILLING CODE 6750-01-M

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1145

Proposed Rule To Regulate Under the Consumer Product Safety Act Risks of Injury That May Be Associated With Baby Bassinets Having Legs That Collapse

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed rule.

SUMMARY: The Commission has learned of instances where baby bassinets have collapsed because their supporting legs gave way. As a result, infants occupying the bassinets have fallen and suffered injuries. Should regulatory action become necessary to address any risk of injury associated with baby bassinets having legs that collapse, the Commission proposes to regulate any such risk of injury under the provisions of the Consumer Product Safety Commission Act (CPSA) rather than the Federal Hazardous Substances Act (FHSA). The Commission preliminarily determines that this transfer is in the public interest because, if the Commission finds regulation of such risks of injury is necessary, public notification and remedial action can be accomplished more effectively and expeditiously under the CPSA than under the FHSA.

DATE: Comments concerning this proposal must be received in the Office of the Secretary by April 27, 1984.

ADDRESS: Written comments should be addressed to the Secretary of the Commission, Sadye E. Dunn, Consumer Product Safety Commission, Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT: Lynn Lichtenstein, Directorate for Compliance and Administrative Litigation, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (301) 492–6626.

SUPPLEMENTARY INFORMATION: The Commission proposes to regulate under the CPSA rather than the FHSA possible risks of death and injury such as concussion, fractured skull, hemorrhage, anoxia and related trauma associated with baby bassinets having legs that collapse.

Section 30(d) of the CPSA (15 U.S.C. 3079(d)) on which this proposed rule is based, provides that a risk of injury associated with a consumer product which could be eliminated or reduced to a sufficient extent by action under the FHSA, may be regulated under the CPSA if the Commission, by rule, finds that it is in the public interest to regulate such risks of injury under the CPSA.

The Commission has examined the applicable statutes and has considered the facts regarding possible risks of death or injury associated with baby bassinets having legs that collapse thus endangering the infant using the bassinet. The Commission has preliminarily determined that it is in the public interest to regulate under the CPSA rather than the FHSA the risks of injury noted here because public notification and remedial action can be accomplished more effectively and expeditiously under the CPSA.

A. Background

The product—A bassinet is a small sleeping container used in the home and elsewhere for infants during the first several months after birth. A bassinet may be stationary or equipped with wheels for mobility. To enhance portability and storage in small spaces, may bassinets have folding legs.

The size of the sleeping container may vary, but it is usually about 36 inches long by about 20 inches wide by about 12 inches deep. The sleeping container is often made of wicker or plastic shaped like wicker, and resembles a basket.

The sleeping container is mounted on four legs, which may have caster wheels to facilitate movement from place to place. (See figure 1.) Some bassinets are constructed with the two legs at each end connected by a harizontal cross member which allows the legs to fold as a pair. On these bassinets, each leg in a pair may have an individual leg brace consisting of two steel links connected by a center pivot. (See figure 1.) When the legs of these bassinets are fully extended, the links of the leg brace form a straight line. The links of the brace may have intermeshing dimples or some other mechanism for locking the brace. (See figure 2A.) When the two links of the brace are moved in an upward direction, the legs will fold under the sleeping container. (See figure 2B.)

When a leg brace is in a straight line it can resist compressive forces either from movement of the infant within the bassinet or an adult pushing the bassinet from one room to another. If a leg brace which is designed to reach a straight line is not fully opened into its straight line position, or if the interlocking dimples are small and shallow, the legs of the bassinet can collapse inward (toward the center of the bassinet). Bending stress on the links due to offset at their outer ends may also cause the leg braces to separate and allow folding of the links either upward or downward. Folding of the links in turn results in collapse of the legs and the bassinet. Collapse of the legs may also be more likely when the brace is constructed of thin-gauge steel.

The hazard—The Commission has learned of the deaths of three infants that are associated with collapse of baby bassinets. The reports indicate that, while the children were in them, the bassinets' legs collapsed. Each infant may have suffered internal cranial hemorrhaging from the blow to the head when falling, and anoxia (inability to breathe) because of being thrown head downward and remaining in that position. From consumer complaints and Commission investigations, the Commission has also learned of additional incidents involving bassinets having legs that collapsed which resulted in minor or no injuries.

All these incidents, fatal or otherwise, appear to have occcured after the baby moved about in the bassinet, or when an adult pushed the bassinet from one room to another over doorsills or other routine obstructions. The incidents indicate that the braces on the legs of the bassinets loosened, detached, or otherwise failed to perform their intended function of keeping the legs fully extended so that the bassinet could be moved around in the home until such time as the user desired to fold the legs under the sleeping container.

Based on the nature of the occurrences, it appears that an infant can suffer concussion, fractured skull, hemorrhage and other related injuries because of the unanticipated collapsing of the legs on some bassinets. The staff is continuing to update its information on injuries associated with leg collapse of baby bassinets.

B. Regulation Under FHSA

At this time, the baby bassinets described above could be subject to regulation by the Consumer Product Safety Commission under provisions of the Federal Hazardous Substances Act (FHSA, 15 U.S.C. 1261 *et seq.*) as articles intended for use by children.

In accordance with provisions of section 3 (e) through (i) of the FHSA (15 U.S.C. 1262 (e), (f), (g), (i)), the Commission could begin a proceeding for the issuance of a rule to declare that the bassinets described in this notice present a mechanical hazard. If issued on a final basis, such a rule would have the effect of classifying these children's articles as "banned hazardous substances" as that term is used in section 2(q)(1)(A) of the FHSA (15 U.S.C. 1261(q)(1)(A)), and would prohibit the distribution or sale of these products in the United States, as well as their importation into this country. If a children's article presents an "imminent

hazard to the public health," provisions of section 3(e)(2) of the FHSA (15 U.S.C. 1262(e)(2)) authorize the Commission to issue an immediate order declaring the product to be a banned hazardous substance pending completion of a proceeding to issue a banning rule.

A final rule issued under provisions of sections 3 (e) through (i) of the FHSA would also make the products in question subject to provisions of section 15 of the FHSA (15 U.S.C 1274). That section authorizes the Commission to determine, after affording all interested persons opportunity for a hearing, that notification to the public of the hazard presented by a product which is a "banned hazardous substance" is necessary in order to adequately protect the public. That section also authorizes the Commission, after affording all interested persons opportunity for a hearing (which could be combined with a hearing regarding the need for public notification), to require the manufacturer, distributor or dealer of a product which is a banned hazardous substance to elect to repair or replace the product, or to refund the purchase price of the product.

However, the provisions of section 15 of the FHSA concerning public notification and corrective action would be applicable to the products which are the subject of this notice only if the Commission had first issued a rule under provisions of sections 3 (e) through (i) of the FHSA to announce the Commission's determination that the products present a mechanical hazard or had published an order to declare that such products present an imminent hazard to the public health.

A proceeding to issue a rule under provisions of sections 3 (e) through (i) of the FHSA is initiated by publication of an advance notice of proposed rulemaking in the **Federal Register** to invite comments from all interested persons about the risk of injury associated with the product which is the subject of the proceeding and possible means of addressing that risk of injury, including voluntary standards now in existence or which might be developed. If, after consideration of all information received in response to the advance notice of proposed rulemaking, the Commission decides to continue the proceeding, publication of a second notice in the **Federal Register** is required to propose the rule and invite written comments on the proposal. The Commission must then analyze all comments received in response to the proposal; describe the costs and benefits of the rule; again consider alternative means to address the risk of injury, including voluntary standards; and publish a third notice in the **Federal Register** to issue the rule on a final basis.

In summary, the Commission is authorized under the FHSA to issue a regulation declaring baby bassinets having legs that collapse to be banned hazardous substances. The rulemaking must consist of three stages—an advance notice of proposed rulemaking with public comment, a notice of proposed rulemaking with public comment, and a final rule that analyzes the public comments and includes a detailed regulatory analysis. Once rulemaking is completed, a process that could take two or more years, the Commission could initiate a proceeding to seek public notice and recall of the banned bassinets, a process which itself would likely take about one year. In appropriate circumstances, the Commission could declare a product to be an imminent hazard to the public health, either before or during the rulemaking proceeding, which would have the effect of immediately banning the product and allowing the public notice and recall proceeding to be started. Whether or not a product is declared to be an imminent hazard, however, the rulemaking is expected to be continued.

C. Regulation Under CPSA

The CPSA has provisions which authorize the Commission in certain cases to obtain an administrative order for public notification of the hazard presented by a product and for repair, or replacement of the product, or refund of the purchase price of the product without any necessity of first completing a rulemaking proceeding. Under the FHSA, the Commission may not initiate a proceeding to obtain public notification or corrective action with regard to a hazard presented by a toy or children's article until the Commission has issued a final banning rule (unless the Commission publishes an order declaring the product to be an imminent hazard to the public health).

Section 15 of the CPSA (15 U.S.C. 2064) confers upon the Commission the authority to order public notification of the hazard presented by a product if the Commission determines, after affording all interested persons opportunity for a hearing, that the product presents a "substantial product hazard," and that notification is required in order to adequately protect the public from that substantial product hazard. Additionally, section 15 of the CPSA authorizes the Commission to order any manufacturer, importer, distributor, or retailer of a product to elect to repair or replace the product, or to refund the purchase price of the product, if the Commission determines, after affording all interested persons opportunity for a hearing, that the product presents a "substantial product hazard," and that issuance of such an order is in the public interest.

If the products described in this notice were subject to regulation under the CPSA, no requirement for rulemaking would exist in order to invoke the provisions of section 15 of that Act.

Additionally, provisions of section 12 of the CPSA (15 U.S.C. 2061) authorize the Commission to file an action in a United States district court against a manufacturer, importer, distributor, or retailer of a consumer product which presents an imminent and unreasonable risk of death or severe personal injury. The court has the authority to order the recall of the product, its repair or replacement, or refund of the purchase price. The court also has authority to order a firm to undertake extensive notification efforts to advise purchasers and the general public of the nature of the risk and of the firm's obligation for remedial action. The Commission may file an action under section 12 of the CPSA without any requirement for having first undertaken a rulemaking proceeding. No corresponding provisions exist in the FHSA.

In summary, under the CPSA, the Commission may regulate a product in one or more different ways. First, after giving interested persons an opportunity for a hearing, the Commission may order that ntoice and recall be provided by firms manufacturing, importing, or distributing a product that presents a substantial product hazard. Unlike the FHSA, there are no requirements that the product first be declared a banned hazardous substance or that it first be subject to a consumer product safety rule. Second, the Commission may file an action in a United States district court if a product presents an imminent and unreasonable risk of death or severe personal injury. The court has the authority to order the recall of the product, its repair or replacement, or refund of the purchase price. Third, the Commission may undertake rulemaking to declare the product a banned hazardous product or to subject the product to a consumer product safety standard.

Because notification to the public of any hazard which may be presented by the products described in this notice and remedial action with regard to those products could be accomplished more effectively and expeditiously under the CPSA than under the FHSA, the

Commission preliminarily determines that it would be in the public interest to regulate under the CPSA rather than the FHSA any risk of strangulation which may be associated with the baby bassinets described in this notice.

D. Impact of Small Businesses

Section 603 of the Regulatory Flexibility Act (RFA, 5 U.S.C. 603) requires agencies to prepare and make available for public comment an initial regulatory flexibility analysis of the impact of any proposed rule on small entities, including small businesses. Section 605(b) of the RFA provides that an agency is not required to prepare a regulatory flexibility analysis if the agency certifies that the rule, if issued on a final basis, will not have a significant economic impact on a substantial number of small entities.

The regulation proposed below, if issued on a final basis, will not by itself impose any legal or other obligation on any person or firm. The rule would simply express the Commission's determination that any action taken to eliminate or reduce the risk of injury with which it is concerned will be taken following the procedures set forth in the CPSA rather than the FHSA.

If the Commission issues a final rule based on the proposal published below, and then determines that it should act to eliminate or reduce the risk of injury which is the subject of the rule, the Commission will be required to initiate the follow through to completion appropriate judicial or administrative proceedings under one or more sections of the CPSA before it can impose any obligation on any person or firm.

Since a final rule based on the proposal imposes no obligation on any person or firm, the Commission hereby certifies that it will have a significant economic impact on a substantial number of small businesses.

E. Environmental Considerations

The regulation proposed below falls within the categories of the Commission actions described in 16 CFR 1021.5(c) that have little or no potential for affecting the human environment. For this reason, neither an environmental assessment nor an environmental impact statement is required.

F. Conclusion and Proposal

After consideration of the information set forth above, and provisions of the FHSA and the CPSA, the Commission preliminarily finds that if regulatory action is needed to address risks of death and injury associated with baby bassinets having legs that collapse, it would be in the public interest to regulate such risks under the CPSA rather than under the FHSA. The FHSA would allow the product to be banned by a rulemaking procedure that would likely take at least two years. Following that, the Commission could, if appropriate, begin a proceeding to order firms to give notice of the risk and to recall the product, a process which itself could take about one year. Thus, if public notice and recall were found to be the appropriate remedies, it would take about three years to obtain these remedies under the FHSA. Although the process could be shortened, as discussed above, by declaring the product to be an imminent hazard to the public health, the Commission does not believe, based on presently available information, that such action would be appropriate for these products. Under the CPSA, as discussed above, no rulemaking is necessary before public notice or recall is sought. Thus, if public notice or recall is found to be necessary because the product presents a substantial product hazard, either or both could be obtained at least two years sooner under the CPSA.

For these reasons, the Commission hereby proposes to regulate under the CPSA rather than the FHSA all possible risks of death or injury which may be associated with bassinets having legs that collapse. Until issuance of any final regulation under section 30(d) of the CPSA, the Commission has authority to regulate under the FHSA any risk of injury described in this notice which bassinets may present. Any other risks of injury that may be associated with this product continue to be subject to regulation under the FHSA.

List of Subjects in 16 CFR Part 1145

Administrative practice and procedure, Consumer protection, Infants and children.

PART 1145—REGULATION OF PRODUCTS SUBJECT TO OTHER ACTS UNDER THE CONSUMER PRODUCT SAFETY ACT

Therefore, under provisions of the Consumer Product Safety Act (section 30(d), Pub. L. 92–573, 86 Stat. 1207, as amended Pub. L. 94–284, 90 Stat. 503, Pub. L. 97–35, 95 Stat. 703; 15 U.S.C. 2079(d)), the Commission proposes to amend the Code of Federal Regulations, Title 16, Chapter II, Subchapter B, Part 1145, by adding a new § 1145.15, as follows:

* * * * *

§ 1145.15 Baby bassinets having legs that collapse; risks of death or injury.

(a) The Commission finds that it is in the public interest to regulate under the Consumer Product Safety Act, rather than under the Federal Hazardous Substances Act, risks of death or injury associated with baby bassinets having hinged legs that collapse when the braces on such legs give way, become loose, detach, or otherwise fail to perform their intended function of keeping the legs fully extended until such time as the user desires to fold the legs.

(b) Therefore, if the Commission finds regulation to be necessary, the risks of death or injury associated with baby bassinets having any of the failures described in § 1145.15(a) shall be regulated only under one or more provisions of the Consumer Product Safety Act.

Interested persons are invited to submit written comments by April 27, 1984. Comments may be accompanied by written data, views, and arguments, and should be addressed to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207.

Received comments may be seen in the Office of the Secretary, Eighth Floor, 1111 18th Street, NW., Washington, D.C., between 8:30 a.m. and 5:00 p.m., Monday through Friday.

(Sec. 30(d), Pub. L. 92–573, 86 Stat. 1207, as amended Pub. L. 94–284, 90 Stat. 503, Pub. L. 97–35, 95 Stat. 703; 15 U.S.C. 2079(d))

Dated: March 15, 1984.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

30 CFR Part 913

Abandoned Mine Land Reclamation Program

AGENCY: Office of Surface Mining and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: On January 19, 1984, the State of Illinois submitted to OSM a proposed amendment to its Abandoned Mine Land Reclamation (AMLR) Plan. The amendment pertains to the authority and the capability to conduct a State emergency reclamation program. OSM is seeking public comment on the proposed amendment.

DATE: Written comments on the amendment must be received on or before 5:00 p.m. April 27, 1984.

ADDRESSES: Copies of the full text of the proposed amendment are available for review at the following locations:

Illinois Department of Mines and Minerals, AML Reclamation Council, First Floor, Alzina Building, 100 North First Street, Springfield, Illinois 62701

Office of Surface Mining and Enforcement, Springfield Office, 600 East Monroe, Room 20, Springfield, Illinois 62701

Written comments must be mailed or hand carried to: Office of Surface Mining and Enforcement, Springfield Office, 600 East Monroe, Room 20, Springfield, Illinois 62701

Comments received after 5:00 p.m., April 27, 1984 will not ordinarily be considered or included in the administrative record for this rulemaking.

FOR FURTHER INFORMATION CONTACT: James D. Evans, Division of Abandoned Mine Land Reclamation, Office of Surface Mining and Enforcement, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Washington, D.C. 20240 Telephone (202) 343-7921.

SUPPLEMENTARY INFORMATION: Title IV of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), Pub. L. 95-87, 30 U.S.C. 1201 *et seq.*, establishes an abandoned mine land reclamation program for the purposes of reclaiming and restoring lands and water resources adversely affected by past mining. This program is funded by a reclamation fee imposed upon the production of coal. Lands and water eligible for reclamation are those that were mined or affected by mining and abandoned or left in an inadequate reclamation status prior to August 3, 1977, and for which there is no continuing reclamation responsibility under State or Federal law. Title IV provides that a State with an approved AMLR program has the responsibility and primary authority to implement an abandoned mine land reclamation program.

The Illinois AMLR Plan was approved on June 1, 1982. On September 19, 1983, OSM informed the States and Indian Tribes of the opportunity to amend their reclamation plans to include a provision for emergency reclamation programs (47 FR 42729). Under Section 410 of SMCRA, the Secretary of the Interior is authorized to expend monies for the emergency restoration, reclamation, abatement, control or prevention of adverse effects of coal mining practices on eligible lands. An emergency, as defined in 30 CFR 870.5 means "a sudden danger or impairment that presents a high probability of substantial physical harm to the health, safety or general welfare of people before the danger can be abated under normal program operation procedures."

For a State or Tribe to undertake an emergency reclamation program as part of its reclamation plan, the State/Tribe must amend its reclamation plan and demonstrate that it has the statutory

authority to undertake emergencies, the technical capability to design and supervise the emergency work and the administrative and procurement procedures to quickly respond to emergencies either directly or through contractors.

On January 19, 1984, Illinois submitted a proposed amendment to the Plan. An approved State AMLR Plan can be amended under the provisions of 30 CFR 884.15. Under these provisions, if the amendment or revision changes the objectives, scope, or major policies followed by the State in the conduct of its reclamation program, the Director should follow the procedures set out in 30 CFR 884.14 in approving an amendment or revisions of a State reclamation plan. This notice of proposed rulemaking begins the process of review of the proposed amendment.

Representatives of OSM's Field Office Director will be available to meet Monday through Friday, excluding holidays, between 8:00 a.m. and 4:00 p.m. at the address indicated above under "**ADDRESSES**," at the request of members of the public to receive their advice and recommendations concerning the proposed Illinois amendment. Persons wishing to meet with representatives of the Field Director's Office during this time period may place such request with William E. Bye, telephone (217) 492–4483.

The Department intends to continue to discuss the State's amendment with representatives of the State throughout the review process. All contacts between Departmental personnel and representatives of the State will be conducted in accordance with OSM's guidelines on contacts with States published September 19, 1979, at 44 FR 54444.

The Illinois amendment can be approved if:

1. The Assistant Secretary finds that the public has been given adequate notice and opportunity to comment, and the record does not reflect major unresolved controversies.

2. Views of other Federal agencies have been solicited and considered.

3. The State had the legal authority, policies and administrative structure to carry out the amendment.

4. The amendment meets all requirements of the OSM, AMLR program provisions.

5. The State has an approved Surface Mining Regulatory Program.

6. It is determined that the amendment is in compliance with all applicable State and Federal laws and regulations.

Contents of the Illinois amendment are:

1. The agency designated by the Governor as authorized to receive grants and administer an emergency program.

2. A legal opinion from the State Attorney General that the designated agency has the authority under State law to conduct the emergency program in accordance with the requirements of Section 410 of Title IV of the Act.

3. A description of the policies and procedures to be followed by the designated agency in conducting the emergency reclamation program.

4. A description of the administrative and managerial structure to be used in conducting the emergency reclamation program.

5. A general description of emergency reclamation activities to be conducted.

6. A narrative description which supports State's position that the procedures, personnel, and other proposed aspects of its program give evidence of its abilities to promptly and effectively mitigate the full range of emergency conditions anticipated in the State.

The Office of Surface Mining has examined this proposed rulemaking under Section 1(b) of Executive order No. 12291 (February 17, 1981) and has determined that, based on available quantitative data, it does not constitute a major rule. The reasons underlying this determination are as follows:

1. Approval will not have an effect on costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; and

2. Approval will not have adverse effects on competition, employment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This proposed rulemaking has been examined pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 et seq., and the Office of Surface Mining has determined that the rule will not have significant economic effects on a substantial number of small entities. The reason for this determination is that approval will not have demographic effects, direct costs, information collection and recordkeeping requirements, indirect costs, nonquantifiable cost, competitive effects, enforcement costs or aggregate effects on small entities.

Further, the Office of Surface Mining has determined that the Illinois amendment does not have a significant effect on the quality of the human environment because the decision relates only to the policies, procedures and organization of the State's Abandoned Mine Land Reclamation program. Therefore, under the Department of the Interior Manual DM 5162.3(a)(1), the Assistant Secretary's decision on the Illinois amendment is categorically excluded from the National Environmental Policy Act requirements.

As a result, no environmental assessment (EA) or environmental impact statement (EIS) has been prepared on this action. It should be noted that a programmatic EIS was prepared by OSM in conjunction with the implementation of Title IV. Moreover, an EA or an EIS has been prepared for the approval of grants for the abandoned mine land reclamation projects under 30 CFR Part 886.

---

30 CFR Part 917

Permanent State Regulatory Program of Kentucky

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is proposing to modify the deadline for Kentucky (1) to promulgate rules governing the training, examination and certification of blasters and (2) to develop and adopt a program to examine and certify all persons who are directly responsible for the use of

explosives in a surface coal mining operation. On January 20, 1984, Kentucky requested an extension of time for the development of a blaster certification program until March 4, 1985. The State later modified its extension request to a nine month extension until December 4, 1984. All States with regulatory programs approved under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act) are required to develop and adopt a blaster certification program by March 4, 1984. Section 850.12(b) of OSM's regulations provides that the Director, OSM, may approve an extension of time for a State to develop and adopt a program upon a demonstration of good cause.

DATE: Comments must be received by April 27, 1984 at the address below, no later than 5:00 p.m.

ADDRESSES: Written comments should be mailed or hand delivered to W. H. Tipton, Director, Lexington Field Office, Office of Surface Mining, 340 Legion Drive, Suite 28, Lexington, Kentucky 40504.

FOR FURTHER INFORMATION CONTACT: Mr. W. W. Tipton, Director, Lexington Field Office, Office of Surface Mining, 340 Legion Drive, Suite 28, Lexington, Kentucky 40504; Telephone: (606) 233–7327.

SUPPLEMENTARY INFORMATION: On March 4, 1983, OSM issued final rules effective April 14, 1983, establishing the Federal standards for the training and certification of blasters at 30 CFR Chapter M (48 FR 9486). Section 850.12 of these regulations stipulates that the regulatory authority in each State with an approved program under SMCRA shall develop and adopt a program to examine and certify all persons who are directly responsible for the use of explosives in a surface coal mining operation within 12 months after approval of a State program or within 12 months after publication date of OSM's rule at 30 CFR Part 850, whichever is later. In the case of Kentucky's program, the applicable date is 12 months after publication date of OSM's rule, or March 4, 1984.

On January 20, 1984, Kentucky requested an extension of the March 4, 1984 deadline until March 4, 1985, to submit its blaster certification program. Subsequently, the State modified the request to extend the deadline to December 4, 1984 (KY Administrative Record No. 587). The State's letter of January 20, 1984, stated that the extension was needed for the State regulatory authority (Department for Surface Mining Reclamation and Enforcement) to work out procedures with the Kentucky Department of Mines and Minerals which presently certifies Kentucky blasters. Also, the letter stated that most of the State's efforts in the past year have been directed toward permitting.

Therefore, OSM is seeking comment on the State's request for additional time to develop and adopt a blaster certification program. Section 850.12(b) of OSM's regulations provides that the Director, OSM, may approve an extension of time for a State to develop and adopt a program upon a demonstration of good cause.

VI. Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

Pesticide Guidelines; Notification to the Secretary of Agriculture of Proposed Regulation Rescinding the Efficacy Data Waiver for Vertebrate Control Products

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule—related notice.

SUMMARY: Notice is given that the Administrator of EPA has forwarded to the Secretary of the U.S. Department of Agriculture a proposed regulation amending the condition regulations to rescind the efficacy data waiver for vertebrate control products.

FOR FURTHER INFORMATION CONTACT: Jean M. Frane, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, Room 1114, Arlington, Virginia 22202 (Tel. 703–557–0592).

SUPPLEMENTARY INFORMATION: Sec. 25(a)(2)(A) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (Pub. L. 92–516, 86 Stat. 973; Pub. L. 94–140, 89 Stat. 753; 7 U.S.C. 136 et seq.) provides that the Administrator shall provide the Secretary of Agriculture with a copy of any proposed regulation at least 60 days prior to signing it for publication in the **Federal Register.** If the Secretary comments in writing to the Administrator regarding any such proposed regulation within 30 days after receiving it, the Administrator shall publish in the **Federal Register** (with the proposed regulation) the comments of the Secretary, if requested by the Secretary, and the response of the Administrator concerning the Secretary's comments. If the Secretary does not comment in writing to the Administrator within 30 days after receiving it, the Administrator may sign such regulation for publication in the **Federal Register** at any time after such 30-day period notwithstanding the foregoing 60-day time requirement. The time requirements may, however, be waived or modified to the extent agreed upon the Administrator and the Secretary.

In accordance with Sec. 25(a)(3) of FIFRA, EPA has also furnished a copy of this proposed regulation to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition and Forestry of the Senate.

This regulation is designated as Part 162 of 40 CFR, and is titled "Rescision of

Efficacy Data Waiver for Vertebrate Control Products."

(Sec. 25 [Pub. L. 92–515, 86 Stat. 973; Pub. L. 94–140, 89 Stat. 753 (7 U.S.C. 136 et seq.)])

Dated: March 7, 1984.

[PP 6E1831/P331; PH–FRL 2552–6]

Dinoseb; Proposed Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that tolerances be established for residues of the pesticide dinoseb in or on the raw agricultural commodities pasture grasses and pasture grasses hay. The proposed regulation to establish maximum permissible levels for residues of the pesticide in or on the commodities was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

DATE: Comments must be received on or before April 27, 1984.

ADDRESS: By mail, submit written comments identified by the document control number (PP 6E1831/P331) to: Information Service Section, Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

In person, bring comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A sanitized copy of any material containing Confidential Business Information must be provided by the submitter for inclusion in the public record. Information not marked "confidential" may be disclosed publicly by EPA without prior notice.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs (703–557–1192).

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 6E1831 to EPA on behalf of Dr. Robert H. Kupleian, National Director, IR–4 Project, and the Agricultural Experiment Stations of New York, Vermont, and West Virginia.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for residues of the pesticide dinoseb (2-*sec*-butyl-4,6-dinitrophenol) in or on the raw agricultural commodity forage grasses at 0.1 part per million (ppm). The petition was later amended to propose tolerances for 0.1 ppm dinoseb in or on the raw agricultural commodities pasture grasses and pasture grasses hay from application of phenol or its readily hydrolyzable salts, ammonium salt or sodium salt.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerances are sought. The toxicological data considered in support of the proposed tolerance were a 6-month rat feeding study with a no-observed-effect level (NOEL) of 5.0 milligrams (mg)/kilogram (kg)/day (100 ppm); a 3-month dog feeding study with a NOEL of 7.5 mg/kg/day (300ppm); a second 3-month dog feeding study with a NOEL of 2.5 mg/kg/day (100 ppm); and teralology studies with NOEL's greater than 15 mg/kg/day for teratogenic effects and 5.0 mg/kg/day for fetotoxic effects in rats and a NOEL of 32 mg/kg/day (highest level tested) for teratogenic effects in mice. Studies considered desirable but currently lacking include chronic feeding studies in at least two species, including one non-rodent species; onocogenic potential evaluation; a multigeneration reproduction study; and mutagenicity testing.

The provisional acceptable daily intake (PADI), based on 3-month dog feeding study (NOEL of 2.5 mg/kg/day) and using a 2000-fold safety factor, is calculated to be 0.0013 mg/kg of body weight (bw)/day. The maximum permitted intake (MPI) for a 60-kg human is calculated to be 0.075 mg/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5-kg daily diet is calculated to be 0.054 mg/day; the proposed tolerances will not contribute to the TMRC since there is no reasonble expectation of finite residues in meat, milk, poultry, or eggs resulting from the feed use of treated pasture grasses or pasture grasses hay.

The nature of the residues is adequately understood and an adequate analytical method, gas chromatography, is available for enforcement purposes.

Although there are presently no action pending against the continued registration of this chemical, concern was expressed about the presence of *N*-nitrosamine impurities in dinoseb formulations containing the alkanolamine salt. EPA has determined that dinitroaniline compounds and secondary or tertiary alkylamines or alkanolamines may pose more of an *N*-nitroso problem than other compounds and is requesting the submission of analytical chemistry data for pesticide products containing these classes of compounds. Since the petitioner has proposed the use of alternate formulations of the pesticide, dinoseb phenol and ammonium or sodium salts of dinoseb, rather than the alkanolamine salt, additional analytical chemistry data are not required at this time.

Based on the above information considered by the Agency, the tolerances established by amending 40 CFR 180.281 would protect the public health. It is proposed, therefore, that the tolerances be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 6E1831/P331]. All written comments filed in response to this petition will be available in the Program Management and Support Division, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e))).

Dated: March 14, 1984.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, it is proposed that 40 CFR 180.281 be amended by designating the existing text as paragraph (a) and by adding new paragraph (b), to read as follows:

§ 180.281 Dinoseb; tolerances for residues.

(a) * * *

(b) Tolerances are established for residues of the herbicide, insecticide, and fungicide dinoseb (2-*sec*-butyl-4,6-dinitrophenol) from application of its phenol or its readily hydrolyzable salts (ammonium salt or sodium salt) in or on the following raw agricultural commodities:

Commodities	Parts per million
Grasses, pasture	0.1
Grasses, pasture, hay	0.1

[FR Doc. 84-8141 Filed 3-27-84; 8:45 am]

BILLING CODE 6560-50-M

Methyl 3-[(Dimethoxyphosphinyl)Oxy]Butenoate, Alpha and Beta Isomers; Proposed Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that a tolerance be established for residues of the insecticide methyl 3-[(dimethoxyphosphinyl)oxy]butenoate, alpha and beta isomers in or on the raw agricultural commodity watercress. The proposed regulation to establish a maximum permissible level for residues of the insecticide in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

DATE: Comments must be received on or before April 27, 1984.

ADDRESSES: By mail, submit written comments identified by the document control number (PP 3E2862/P330) to: Information Services Section; Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

In person, bring comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway; Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A sanitized copy of any material containing Confidential Business Information must be provided by the submitter for inclusion in the public record. Information not marked "confidential" may be disclosed publicly by EPA without prior notice.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs (703–557–1192).

SUPPLEMENTARY INFORMATION: The Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition 3E2862 to EPA on behalf of the IR–4 Technical Committee and the Agricultural Experiment Stations of Alabama, Florida, Pennsylvania, Tennessee, and West Virginia

The petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for residues of the insecticide methyl 3-[(dimethoxyphosphinyl)oxy]butenoate, alpha and beta isomers in or on the raw agricultural commodity watercress at 1.5 per million (ppm). The petition was later amended to propose a tolerance at 2.0 ppm.

The data submitted in the petition and other relevant material have been evaulated. The pesticide is considered useful for the purpose for which the tolerance is sought. The toxicological data considered in support of the proposed tolerance were a 2-year rat feeding study with a no-observed-effect level (NOEL) for cholinesterase inhibition (ChE) of 0.025 milligram (mg)/kilogram (kg)/day (0.5 ppm) and negative for oncogenic effects at all levels fed (0, 0.5, 1.5, 5 and 15 ppm); a 2-year dog feeding study with a ChE NOEL of 0.025 mg/kg/day (0.5 ppm); a 3-generation reproduction study in rats with no reproductive effects at 1.2 mg/kg (24 ppm); and rabbit teratology study, negative for teratogenic effects at 1.0 mg/kg. Studies considered desirable but lacking include an oncogenicity study in a second species, a delay neurotoxicity study, and a general metabolism study.

The acceptable daily intake (ADI), based on the 2-year rat feeding study (NOEL of 0.025 mg/kg/day) and using a 10-fold safety factor, is calculated to be 0.0025 mg/kg of body weight (bw)/day. The maximum permitted intake (MPI) for a 60-kg human is calculated to be 0.15 mg/day. The theoretical maximum residue contribution (TMRC) from existing tolerances for a 1.5-kg daily diet is calculated to be 0.1765 mg/day; the current action will increase the TMRC by 0.0009 mg/day (0.5 percent) and will utilize an additional 0.6 percent of the ADI. The tolerance that will be established by this proposed rule is considered to pose a negligible incremental risk since dietary exposure will not be significantly increased.

The nature of the residues is adequately understood and an adequate analytical method, gas chromatography, is available for enforcement purposes. There should be no problem with secondary residues in meat, milk, poultry, or eggs since watercress is not considered a livestock feed item. There are currently no actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency, the tolerance established by amending 40 CFR 180.157 would protect the public health. It is proposed, therefore, that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 3E2862/P330]. All written comments filed in response to this petition will be available in the Program Management and Support Division, at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–534, 94 Stat. 1164, 5 U.S.C. 601–612), the

Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: March 14, 1984.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, it is proposed that 40 CFR 180.157 be amended by adding and alphabetically inserting the raw agricultural commodity watercress, to read as follows:

§ 180.157 Methyl 3-[(dimethoxyphosphinyl)oxy]butenoate, alpha and beta isomers; tolerances for residues.

* * * * *

Commodities	Parts per million
Watercress	2.0

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)))

([00000/P333; PH-FRL 2554-2])

Potassium Carbonate and Sodium Sesquicarbonate Proposed Amendment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes to add potassium carbonate and sodium sesquicarbonate to the pesticide chemcials listed as generally recognized as safe (GRAS) when used as plant desiccants for the purposes of section 408(a) of the Federal Food, Drug, and Cosmetic Act. This proposed amendment was requested by EPA.

DATE: Written comments must be received on or before April 27, 1984.

Information submitted as a comment concerning this notice may be claimed confidential by making any part or all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A sanitized copy of any material containing Confidential Business Information must be provided by the submitter for inclusion in the public record. Information not marked "confidential" may be disclosed publicly by EPA without prior notice.

ADDRESS: By mail, submit written comments identified by the document control number ([00000/P333]) to: Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Henry M. Jacoby (703-557-1900).

SUPPLEMENTARY INFORMATION: This proposed rule is sought in conjunction with the anticipated use of a mixture of potassium carbonate, sodium sesquicarbonate, and sodium carbonate for the purpose of accelerating the field drying (desiccation) of freshly cut hay. Potassium carbonate (K_2CO_3) is already exempted from the requirement of a tolerance under 40 CFR 180.1001(d) when used in accordance with good agricultural practice as an inert (or occasionally active) ingredient (specifically a buffering agent) in pesticide formulations applied to growing crops. Potassium carbonate is routinely used in foods such as beverages, soft candy, baked goods, and frostings at levels ranging from 0.01 percent (100 parts per million (ppm)) to 1.13 percent (11,300 ppm). Sodium sesquicarbonate ($NA_2CO_3.NaHCO_3.2H_2O$) is a molecule containing sodium bicarbonate, sodium carbonate, and water and is naturally occurring or can be produced synthetically.

In 1975, the Select Committee on GRAS Substances (SCOGS) determined that there was no evidence in the available information on carbonates and bicarbonates, including the two subject chemicals, that demonstrated or suggested reasonable grounds to suspect a hazard to the public used (on food) at levels that are current or that might reasonably be expected in the future. Both chemicals are GRAS under 21 CFR Part 182 as multiple-purpose GRAS food substances when used in accordance with good manufacturing practice. As part of a chemical family routinely used in foods, the various carbonates function as nutrient and/or dietary supplements, neutralizing agents, or leavening agents.

Based on the report of the SCOGS committee concerning potassium carbonate and sodium sesquicarbonate, the Agency has no reason to believe that these two chemicals are not GRAS substances.

Based on the long history of safe use of these chemicals in foods and on their GRAS status under 21 CFR 182.1619 (potassium carbonate) and 21 CFR 182.1792 (sodium sesquicarbonate), the Agency concludes that neither material should be considered as poisonous or deleterious, and that they are recognized by experts as safe pursuant to 40 CFR 180.2. The opinions of such experts on these chemicals are published in the NTIS Monograph #PB-254 535 (Evaluation of Health Aspects of Carbonates and Bicarbonates as Food Ingredients), FASEB, 1975.

The subject materials are considered useful for the purpose for which this regulation is being sought, and the Agency has concluded that it will protect the public health. It is proposed, therefore, that the regulation be established as set forth below.

Any person who has registered or submitted an application for the registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [00000/P333]. All written comments filed in response to this proposed regulation will be available for public review in the office of Henry M. Jacoby at the above address from 8 a.m. to 4 p.m., Monday through Friday, except for legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e))

List of Subjects in 40 CFR Part 180

Administrative practices and procedures, Agricultural commodities, Pesticides and pests.

Dated: March 16, 1984.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, it is proposed that 40 CFR 180.2(a) be revised, to read as follows:

§ 180.2 Pesticide chemical considered safe.

(a) As a general rule, pesticide chemicals other than benzaldehyde (when used as a bee repellent in the harvesting of honey), ferrous sulfate, lime, lime-sulfur, potassium carbonate, potassium polysulfide, potassium sorbate, sodium carbonate, sodium chloride, sodium hypochlorite, sodium polysulfide, sodium sesquicarbonate, sorbic acid, sulfur, and, when used as postharvest fungicides, citric acid, fumaric acid, oil of lemons, oil of orange, sodium benzoate, and sodium propionate are not for the purposes of section 408(a) of the Act generally recognized as safe.

BILLING CODE [illegible]

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. I

[CC Docket No. 79-252; FCC 84-82]

Policy and Rules Concerning Rates for Competitive Common Carrier Services and Facilities Authorizations

AGENCY: Federal Communications Commission.

ACTION: Fourth further notice of proposed rulemaking.

SUMMARY: In Docket No. 79-252 the Commission has determined that it would forbear from regulating the rates and facilities of all resale common carriers and the specialized common carriers. In this Notice, the Commission seeks comments on its proposal to require those carriers to cancel any tariffs they presently have on file with the Commission and to file no further tariffs. This action is proposed to reduce regulatory burden.

DATES: Comments must be received by April 30, 1984 and replies by May 15, 1984.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Beverly Baker, Common Carrier Bureau, (202) 632-6917.

Fourth Further Notice of Proposed Rulemaking

In the Matter of Policy and Rules Concerning Rates for Competitive Common Carrier Services and Facilities Authorizations Therefor; CC Docket No. 79-252.

Adopted: March 15, 1984.
Released: March 22, 1984.

By the Commission.

1. In the Competitive Carrier Rulemaking,[1] the Commission has adjusted its common carrier tariff and facilities regulatory requirements in light of the development of competition in interexchange telecommunications services. In the *First Report and Order* in this proceeding, the Commission streamlined the regulatory requirements applied to the specialized common carrier and the terrestrial resellers.[2] In the *Second Report and Order,* the Commission decided to forbear from regulating tariffs and facilities of terrestrial resellers.[3] In the *Fourth Report and Order* the Commission found, after three years' experience with streamlined regulation, that for some carriers there was no evidence that even this minimal regulation regarding tariffs and facilities was necessary or useful to protect the public against unreasonable pricing practices or imprudent investments.[4] Accordingly, the Commission determined that it would forbear from requiring tariffs or facilities applications from the specialized common carriers and all resellers, including the domestic satellite resellers, resellers owned by or affiliated with exchange telephone companies, and domestic record carier resellers not covered by the interconnection requirements of the Record Carrier Competition Act.[5] On the basis of this extensive record and for the reasons discussed below, we are here proposing that all tariffs which carriers treated by forbearance have on file with the Commission be cancelled and that no further tariffs be accepted for filing from those carriers.

2. Maintaining these documents at the Commission's offices entails certain costs such as the cost of storage space and the cost of staff time necessary to review the form of filed tariffs, to organize the materials for public inspection, to review special permission requests and to respond to questions from members of the public concerning the tariffs. More importantly, the presence of effective tariffs on Commission premises might mislead the public, state regulators and others to the belief that the FCC had, in fact, substantively evaluated them and found no objection. As the Commission stated in the *Second Report and Order,* the unnecessary application of traditional regulatory tools inhibits development of competition and results in unnecessary burdens inevitably borne by the consuming public. The elimination of these requirements would encourage the offering of services in greater diversity, more rapidly and at lower prices. Successful market performance, the Commission stated, should depend on carrier performance and not on an unintended Commission "stamp of approval" 91 FCC 2d at 72-73. The continued presence of tariffs at the Commission, by giving the appearance of such a "stamp of approval," could well lull customers into believing that their own comparisons and evaluations of various service offerings were unnecessary and, thus, would inhibit the development of a vigorously competitive market. Since the rate levels and practices in these tariffs will no longer be analyzed by the Commission staff, it would seem to be unnecessary to continue to incur these costs and risks. Of course, no action of the Commission

---

[1] Policy and Rules Concerning Rates and Facilities Authorizations for Competitive Common Carrier Services (CC Docket No. 79-252), Notice of Inquiry and Proposed Rulemaking, 77 FCC 2d 308 (1979); First Report and Order, 85 FCC 2d 1 (1980); Further Notice of Proposed Rulemaking, 84 FCC 2d 445 (1981); Second Report and Order, 91 FCC 2d 59 (1982), *recon.* FCC 83-69, released March 21, 1983; Second Further Notice of Proposed Rulemaking, FCC 82-187, released April 21, 1982; Third Further Notice of Proposed Rulemaking, Mimeo CC 33457, released June 14, 1983, 48 FR 28282 (June 21, 1983); Thrid Report and Order, Mimeo 012, released October 6, 1983; and Fourth Report and Order, FCC 83-481, released November 2, 1983, petitions for reconsideration filed December 19, 1983.

[2] The specialized common carriers are providers of terrestrial voice and data services. They include such carriers as: MCI Telecommunications Corporation, GTE-SPRINT, United States Transmission Systems, Inc., Goeken Comunications, Inc., and Western Telecommunications. Resellers are carriers that lease all of the circuits they use to provide service to their customers from underlying carriers.

[3] In response to the *Second Report and Order,* fifteen carriers cancelled the tariffs they had on file with the Commission.

[4] Carriers subject to streamlined regulatory requirements could file tariffs on 14 days' notice, the tariffs would be presumed to be lawful, and extensive cost support data would not be required. In addition, those carriers could, without advance authorization from the Commission, expand their facilities anywhere within the continental United States and discontinue service on 31 days' notice to the Commission.

[5] Pub. L. No. 97-130, 95 Stat. 1687 (1981). The Commission has not altered regulatory requirements applicable to international services. *See Fourth Report and Order,* para. 4 n. 5 and para. 37.

would prohibit any carriers from keeping these materials or any other materials regarding their service offerings, pricing policies and terms of service on file in a tariff format and available for public inspection at their own offices.

3. We are, therefore, proposing that all carriers subject to forbearance be required by a date certain to cancel their tariffs on file with this Commission by supplement effective upon five days' notice. We invite comment from interested parties on this proposal.

4. *Regulatory Flexibility Analysis.* By this Notice of Proposed Rulemaking, the Commission seeks to determine whether it is in the public interest to discontinue maintaining at the Commission tariffs of carriers over which the Commission is no longer excercising its regulatory jurisdiction as to rates and facilities. If adopted, this proposal would result in the cancellation of the tariffs of approximately 120 specialized common carriers and resellers of common carrier services. The proposal would eliminate all federal tariff filings by these companies. The proposal would not establish any additional federal rules requiring recordkeeping, reporting or other compliance measure. There are no other federal rules which overlap, duplicate or conflict with this proposal. There are no significant alternatives to this proposal which would accomplish the Commission's objective.

5. This proceeding is instituted pursuant to the provisions contained in 47 U.S.C. 154(i) and 403.

6. Comments must be filed by April 30, 1984 and replies by May 15, 1984.

7. For purposes of this non-restricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rulemaking until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must also state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. *See generally* § 1.1231 of the Commission's Rules, 47 CFR 1.1231. All relevant and timely comments and reply comments will be considered by the Commission. In reaching its decision, the Commission may take into account information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

8. In accordance with the provision of 47 CFR 1.1419(b), an original and six copies of all comments, replies, pleadings, briefs and other documents filed in this proceeding shall furnished to the Commissiom. Members of the public who wish to express their views by participating informally may do so by submitting one or more copies of their comments, without regard to form (as long as the docket number is clearly stated in the heading). Copies of all filings will be available for public inspection during regular business hours in the Commission's Docket Reference Room (Room 239) at its headquarters in Washington, D.C. 1919 M Street, NW.

9. It is hereby ordered that the Secretary shall cause this fourth further Notices of Proposed Rulemaking to be published in the **Federal Register.**

47 CFR Part 73

[MM Docket No. 84-278; RM-4551; 4728]

FM Broadcast Station in Appalachicola, Florida; Proposed Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign FM Channel 265A and 288A to Appalachicola, Florida, in response to separate petitions filed by Richard L. Plessinger and B.F.J. Timm. The proposed assignments could provide a first and second FM service to that community.

DATES: Comments must be filed on or before May 14, 1984, and reply comments on or before May 29, 1984.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

List of Subject in 47 CFR Part 73

Radio broadcasting.

Notice of Proposed Rule Making

In the Matter of amendment of § 73.202(b). Table of Assignments, FM Broadcast Stations (Appalachicola, Florida) MM Docket No. 84-278, RM-4551, RM-4728.

Adopted: March 12, 1984.
Released: March: 21, 1984.

By the Chief, Policy and Rules Division.

1. The Commission has before it for consideration two separate petitions for rule making requesting the assignment of Class A channels to Appalachicola, Florida. The first petition filed by Richard L. Plessinger ("Plessinger") (RM-4551), seeks the assignment of FM channel 265A, while the second petitioner, B.F.J. Timm ("Timm") (RM-4728), requests the allocation of FM Channel 288A. Each petitioner stated their intention to apply for the channel, if assigned.

2. Both channels can be assigned in compliance with the minimum distance separation requirements. Plessinger specified a slightly different set of coordinates (6.2 miles east) than those used by the Commission for the assignment. Petitioner should be aware that the use of a site too far removed from the community may present a problem in providing city grade coverage to community.

3. In view of the fact that the proposed assignments could provide a first and second local FM service to Appalachicola, Florida, the Commission believes it is appropriate to propose amending the FM Table of Assignments, § 73.202(b) of the Commission's Rules, with respect to the following community:

City	Channel No.	
	Present	Proposed
Apalachicola, Florida		256A, and 288A.

4. The Commission's authority to institute rule making proceedings showing required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before May 14 1984, and reply comments on or before May 29, 1984, and are advised to read the Appendix for the proper procedures. A copy of such comments should be served on the petitioners as follows:

Richard L. Plessinger, 1591 Boyle Road, Hamilton, Ohio 45013

Herbert M. Schulkind, Esquire, Fly, Shuebruk, Gaguine, Boros, Schulkind & Braun, 1211 Connecticut Avenue, NW., Suite 401, Washington, D.C. 20036 (Counsel for B.F.J. Timm).

6. The Commission had determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules,* 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Kathlen Scheuerle, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is not longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(c)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, IT IS PROPOSED TO AMEND the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice,* they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in § 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

Further Notice of Proposed Rule Making

In the Matter of Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations

(Pullman, Washington, and Moscow, Idaho,[1] MM Docket No. 83–97, RM–4235, RM–*4428*.

Adopted: March 14, 1984.

Released: March 21, 1984.

By the Chief, Policy and Rules Division.

1. In response to the *Notice of Proposed Rule Making*, 48 FR 8503, published March 1, 1983, proposing the assignment of Channel 258 to Pullman, Washington, KRPL, Inc.[2] filed a counterproposal urging the Commission to assign Channel 258 to Moscow, Idaho, instead, as a substitute for Channel 280A. The channel cannot be assigned to both communities because of mileage separation requirements. We undertook to identify any other channels available for assignment to either city and have determined that Channel 291 can be assigned to Moscow. A site restriction of 3.3 miles south of the city is needed to avoid short spacing to Canadian Channel 291B, Creston, British Columbia, and to Station KEZE(FM) (construction permit) for Channel 289 at Spokane, Washington. Generally, we would not propose a substitute channel which cannot be used at the same site as the licensee's existing station. However, petitioner had requested Channel 258 as a substitute even though that channel involved a move of 1.3 miles northwest from the present location.

2. In conformity with Commission precedent, it is necessary to issue a *Further Notice of Proposed Rule Making* to allow interested parties an opportunity to express their interest in Channel 291. The earlier *Notice* did not provide this opportunity because it only pertained to Pullman. In a separate action, the Commission has assigned Channel 258 to Pullman, Washington.

3. KRPL, Inc. in it counterproposal alleges that its station's coverage area is inadequate. It claims that Moscow is characterized by hills, valleys and small communities which cannot be provided an adequate signal from a Class A facility. It further states that in order to remain competitive in the Pullman-Moscow market, it will be necessary to increase its operating power by going from a Class A to a Class C channel.

4. Canadian concurrence has been obtained in the assignment of Channel 291 to Moscow, Idaho.

5. In accordance with our established policy, we shall propose to modify the license of Station KRPL–FM to specify operation on Channel 291. However, if another party should indicate an interest in the Class C assignment, the modification may not be implemented. Instead, the channel would be open to competing applications. See *Cheyenne, Wyoming*, 62 F.C.C. 2d 63 (1976) and *Modification of FM Station Licenses*, 48 FR 55585, published December 14, 1983.

6. In view of the need for a wide coverage area FM station, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the Rules, as it pertains to Moscow, Idaho, as follows:

City	Channel No.	
	[illegible]	Pro- [illegible]
Moscow, Idaho	[illegible]	[illegible]

7. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

8. Interested parties may file comments on or before May 14, 1984, and reply comments on or before May 29, 1984, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: Haley, Bader & Potts, c/o Michael H. Bader, 2000 M Street, NW., Washington, D.C. 20036.

9. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

10. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(c)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, and amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, IT IS PROPOSED TO AMEND the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of the Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a

[2] KRPL, Inc. is the licensee of Station KRPL–FM, Moscow, Idaho.

different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the persons(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

AGENCY: Interstate Commerce Commission.

ACTION: Discontinuance of proceeding.

SUMMARY: The Commission requested information and comments on whether interim carriers providing service over lines of the Chicago, Rock Island and Pacific Railroad Company, Debtor (William M. Gibbons, Trustee) under section 122 of the Rock Island Railroad Transition and Employee Assistance Act and which are utilizing the Rock Island formula, should be permitted to annualize their expenses, and on whether changes in the reporting time limits are appropriate. This decision describes the results of our review of the information filed pursuant to that request.

DATES: This decision shall be effective on March 27, 1984.

FOR FURTHER INFORMATION CONTACT: Melvin F. Clemens, Jr., (202) 275-7840 or 275-1559.

SUPPLEMENTARY INFORMATION: By notice served September 15, 1982 [47 FR 41144, September 17, 1982], the Commission indicated its intent to reconsider its previous decision in this matter [47 FR 4261, January 29, 1982] as to whether interim operators, which are providing service over lines of the Chicago, Rock Island and Pacific Railroad Company, Debtor (William M. Gibbons, Trustee) (Rock Island), under Section 122 of the Rock Island Transition and Employee Assistance Act (RITEA) (Pub. L. 96-254) and which are utilizing the Rock Island Formual (Formula) for compensating the Trustee, should have the present reporting time limit changed to permit additional reporting time for their operations, and should be permitted to annualize expenses associated with those operations when determining net revenues.

The initial compliants from interim operators utilizing the Formula indicated that it was virtually impossible to report on revenues derived from interim operations within fifteen days of the close of a month, particularly where those operations were integrated into their system operations. The comments received on the Commission's notice essentially affirmed the railroads' previous assertions that the reporting time is too short, and that there is need for greater equity in applying the revenue portion of the Formula. The comments were received from the Cadillac and Lake City Railway Company (CLK), Chessie System Railroads (Baltimore and Ohio Railroad Company (BO)), Norfolk and Western Railway Company (NW), and the North Central Oklahoma, Inc. (NCOK). No comments were received from the Trustee of the Chicago, Rock Island and Pacific Railroad Company, or any other party opposing the proposed changes.

The NW, the principal operator utilizing the formula, has instituted a specialized computer reporting system for its operations over Rock Island lines. This system compiles net revenue data for three month intervals and determines the proper net revenue payment for that interval within 120 days of the close of each quarterly period. NW considers this to be the minimum time required for it to report on the net revenue portion of its operations, even though its reporting of switching and loaded cars handled can be accomplished sooner.

NW supports the annualization of revenues and expenses, and recommends that this reporting be allowed without the requirement of an individualized showing of need. NW believes that the elimination of such a showing would further reduce the Commission's regulatory burden without unduly prejudicing the Trustee.

Since submitting their comments, the carriers utilizing the Rock Island Formula advised the Commission of their negotiations with the Trustee, and subsequent lease and/or purchase agreements for the Rock Island property covered by the service order. With the exception of NW, all involved carriers have consummated lease agreements with the Trustee which contain provisions for compensating the Estate for the use of Rock Island property. Further, on September 1, 1983, the NW filed an application under Section 17(b) of the Milwaukee Railroad Restructuring Act (MRRA), 45 U.S.C. 915(b), as modified by section 111 of the RITEA, 45 U.S.C. 1009, and 49 CFR Part 1180, Supart B, to purchase the line in the Lake Calumet switching district covered by Service Order No. 1473. The application was filed in response to Order No. 593 entered on August 17, 1983, by the United States District Court for the Northern District of Illinois (Judge Frank T. McGarr) which has jurisdiction over the bankruptcy estate of the Rock Island.

On October 12, 1983, the Commission issued its decision in Finance Docket No. 30281 recommending that the Court authorize NW's acquisition of the Rock Island line, and on November 2, 1983, NW and Rock Island closed on the purchase.

Conclusion

Since the carriers are no longer utilizing the Rock Island Formula, the question of annualizing expenses in the proceeding is moot. Under these circumstances, no further Commission action is required and this proceeding should be discontinued.

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

It is Ordered:

1. This proceeding is discontinued.

2. This decision is effective on its date of service.

A copy of this order shall be served on the Association of American Railroads and each of the respondents.

Notice shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, DC, and by publication in the **Federal Register.**

Decided: March 21, 1984.

By the Commission, Chairman Taylor, Vice Chairman Andre, Commissioners Sterrett and Gradison. Commissioner Gradison did not participate.

James H. Bayne,

Acting Secretary.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Section 22 Import Fees; Determination of Quarterly Import Fees on Sugar

AGENCY: Office of the Secretary, USDA.

ACTION: Notice.

SUMMARY: Headnote 4(c) of Part 3 of the Appendix to the Tariff Schedules of the United States (TSUS) requires the Secretary of Agriculture to determine on a quarterly basis the amount of the fees which shall be imposed on imports of raw and refined sugar (TSUS items 956.05, 956.15, 957.15) under the authority of section 22 of the Agricultural Adjustment Act of 1933, as amended. This notice announces those determinations for the second calendar quarter of 1984.

EFFECTIVE DATE: April 1, 1984.

FOR FURTHER INFORMATION CONTACT: Robert G. Harper, Foreign Agricultural Service, Department of Agriculture, Washington, D.C. 20250 (202–382–9061).

SUPPLEMENTARY INFORMATION: By Presidential Proclamation No. 5164, dated March 20, 1984, Headnote 4 of Part 3 of the Appendix to the TSUS was amended to provide that quarterly adjusted fees shall be imposed on imports of raw and refined sugar (TSUS items 956.05, 956.15, and 957.15). Paragraph (c)(ii) of Headnote 4 provides that the quarterly adjusted fee for item 956.15 shall be the amount by which the average of the adjusted daily spot (domestic) price quotations for raw sugar for the 20 consecutive market days immediately preceding the 20th day of the month preceding the calendar quarter during which the fee shall be applicable (as reported by the New York Coffee, Sugar, and Cocoa Exchange), expressed in United States cents per pound, in bulk, is less than the market stabilization price. The market stabilization price for the second calendar quarter of 1984 is 21.17 cents per pound. However, whenever the average of the daily spot price quotations for 10 consecutive market days within any calendar quarter: (1) Exceeds the market stabilization price by more than one cent, the fee then in effect shall be decreased by one cent; or (2) is less than the market stabilization price by more than one cent, the fee then in effect shall be increased by one cent. Paragraph (c)(i) of Headnote 4 further provides that the quarterly adjusted fee for items 956.05 and 957.15 shall be the amount of the fee for item 956.15 plus one cent.

The average of the adjusted daily spot (domestic) price quotations for raw sugar for the applicable period prior to the second calendar quarter of 1984 has been calculated to be 22.0170 cents per pound. This results in a fee of 0.00 cent per pound for item 956.15, since the adjusted average spot price is greater than 21.17 cents. Accordingly, the fee for items 956.05 and 957.15 for the second calendar quarter of 1984 is 1.00 cent per pound.

Headnote 4(c) requires the Secretary of Agriculture to determine and announce the amount of the quarterly fees no later than the 25th day of the month preceding the calendar quarter during which the fees shall be applicable. The Secretary is also required to certify the amount of such fees to the Commissioner of Customs and file notice thereof with the **Federal Register** prior to the beginning of the calendar quarter during which the fees shall be applicable. This notice is therefore being issued in order to comply with the requirements of Headnote 4(c).

Notice is hereby given that, in accordance with the requirements of Headnote 4(c) of Part 3 of the Appendix to the Tariff Schedules of the United States, it is determined that the quarterly adjusted fees for raw and refined sugar (TSUS items 956.05, 956.15, and 957.15) for the second calendar quarter of 1984 shall be as follows:

Item	Fee (cents per pound)
956.05	1.00
956.15	0.00
957.15	1.00

The amounts of such fees have been certified to the Commissioner of Customs in accordance with paragraph (c)(v) of Headnote 4.

Signed at Washington, D.C., on March 23, 1984.

Richard E. Lyng,

Acting Secretary of Agriculture.

BILLING CODE 3410-10-M

Agricultural Stabilization and Conservation Service

Flue-Cured Tobacco; 1984–85 National Marketing Quota for Flue-Cured Tobacco

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Notice of Determination of 1984–85 Marketing Quota.

SUMMARY: The purpose of this notice is to affirm determinations which have been made with respect to the 1984 crop of flue-cured tobacco in accordance with the Agricultural Adjustment Act of 1938, as amended. As announced on December 15, 1983, the 1984 marketing quota for flue-cured tobacco is 805 million pounds, approximately 11½ percent below last year's quota. In addition, the national acreage allotment for the 1984 crop of flue-cured tobacco is 404,725.99 acres.

EFFECTIVE DATE: December 15, 1983.

FOR FURTHER INFORMATION CONTACT: Robert L. Traczy, Agricultural Economist Analysis Division, ASCS, Room 3736-South Building, P.O. Box 2415, Washington, D.C. 20013, (202) 447–5187. The Final Regulatory Impact Analysis describing the options considered in developing this notice and the impact of implementing each option is available on request from Robert L. Tarczy.

SUPPLEMENTARY INFORMATION: This notice has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Departmental Regulation No. 1512–1 and has been classified "not major." This action has been classified "not major" since implementation of these determinations will not result in: (1) an annual effect on the economy of $100 million or more, (2) a major increase in costs or prices for consumers, individual

industries, Federal, State or local governments, or geographical region, or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the Federal Assistance Program to which this notice applies are: Title—Commodity Loan and Purchases; Number 10.051, as set forth in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this notice since the Agricultural Stabilization and Conservation Service (ASCS) is not required by 5 U.S.C. 553 or any provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this notice.

This notice of determination is issued in accordance with the Agricultural Adjustment Act of 1938, as amended (hereinafter referred to as the "1938 Act") in order to announce for the 1984 marketing year for flue-cured tobacco the following:

1. The amount of the reserve supply level;

2. The amount of the total supply;

3. The amount of the national marketing quota;

4. The national average yield goal;

5. The national acreage allotment;

6. The national acreage reserve;

A. For establishing acreage allotments for new farms, and

B. For making corrections and adjusting inequities in old farms;

7. The national acreage factor; and

8. The national yield factor.

Marketing quotas on an acreage-poundage basis were proclaimed by the Secretary of Agriculture for flue-cured tobacco for the 1983–84, 1984–85, and 1985–86 marketing years (See 48 FR 1781). Since at least one-third of the flue-cured tobacco producers voting in a marketing quota referendum on December 16, 1982, did not vote to disapprove such marketing quotas, such marketing quota is in effect for the 1984–85 marketing year (See 48 FR 21608).

The determinations set forth in this notice have been made on the basis of the latest available statistics of the Federal Government and after due consideration of data, views, and recommendations received from flue-cured tobacco producers and others pursuant to a proposed Notice of Determination (48 FR 46401) which was published on October 12, 1983.

Discussion

During the comment period, 27 written responses were received from farmers, members of the trade (including associations), and farm groups. Of the 24 respondents who commented on the level of the 1984 quota, 17 recommended that the quota remain unchanged from the 1983 level. The other 7 who commented on the quota level recommended quotas ranging from a 5 to 16 percent decrease in quota.

In addition, two meetings were held to allow interested persons to give their views orally. The vast majority of these individuals and organizations favored the same quota level for the 1984 marketing year as the level which was applicable to the 1983 marketing year.

Because the total supply is significantly above the reserve supply level and those supplies are well distributed amont the grades, the flue-cured tobacco marketing quota has been reduced by 11½ percent for the 1984 marketing year.

Section 317(a)(1) of the 1938 Act (7 U.S.C. 1314c(a)(1)) provides, in part, that the national marketing quota for a marketing year for flue-cured tobacco is the amount of flue-cured tobacco produced in the United States which the Secretary estimates will be utilized during the marketing year in the United States and will be exported during the marketing year, adjusted upward or downward in such amount as the Secretary determines is desirable for the purpose of maintaining an adequate supply or for effecting an orderly reduction of supplies to the reserve supply level. The 1938 Act further provides that any such downward adjustment shall not exceed 15 percent of such estimated utilization and exports.

The "reserve supply level" is defined in section 301(b)(14)(B) of the 1938 Act as the normal supply plus 5 percent thereof, to assure a supply adequate to meet domestic consumption and export needs in years of drought, flood, or other adverse conditions, as well as in years of plenty.

The "normal supply" is defined in section 301(b)(10)(B) of the 1938 Act as a normal year's domestic consumption and exports, plus 175 percent of a normal year's domestic consumption and 65 percent of a normal year's exports as an allowance for normal carryover.

A "normal year's domestic consumption" is defined in Section 301(b)(11)(B) of the 1938 Act as the yearly average quantity of tobacco produced in the United States and consumed in the United States during the 10 marketing years immediately preceding the marketing year in which such consumption is determined, adjusted for current trends in such consumption.

A "normal year's exports" is defined in section 301(b)(12) of the 1938 Act as the yearly average quantity of tobacco produced in the United States which was exported from the United States during the 10 marketing years immediately proceding the marketing year in which such exports are determined, adjusted for current trends in such exports.

The yearly average domestic consumption of flue-cured tobacco during the 10 marketing years preceding the 1983–84 marketing year was 591 million pounds, and the yearly average exports during such period amounted to 533 million pounds. both domestic consumption and exports have shown downward trends. Accordingly, a normal year's exports equal 530 million pounds while a normal year's domestic consumption has been established at 500 million pounds. These normal year's consumption and exports result in a reserve supply level for flue-cured tobacco of 2,363 million pounds.

"Total supply" is defined in Section 301(b)(16)(B) of the 1938 Act as the carryover at the beginning of the marketing year (July 1) plus the estimated production in the United States during the calendar year in which the marketing year begins. The carryover of flue-cured tobacco in the inventories of manufacturers and dealers, including Commodity Credit Corporation (CCC) loan stocks, amounted to 2,204 million pounds, farm sales weight on July 1, 1983.

The 1983 crop marketings of flue-cured tobacco are currently estimated at 855 million pounds. The sum of the carryover of flue-cured tobacco plus the 1983 crop marketings totals 3,059 million pounds and represents the total supply of flue-cured tobacco for the 1983–84 marketing year. This amount exceeds the reserve supply level by 696 million pounds.

It is estimated that 455 million pounds of flue-cured tobacco will be utilized in the United States during the 1984–85 marketing year and 460 million pounds will be exported. Because the total supply is substantially in excess of the reserve supply level, it is deemed desirable to make a downward adjustment of 110 million pounds from the estimated utilization in order to determine the 1984 flue-cured tobacco marketing quota. Accordingly, the national marketing quota for flue-cured tobacco for the marketing year

beginning July 1, 1984, is 805 million pounds.

Section 317(a) of the 1938 Act (7 U.S.C. 1314c(a)), provides that, beginning in 1983 and at 5 year intervals thereafter, the farm acreage allotment and preliminary farm yield for each farm be adjusted to reflect increases or decreases in the past 5 years' moving county average yield per acre and the national average yield goal shall be adjusted to the past 5 years' moving national average yield. Accordingly, it has been determined that the national average yield goal of 1989 pounds per acre for the 1983–84 marketing years will be the national average yield goal for the 1984–85 marketing year.

In accordance with section 317(a)(3) of the 1938 Act (7 U.S.C. 1314c(a)(3)), the national acreage allotment for the 1984 crop of flue-cured tobacco is determined to be 404,725.99 acres, which is the result of dividing the national marketing quota by the national average yield goal.

In accordance with section 317(e) of the 1938 Act (7 U.S.C. 1314c(e)), the Secretary is authorized to establish a national reserve from the national acreage allotment in an amount equivalent to not more than 3 percent of the national acreage allotment for the purposes of making corrections in farm acreage allotments, adjusting for inequities, and establishing allotments for new farms. It has been determined that a national reserve for the 1984 crop of flue-cured tobacco of 475 acres is adequate for these purposes.

Determinations 1984–85 marketing year

Accordingly, the following determinations have been made for flue-cured tobacco for the marketing year beginning July 1, 1984:

(a) *Reserve supply level.* The reserve supply level has been determined to be 2,363 million pounds based upon a normal year's domestic consumption of 500 million pounds and a normal year's exports of 530 million pounds.

(b) *National marketing quota.* The national marketing quota on an acreage-poundage basis for the marketing year beginning July 1, 1984 has been determined to be 805 million pounds. This quota is based on an estimated consumption in the United States in such marketing year of 455 million pounds and estimated exports in such marketing year of 460 million pounds, with a 110 million pound downward adjustment in order to effect an orderly reduction of supplies toward the reserve supply level.

(c) *National average yield goal.* The national average yield goal has been determined to be 1,989 pounds. This goal is based on the 5-year national average yield for the 1977–81 marketing years.

(d) *National acreage allotment.* The national acreage allotment on an acreage-poundage basis has been determined to be 404,725.99 acres. This allotment is determined by dividing the national marketing quota of 805 million pounds by the national average yield goal of 1,989 pounds.

(e) *National reserve.* The national reserve for making corrections and adjusting inequities in old farm acreage allotments and for establishing allotments for new farms has been determined to be 475 acres.

(f) *National acreage factor.* The national acreage factor has been determined to be .884.

(g) *National yield factor.* The national yield factor has been determined to be .9020.

(h) *Types of tobacco.* Types 11, 12, 13, and 14 of tobacco shall constitute one kind of tobacco for the 1983–84, 1984–85, and 1985–86 marketing years.

(Secs. 301, 313, 317, 375, 52 Stat. 38, 47, 66, as amended, 79 Stat. 66 (7 U.S.C. 1301, 1313, 1314c, 1375))

Signed at Washington, D.C. on March 9, 1984.

Richard E. Lyng,

Acting Secretary.

CIVIL RIGHTS COMMISSION

Rhode Island Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Rhode Island Advisory Committee to the Commission will convene at 12:00 noon and will end at 2:00 p.m., on April 18, 1984, at the Brown University—Wilson Laboratory, Seminar Room B–2, Brown Street (between Angel and Waterman), Providence, Rhode Island 02912. The purpose of the meeting is to discuss the monitoring of the "Greenhouse Compact" and the revised draft of the redistricting report.

Persons desiring additional information, or planning a presentation to the Committee, should contact the Chairperson, Dorothy Zimmering, at (401) 245–3515 or the New England Regional Office at (617) 223–4671.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., March 23, 1984.

John I. Binkley,

Advisory Committee Management Officer.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

International Trade Administration

[C-351-008]

Carbon Steel Plate From Brazil; Intention To Terminate Suspension Agreement

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of intention to terminate suspension agreement.

SUMMARY: The Department of Commerce has begun an administrative review of the agreement suspending the countervailing duty investigation on carbon steel plate from Brazil. In the course of that review, we have found evidence that the Government of Brazil has failed to comply with the terms of the agreement. Therefore, we are proposing to terminate the suspension agreement. Interested parties are invited to comment on this proposal.

EFFECTIVE DATE: March 28, 1984.

FOR FURTHER INFORMATION CONTACT: Peggy Clarke or Brian Kelly, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On September 7, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 39394) a notice suspending the countervailing duty investigation on carbon steel plate from Brazil and announced its intent to conduct an administrative review of the suspension agreement. The Department subsequently received a request from the petitioners that the investigation be continued, and on January 20, 1983, published a notice of final affirmative determination (48 FR 2568). The International Trade Commission published a final affirmative injury determination on March 16, 1983 (48 FR 11190).

Scope of the Agreement

Imports covered by the agreement are shipments of Brazilian carbon steel plate. The term "carbon steel plate" covers hot-rolled carbon steel products

whether or not corrugated or crimped, not pickled, not cold-rolled, not in coils, not cut, not pressed, and not stamped to non-rectangular shape, 0.1875 inch or more in thickness and over 8 inches in width, currently classifiable under items 607.6615 or 607.9400 of the Tariff Schedules of the United States Annotated ("TSUSA"); and hot or cold-rolled carbon steel plate that has been coated or plated with zinc, including any material which has been painted or otherwise covered after having been coated or plated with zinc, currently classifiable under items 608.0710 or 608.1100 of the TSUSA. Semifinished products of solid rectangular cross section with a width at least four times the thickness, in the as cast condition or processed only through primary mill hot-rolling, are not included.

Reasons for Terminating the Agreement

Under the terms of the agreement, the Brazilian government was to impose an export tax on all shipments of carbon steel plate exported to the United States on or after October 1, 1982. The initial tax rate for imposition was 12.16 percent of the f.o.b. invoice price of the exports. In February 1983, the Brazilian government increased this tax to 12.53 percent.

In the course of the administrative review, we found that the exporters paid no tax before May 16, 1983. On May 16, exporters paid back taxes. However, the tax payments were not subjected to monetary correction, interest, or other penalties.

We believe the word "imposition" in the agreement means timely collection of the export taxes. The general procedure agreed to by the Department and the Brazilian government for tax collection is that the tax is due 45 days after the end of the month in which the shipment occurs. Under this arrangement payment of taxes on all shipments from October 1, 1982 through February 28, 1983 was up to five months late. We preliminarily determine that the late payment of these export taxes, particularly without monetary correction, interest, or penalties, constitutes a violation of the agreement.

The Brazilian government is required to submit quarterly letters certifying compliance with the agreement. The letters are due 15 days after the end of each quarter. We note that the certification letters due on July 15, 1983 and October 15, 1983 were several weeks late.

Intention To Terminate

For these reasons, we believe the Brazilian government has failed to comply with the terms of the suspension agreement. We propose to terminate it and to issue a countervailing duty order.

Accordingly, as required by section 704(a)(1)(A)(i) of the Tariff Act of 1930 ("the Tariff Act"), the Department intends to instruct the Customs Service to suspend liquidation of all entries of carbon steel plate from Brazil that are entered, or withdrawn from warehouse, for consumption beginning 90 days prior to publication of a notice terminating the agreement. Further, we intend to instruct the Customs Service to require a cash deposit or bond for each such entry of 11.75 percent of the f.o.b. invoice price, the subsidy rate found in the Department's final affirmative determination.

Interested parties may submit written comments on this proposed termination within 15 days of the date of publication of this notice and may request disclosure and/or a hearing within 5 days of the date of publication. Any hearing, if requested, will be held 20 days after the date of publication of this notice or the first workday thereafter. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish its final decision, including its analysis of issues raised in any such written comments or at a hearing.

This notice is published in accordance with section 704(i)(1) of the Tariff Act (19 U.S.C. 1671c) and § 855.32 of the Commerce Regulations.

Dated: March 23, 1984.

Alan F. Holmer,

Deputy Assistant Secretary, Import Administration.

[FR Doc. 84-8282 Filed 3-27-84; 8:45 am]

BILLING CODE 3510-DS-M

[C-351-011]

Carbon Steel Wire Rod From Brazil; Intention To Terminate suspension Agreement

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of intention to terminate suspension agreement.

SUMMARY: The Department of Commerce has begun an administrative review of the agreement suspending the countervailing duty investigation on carbon steel wire rod from Brazil. In the course of that review, we have found evidence that the Government of Brazil has failed to comply with the terms of the agreement. Therefore, we are proposing to terminate the suspensison agreement. Interested parfies are invited to comment on this proposal.

EFFECTIVE DATE: March 28, 1984.

FOR FURTHER INFORMATION CONTACT: Barbara Williams or Brian Kelly, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On september 27, 1982, the Department of Commerce ("the Department") published in the Federal Register (47 FR 42399) a notice suspending the countervailing duty investigation on carbon steel wire rod from Brazil and announced its intent to conduct an administrative review of the suspension agreement.

Scope of the Agreement

Imports covered by the agreement are shipments of Brazilian carbon steel wire rod. The term "carbon steel wire rod" covers a coiled, semi-finished, hot-rolled carbon steel product of approximately round solid cross section, not under 0.02 inch nor over 0.74 inch in diameter, not termpered, not treated, and not partly manufactured, and valued over 4 cents per pound, as currently classifiable in item 607.1700 of the Tariff Schedules of the United States Annotated.

Reasons for Terminating the Agreement

Under the terms of the agreement, the Brazilian government was to impose an export tax on all shipments of corbon steel wire rod exported to the United States on or after October 20, 1982. The initial tax rate for imposition was 14.90 percent of the f.o.b. invoice price of the export. In February 1983, the Brazilian government increased this tax to 15.50 percent.

In the course of the administrative review, we found that the exporters paid no tax before May 16, 1983. On May 16, exporters paid back taxes. however, the tax payments were not subjected to monetary correction, interest, or other penalties.

We believe the word "imposition" in the agreement means timely collection of the export taxes. The general procedure agreed to by the Department and the Brazilian government for tax collection is that the tax is due 45 days after the end of the month in which the shipment occurs. Under this arrangement payment of taxes on all shipments form October 20, 1982 through February 28, 1983 was up to five months late. We preliminarily determine that the late payment of these export taxes, particularly without monetary

correction, interest, or penalties, constitutes a violation of the agreement.

The Brazilian government is required to submit quarterly letters certifying compliance with the agreement. The letters are due 15 days after the end of each quarter. We note that the certification letters due on July 15, 1983 and October 15, 1983 were several weeks late.

Intention To Terminate

For these reasons, we believe the Brazilian government has failed to comply with the terms of the suspension agreement. We propose to terminate it. As provided by section 704(i)(B) of the Tariff Act of 1930 ("the Tariff Act"), this would require that we resume the investigation as if the affirmative preliminary determination under section 703(b) were made on the effective date of any termination.

Accordingly, as required by section 704(i)(1)(A)(i) of the Tariff Act, the Department intends to instruct the Customs Service to suspend liquidation of all entries of carbon steel wire rod from Brazil that are entered, or withdrawn from warehouse, for consumption beginning 90 days prior to publication of a notice terminating the agreement. Further, we intend to instruct the Customs Service to require a cash deposit or bond for each such entry of 14.31 percent of the f.o.b. invoice price, the subsidy rate found in the Department's preliminary affirmative determination (47 FR 30650, July 14, 1982).

Interested parties may submit written comments on this proposed termination within 15 days of the date of publication of this notice and may request disclosure and/or a hearing within 5 days of the date of publication. Any hearing, if requested, will be held 20 days after the date of publication of this notice or the first workday thereafter. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish its final decision, including its analysis of issues raised in any such written comments or at a hearing.

This notice is published in accordance with section 704(i)(1) of the Tariff Act (19 U.S.C. 1671c) and § 355.32 of the Commerce Regulations.

Dated: March 23, 1984.

Alan F. Holmer,

Deputy Assistant Secretary, Import Administration.

BILLING CODE 3510-DS-M

Texas A&M University; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, D.C.

Docket No. 82-00351. Applicant: Texas A&M University, College Station, TX 77843. Instrument: 2 Wavemakers, Wave Height Gauge. Manufacturer: Seasim Controls Limited, United Kingdom. Intended use: See notice at 47 FR 49055.

Comments: None received.

Decision: Approved for the wavemakers (including the random signal generator) only. Denied for the wave height gauge.

(1) In the case of the approved instrument, no instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument has a wave absorbing capability which absorbs reflection from walls or models. The National Oceanic and Atmospheric Administration advises in its memorandum dated December 8, 1982 that (1) the capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

(2) In the case of the denied instrument, an instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States. Reasons: In its request for duty-free entry, the applicant alleges only that "There are no resistance gauges manufactured in the United States." However, the National Oceanic and Atmospheric Administration advises in its memorandum dated December 8, 1982, that Grundy Environmental Systems of San Diego, California manufactures a resistance type wave height gauge. The Department has verified that Grundy does manufacturer such a gauge (The Model 9611 Wave and Tide Monitoring System). We therefore find that the Grundy resistance type wave height gauge is of equivalent scientific value to the foreign instrument for the applicant's intended use.

Frank W. Creel,

Acting Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Increasing the Import Limit for Certain Cotton Textile Products Produced or Manufactured in Brazil

March 23, 1984.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 28, 1984. For further information contact Diana Bass, International Trade Specialist (202) 377-4212.

Background

A CITA directive dated March 11, 1983, as amended, established restraint limits for specified categories of cotton and man-made fiber textiles and textile products, including Category 313 (cotton sheeting), produced or manufactured in Brazil and exported during the twelve-month period which began on April 1, 1983. In the CITA directive published below the limit for Category 313 is being increased from 29,098,650 square yards to 31,720,150 square yards by the application of ten percent swing provided under the terms of the Bilateral Cotton and Man-Made Fiber Textile Agreement of March 31, 1982 between the Governments of the United States and the Federative Republic of Brazil.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924) and December 14, 1983 (48 FR 55607), and December 30, 1983 (48 FR 57584).

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreement.

March 23, 1984.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

This directive further amends, but does not cancel, the directive of March 11, 1983 from the Chairman of the Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton and man-made fiber textiles and textile products, produced or manufactured in Brazil.

Effective on March 28, 1984, you are directed to increase the restraint limit established for Category 313 in the directive of March 11, 1983, as amended, to 31,720,150 square yards [1] according to the terms of the Bilateral Cotton and Man-Made Fiber Textile Agreement of March 31, 1982 bewteen the Governments of the United States and the Federative Republic of Brazil.[2]

The Committee for the Implementation of Textile Agreements has determined that this action falls with the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553.

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Announcing New Limits on Certain Cotton, Wool, and Man-Made Fiber Textile Products Exported From Hong Kong

March 23, 1984.

On September 15, 1983 and January 4, 1984, notices were published in the **Federal Register** (48 FR 41481 and 49 FR 491) announcing that the Government of the United States had requested consultations with the Government of Hong Kong concerning Categories 314, 337, 359, 361, 369, 459 and 649 under the terms of the bilateral Agreement of June 23, 1982, as amended.

The purpose of this notice is to announce that consultations on these categories have been held and the following limits established for 1983 under the terms of the bilateral agreement.

Category	Unit	1983 limit
314	Syd	5,817,191
337	Doz.	591,979
359	Lbs.	9,536,887
[illegible]	Nos	655,561
369	Lbs.	7,392,251
459	Lbs.	425,038
649	Doz.	512,867

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 84-8286 Filed 3-27-84; 8:45 am]

BILLING CODE 3510-DR-M

Announcing New Import Limits for Certain Wool Apparel Products Produced or Manufactured in Hungary

March 23, 1984.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 28, 1984. For further information contact Gordana Slijepcevic, International Trade Specialist, (202) 377-4212.

Background

In consultations held January 23-24, 1984, the Governments of the United States and the Hungarian People's Republic agreed to amend their Bilateral Wool Textile Agreement of February 15 and 25, 1983 to include specific limits for wool coats in Category 435 and women's, girls' and infants' trousers, slacks and shorts in Category 448, produced or manufactured in Hungary and exported to the United States. In the case of Category 435 the specific limit is 10,563 dozen for goods exported during the thirteen-month period which began on December 1, 1983 and extends through December 31, 1984. For Category 448 the specific limit is 19,000 dozen for goods exported during the twelve-month period which began on January 1, 1984.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), and December 30, 1983 (48 FR 57584).

SUPPLEMENTARY INFORMATION: On December 16, 1983 a letter dated December 13, 1983 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs was published in the **Federal Register** (48 FR 55891) which established limits for certain categories of wool apparel products produced or manufactured in Hungary and exported during the year which began on January 1, 1984. The letter published below amends the letter of December 13, 1983 to include limits for wool apparel products in Categories 435 and 448 during the designated restraint periods.

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

March 23, 1984.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: This directive amends, but does not cancel, the letter of December 13, 1983 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs which established levels of restraint for certain specified categories of wool textile products, produced or manufactured in Hungary and exported to the United States during 1984.

Effective on March 28, 1984, the directive of December 13, 1984 is hereby amended to include the following levels of restraint for wool textile products in Categories 435 and 448, exported during the indicated periods:

Category	Restraint limit[1] (dozen)	Period
435	10,561	Dec. 1, 1983 to Dec. 31, 1984
438	19,000	Jan. 1, 1984 to Dec. 31, 1984.

[1] The limits have not been adjusted to reflect any imports exported after November 30, 1983 (Cat. 435) and December 31, 1983 (Cat. 448)

Wool textile products in Categories 435 and 438 which have been exported to the United States prior to December 1, 1983 in the case of Category 435 and prior to January 1, 1984 in the case of Category 438 shall not be subject to this directive.

Wool textile products in Categories 435 and 438 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924) and December 14, 1983 (48 FR 55607), and December 30, 1983 (48 FR 57584).

The action taken with respect to the Government of the Hungarian People's Republic and with respect to imports of wool textile products from Hungary has been

---

[1] The level has not been adjusted to account for any imports exported after March 31, 1983.

[2] The agreement provides, in part, that (1) within the aggregate and group limits, specific limits may be exceeded by designated percentages; (2) specific limits may be increased by carryover and carryforward up to 11 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register.**

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Government of India Officials Authorized To Issue Export Visas and Exempt Certifications

March 22, 1984.

The Government of India has notified the United States Government that the following officials of the Apparel Export Promotion Council are now authorized to issue export visas for cotton, wool and man-made fiber textile products, produced or manufactured in India and exported to the United States under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of December 21, 1982:

Jacob Thomas, Assistant Director, Air Cargo Complex, Palam Airport, New Delhi
Kanshi Ram, Deputy Director, Air Cargo Complex Palam Airport
Anil Kumar, Assistant Director, Jaipur
S. C. Gadekar, Assistant Director, Bombay
K. Vasantha Kumar, Assistant Director, Madras

The following new officials have been designated to issue certifications for textile products which are exempt from the limitations of the bilateral agreement:

R. S. Bedi, Assistant Director, Office of Development Commissioner (Handicrafts)
P. K. Khullar, Assistant Director, Office of Development Commissioner (Handicrafts)
R. R. Vasudeva, Assistant Director, Office of Development Commissioner (Handicrafts)
G. K. Ashthana, Assistant Director, Office of Development Commissioner (Handicrafts)

The purpose of this notice is to advise the public of the change.

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

COMPTROLLER OF THE CURRENCY

FEDERAL DEPOSIT INSURANCE CORPORATION

FEDERAL HOME LOAN BANK BOARD

FEDERAL RESERVE SYSTEM

Delayed Availability of Funds; Issuance of a Policy Statement

AGENCY: Comptroller of the Currency, Federal Deposit Insurance Corporation, Federal Home Loan Bank Board, and Board of Governors of the Federal Reserve System.

ACTION: Issuance of a policy statement.

SUMMARY: The agencies are issuing this policy statement to encourage and assist industry efforts in voluntarily addressing the problems caused by some financial institutions when they delay a depositor's ability to withdraw funds deposited by check—often called "delayed availability of funds." The policy statement calls for those financial institutions that delay availability to review and disclose their policies, and to refrain from imposing unnecessary delays on all checks, particularly on Social Security and other government checks. In reviewing their availability policies, institutions are asked to consider taking into account factors that indicate whether a given situation presents a risk of loss and to provide a means for depositors to request that an exception be made to the standard hold policy.

EFFECTIVE DATE: March 22, 1984.

FOR FURTHER INFORMATION CONTACT: William Grant, Office of the Comptroller of the Currency, (202) 447–1938; Paul Sachtleben, Federal Deposit Insurance Corporation, (202) 389–4761; Richard Tucker, Federal Home Loan Bank Board, (202) 377–6211; or Gerald Hurst, Board of Governors of the Federal Reserve System, (202) 452–3667.

SUPPLEMENTARY INFORMATION: (1) *General.* Delayed availability—the practice by some financial institutions of delaying a customer's ability to withdraw funds deposited by check for several days after the date of deposit—has been an issue of concern for several years.

Interest in limiting or restricting the delayed availability practice has increased recently both at the state and federal level. Two states, New York and California, have enacted laws addressing the issue and several other states are considering legislation. In addition, there are bills pending in both houses of Congress.

The agencies believes that the practice of delaying availability results in problems for depositors, especially when the policy is inflexible or is not disclosed to depositors in an effective manner. Institutions maintain that the practice of delaying a depositor's ability to withdraw funds beyond the time it takes the institution to receive provisional credit for the check is justified to some extent because of the time it takes for a check to be returned to the institution of first deposit if it is not paid by the paying institution. They state that the only way an institution learns that a deposited check is being returned unpaid is to receive the check back; thus, there is a risk of loss. However , only about one percent of all checks are returned unpaid and only a very small percentage of these checks result in actual losses to financial institutions. While it may be true that the frequency of losses is small because of delayed availability policies and that the potential for losses is much larger, the agencies nevertheless believe that the practice of imposing delays on all deposited checks without regard to whether a particular situation presents a potential risk (for example, the deposit of an unusually large personal check into a new account) does not appear to be justified by the risk of loss. More specifically, for example, there is normally no justification for delaying availability on a Social Security or other government check deposited into an established account beyond the date when an institution receives credit for the check. The real risk of loss in such cases results from fraud, which typically would not be discovered until long after the check has cleared.

The agencies believe that voluntary industry action, rather than mandatory requirements, represents a potential solution to many of the problems caused by delayed availability, without the costs and burdens of a legislative or regulatory approach. The agencies are, therefore, issuing a policy statement tha. outlines their concerns and recommending actions to be taken by the industry in the hope that it will encourage and assist voluntary industry action.

(2) *Discussion of policy statement.* The policy statement calls on financial institutions that delay availability to take several actions. Institutions are asked to review their policies, consider whether the delay periods can be reduced, and disclose their policies to customers in an effective manner. Institutions are also asked to refrain from imposing unnecessary delays on all checks, particularly delays on

government checks deposited into established accounts beyond the time required for the institutions to receive credit for the checks. In reviewing their policies, institutions are asked to consider various factors that might indicate whether a risk of loss exists in a given situation that justifies a delay in availability and to provide depositors with a means for requesting that an exception be made from the standard hold policies.

The actions recommended are based on the agencies' belief that, although it is appropriate to delay availability in some specific situations, it is not necessary for financial institutions to delay availability on all deposited checks. By pointing out specific actions that institutions can take, the agencies hope that the policy statement will be a basis for industry action. As the statement indicates, the agencies plan to monitor developments in the area to determine whether further steps are needed.

* * * * *

Joint Policy Statement on Delayed Availability of Funds

The Comptroller of the Currency, Federal Deposit Insurance Corporation, Federal Home Loan Bank Board, and Federal Reserve Board are issuing this policy statement regarding the practice by financial institutions of delaying a depositor's ability to withdraw funds deposited by check—often called "delayed availability of funds." The agencies are concerned about the problems this practice causes for depositors and believe that voluntary action on the part of all financial institutions to reduce these problems would be the most efficient, least costly, and least burdensome solution.

An increasing number of financial institutions delay a depository's ability to withdraw funds in order to reduce their risk of loss if a deposited check is returned unpaid. However, financial institutions need not impose such delays on every deposited check in order to reduce the risk. In fact, some delayed availability policies may be inequitable. The agencies believe that there are actions that financial institutions can take now to eliminate some of the problems.

The agencies believe that financial institutions that delay availability should:

(1) *Review their policies* and consider reducing the delay periods to the extent possible, consistent with prudent business practices.

(2) *Disclose their policies* to depositors in an effective manner at the time an account is opened and, when practical, at the time a check is deposited that will be subject to a delay in availability. Institutions might also alert depositors to other ways of transferring funds that do not involve checks, such as through wire transfers or direct deposit through an automated clearing house.

(3) *Refrain from imposing unnecessary delays on all checks,* particularly delays on Social Security and other government checks deposited into established accounts beyond the time required to receive credit for the checks. (A delay beyond this time is generally inappropriate since the real risk is that of fraud, which ordinarily will not be discovered until long after the check has cleared.)

In reviewing their policies, institutions should take into account factors that indicate whether a given situation presents a risk of loss that justifies a delay in availability. These factors may include, for example, the length of time the account has been maintained, past experience with the depositor, the identity of the drawer, the type of check, and the location of the payor depository institution. In addition, institutions should consider providing, as part of their policy, a means for depositors to request that an exception be made from the standard delay practice and inform depositors of this possibility.

The agencies hope that the problems caused by delayed availability policies can be addressed by voluntary industry action, and urge trade groups and individual institutions to act. The agencies will be monitoring the effectiveness of these voluntary efforts to determine the extent to which disclosure is being made and the nature of specific delayed availability policies. Consumer surveys will also be conducted to determine the level of consumer awareness of delayed availability policies and the extent of consumer problems.

If it appears that voluntary action is inadequate to address the delayed availability issue, the agencies will consider further action to deal with the practice and the problems it causes.

Dated: March 22, 1984.

By order of the Office of the Comptroller of the Currency.

John F. Downey,

Chief National Bank Examiner.

By order of the Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

By order of the Federal Home Loan Bank Board.

J. J. Finn,

Secretary to the Board.

By order of the Board of Governors of the Federal Reserve System.

William W. Wiles,

Bonneville Power Administration

Availability of the Bonneville Acquisition Guide

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice of document availability.

SUMMARY: Copies of the Bonneville Acquisition Guide (BAG) which establishes the procedures BPA uses in the solicitation, award, and administration of procurement contracts are now available from BPA for $20 each.

ADDRESS: Copies of the BAG may be obtained by sending a check to the General Accounting Section—DTKC, Bonneville Power Administration, P.O. Box 3621, Portland, OR 97208.

FOR FURTHER INFORMATION CONTACT: N. L. Linscott, Contracts Manager at the above address, 503–230–4763.

SUPPLEMENTARY INFORMATION: The Bonneville Power Administration was established in 1937 as a Federal Power Marketing agency in the Pacific Northwest. BPA is a nonappropriated fund entity which finances its operations from power revenues. Its procurement operations are conducted under 16 U.S.C. 832a (f) and (g) as well as 40 U.S.C. 474(d)(20). The BAG utilizes the special authorities referred to in the preceding sentence as a basis for establishing BPA procurement policy; however, it follows the format of the Federal Acquisition Regulations to assist offerors in locating pertinent policies.

All BPA procurement solicitations include notice of applicability and availability of the BAG for the information of offerors on particular procurements.

Issued in Portland, Oregon, on March 15, 1984.

Peter T. Johnson,

Administrator.

[Docket No. ER84–323–000]

Florida Power & Light Co.; Filing

March 23, 1984.

The filing Company submits the following:

Take notice that on March 15, 1984, Florida Power & Light Company (FP&L) tendered for filing two Exhibits A to its FERC Electric Tariff, First Revised Volume No. 1, for the termination of service to Seminole Electric Cooperative, Inc. at its Bayshore and Slater delivery points. In accordance with the terms of these Exhibits A, all loads previously served at these delivery points have been transferred to a different existing delivery point as of February 27, 1984.

FP&L requests an effective date of February 27, 1984, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211

and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 11, 1984. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. ER84-324-000]

Florida Power & Light Co.; Filing

March 23, 1984.

The filing Company submits the following:

Take notice that on March 15, 1984, Florida Power & Light Company (FP&L) tendered for filing a contract executed by both parties entitled "Contract for Interchange Service Between Florida Power & Light Company and City of Starke, Florida."

FP&L requests an effective date of June 1, 1984, and therefore requests waiver of the Commission's notice requirements.

According to FP&L a copy of this filing was served upon the City of Starke.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 11, 1984. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Project No. 7229-001]

The Grisdale Hill Co.; Surrender of Preliminary Permit

March 23, 1984.

Take notice that The Grisdale Hill Company, Permittee for the Bartlett Power Project No. 7229, has requested that its preliminary permit be terminated. The preliminary permit for Project No. 7229 was issued on September 20, 1983, and would have expired on August 31, 1985. The project would have been located on the Salmon River in Clackamas County, Oregon.

The Permittee filed the request on February 7, 1984, and the surrender of the preliminary permit for Project No. 7229 is deemed accepted as of February 7, 1984, and effective as of 30 days after the date of this notice.

Lois D. Cashell,

Acting Secretary.

[Project No. 6406-001]

Langell Valley Irrigation District; Surrender of Preliminary Permit

March 23, 1984.

Take notice that Langell Valley Irrigation District, Permittee for the Gerber Reservoir Project No. 6406, has requested that its preliminary permit be terminated. The preliminary permit for Project No. 6406 was issued on January 3, 1983, and would have expired on June 30, 1984. The Project would have been located on Upper Miller Creek in Klamath County, Oregon.

The Permittee filed the request on February 13, 1984, and the surrender of the preliminary permit the Project No. 6406 is deemed accepted as of February 13, 1984, and effective as of 30 days after the date of this notice.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. TA84-4-1-60-002]

Locust Ridge Gas Co.; Proposed Changes in FERC Gas Tariff

March 23, 1984.

Take notice that on March 15, 1984, Locust Ridge Gas Company (Locust Ridge) tendered for filing the following revisions to its FERC Gas Tariff:

Original Volume No. 3—Second

Substitute Sixteenth Revised Sheet No. 1A

Original Volume No. 1—Second

Substitute Ninth Revised Sheet No. 1A.

Locust Ridge states that these new tariff sheets will have no net effect on the Company's current effective rate. Copies of the filing have been mailed to its jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedures (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before April 2, 1984. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Project No. 5126-002]

Mega Hydro Inc.; Surrender of Preliminary Permit

March 23, 1984.

Take notice that Mega Hydro Inc., Permittee for the proposed West Fork-

Feather River Power Project No. 5126 has requested that its preliminary permit be terminated. The preliminary permit was issued on December 22, 1982, and would have expired on May 31, 1984. The project would have been located on West Fork Creek in Butte County, California. Mega Hydro Inc. cites that the project is not economically feasible for development.

Mega Hydro Inc. filed its request on January 30, 1984, and the surrender of its permit for Project No. 5126 is deemed accepted effective 30 days from the date of this notice.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 84-8360 Filed 3-27-84; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER84-321-000]

Pacific Power & Light Co.; Filing

March 23, 1984.

The filing Company submits the following:

Take notice that on February 24, 1984, Pacific Power & Light Company (PP&L) tendered for filing a Letter Agreement dated, December 2, 1983 between PP&L and the Public Utility District No. 1 of Cowlitz County (The District) and an Amendment (Amendatory Agreement) to the Power Contract dated June 4, 1957 between PP&L and The District.

PP&L states that the Letter Agreement provides for a methodology to determine transfer and motoring losses associated with The District's power allocation from the Swift Hydroelectric Project. PP&L further states that the $54,000 transfer charge noted in the Letter Agreement is a restatement of the transfer charge contained in PP&L's December 15, 1983 filing under Docket No. ER84-171-000.

PP&L indicates that the Amendatory Agreement reflects The District's withdrawal from the sale of electrical power and energy to PP&L and provides for scheduling, accounting and storage of The District's power allocation from the Swift Hydroelectric Project.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 6, 1984. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 84-8351 Filed 3-27-84; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 4916-001]

Plumas County Flood Control and Water Conservation District; Surrender of Preliminary Permit

March 23, 1984.

Take notice that Plumas County Flood Control and Water Conservation District (District), Permittee for the proposed Chips Creek Project No. 4916 has requested that its preliminary permit be terminated. The preliminary permit was issued on March 21, 1983, and would have expired on September 30, 1984. The project would have been located on Chips Creek in Plumas County, California. The District cites that the project is within the U.S. Forest Service's Rare II Planning Area which precludes activities necessary to determine the feasibility of the proposed project.

The District filed its its request on February 6, 1984, and the surrender of its permit for Project No. 4916 is deemed accepted effective 30 days from the date of this notice.

Lois D. Cashell,

Acting Secretary.

Office of Hearings and Appeals

Cases Filed; Week of March 2 Through March 9, 1984

During the week of March 2 through March 9, 1984, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy. Submissions inadvertently omitted from earlier lists have also been included.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20585.

Dated: March 21, 1984.

George B. Breznay,

Director, Office of Hearings and Appeals.

List of Cases Received by the Office of Hearings and Appeals

[Week of Mar. 2 through Mar. 9, 1984]

Date	Name and location of applicant	Case No.	Type of submission
Mar. 5, 1984	Industrial Sprinkler Co., Hackensack, N.J	HFA-0212	Appeal of an Information Request Denial. If granted: The February 23, 1984, Freedom of Information Request Denial issued by the Department of Energy would be rescinded and Industrial Sprinkler Company would receive access to documents relating to the DOE's audit of Terminal Construction Company.
Mar. 6, 1984	Economic Regulatory Administration, Washington, D.C	HRZ-0191	Interlocutory Order. If granted: The proposed Remedial Order (Case No. HRO-0156) issued to Gulf Oil Corporation would be modified as follows: the violation time period would be extended, amount of alleged overcharges would be increased, and Subpart V proceedings would be substituted for the remedial measures.
Do	do	HRD-0203	Motion for Discovery. If granted: Discovery would be granted to Economic Regulatory Administration regarding issues of marine transportation costs in connection with the Proposed Remedial Order issued to Marathon Oil Company (Case No. HRO-0026).
Do	Marathon Oil Co., Washington, D.C	HRD-0204	Motion for Discovery. If granted: Discovery would be granted to Marathon Oil Company in connection with the Statement of Objections submitted in response to a Proposed Remedial Order (Case No. HRO-0026) issued to the firm.
Do	do	HRD-0205	Motion for Discovery. If granted: Discovery would be granted to Marathon Oil Company, regarding issues of marine transportation costs in connection with the Proposed Remedial Order issued to the firm (Case No. HRO-0026).
Do	Welch Oil Co., Bellevue, Iowa	HEE-0090	Exception to the Reporting Requirements. If granted: Welch Oil Company would not be required to file form EIA 782-B "Reseller/Retailer's Monthly Petroleum Products Sales Report".
Mar. 8, 1984	Ashland Oil, Inc./Atlantic Richfield, Los Angeles, Calif	HEJ-0047	Request for Protective Order. If granted: Atlantic Richfield Company would enter into a Protective Order with the Ashland Oil, Inc. regarding the exchange of proprietary information between Atlantic Richfield Company and Ashland Oil, Inc. in connection with Ashland Oil Inc.'s Application for Exception (Case No. BEE-1578).
Do	Herbert Holmes, Clarksburg, W. Va	HFA-0213	Appeal of An Information Request Denial. If granted: The February 27, 1984 Freedom of Information Request Denial issued by the Nevada Operations Office would be rescinded, and Herbert Holmes would receive access to his dosimeter readings and related medical reports resulting from a nuclear test named "Operation Teapot" in 1955.
Mar. 9, 1984	Texaco, Inc., Washington, D.C	HRR-0085	Motion for Modification/Rescission. If granted: The February 28, 1984 Decision and Order (Case No. HRZ-0166) issued to the Office of Special Counsel would be modified regarding Texaco, Inc.'s request to reconsider the LOC Crude information.

Refund Applications Received

[Week of Mar. 2 to Mar. 9, 1984]

Date	Name and refund proceeding/name of refund applicant	Case No.
Mar. 6, 1984	Amoco/Asher Oil Co., Amoco/Heilig Oil Co	RF21-12287, RF21-12288
Feb. 29, 1984	Amoco/Capitol Rent A Car, Inc	RF21-12289
Mar. 6, 1984	Amoco/Doug Asher Oil Co., Inc	RF21-12290

BILLING CODE 6450-01-M

Western Area Power Administration

Request for Applications for Short-Term Power From the Navajo Generating Station

AGENCY: Western Area Power Administration, Department of Energy.

ACTION: Notice of request for applications for short-term power from the Navajo Generating Station.

SUMMARY: The Western Area Power Administration (Western), Boulder City Area Office, is requesting applications for Navajo Generating Station (Navajo) power. The general principles under which the power is to be marketed are contained in the General Consolidated Power marketing Criteria or Regulations for Boulder City Area Projects (Criteria) published in the **Federal Register** on May 9, 1983 (48 FR 20881).

Applications are requested for short-term capacity and energy available from Navajo, a feature of the Central Arizona Project (CAP), in accordance with Part IV of the Criteria. Allocations of Navajo power for short-term arrangements will be made after review of applications requested herein.

Allocations of Navajo power for long-term arrangements will be made after the decision relating to the construction of a regulatory storage unit is reached.

Western will immediately begin accepting and reviewing applications for power in accordance with the Criteria.

ADDRESS: Applications may be sent to: Mr. Thomas A. Hine, Area Manager, Boulder City Area Office, Western Area Power Administration, P.O. Box 200, Boulder City, NV 89005, (702) 293-8800.

DATE: Applications for short-term Navajo power will be accepted through April 30, 1984. Applications postmarked after that date will not be considered.

SUPPLEMENTARY INFORMATION: On May 9, 1983, Western published the General Consolidated Power marketing Criteria or Regulations for Boulder City Area Projects in the **Federal Register**. The Criteria contains the general power marketing principles for amounts of power available from Navajo. Terms for delivery will be consistent with the Criteria. Charges for capacity and energy will currently be consistent with the United States layoff agreements. These charges currently include an annual generation capacity charge, an annual generation capacity surcharge, a generation operating charge and a generation energy charge. Charges for transmission capacity currently include an annual transmission capacity charge, an annual transmission capacity surcharge, an annual Moenkopi

Substation use charge, and a transmission operating charge.

As stated in the Criteria, the power from Navajo is marketed as contingent power, with the reciever supplying the necessary reserve capacity. Navajo power available for marketing is that amount of power withdrawn from the current layoff contractors that is surplus to the needs of the CAP. It is anticipated that the power to be allocated will be available for the most part during offpeak hours for the startup of CAP, and will be available only during the winter season after CAP pumping is in full operation. The amount available during any hour will be dependent upon Navajo output and CAP load.

The current schedule for withdrawal of Navajo power from the layoff contractors is shown below:

Withdrawal date	Withdrawal amount (MW)	
	Incremental	Cumulative
July 1984	16.4	16.4
July 1984	8.7	25.1
July 1984	13.7	[illegible]
July 1984	11.2	- 50.0
January 1985	[1] 316.3	[illegible]
July 1985	[2] 41.5	[2] 407.8
July 1985	[2] 61.0	[2] 468.8
January 1986	[2] 31.8	[2] 500.6
January 1986	[2] 46.2	[2] 546.8

[1] The January 1985 withdrawal includes separate planned withdrawals of 4.8 MW for the Protective and Regulatory Pumping Unit, and 40.7 MW for the Yuma Desalting Plant, which have been postponed due to the enactment of Public Law 98-[illegible].

[2] Withdrawals from preference contractors will be postponed until May 31, 1987, if power is not needed for CAP.

This schedule is subject to change concurrent with any change in the CAP construction schedule.

The Salt River Project has installed a dynamic participation signal that instantaneously allocates the output of Navajo to the participants in the Navajo Generating Station. Due to the varied output of the powerplant, with variations in coal quality and other factors, each successful applicant must be able to accept such a signal in order to provide system regulation and control. Inasmuch as the output of Navajo is separated into percentages equal to the participation share, Western will allocate Navajo power by percentage of the amount withdrawn.

Applications shall include name and address of the applicant, including contact person, and the amounts of capacity and energy requested for both the summer and winter seasons as defined in the Criteria.

The applications for power shall include the following applicant profile data as approved through November 30, 1984, by the Office of Management and Budget (OMB No. 1904–0037):

1. Eligibility—a statement of eligibility as a preference customer under Reclamation Law and pertinent statutes, particularly section 9(c) of the Reclamation Project Act of 1939 (43 U.S.C. 485h(c)).

2. Organization—a brief description of the organization that will interact with Western on contract and billing matters.

3. The name, address, and telephone number of a contact person from a consulting firm used, if any.

4. Transmission:

a. Voltage of service required, requested point(s) of delivery, and the capacity desired at each.

b. A description of the transmission arrangements necessary to deliver the power from the project delivery point(s) specified in the Criteria to the applicant's load.

5. Loads:

a. A tabulation showing monthly peak demands and monthly energy usage for calendar years 1981, 1982, and 1983.

b. The applicant's daily peak for system loads for the peak weeks in the summer (March–September) and winter (October–February) seasons for 1981, 1982, and 1983.

6. Resources:

a. List of generating resources, if any, including installed capacity, 1983 plant factor, and location.

b. A listing, if an applicant is applying for power on behalf of others, of the entities represented, the present allocations to those entities of existing Federal resources, and the proposed allocation of the available new resources.

c. A listing of power supply contracts with parties other than Western, which includes the amounts of capacity and energy under contract and termination date of each.

7. The application may also contain any other pertinent information the applicant may wish to provide.

8. The signature and title of an appropriate official who is able to attest to the validity of the data submitted and who is authorized to submit an application for power.

The applications for power will be available for public review at the Boulder City Area Office after May 11, 1984.

Issued at Golden, Colorado, March 16, 1984.

Robert L. McPhail,
Administrator.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPP-180640; PH-FRL 2554-6]

Louisiana Department of Agriculture; Receipt of Application for Specific Exemption To Use a Pesticide for an Unregistered Use; Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a specific exemption request from the Lousiana Department of Agriculture (hereafter referred to as the "Applicant") for a specific exemption to use the active ingredient 1-[[2-(2,4-dichlorophenyl)-4-propyl-1,3-dioxolan-2-yl]methyl]-1*H*-1,2,4-triazole, plus its metabolites containing the dichlorobenzyl moiety (Tilt, EPA Reg. No. 100–617) to control sheath blight caused by *Rhizoctonia solani,* as well as brown spot caused by *Bipolaris oryzae,* narrow brown spot caused by *Cercospora oryzae,* leaf smut caused by *Entyloma oryzae,* stem rot caused by *Sclerotium oryzae,* blast caused by *Pyricularia oryzae* and sheath spot caused by *Rhizoctonia oryzae* on 250,000 acres of rice in Louisiana. EPA is soliciting comment before making the decision whether or not to grant the specific exemption.

DATE: Comments must be received on or before April 27, 1984.

ADDRESS: Written comments by mail to: Information Services Section, Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460. In person, bring comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part of all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A sanitized copy of any material containing Confidential Business Information must be provided by the submitter for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice.

FOR FURTHER INFORMATION:

By mail: Libby Welch, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

Office location and telephone number: Rm. 716C, CM#2, 1921 Jefferson Davis Highway, Arlington, VA (703–557–1192).

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any registration provision of FIFRA if he determines that emergency conditions exist which require such exemption.

The Applicant has requested the Administrator to issue a specific exemption to permit the use of Tilt, EPA Reg. No. 100–617, to control sheath blight caused by *Rhizoctonia solani,* as well as brown spot caused by *Bipolaris oryzae,* narrow brown spot caused by *Cercospora oryzae,* leaf smut caused by *Entyloma oryzae,* stem rot caused by *Sclerotium oryzae,* blast caused by *Pyricularia oryzae* and sheath spot caused by *Rhizoctonia oryzae* throughout Louisiana. Information in accordance with 40 CFR Part 166 was submitted as part of this request. Tilt is currently registered for use on grasses grown for seed.

According to the Applicant, approximately 525,000 acres will be planted to rice in Louisiana during the 1984 crop year. It is stated that the Louisiana rice crop has been damaged annually by a number of diseases, primarily sheath blight caused by *Rhizoctonia solani,* but including the other pests named above. The incidence of rice sheath blight has increased since the late 1960's and has severely reduced yields in various locations in the State, according to the Applicant. The organism is soilborne with the primary inoculum being a sclerotium that continues to increase in number with each diseased crop.

The Applicant predicts that this disease situation will continue and even worsen because of the following factors: (1) Resistant long grain rice varieties are currently unavailable and none are anticipated within the near future; (2) the pathogen attacks both rice and soybeans, preventing cultural control through crop rotation; (3) changes in crop rotation from long rice-pasture rotations to rice-rice or rice-soybean rotation have occurred; these rotations have allowed the current buildup of inoculum levels resulting in increasing sheath blight incidence in rice; (4) crop residue destruction has not been effective in controlling this pathogen; burning of rice stubble is not effective in completely destroying the sclerotia, contributes to air pollution, and destroys needed organic matter; incorporation of residue by tillage serves to replenish the sclerotia reserve in the soil; (5) currently labeled fungicides available for sheath blight control *Rhizoctonia* spp. in rice, but do not provide consistently high levels of control or substantially reduce the number of sclerotia in the stubble. Benlate (benomyl) and Mertect (thiabendazole) are currently labeled for rice sheath blight in Louisiana. The Applicant states that widespread use of benomyl has often resulted in the development of pathogen resistance to the chemical and consequent loss of benomyl as a control measure. The chemical pathways of thiabendazole are very near those of benomyl and similar situations are expected to develop with that compound according to the Applicant. It is estimated that treatment of affected acreage with Tilt in 1984 could save Louisiana growers at least $9,400,000.

The Applicant proposes to treat 250,000 acres of rice throughout the State. The time of usage will be from May 1, 1984, through September 1, 1984, with no more than 141,000 pounds of active ingredient to be used.

This notice does not constitute a decision by EPA on the application itself. Use of the pesticide Tilt has been determined to be of public interest, and, therefore, the Agency has decided that public notice and opportunity for public comment pursuant to 40 CFR 166.10 is called for as a part of the information adjudication for specific exemptions. Accordingly, interested persons may submit written views on this subject to the Program Management and Support Division at the address above. The comments must be received on or before April 27, 1984, and should bear the identifying notation "OPP–180640." All written comments filed pursuant to this notice will be available for public inspection in Rm. 236, Crystall Mall No. 2, at the address given above, from 8:00 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Agency, accordingly, will review and consider all comments received during the comment period in determining whether to issue the emergency exemption requested by Louisiana.

Dated: March 19, 1984.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

Draft General National Pollutant Discharge Elimination System (NPDES) Permit for Log Transfer Facilities in the State of Alaska; Change in Comment Period and Hearing

AGENCY: Environmental Protection Agency.

ACTION: Notice of Extension of public comment period and postponement of public hearing.

SUMMARY: The Regional Administrator of Region 10 is today giving notice that the public comment period (previously noticed at 49 FR 6788, February 23, 1984) for the draft general National Pollutant Discharge Elimination System (NPDES) permit for log transfer facilities in the State of Alaska is extended until May 4, 1984. A public hearing scheduled for March 28, 1984, in Juneau has been rescheduled for April 27, 1984. An informal public workshop to discuss the permit terms and conditions has been scheduled for April 12, 1984, in Juneau. The time and location of these meetings are listed below.

DATES: Interested persons may subit comments on the draft general permit to EPA, Region 10, at the address below no later than May 4, 1984. An informal public workshop is scheduled for April 12, 1984, at 9:00 A.M. at the University of Alaska, Bill Ray Center, Room #152, 1108 F Street, Juneau. A public hearing is scheduled for April 27, 1984, at 9:00 A.M., at the Mendenhall Glacier Visitor Center, Juneau, Alaska. Any person wishing to make statement at the hearing must notify Mr. Wally Scarburgh at the address below no later than 4:00 P.M. on April 20. Regional Administrator, U.S. Environmental Protection Agency, Region 10, M/S 430, 1200 Sixth Avenue, Seattle, Washington 98101.

FOR FURTHER INFORMATION CONTACT:

Mr. William Lawrence, Alaska Operations Office, Room E 556, Federal Building, 701 C Street, Box 19, Anchorage, Alaska 99513, (907) 271–5083

Ms. Marcia Lagerloef, Ocean Programs Section, M/S 430, US EPA Region 10, 1200 Sixth Avenue, Seattle, Washington 98101, (206) 442–1285

Mr. Wally Scarburgh, Alaska Operations Office, 3200 Hospital Drive, Suite 101, Juneau, Alaska 99811, (907) 586–7619

Mr. Edward Ovsenik, Permits Division (EN–336), EPA Headquarters, 401 M Street, S.W., Washington, D.C. 20460, (202) 426–7035

Dated: March 21, 1984

L. Edwin Coate,

Acting Regional Administrator.

BILLING CODE 6560-50-M

[OPP—180641 PH-FRL 2552-7]

Cyromazine; Issuance of Emergency exemptions for Use of an Unregistered Pesticide

AGENCY: EPA Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted specific exemptions for the use of the pesticide chemical cyromazine to the: (1) Maryland and Pennsylvania Departments of Agriculture and the Virginia Department of Agriculture and Consumer Services to control fly larvae in poultry manure. The specific exemptions were authorized for use in 15 counties in Pennsylvania, 3 counties in Maryland and in the affecterd area of Virginia's Shenandoah Valley to control an outbreak of highly pathogenic avian influenza; and (2) Florida Department of Agriculture and Consumer Services for use on celery, lettuce and fresh-market tomatoes to control leafminers.

DATES: 1. The specific exemptions were granted to Pennsylvania on December 9, 1983, to Maryland on January 31, 1984, and to Virginia on February 25, 1984. Pennsylvania's exemption expires on December 9, 1984, or when the emergency situation ceases to exist, whichever occurs first; and Maryland's and Virginia's exemptions expire on January 26, 1985, or when the emergency situation ceases to exist, whichever occurs first.

2. Florida's exemptions for use on celery and lettuce were granted on November 25, 1983, and expire on June 30, 1984; and the tomato exemption was granted on February 9, 1984, and expires on June 15, 1984.

FOR FURTHER INFORMATION CONTACT:

By mail: Jack E. Housenger, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

Office location and telephone number: Rm. 716, CM#2, 1921 Jefferson Davis Highway, Arlington, Va. (703) 557–1192.

SUPPLEMENTARY INFORMATION: EPA has granted specific exemptions for the use of the pesticide chemical cyromazine to the Maryland and Pennsylvania Departments of Agriculture and the Virginia Department of Agriculture and Consumer Services to control fly larvae in poultry manure in areas affected by an outbreak of highly pathogenic avian influenza. EPA has also granted a specific exemption to Florida for the use of cyromazine on celery, lettuce, and tomatoes to control leafminers.

Maryland, Pennsylvania, and Virginia

The Maryland and Pennsylvania Departments of Agriculture and the Virginia Department of Agriculture and Consumer Services have declared the existence of emergency conditions due to outbreaks of the highly pathogenic avian influenza in the poultry flocks in certain areas within their States.

The highly pathogenic avian influenza is a virus which can be trasmitted by various mechanisms. One possible mechanism of transmission may be the fly. Therefore, one aspect of the efforts to reduce the spread of the virus is control of the fly population. Each State will use cyromazine in poultry feed as a feed-through pesticide to control fly larvae in poultry manure. Currently registered pesticides will also be used to control adult fly populations as well as other insects. This outbreak of highly pathogenic avain influenza has resulted in mortality of 25 to 60 precent of the poultry population affected.

After reviewing the applications and other available information, EPA has determined that:

1. An outbreak of the highly pathogenic avian influenza has occurred in seven counties in Pennsylvania, in Cecil County in Maryland and in some parts of Virginia's Shenandoah Valley, and as a part of the overall program to help reduce the spread of the virus, immediate control of fly populations is necessary in and around the affected areas.

2. Registered alternatives are not adequately controlling the fly populations which could result in the spread of this highly pathogenic virus.

3. As a result of a risk analysis, it has been determined that the use of cyromazine as proposed will not pose an unreasonable hazard to man or the environment.

Accordingly, Pennsylvania, Maryland, and Virginia have been granted specific exemptions to use the pesticide noted above until December 9, 1984, in Pennsylvania; and January 26, 1985, or when the emergency situation ceases to exist, whichever occurs first, in Maryland and Virginia, to the extent and in the manner set forth in the applications. The specific exemptions are also subject to the following conditions:

1. The unregistered pesticide product Larvadex 0.3% Premix, which contains the active ingredient cyromazine and is manufactured by the CIBA-GEIGY Corporation, will be used.

2. Larvadex 0.3% Premix will be applied to feed at a rate of one pound of product (0.003 pound active ingredient) per ton of feed.

3. Poultry may be fed treated feed in the Pennsylvania counties affected by the avain flu and their adjoining countries, Adams, Berks, Chester, Cumberland, Dauphin, Delaware, Franklin, Lancaster, Lebanon, Lehigh, Montgomery, Northumberland, Perry, Schuylkill, and York; in the Maryland county of Cecil and the adjoining countries of Harford and Kent; and in Virginia's Shenandoah Valley.

4. Treated feed may be fed only to egg-laying, pullet and broiler poultry.

5. Combined residues of cyromazine and its metabolite melamine will not exceed 0.4 ppm in eggs, meat, fat and meat byproducts of poultry.

6. The EPA shall be immediately informed of any adverse effects resulting from the use of cyromazine in connection with these exemptions.

7. A final report summarizing the results of these programs is required to be submitted after the exemptions expire.

Florida

The Florida Department of Agriculture and Consumer Services has declared the existence of emergency conditions with regard to control of leafminers in celery, lettuce and tomatoes. The leafminer has been a serious problem for Florida growers and has resulted in extreme economic losses on each of these crops in the past when registered alternative pesticides have failed to provide control.

After reviewing the applications and other available information, EPA has determined that:

1. A pest outbreak of the leafminer has occurred and registered alternative pesticides will not provide adequate control.

2. Significant economic losses are anticipated without the use of an effective leafminer control.

3. The use of cyromazine as proposed will not pose an unreasonable hazard to man or the environment.

Accordingly, Florida has been granted specific exemptions to use cyromazine on celery and lettuce until June 30, 1984, and on fresh-market tomatoes until June 15, 1984. The specific exemptions are also subject to the following conditions:

1. The unregistered pesticide product Trigard 75 WP, which contains the active ingredient cyromazine and is manufactured by the CIBA-GEIGY Corporation, will be used.

2. Trigard 75 WP will be applied at a rate of 0.125 pound active ingredient per acre per application.

3. A maximum of 12 applications may be made to celery and tomatoes and a maximum of 8 applications may be made to lettuce.

4. A 14-day preharvest interval will be observed for applications made to celery and lettuce while applications may be made up to the day of harvest for tomatoes.

5. A maximum of 10,000 acres of celery and 12,000 acres of lettuce in the counties of Hendry, Lake, Orange, Palm Beach, Sarasota, and Seminole may be treated. A maximum of 30,000 acres of tomatoes for fresh fruit market only may be treated.

6. Combined residues of cyromazine and its metabolite melamine will not exceed 0.5 ppm in or on celery or lettuce and 1 ppm in or on tomatoes as a result of the approved treatments.

7. The EPA shall be immediately informed of any adverse effects resulting from the use of cyromazine in connection with these exemptions.

8. A final report summarizing the results of these programs is required to be submitted after the exemptions expire.

Dated: March 19, 1984.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

Premanufacture Notices; Monthly Status Report for December 1983

Correction

In FR Doc. 84-2850, beginning on page 4139, in the issue of Thursday, February 2, 1984, make the following corrections:

1. On page 4139, in Table I, in the entries for 84-257 and 84-258, the second line in the identity and generic name column should read "a diisocyanate."

2. On page 4140, in Table I, in the entry for 84-286, in the identity and generic name column, after "aliphatic" add "nitrile".

3. On page 4142, in Table III., in the entry for 83,1156 "cyclopentadieneformaldehyde" should be one word.

4. On page 4143, in Table III., in the entry for 83-1273 "Chromophore" should have an "e" on the end.

BILLING CODE 1505-01-M

[(OPTS-59146A/147A) TSH-FRL 2554-3]

Certain Chemicals; Approval of Test Marketing Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of six applications for test marketing exemptions (TMEs) under section 5(h)(6) of the Toxic Substances Control Act (TSCA), TME-84-26, TME-84-27, TME-84-28, TME-84-29, TME-84-30, TME-84-31, and TME-84-32. The test marketing conditions are described below.

EFFECTIVE DATE: March 20, 1984.

FOR FURTHER INFORMATION CONTACT: Joe B. Boyd, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-202, 401 M St. SW., Washington, DC. 20460 (202-382-3739).

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use and disposal of the substances for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present any unreasonable risk of injury.

EPA hereby approves TME-84-26, TME-84-27, TME-84-28, TME-84-29, TME-84-30, TME-84-31, and TME-84-32. EPA has determined that test marketing of the new chemical substances described below, under the conditions set out in the TME applications, and for the time periods and restrictions (if any) specified below, will not present any unreasonable risk of injury to health or the environment. Production volumes, number of workers exposed to the new chemicals, and the levels and durations of exposure must not exceed those specified in the applications. All other conditions and restrictions described in the applications and in this notice must be met.

TME 84-26

Date of Receipt: February 6, 1984.
Notice of Receipt: February 17, 1984 (49 FR 6162).
Applicant: Confidential.
Chemical: (G) Polyamic resin solution.
Use: (G) Specialty coatings.
Production Volume: Confidential.
Number of Customers: Confidential.
Worker Exposure: Manufacture: a total of 4 workers.
Processing: Dermal and inhalation. Number of workers is confidential.
Test Marketing Period: 18 months.
Commencing on: March 20, 1984.
Risk Assessment: No significant health or environmental concerns were identified. The estimated worker exposure and environmental release of the test market substance are expected to be low. The test market substance will not pose any unreasonable health or environmental risks.
Public Comments: None.

TME 84-27

Date of Receipt: February 6, 1984.
Notice of Receipt: February 17, 1984 (49 FR 6162).
Applicant: Confidential.
Chemical: (G) Polyamic resin solution.
Use: (G) Specialty coatings.
Production Volume: Confidential.

Workers Exposure: Manufacture: a total of 4 workers.
Test Marketing Period: 18 months.
Commencing on: March 20, 1984.
Risk Assessment: No significant health or environmental concerns were identified. The estimated worker exposure and environmental release of the test market substance are expected to be low. The test market substance will not pose any unreasonable health or environmental risks.
Public Comments: None.

TME 84-28

Date of Receipt: February 7, 1984.
Notice of Receipt: February 17, 1984 (49 FR 6162).
Applicant: Confidential.
Chemical: (G) Alkyl polyether.
Use: (G) Used in manufacture of an industrial polyurethane.
Production Volume: 20,000 kg.
Number of Customers: Confidential.
Worker Exposure: Manufacture and use: dermal, a total of 10 workers up to 2 hrs/day up to 120 days/yr.
Test Marketing Period: 6 months.
Commencing on: March 20, 1984.
Risk Assessment: No significant health or environmental concerns were identified. The estimated worker exposure and environmental release of the test market substance are expected to be low. The test market substance will not pose any unreasonable health or environmental risks.
Public Comments: None.

TME 84-29

Date of Receipt: February 7, 1984.
Notice of Receipt: February 17, 1984 (49 FR 6162).
Applicant: Confidential.
Chemical: (G) Urethane acrylate.
Use: (G) Resin coating.
Production Volume: 20,000 lbs.
Number of Customers: five.
Worker Exposure: Manufacture: dermal, 10 workers. Processing and use: dermal, 20 workers
Test Marketing Period: 12 months.
Commencing on: March 20, 1984.
Risk Assessment: No significant health or environmental concerns were identified. The estimated worker exposure and environmental release of the test market substance are expected to be low. The test market substance will not pose any unreasonable health or environmental risks.
Public Comments: None.

TME 84-30

Date of Receipt: February 10, 1984.
Notice of Receipt: February 24, 1984 (49 FR 6990).
Applicant: Confidential.
Chemical: (G) Rosin-modified phenolic resin.
Use: Heat set web offset printing inks (80%), Sheet-fed quickset printing inks (20%).
Production Volume: Confidential.
Number of Customers: Six.
Worker Exposure: Manufacture: Dermal and inhalation a total of 4 workers, up to 3 hrs./day, up to 2 days/yr.
Test Marketing Period: 6 months.
Commencing on: March 20, 1984.
Risk Assessment: No significant health or environmental concerns were identified. The estimated worker exposure and environmental release of the test market substance are expected to be low. The test market substance will not pose any unreasonable health or environmental risks.
Public Comments: None.

TME 84-31

Date of Receipt: February 15, 1984.
Notice of Receipt: February 24, 1984 (49 FR 6990).
Applicant: EM Chemicals.
Chemical: (g) Alkylbenzoic acid, 4-alkylphenyl ester.
Use: Used in a mixture for manufacture of liquid crystal displays.
Production Volume: Confidential.
Number of Customers: 15.
Worker Exposure: Manufacture: dermal, a total of 15 workers.
Test Marketing Period: 3 months.
Commencing on: March 20, 1984.
Risk Assessment: No significant health or environmental concerns were identified. The estimated worker exposure and environmental release of the test market substance are expected to be low. The test market substance will not pose any unreasonable health or environmental risks.
Public Comments: None.

TME 84-32

Date of Receipt: February 15, 1984.
Notice of Receipt: February 24, 1984 (49 FR 6990).
Applicant: EM Chemicals.
Chemical: Alkylbenzoic acid, 4-alkylphenyl ester.
Use: Used in a mixture to manufacture liquid crystal displays.
Production Volume: Confidential.
Number of Customers: 15.
Worker Exposure: Processing and use: dermal, a total of 15 workers up to 8 hrs/day and up to 90 days/yr.
Test Marketing Period: 3 months.
Commencing on: March 20, 1984.
Risk Assessment: No significant health or environmental concerns were identified. The estimated worker exposure and environmental release of the test market substance are expected to be low. The test market substance will not pose any unreasonable health or environmental risks.
Public Comments: None.

The Agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information come to its attention which casts significant doubt on its finding that the test marketing activities will not present any unreasonable risk of injury to health or the environment.

Dated: March 20, 1984.

Health Assessment Document for Ethylene Oxide and Ethylene Dichloride

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability of External Review Drafts.

SUMMARY: This notice announces the availability of two external review drafts: the Health Assessment Document for Ethylene Oxide and the Health Assessment Document for Ethylene Dichloride. The largest single use of ethylene oxide is as an intermediate in the synthesis of ethylene glycol. However, small amounts of this epoxide are used as a sterilant or pesticide in commodities, pharmaceuticals, medical devices, tobacco, and other items. A major portion (84%) of the United States' ethylene dichloride production is consumed to make vinyl chloride monomer. It is also used to make chlorinated solvents, vinylidene chloride and ethyleneamines.

Those persons interested in commenting on the scientific merit of these documents will be able to obtain a copy of each document as follows:

(1) The documents will be available in single copy quantity from EPA at the following address: ORD Publications—CERI-FRN, U.S. Environmental Protection Agency, 26 W. St. Clair, Cincinnati, Ohio 45268 [(513) 684-7562].

Requesters should be sure to cite the EPA number assigned to these documents, EPA-600/8-84-009A for ethylene oxide and EPA-600/8-84-006A for ethylene dichloride.

To receive these documents, requesters should send their names and addresses to CERI at this time.

(2) These documents will also be available for public inspection and copying at the EPA Library at Waterside Mall, 401 M. Street, SW., Washington, D.C. 20460.

Commenters are requested to submit separate comments for each document rather than making a combined submission. Comments must be made in writing and addressed to either: Project Officer for Ethylene Oxide or Project Officer for Ethylene Dichloride, Environmental Criteria and Assessment Office (MD-52), U.S. Envoronmental Protection Agency, Research Triangle Park, N.C. 27711.

After receipt of all public comments on these documents, the Science Advisory Board will hold public meetings to review the documents. Advance notices announcing the time and place and the agenda will be published in the **Federal Register.**

DATES: The Agency will make these documents available for public comment on Monday, April 23, 1984. Comments must be received by close of business on Friday, June 22, 1984, or postmarked by that date.

SUPPLEMENTARY INFORMATION: The Office of Health and Environmental Assessment has prepared these health assessments to serve as source documents for EPA use. These health assessment documents were originally developed for use by the Office of Air Quality Planning and Standards to support decision-making regarding

possible regulation of ethylene oxide and ethylene dichloride under the Clean Air Act. However, the scope of these documents has since been expanded to address multimedia aspects.

In the development of these assessment documents, the scientific literature has been inventoried, key studies have been evaluated, and summary/conclusions have been prepared so that the chemicals' toxicity and related characteristics are qualitatively identified. Observed effect levels and other measures of dose-response relationships are discussed, where appropriate, so that the nature of the adverse health responses is placed in perspective with observed environmental levels.

FOR FURTHER INFORMATION CONTACT: Ms. Diane Chappell, U.S. Environmental Protection Agency, Environmental Criteria and Assessment Office, MD–52, Research Triangle Park, N.C. 27711 [(919) 541–3637].

Dated: March 23, 1984.

Bernard D. Goldstein,

Assistant Administrator for Research and Development.

BILLING CODE 6560–50–M

[FRL 2493–5]

Fuels and Fuel Additives; Proposed Revocation of Waiver Granted Under Section 211(f) of the Clean Air Act

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed revocation of waiver.

SUMMARY: The Environmental Protection Agency (EPA) is granting a petition for reconsideration and proposing to revoke a waiver granted under section 211(f) of the Clean Air Act to American Methyl Corporation (American Methyl) [1] for a proprietary fuel known as "Petrocoal." This proposed revocation is based on EPA's analysis of relevant data and information in light of a petition for reconsideration and a supplementary submission by the Motor Vehicle Manufacturers Association of the United States, Inc. (MVMA), as well as comments submitted in response to a solicitation for public comments in the **Federal Register** on May 2, 1983, 48 FR 19779.

Hearing

Any party desiring to present views orally may request a hearing by contacting Richard G. Kozlowski at the address listed below. The deadline for such a request is April 27, 1984. If EPA receives a timely request, EPA will publish in the **Federal Register** a notice of its date and location.

DATE: Comments should be submitted on or before May 29, 1984, or 30 days after the hearing, should one be held.

ADDRESS: Copies of the non-confidential information relative to this waiver application and subsequent submissions are available for inspection in public docket EN–81–8 at the Central Docket Section (LE–131) of EPA, Gallery I—West Tower, 401 M Street, SW., Washington, D.C. 20460, (202) 382–7548, between the hours of 8:00 a.m. and 4:00 p.m. Any comments from interested parties should be addressed to this docket, with a copy forwarded to Richard G. Kozlowski, Director, Field Operations and Support Division (EN–397), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying materials in the docket.

FOR FURTHER INFORMATION CONTACT: James W. Caldwell, Chief, Fuels, Section, Field Operations and Support Division (EN–397), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, (202) 382–2635.

SUPPLEMENTARY INFORMATION:

I. Background

Section 211(f)(1) of the Clean Air Act (Act), 42 U.S.C. 7545(f)(1), states that effective upon March 31, 1977, it shall be unlawful for any manufacturer of any fuel or fuel additive to first introduce in commerce, or to increase the concentration in use of, any fuel or fuel additive for general use in light-duty motor vehicles manufactured after model year 1974 which is not substantially similar to any fuel or fuel additive utilized in the certification of any model year 1975, or subsequent model year, vehicle or engine under section 206 of the Act. Section 211(f)(4) of the Act, 42 U.S.C. 7545(f)(4), provides that the Administrator of EPA, upon application of any manufacturer of any fuel or fuel additive, may waive the prohibitions established under section 211(f)(1), if the Administrator determines that the applicant has established that such fuel or fuel additive or a specified concentration thereof, or the emission products of such fuel or additive or specified concentration thereof, will not cause or contribute to a failure of any emission control device or system (over the use life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the emission standards with respect to which it has been certified pursuant to section 206 of the Act. If the Administrator does not act to grant or deny an application within 180 days of receipt of the application, the waiver authorized by section 211(f)(4) shall be treated as granted.

American Methyl submitted an application for a waiver for a proprietary fuel known as "Petrocoal" on February 20, 1981. A **Federal Register** notice was published April 13, 1981, 46 FR 21695, acknowledging receipt of the application and soliciting comments. With American Methyl's consent, EPA subsequently extended until September 28, 1981 the 180-day review period provided by section 211(f)(4), that would have expired on August 19, 1981. On September 28, 1981, the Administrator granted the waiver, subject to certain conditions. A **Federal Register** notice of this decision was published on October 5, 1981, 46 FR 48975.

On December 4, 1981, MVMA filed with EPA a petition seeking administrative reconsideration of EPA's decision. In general, MVMA's administrative petition argued that: (1) The Petrocoal waiver was not in the public interest, (2) adverse consequences to vehicle manufcturers and individual car owners would result, and (3) the decision was contrary to applicable provisions of the Act.

Also on December 4, 1981, MVMA on behalf of its member companies, and the General Motors Corporation individually, filed timely petitions for review of the waiver grant in the U.S. Court of Appeals for the District of Columbia Circuit. American Methyl joined in the litigation as an intervenor, and over the next several months the parties discussed approaches to narrow or resolve the outstanding issues. Those discussions did not lead to an agreement, and on February 22, 1983, MVMA submitted to EPA supplementary petition for reconsideration, referencing new data on the effects of methanol in gasoline on automotive evaporative emissions. These data were obtained primarily from studies performed for the Department of Energy and the Coordinating Research Council by Systems Control, Inc., and from studies by E.I. duPont, Inc. (DuPont) in connecting with its August 25, 1982 waiver application to EPA concerning a methanol blend. These data were also based on comments submitted by the California Air Resources Board in connection with DuPont's waiver application. On the basis of this evidence, MVMA argued, among other

---

[1] At the time EPA granted the waiver, American Methyl was known as Anafuel Unlimited. For ease of reference, this notice will refer to the company as American Methyl throughout.

things, that evaporative emissions with methanol-gasoline blends are significantly higher than with gasoline, and cannot be controlled by fuel blending, even if volatility is controlled.

In addition, subsequent information indicated that the fuel tested by the applicant and provided by the applicant to the Agency and to General Motors Corporation for testing may not have been the fuel described in the waiver request.

Since the control of evaporative emissions by compliance with American Society for Testing and Materials (ASTM) specifications was a key assumption upon which the waiver was granted, and since the composition of the fuel described or tested is integral to the waiver decision, the new information brought into question the validity of the Agency's waiver grant.

Accordingly, in the **Federal REgister** on May 2, 1983, 48 FR 19789, EPA stated that it was considering administrative action to modify or to revoke the waiver under section 211(f) of the Act, or to control or prohibit the sale of Petrocoal under section 211(c) of the Act. The Agency solicited comments, data, and analyses which relate to the waiver or which could be of help to the Agency in determining whether Petrocoal produces any emission product which either causes or contributes to air pollution which may reasonably be anticipated to endanger the public health or welfare, or which will impair to a significant degree the performance of any emission control device or system which is in general use or which is likely to be in general use in a reasonable time, or which would cause or contribute to the failure of a vehicle to meet applicable emissions standards to which it was certified.

II. New Information

A. Introduction

Since the Petrocoal waiver was granted on September 28, 1981, new information concerning Petrocoal as well as information concerning the relationship between evaporative emissions and fuel volatility has been obtained. Much of this new information has been received in response to EPA's May 2, 1983 request for comments. In response to this notice, EPA received many comments from motor vehicle manufacturers, oil companies, alternative fuel companies, and a prosecuting attorney.

The major source of new data is a test program on vehicles fueled with alcohol blends conducted by Systems Control, Inc. for the Coordinating Research Council (CRC) under contract with the Department of Energy. The study was designed to evaluate, for these fuels, such properties as driveability, fuel economy, and emissions performance. The program was divided into two phases: ethanol and methanol blends. The methanol phase of the program included ten vehicles.

While all the data from the CRC tests have been accumulated, CRC has not published a final report. Accordingly, EPA received many reviews, comments, and analyses concerning these data. Detailed analyses were provided by the MVMA, Energy and Environmental Analysis, Inc., the California Air Resources Board, DuPont, and Atlantic Richfield. The comments mainly discuss emissions properties observed for the various methanol blends compared with the base fuel.

One of the methanol blends, labeled MG–3 by the CRC, consists of 9.2 percent methanol and 3.2 percent butanol. This particular blend most closely resembles the Petrocoal fuel, although it does not contain Petrocoal's proprietary inhibitor. In the original application for a waiver, American Methyl suggested that its inhibitor served two purposes: To "control corrosion" in the fuel system and to "Overcome the usual decrease in fuel efficiency of methanol-petroleum blends." Since the inhibitor apparently does not affect short-term evaporative emissions, either in American Methyl's view or based on EPA's independent judgment, the MG–3 fuel data are pertinent to a review of Petrocoal's properties regarding evaporative emissions. Therefore, these data are appropriate for the purpose of evaluating the central argument concerning the relationship between evaporative emissions and volatility with Petrocoal.

Additionally, Toyota presented new data consisting of emissions tests performed on two Toyota vehicles, a 1982 Cressida and 1983 Corolla. These vehicles were tested on an indolene reference fuel and a test fuel almost equivalent to Petrocoal. This test fuel contained 9 percent methanol and 6 percen tertiary-butyl alcholo in unleaded gas. It was blended to be similar in Reid Vapor Pressure to the indolene reference fuel and to a lesser extent to the other distillation specifications. Toyota also presented results concerning fuel deterioration and driveability using and unleaded fuel alone compared to the same unleaded fuel blended with Petrocoal Basic.

There is also new information concerning the composition of the proprietary inhibitor in Petrocoal. A series of reports and affidavits have been received from American Methyl Corporation and Coal Fuels Corporation. The matter of concern is whether CV–100, a ferrous picrate, is a portion of Petrocoal's proprietary inhibitor. Coal Fuels asserts it must be used in Petrocoal. American Methyl originally argued that CV–100 was a component in Petrocoal, but now assert it is not.

Some new information concerning long-term effects of Petrocoal has also been presented to EPA. Specifically, the California Air Resources Board has commented on its experience with part failures in vehicles fueled with Petrocoal, and Toyota has presented some test results on peroxide formation in vehicles fueled with blends approximating Petrocoal.

B. Evaporative Emissions

Several important comments were received that discuss the effect on evaporative emissions of Petrocoal and fuels similar to it. The discussion that follows reviews the general nature of the data and supporting analyses; and section C, the effect on vehicle emission standards is discussed.

1. Coordinating Research Council Data. CRC's data on methanol blends are particularly important to an examination of effect of Petrocoal on evaporative emissions. This unique importance stems from the close physical control that was exercised over volatility as measured by the Reid Vapor Pressure (RVP) or the Front End of Volatility Index (FEVI) in developing the test and base fuels and the similarity in alcohol composition between certain of the test fuels and Petrocoal. This discussion will therefore review some basic observations regarding the outcomes of the test program. These data are also analyzed in various comments to the docket.

The test fuels and base fuel for this test program are described in Table 1. The test fuels of primary interest to this discussion are MG–1, MG–3, and MG–5, each a blend of methanol and butanol similar to Petrocoal, with MG–3 most like Petrocoal. A review of all three fuels is of interest for what it may reveal of trends and relationships. Both RVP and FEVI are controlled to a narrower range than is common for such studies and a range entirely within typical ASTM Summer specifications. Moreover, the base fuel has the highest RVP of all of the fuels and is exceeded in FEVI by only one of the fuels examined here—MG–5.

The vehicles used in the test program are identified in Table 2. Five of them are closed loop California cars designed to meet a two-gram evaporative

standard, and five are open loop Federal cars designed to meet a six-gram evaporative standard.[3] All are 1980 model year vehicles. Emission levels of the six-gram vehicles may reflect some anticipation of the 1981 Federal shift to a two-gram standard.

The changes in evaporative hydrocarbon emissions with each of the three test fuels relative to the higher RVP base fuel are shown separately in Table 3 for two-gram and six-gram vehicles. When all ten cars are combined, the increases in evaporative emissions for MG–1, MG–3, an MG–5 are, respectively, 47%, 95%, and 146%. Removal of vehicles #3 and #12, vehicles with the sharpest pattern of response to the test fuels, reduces these increases to 35%, 56%, and 94%—still very substantial effects, considering the already largely controlled volatility.

Since MG–3 most closely resembles the fuel tested in the original Petrocoal evaluation (except for the presence in Petrocoal of the proprietary inhibitor, which does not appear to affect evaporative emissions), the data from tests made with this fuel were subjected to the statistical tests usually used by the Agency to evaluate fuel waiver applications.[3] In light of its low volatility, both in absolute terms and relative to the base fuel, MG–3's failure of all three of these tests for evaporative emissions is considered to be very significant.

The paired difference test places a confidence interval about the mean of the vehicle-by-vehicle differences between base and test fuels. The 90% interval for MG–3 was from 1.16 grams to 4.37 grams. The entire interval was above zero, evidence that an increase occurred which was outside of the normal realm to chance variations. MG–3 also failed the sign test, which looks at the preponderance of increases over decreases. This test is particularly useful here in that it gives no special weight to extreme values. The test result was such, with all vehicles showing increases, that there is 99% confidence that an increase actually occurs. The final test, the deteriorated emissions test, evaluates the significance of these increases by adding the difference attributable to the test fuel on a vehicle-by-vehicle basis to the 50,000-mile deteriorated certification level for each vehicle. The result is compared to applicable standards. This evaluation demonstrates that four of these vehicles, all two-gram cars, exceed the evaporative emission standard when fueled with MG–3. For a sample of ten, any single failure of this test is sufficient to support the conclusion that the fuel causes vehicles to exceed emission standards. Test parameters are set so that there is at least a 90% chance that the fuel will fail the test if 25% or more of the vehicles in the sample fleet fail when using it. Statistical details of this test are developed more fully in the Administrator's decision on Methyl Tertiary Butyl Ether cited above.

To summarize, the Agency's analysis of these data on fuels very similar to Petrocoal seems to demonstrate a failure to meet evaporative hydrocarbon standards using Petrocoal. Control of volatility to ASTM specifications appears to exert insufficient control to assure that use of Petrocoal will not cause or contribute to excessive evaporative emissions.

2. ARCO Petroleum Products Company.

Comments to this docket by ARCO consist, in the main, of a statistical reanalysis of the data from nine different studies that included evaporative emissions measurements. The studies tested a variety of fuels, including gasohol, methanol blends, and methanol-butanol blends as compared with pure hydrocarbon fuels. The primary focus of the effort is on demonstrating the existence of a statistical correlation between fuel volatility (as measured by the Front End Volatility Index (FEVI)[4]) and evaporative emissions as measured in the SHED [5] test. The correlation is shown to exist in all nine of the studies.

A correlation such as that mentioned above can exist and be quite strong without precluding the parallel finding that certain fuel compositions yield higher evaporative emissions than others at controlled volatility. The generally wide volatility range of the studies considered and the tendency of the base or reference fuels to be relatively low in that range also contribute to a situation where the demonstrated existence of a positive correlation between evaporative emissions and FEVI tells little about the complete statistical model that predicts evaporative emissions. Alone among the nine studies, the CRC study of methanol blends provides physical control over volatility and permits direct comparison of evaporative emissions between Petrocoal-like blends and base fuels. Where that comparison is made by ARCO, the base fuel test results fall entirely below a regression line constructed using methanol fuels to relate evaporative emissions to FEVI (see Figure 9–6, Docket Entry III–D–2). In the absence of some other causal influence than FEVI, the base fuel tests should be distributed more or less evenly above and below the regression line. This distributional anomaly is doubly significant in light of the base fuel's position in the middle of the FEVI range for this study.

In addition to the correlation analysis mentioned above, ARCO made an attempt to determine, where possible, whether base fuels and test fuels differ significantly with respect to the slope of the regression equations relating FEVI and evaporative emissions. That no significant differences were found is not remarkable, given the paucity of data where such comparisons could be made.

ARCO has demonstrated the existence of a positive correlation between FEVI and evaporative emissions where a wide range of volatilities and fuel compositions are involved. The existence of this general relationship is not at issue. The question, rather, is whether controlling the FEVI of high concentration methanol blends to ASTM specifications will adequately control evaporative emissions to within the standard. The question more specifically is whether so controlling the FEVI of Petrocoal blends will control evaporative emissions within standards. The ARCO analysis fails to demonstrate this.

3. E. I. DuPont de Nemours & Company

DuPont's submission undertakes essentially the same demonstration as that made by ARCO—to show that the correlation known to exist with hydrocarbon fuels between volatility and evaporative emissions is also present where alcohol-gasoline blends are involved. DuPont analyzed data from three studies, including the CRC study discussed above. The analysis demonstrates, as expected, the existence of the correlation of evaporative emissions and FEVI. In the plots provided by DuPont, the hydrocarbon fuels have a tendency to have evaporative emissions which are lower than those predicted by the regression line relating emissions and volatility—an indication that a more complex causal process may be involved than the simple bivariate relationship between evaporative emissions and FEVI.

---

[3] The evaporative emission standard for 1981 and later model year cars is two grams per test measured on the full SHED (Sealed Housing for Evaporative Determination) test. Prior to that, the standard was six grams per test. See 40 CFR 86.0818(b)(1)(i).

[3] See, for example, Application for Methyl Tertiary Butyl Ether—Decision of the Administrator, 44 FR 12242 (March 6, 1979).

[4] Defined as the Reid Vapor Pressure of the fuel plus .13 times the percentage evaporated at 158°F.

[5] Sealed Housing for Evaporative Determinations.

DuPont carried this analysis a step further than other commenters by assessing the adequacy of various volatility measures through the use of multiple regression procedures. This effort resulted in development of a new measure of volatility which correlates more closely with evaporative emissions than either FEVI or RVP, the more commonly used measures.

DuPont's analysis, though laudable for its progress toward a better measure of volatility, still does not demonstrate the equivalence of evaporative emissions from hydrocarbon fuels with those from alcohol fuels even when DuPont's new measure of volatility is controlled. The simple demonstration of a statistical correlation between evaporative emissions and volatility fails to explain away the strong relationship between evaporative emissions and the presence or absence of the high methanol concentrations typical of Petrocoal, even with volatility controlled.

4. Energy and Environmental Analysis

Writing on behalf of Coal Fuels and American Methyl under separate covers, Energy and Environmental Analysis Inc. (EEA) reviewed the engineering aspects of the CRC test program on methanol blends and also performed a statistical analysis of the data.

EEA raised several technical concerns with respect to the CRC test program. EEA contends that certain non-standard equipment installed in the vehicles' fuel systems (primarily the fluidyne fuel flow transducers for Department of Energy (DOE) fuel economy measurements) resulted in fuel leakage and increased evaporative emissions. It is true that CRC encountered some leakage problems. However, the vehicles were checked thoroughly after testing for leaks and when leaks were encountered, the data were not used.

EEA also contends that because the test fuels did not contain corrosion inhibitors, there was a greater possibility of fuel leakage. For the short duration of the test program, the presence or lack of corrosion inhibitors should not have any significant effect. Also, as previously mentioned, the vehicles were monitored very carefully for leakage after each test, and only where no leakage occurred were the data used. EPA therefore concludes that the occurrence of leakage or potential leakage does not compromise the validity of the CRC data for evaluating evaporative emissions effects of the tested fuels.

EEA's statistical analysis of the CRC data is somewhat more sophisticated than the approach used by other commenters and was designed to permit types of conclusions not possible with a simple bivariate correlation analysis. In essence, the analysis used multiple regression with dummy variables for individual vehicles and for the presence of alcohol in fuels. This approach would appear to permit the examination of the effects on evaporative emissions of any single variable in the equation with the effects of other variables held constant. Of particular interest here, of course, is the ability of the technique to adjust evaporative results for test fuels to the levels that could be expected if the fuels had been blended to the same volatility (measured by FEVI) as that of the based fuel. The analyst would thus statistically remove the effects of differing volatilities in the test program and determine the effects on evaporative emissions of the presence or absence of methanol.

While in most respects this is a rigorous way to approach these data and the substantive concerns in question, there are some problems with application of the statistical method used. The use of a single dummy variable to represent all alcohol fuels simultaneously, regardless of the amount of alcohol, prevents an assessment of the impact of individual test fuels on evaporative emissions, and calls into question the usefulness of the significance test for this variable. It should also be noted that statistical control of volatility is not entirely necessary in this study due to the tight experimental controls that in fact were exercised over this variable, and the fact that the base fuel was near the middle of the FEVI range.

These qualifications aside, this analysis does permit certain important conclusions. First, the relationship between measures of volatility and evaportive emissions (discussed above in connection with the ARCO and DuPont analyses) is here again established in an analysis employing statistical controls over other variables. Second, this analysis quantifies the effect of methanol blends on evaporative emissions in a situation where volatility is controlled, both relative to the base fuel and relative to ASTM specifications.

The emission increase over base fuel levels is established separately for two-gram and six-gram vehicles and averages together the effects of all of the test fuels in the program (including MG–2 and MG–4 in which methanol was used without a cosolvent). For the closed loop two-gram cars, there was a 56% increase of 1.56 grams over base fuel emissions; for the open loop six-gram cars, the increase was 1.35 grams—a 43% increase. The method also permits determination of the amount by which FEVI would have to be lowered for the test fuels to achieve the same evaporative level as was obtained with the base fuel—a rather substantial 3.8 FEVI points for the two-gram cars and 3.2 points for the six-gram cars. It is important to note that despite the reduced variance of the predictor dummy variable, this effect of methanol blends in producing an evaporative increase at controlled FEVI was statistically significant at the .01 level (99% confidence) or better. While it may be possible to eliminate the increase by reducing FEVI below the level for the base fuel (and hence reducing RVP below the ASTM specification), the necessary compensatory adjustment estimated by EEA's analysis is a drastic one. Therefore, the EEA analysis, while again affirming the relationship between volatility and emissions, additionally demonstrates the upward pressure on evaporative emissions exerted by methanol blends even when RVP or FEVI is controlled.

5. Toyota. Toyota's test program was small, but sharply focused on the issues in the request for comments, and thus, is of considerable interest. The data for the emissions tests were developed using a test fuel comprising 9% methanol and 6% butanol whose distillation properties (particularly RVP) were deliberately matched to Indolene, the certification reference fuel. The two vehicles in the program experienced 32% and 105% increases in evaporative emissions over the reference fuel. The larger of the two increases occurred with a carburetor-equipped vehicle, a 1983 Corolla, while the smaller increase occurred with a fuel-injected 1982 Cressida. Toyota notes that the Corolla was induced by the test fuel to fail its two-gram standard.

The test fuel for this program was different from Petrocoal only in the absence of the proprietary inhibitor. It was matched in RVP, and to a lesser extent in other distillation characteristics with the reference fuel and controlled to an RVP level within ASTM summer specifications. Despite these controlled conditions, there was an increase for the carburetor-equipped vehicle very similar in magnitude to those seen with MG–3 and MG–5 in the CRC program. This evidence seems damaging to the proposition that controlling Petrocoal's RVP to ASTM specifications will hold evaportive emissions to the levels obtained with conventional gasolines.

C. Effect of Petrocoal on Adherence to Standards

Since the effect of a proposed fuel or fuel additive on vehicles' abilities to adhere to applicable vehicle emission standards is the crucial issue under section 211(f), the data and comments that bear upon this question with Petrocoal are examined here.

1. Energy and Environmental Analysis. EEA's analysis of the CRC data undertakes a direct examination of the standards question for evaporative emissions by computing vehicle-by-vehicle failure probabilities for the base and for all test fuels aggregated. EEA provided little information on the method use in this analysis, and Agency statisticians were unable to determine how the calculations were made. EEA argues that the failure probabilities for vehicles certified to the six-gram standard are low on both base and test fuels and that the high probabilities for "two-gram" vehicles are not meaningful, since they all failed on the base fuel.

The low failure probabilities asserted for six-gram cars are clearly a function of the large difference between the base fuel evaportive emission certification levels for these vehicles and the standard. The two-gram vehicles' performace on these tests cannot be simply ignored because the specific cars initially failed. Rather, the effect of the high increase in evaporative emissions must be considered.

While the failure probability discussion is not ultimately productive, EEA's larger analysis of the CRC data does provide certain insights relating to this question. The 1.56 gram and 1.32 gram increases computed for two-gram cars, respectively, at controlled FEVI, are quite large relative to the two-gram standard that applies to 1981 and later Federal vehicles. The likelihood that there will be sufficient headroom to cover increases even approaching this magnitude for most of the vehicle fleet slight.[6]

2. California Air Resources Board (CARB). CARB uses data form its in-use surveillance testing program to look at the likelihood that Petrocoal induces vehicles to exceed standards. The analysis looks at both evaporative hydrocarbon (HC) emissions and oxides of nitrogen (NO_x) exhaust emissions. The approach is to apply the percentage increases for the CRC data to the in-use test results from properly maintained cars and then to compare the resulting failure rates to those obtained in the original tests.

For evaporative emissions, CARB treated hot soak and diurnal measurements separately, later combining them for overall pass/fail determinations. They used an average of the MG–3 and MG–5 results from the CRC data to obtain the increases. The failure rate for the twenty two-gram cars with evaporative measurements went from an initial 20% to 80% when the increases were applied. The Agency repeated the procedure with just the increase attributable to MG–3, which falls entirely within the Petrocoal alcohol composition definition. This effort has the same result—the failure rate still changed from 20% to 80% when the test fuel effect was applied.

NO_x effects were similarly evaluated, but on larger in-use vehicle samples of 63 and 90 vehicles each. The failure rate for the 1979 vehicles on a 1.5 gram per mile (gpm) California standard went from 21% to 52% when the increase from the two test fuels was added. The 1980 1.0 gpm vehicles' failure rate increased to 72% from 26%.

3. Toyota. Since the Toyota test program used a fuel judged identical to Petrocoal in its instantaneous emission effects, and since the CARB analysis renewed Agency concerns about NO_x emissions, the two Toyota test vehicles' results were appended to those from the earlier tests of Petrocoal by American Methyl, GM, and the Agency on which the original waiver was based. Then, the deteriorated emissions test was performed again. One of the two Toyotas, the carburetor-equipped Corolla, failed this test, bringing the overall rate to 3 out of 18, a more serious failure than the 2 of 16 observed during the original consideration of the Petrocoal waiver. The 73% increase on the Corolla is large enough to cause concern when vehicles are meeting a 1.0 gpm NO_x standard.

D. Long-Term Effects

A review of the comments on specific long-term effects of Petrocoal finds two results specific to Petrocoal. The California Air Resources Board (CARB) reports that customer experience now exists documenting long-term deleterious effects of Petrocoal. CARB reports that Newhall, a Petrocoal marketer in California, found numerous complaints about driveability problems when Petrocoal at 12 percent total alcohol was marketed. Further, Newhall reported accelerator pump failures associated with the fuel. Some of the accelerator pumps on the vehicles of Newhall's own employees had to be replaced. Since such failure of accelerator pumps can cause failure of emission standards, it gives EPA cause for concern regarding the long-term ability of vehicles fueled with Petrocoal to meet applicable emissions standards.[7]

Toyota presents data on laboratory tests of Petrocoal Basic vs. a hydrocarbon fuel, both blended to similar distillation characteristics. It finds the Petrocoal oxidation stability to be almost 50 percent lower than the base gasoline, and the peroxide formation seven times larger with Petrocoal than with the base hydrocarbon fuel. Toyota cites this increased peroxide formation as likely to significantly increase gum generation, which is the cause of rapid deterioration of rubber and metal parts. Further, it may directly cause corrosion of fuel system materials leading to the deterioration of emission control devices and, hence, to increased emissions. Once again, these tests lead EPA to question the ability of vehicles to comply with applicable emissions standards using Petrocoal.

E. Other Comments to the Docket

The major comments concerning evaporative emissions and emissions durability have been discussed above. Some additional comments which were also presented are discussed here.

Sun Oil, Union Carbide, and American Methyl Corp. presented information or suggested modifications concerning lower levels of alcohol than the 15 percent maximum currently permitted in Petrocoal. Sun Oil, in requesting a rescission of the waiver, presented two technical papers discussing, among other things, materials compatibility. It concludes that data exist to support acceptance of a 3.5 weight percent oxygen limit on alcohol blends for satisfactory driveability. Further, Sun Oil presents its research findings that up to five percent concentrations of methanol are compatible with fuel system parts. Yet, it notes insufficient data have been developed at higher concentrations of methanol, with the literature indicating that such higher percentages could significantly change the properties of elastomers.

Union Carbide, while supportive of Petrocoal, suggested that the volatility of Petrocoal might be too high. It performed a mathematical regression to arrive at a

[6] For example, the average certification level for 49-state 1981–1984 model year GM light-duty vehicles is 1.3 grams. This leaves substantially less headroom than the Petrocoal effects indicated by this EEA analysis would consume.

[7] It should be noted that the information before the Agency at the time of the grant of the waiver included a vehicle fueled with Petrocoal that experienced an accelerator pump failure. EPA discounted the information at the time, because it was a single incident. In light of CARB's comments, the pump failure is more significant.

more optimal set of parameters. It suggested that Petrocoal should be restricted such that total alcohols do not exceed 12.5 percent by volume, methanol content does not exceed 10.9 percent and C–4 content is at least 1.5 percent.

American Methyl, while obviously supporting its own product, did note that it would accept a modification to restrict the maximum allowable alcohol content to 12½ percent.

Some further information came from the Prosecuting Attorney of Genessee County, Michigan. He cited managers of vehicle repair facilities who are seeing damage to fuel systems with the use of methanol fuels. He said they noted deterioration of rubber sealants and suggested that a maximum allowable limit of 5 percent methanol would be appropriate.

III. Proper Ingredients

A portion of the May 2, 1983 notice requested comments concerning the ingredients that were proper for use in Petrocoal. This request stemmed from the controversy concerning the use of CV–100, an additive containing ferrous picrate. While the ingredients of Petrocoal are proprietary, EPA has been given written permission by American Methyl, the firm which requested the confidential treatment of Petrocoal, to publicly discuss the CV–100 issue.

Affidavits have been presented by both American Methyl and Coal Fuels Corp. discussing the use of this compound. Also, Carvern Petrochemical Co., Ltd. has commented that CV–100, a product it manufactures, is a "very necessary ingredient."

The confidential information submitted by American Methyl with its waiver application disclosing the contents of Petrocoal did not mention mention CV–100. The fuel registration required by section 211(b) of the Act which was filed with the EPA office at Research Triangle Park, NC, also does not include CV–100, either by its name or chemical identity. American Methyl did at one time want to use CV–100 for blends of gasoline with high volumes of methanol, and argued that ferrous picrate was implicitly covered by the registration and waiver application. It now claims that it does not use the substance.

In the course of vehicle testing required for the waiver application, American Methyl performed tests at Systems Control, Inc., in California. It is generally agreed that the Petrocoal fuel in those tests did not include CV–100. However, it appears that CV–100 may well have been used in Petrocoal samples supplied by American Methyl and used by EPA in Ann Arbor and General Motors in Warren. American Methyl has stated its belief that CV–100 was not used in these samples, although it has originally intended that it would be added to the fuel sent to General Motors. A Coal Fuels Corporation official, formerly with American Methyl, asserts that CV–100 definitely was used by EPA and General Motors.

Since CV–100 has a metallic ingredient, a chemical test for the ferrous component would still be possible two years later. The Agency has investigated and learned, however, that neither GM, EPA, nor American Methyl still has any of the Petrocoal fuel that was sent either to EPA or General Motors.

Further, the long-term durability information on Petrocoal presented by American Methyl was developed by Dr. Geoff Germane using a fuel that did not contain CV–100. He tested for long-term compatibility of Petrocoal with the metals and polymers in vehicles. His basic conclusion in his April 1, 1981 report was the Petrocoal caused less corrosion than unleaded gasoline on metals, and that Petrocoal and unleaded gasoline has similar effects on fuel system polymers. However, this report clearly did not consider CV–100.

An applicant for a fuel or fuel additive waiver must present emissions test results based on the same fuel as that for which the waiver is sought. In the Petrocoal case, it appears that a different fuel was used for at least some testing. Specifically, a fuel containing CV–100 may well have been used for the GM and EPA tests. The applicant at the time considered CV–100 to be an ingredient in the fuel.

The fact that the GM and EPA emissions tests results with CV–100 did not differ appreciably from those of Petrocoal without the CV–100 is not surprising. CV–100 includes an iron compound, mixed in very small quantities in the finished gasoline. The emission effects would show up after many miles of driving, usually in the form of detrimental catalyst coating and/or engine deposits. For this reason, EPA has required long-term durability tests for metallic additives.

EPA was not aware of the presence of CV–100 in any of the Petrocoal samples Had EPA known that this metallic compound was present in the samples used in the long-term compatibility tests, it would have required substantiation that Petrocoal with CV–100 would not contribute to a vehicle's failure to meet applicable emissions standards over the 50,000-mile lifetime of vehicles.

MVMA further commented that the parameters used by EPA to describe Petrocoal were faulty. Specifically, MVMA claimed that the total alcohol allowed (15%) and the maximum ratio of methanol to C–4 alcohols (6.5 to 1) were not based on any fuel actually sampled. The sample of Petrocoal used by EPA's Ann Arbor laboratory was tested by the Department of Energy.[8] They reported a volumetric content that was less than 100% as follows: 9.9% methanol, 2.2% butanol, and 82.8% hydrocarbons. They note that "it is not uncommon, however, that the sum of three independent analyses of a complex mixture such as this vary from 100 percent by a few points." The ratio of methanol to butanol was 4.5 to 1. General Motors[9] reported a total of 10% alcohol with a methanol/butanol ratio of 2. General Motors noted that the 15% Petrocoal fuel they were sent contained only about 10% total alcohol.

As to the fuel tested by American Methyl, EPA has some reason to think that sample might have contained 11.2% methanol, 3.6% C–4 alcohol, with a ratio of 3.2 to 1.[10] However, GM, upon contact with American Methyl, claimed that it learned that the 15% proprietary additive in Petrocoal contained hydrocarbons in addition to the alcohols and inhibitor. While this would appear to contradict the use of 15% alcohol as claimed by American Methyl, there is no record that American Methyl has attempted to refute GM's assertion. Thus, the total alcohol, in one case, might have reached 15%, but some ambiguity still remains. It appears clear, however, that the highest ratio of methanol to butanol tested was 4.5 to 1, not 6.5 to 1.

IV. Today's Actions

After reviewing the public comments and other information obtained since the grant of the Petrocoal Waiver, the Agency is granting MVMA's administrative petition for reconsideration of the waiver. New information submitted by MVMA and others seems to disprove the validity of key conclusions on which the waiver was based. Most importantly, the waiver's requirement of adherence to ASTM volatility standards (predominantly RVP) appears to be inadequate to control evaporative emissions of Petrocoal. As a result, EPA can no longer conclude that vehicles

---

[8] Letter from Frank W. Cox, Research Chemist, U.S. Dept. of Energy, to Richard Lawrence (EPA), August, 4, 1981.

[10] See note of telephone conservation between Byron Nagata (Anafuel Unlimited) and Barry Nussbaum (EPA), May 4, 1981.

using Petrocoal will meet Clean Air Act emission standards. In addition, there is some evidence that some of the fuel tested at the time of the waiver application was not the same as the fuel described in the waiver. If true, it also calls into question whether the applicant met its burden to demonstrate that its fuel will not result in noncompliance with emission standards. This is in part because, had EPA known that Petrocoal contained the metallic additive CV–100, it would have required the applicant to perform long-term durability tests to assure that emission standards are met over the full useful life of motor vehicles under the Clean Air Act.

American Methyl raised an objection to reconsideration of the Petrocoal waiver in a letter to then-acting Administrator Verstandig, dated April 21, 1983.[11] Although American Methyl did not present the same objection in its response to EPA's requests for comments, it is relevant to address that objection at this time. Specifically, American Methyl argued that the information presented for reconsideration "may not validly be the basis for administrative reconsideration" under section 307(d)(7)(B) of the Act, since the information was presented after the expiration of the 60-day period for seeking judicial review.

The argument is flawed for two reasons. First, section 307(d)(7)(B) does not apply to this reconsideration. Proceedings to waive the prohibitions in section 211(f) of the Act are not among the actions enumerated in section 307(d)(1), which provides an exclusive list of actions that are subject to the requirements of section 307(d). The only such action under section 211 is "the promulgation or revision of any regulation pertaining to any fuel or fuel additive under section 211." Section 307(d)(1)(D). A section 211(f) wavier is not a regulation, however.

Secondly, even if section 307(d)(7)(B) applied to this reconsideration, it would not bar these proceedings. That provision only defines the instances in which EPA is compelled to convene a proceeding for reconsideration; it does not prohibit EPA from reconsidering any action based on new information arising after expiration of the period for judicial review.[12]

In reconsidering the Petrocoal waiver, the standard for review of the newly submitted and developed information is that prescribed in section 211(f)(4) of the Act: will the fuel or fuel additive, or its emission products cause or contribute to a failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance with the emission standards under which the device or system was certified pursuant to section 206 of the Act? If the information available to the Agency indicates that such compliance will be achieved, the waiver will continue in effect. If, however, this information indicates that such compliance will not be achieved, the waiver will be revoked by the Agency.

Based on information submitted in response to the May 2, 1983 **Federal Register** notice, and other information provided to the Agency since the grant of the Petrocoal waiver, the Agency is today proposing to revoke that waiver. Although evidence continues to demonstrate a correlation between evaporative emissions and volatility in general, serious doubts have been raised as to whether at a given RVP or FEVI a methanol blend fuel will behave similarly to a hydrocarbon blend fuel with regard to evaporative emissions. Therefore, the ability of ASTM controls on volatility such as those in the Petrocoal waiver to effectively limit evaporative emissions is questionable. Since the available test data show large increases in evaporative emissions with use of fuels similar to Petrocoal, the Agency has concluded that the use of Petrocoal will likely cause vehicles to exceed applicable Clean Air Act emission standards. In addition, new information raises questions concerning Petrocoal's compatibility with certain automotive materials. Finally, as noted, above, conflicting information concerning the content of Petrocoal calls into question whether the manufacturer met its burden of demonstrating compliance with applicable emission standards during the initial waiver process.

EPA's conclusions concerning the relationship of volatility and evaporative emissions are based on the submittals discussed in Part II–B of this notice, above. In general, these analyses firmly establish a correlation between fuel volatility as measured by both RVP and the Front End Volatility Index and evaporative emissions. However, when volatility is controlled (either statistically or experimentally) to a comparable level found in reference fuels (which are below ASTM specifications), there is substantial evidence that use of methanol blends at levels similar to Petrocoal leads to evaporative emission levels higher than those of otherwise comparable hydrocarbon fuels. Such higher levels were found in the tests conducted for the Coordinating Research Council and those conducted by Toyota on fuels very similar to Petrocoal. The increases in emission levels found in these testing programs are large enough to statistically significant even with a relatively small sample. Therefore, control of volatility to ASTM specifications does not appear to be sufficient to assure that the use of Petrocoal will not result in excessive evaporative HC emissions, as was assumed by the Agency in its grant of the Petrocoal waiver.

In regard specifically to the ability of vehicles using Petrocoal to meet applicable emission standards, the information discussed above in Part II–C of this notice indicates that even relatively small emission increases may have a substantial effect on failure rates of vehicles subject to a two-gram HC evaporative emission standard. The CRC data (as analyzed by the Agency, EEA, and others) and the Toyota tests evince a relatively large impact of Petrocoal on such emissions compared to the standard. Even assuming a low level of base in-use emissions, these data indicate that use of Petrocoal is likely to cause or contribute to vehicle failures to meet HC evaporative emission standards.

In addition, information submitted to the docket causes the Agency to believe that vehicles using Petrocoal will not be able to meet the NO_x exhaust emission standard. Although the testing which preceded the grant of the Petrocoal waiver indicated that this fuel was likely to cause failure of that standard, the statistical result with the data then available was marginal. However, the magnitude of increases in NO_x emission shown in the new CRC and Toyota data provides an additional basis for EPA's belief regarding Petrocoal's effect on conformity to the NO_x.

---

[11] "Opposition to Request by Motor Vehicle Manufacturers Association for Reconsideration of Grant of Fuel Waiver for Petrocoal Fuel," from Scott N. Stone, attorney for American Methyl Corporation, to Lee Verstandig, Acting Administrator, EPA, April 21, 1983.

[12] American Methyl also argued that MVMA's original petition for reconsideration presented "no legally valid ground for administrative reconsideration under the Clean Air Act," since MVMA's original petition (before it was supplemented) purportedly contained no new information which could not have ben presented to EPA during the comment period. This argument, also based on sectgion 307(d)(7)(B), is also incorrect for the two reasons discussed immediately above. Moreover, regardless of the merits of American Methyl's argument with respect to MVMA's original petition for reconsideration, the petition as supplemented and the comments in response to the May 2, 1983 **Federal Register** notice clearly present new information not available to the Agency during the comment period, as discussed elsewhere in this notice.

Finally, the application by CARB of experimental emission increases to in-use test data provides direct insight into the likely impact of Petrocoal on fleet attainment of both HC evaporative emissions and NO_x exhaust emission standards. For HC evaporative emissions, in particular, these results point to a substantial incidence of Petrocoal-induced failures.

The Agency is further concerned about the CV–100 question. A waiver applicant must take precautions to assure that representative samples are available to all parties wishing to test the additive in order to respond to the request for public comments. This is especially true when the applicant for a waiver requests confidential treatment of the contents of his product. In this case, some confusion still exists as to the content of Petrocoal, as evidenced by affidavits containing contradictory statements submitted by two different companies. There is a strong possibility that CV–100 was used in some of the tests during the initial waiver process, but not in others. The waiver applicant should have exercised more caution to assure that all parties tested the same material. Lacking such caution, there are serious doubts about the reliability of information submitted to the Administrator during the initial waiver process. As noted above, this discrepancy also calls into question whether the applicant met its statutory burden of demonstration, in light of the fact that additional long-term durability testing would have been required had the Agency known the Petrocoal contained CV–100. Information submitted by Toyota concerning the long-term effectsof Petrocoal raises further doubts about the ability of vehicles using Petrocoal to meet applicable emission standards throughout their useful life. This matter is an additional basis for EPA's proposed revocation of the Petrocoal waiver.

Moreover, a review of the data indicates that none of the original samples tested contained the ratio of methanol to cosolvent covered by the waiver request, and at most, only one of the samples contained the percentage of total alcohol covered. This also leads the Agency to believe the requisite burden had not, in fact, been met by American Methyl.

American Methyl has raised two additional issues concerning further action by the Agency on the Petrocoal waiver. First, it has indicated its willingness to agree to a modification of the Petrocoal waiver so as to reduce the allowable alcohol content of Petrocoal from 15% to 12½%. Second, it has argued that a reconsideration of the Petrocoal waiver based on MVMA's petition would require reconsideration of all section 211(f) waivers granted in the past for similar alcohol-based fuels.

In regard to the proposed modification of the Petrocoal waiver, the Agency does not believe that such an action would be appropriate based on this record. American Methyl has submitted no evidence to indicate that a 12½% alcohol content limitation would eliminate the problems described above concerning the ability of Petrocoal-fueled vehicles to meet applicable emission standards, particularly the HC evaporative emission and NO_x exhaust emission standards. Absent such evidence, the Agency would have no basis under section 211(f) to approve such a modified Petrocoal waiver.[13]

In regard to American Methyl's second issue, the Agency notes that the company has filed a petition for reconsideration and revocation of a waiver granted to ARCO for a blend of methanol and tertiary butyl alcohol (46 FR 56361, November 16, 1981). Issues raised by that petition will be addressed separately in EPA's response to it. In general, however, the Agency does not believe that a revocation of the Petrocoal waiver either requires or precludes Agency action to regulate fuel content under the general rulemaking authority of section 211(c) or to reconsider other waivers issued under section 211(f). The information currently available to the Agency demonstrates only that methanol blends at the level allowed by the Petrocoal waiver are likely to cause emission problems. Petrocoal contains methanol at considerably higher levels than allowed by any other waiver granted by EPA. Further examination will be required before EPA can decide whether action to control fuels containing lower levels of methanol is appropriate. Thus, the Agency is not proposing any action other than revocation of the Petrocoal waiver at this time.

(Sec. 211 of the Clean Air Act, 42 U.S. 7545)

Dated: March 16, 1984.

William D. Ruckelshaus,

Administrator.

Correction

In FR Doc. 84-3384 appearing on page 4840 in the issue of Wednesday, Feburary 8, 1984, make the following correction: In column two, "**SUMMARY,**" line four, "(± +)" should read "(±)".

BILLING CODE 1505-01-M

FEDERAL RESERVE SYSTEM

Agency Forms Under Review

March 23, 1984.

Background

When executive departments and independent agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Paperwork Reduction Act [44 U.S.C. Chapter 35]. Departments and agencies use a number of techniques to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out its responsibilities under the act also considers comments on the forms and recordkeeping requirements that will affect the public. Reporting or recordkeeping requirements that appear to raise no significant issues are approved promptly. OMB's usual practice is not to take any action on proposed reporting requirements until at least ten working days after notice in the **Federal Register**, but occasionally the public interest requires more rapid action.

List of Forms Under Review

Immediately following the submission of a request by the Federal Reserve for OMB approval of a reporting or recordkeeping requirement, a description of the report is published in the **Federal Register**. This information contains the name and telephone number of the Federal Reserve Board clearance officer (from whom a copy of the form and supporting documents is available). The entries are grouped by type of submission—i.e., new forms, revisions, extensions (burden change), extensions (no change), and reinstatements.

Copies of the proposed forms and supporting documents may be obtained from the Federal Reserve Board clearance officer whose name, address, and telephone number appear below. The agency clearance officer will send you a copy of the proposed form, the request for clearance (SF 83), supporting statement, instructions, transmittal letters, and other documents that are submitted to OMB for review.

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer—Cynthia Glassman—Division of Research and Statistics, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202-452-3829)

OMB Reviewer—Judy McIntosh—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, Washington, D.C. 20503 (202-395-6880)

Request for Approval To Implement a One-Time Survey

1. Report title: One-time Household Survey of Currency and Transactions Account Usage

Agency form number: FR 3030

Frequency: One-time

Reporters: Individuals and households

Small businesses are not affected.

General description of report: Respondent's obligation to reply is voluntary; a pledge of confidentiality on an individual basis is promised.

This survey of households usage of currency and transaction accounts will provide valuble information for monetary policy, research, and operations. The information will be used in analyses developments by the Federal Reserve System and in responses to inquiries from Congress, the U.S. Treasury and the public.

Board of Governors of the Federal Reserve System, March 23, 1984.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 84-8326 Filed 3-27-84; 8:45 am]

BILLING CODE 6210-01-M

Marshall & Ilsley Corp., et al; Formations, Acquisitions, and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (49 FR 794) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than April 19, 1984.

A. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Marshall & Ilsley Corporation*, Milwaukee, Wisconsin; to acquire 100 percent of the voting shares of Wauwatosa State Bank, Wauwatosa, Wisconsin.

B. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Minnesota Assets Management Corporation*, St. Louis Park, Minnesota; to acquire 94.1 percent of the voting shares of Summit State Bank of Richfield, Inc., Richfield, Minnesota. Comments on this application must be received not later than April 20, 1984.

Board of Governors of the Federal Reserve System, March 22, 1984.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Citicorp, et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (49 FR 794) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (49 FR 794) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 17, 1984.

A. Federal Reserve Bank of New York (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Citicorp*, New York, New York; to engage *de novo* through an unnamed future subsidiary in credit card activities, including the issuance of credit cards to customers; the servicing of credit card accounts receivable; the soliciting of merchants to participate in credit card programs so that merchants will accept the credit cards from customers.

B. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *BankAmerica Corporation*, San Francisco, California; to engage *de novo* through its subsidiary, BA Futures, Incorporated, San Francisco, California, in futures commission merchant activities in the execution and clearance of futures contracts and options on futures contracts for unaffiliated persons.

Board of Governors of the Federal Reserve System, March 22, 1984.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 84-8256 Filed 3-27-84; 8:45 am]

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 80N-0012; DESI 9049]

Certain Dermatologic/Anti-Infective Drug Products; Drugs for Human Use; Drug Efficacy Study Implementation; Reevaluation

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA): (1) Rescinds a notice of opportunity for a hearing as it pertains to certain combination drug products containing neomycin and a corticosteroid, (2) classifies the drug products as effective for the indication stated below, and (3) announces the conditions for their approval and marketing.

DATE: Supplements due on or before May 29, 1984.

ADDRESSES: Communications in response to this notice should be identified with reference number DESI 9049, directed to the attention of the appropriate office named below, and addressed to the Food and Drug Administration 5600 Fishers Lane, Rockville, MD 20857.

Supplements to full new drug applications (identify with NDA number): Division of Anti-Infective Drug Products (HFN-140), Center for Drugs and Biologics.

Original abbreviated new drug applications and supplements thereto (identify as such): Division of Generic Drug Monographs (HFN-530), Center for Drugs and Biologics.

Requests for an opinion of the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFN-310), Center for Drugs and Biologics.

FOR FURTHER INFORMATION CONTACT: Herbert Gerstezang, Center for Drugs and Biologics (HFN-8), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of September 25, 1981 (46 FR 47408), the Director of the Bureau of Drugs (now the Center for Drugs and Biologics) reclassified certain topical anti-infective drug products for dermatologic use to lacking substantial evidence of effectiveness, proposed to withdraw approval of their new drug applications, and offered an opportunity for a hearing on the proposal. Among the drugs included in that notice were products containing neomycin in combination with a corticosteroid. In subsequent **Federal Register** notices (47 FR 17677, 48 FR 334, and 48 FR 3416), the Director withdrew approval of those products for which hearing requests were not submitted or were later withdrawn by the manufacturers. The data and information submitted in support of hearing requests for the drug products listed below have been reviewed, and the Director has determined that insofar as it applies to these drug products, the September 25, 1981 notice of opportunity for a hearing should be rescinded and the products should be reclassified as effective for the treatment of corticosteroid-responsive dermatoses with secondary infection. Other durg products included in the 1981 notice that are the subjects of pending hearing requests will be addressed in future **Federal Register** notices.

(Final rules amending the antibiotic drug regulations have exempted antibiotic-containing drugs for dermatologic use (45 FR 71354, Oct. 28, 1980) and, later, all classes of antibiotic-containing drugs (47 FR 39155, Sept. 7, 1982) from certification requirements. Under these provisions, approved antibiotic form 5's and form 6's are regarded as new drug applications (NDAs) and abbreviated new drug applications (ANDAs), respectively, and subject to section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355). Most of the drug products listed below were being certified until they were exempted from that procedure. The monograph or regulation under which

each was certified (now retained as the public standard for each drug product) is shown below in parentheses following the name and address of the NDA holder. No reference number is included for three drugs which, in the absence of a certification regulation, were released pending a final effectiveness determination. The antibiotic regulations will be amended at a future date to provide the public standards for these drugs.)

1. NDA 50–237; Neo-Cort-Dome Cream 0.5% and 1% and Neomycin-HC Cream 0.5% and 1%, each containing neomycin sulfate EQ 3.5 mg base/Gram (Gm) and 0.5% or 1% hydrocortisone; Miles Pharmaceuticals, 400 Morgan Lane, West Haven, CT 06516.

2. NDA 50–323; NeoDecadron Cream containing neomycin sulfate EQ 3.5 mg base/Gm and dexamethasone sodium phosphate EQ 0.1% phosphate; Merck Sharp & Dohme, Division of Merck & Co., Inc., West Point, PA 19101. (21 CFR 444.542b)

3. NDA 50–345; Cordran-N Ointment containing neomycin sulfate EQ 3.5 mg base/Gm and flurandrenolide 0.05%; Eli Lilly & Co., P.O. Box 618, Indianapolis, IN 46206. (21 CFR 444.542a)

4. NDA 50–346; Cordran-N Cream containing neomycin sulfate EQ 3.5 mg base/Gm and flurandrenolide 0.05%; Eli Lilly & Co.

5. NDA 50–374; Neo-Cortef Lotion containing neomycin sulfate EQ 3.5 mg base/milliliter and hydrocortisone acetate 1%; The Upjohn Co., 7171 Portage Rd., Kalamazoo, MI 49001. (21 CFR 444.542c)

6. ANDA 60–480; Neo-Oxylone Ointment containing neomycin sulfate EQ 3.5 mg base/Gm and fluorometholone 0.025%; The Upjohn Co. (21 CFR 444.542a)

7. ANDA 60–611; Neo-Medrol Acetate Cream containing neomycin sulfate EQ 3.5 mg base/Gm and methylprednisolone acetate 0.25% or 1%; The Upjohn Co. (21 CFR 444.542b)

8. ANDA 60–700; Neo-Synalar Cream containing neomycin sulfate EQ 3.5 mg base/Gm and fluocinolone acetonide 0.025%; Syntex Laboratories, Inc., 3401 Hillview Ave., Palo Alto, CA 94304. (21 CFR 444.542b)

9. ANDA 60–751; Neo-Cortef Ointment containing neomycin sulfate EQ 3.5 mg base/Gm and hydrocortisone acetate 0.5%, 1% or 2.5%, The Upjohn Co. (21 CFR 444.542a)

10. ANDA 60–904; Neomycin Sulfate-Hydrocortisone Ointment containing neomycin sulfate EQ 3.5 mg base/Gm and hydrocortisone 1% formerly marketed by Lemmon Co. (successor to Premo Pharamaceutical Laboratories), P.O. Box 30, Sellersville, PA 18960.

11. ANDA 61–036; Neo-Delta Cortef Ointment containing neomycin sulfate EQ 3.5 mg base/Gm and prednisolone acetate 0.5%; The Upjohn Co. (21 CFR 444.542a)

12. ANDA 61–049; Neo Cortef Cream containing neomycin sulfate EQ 3.5 mg base/Gm and hydrocortisone acetate 1% or 2.5%; The Upjohn Co.

13. ANDA 61–154; Neomycin Sulfate-Hydrocortisone Acetate Ointment containing neomycin sulfate EQ 3.5 mg base/Gm and hydrocortisone acetate 1%; Ambix Laboratories, Division of Organic Corporation of America, 1615 East 51st St., North Bergen, NJ 07047.

14. ANDA 62–104; Neomycin Sulfate-Hydrocortisone Ointment containing neomycin sulfate EQ 3.5 mg base/Gm and hydrocortisone 1%, Clay-Park Laboratories, Inc., 3339 Park Ave., Bronx, NY 10456.

The findings announced in the 1981 notice were based on data submitted up to that time in support of the products' labeled indications. The Director has reevaluated these data plus additional data submitted in response to the 1981 notice in light of comments from the American Academy of Dermatology that the clinical benefit from these products would be expected to be greatest during the early phase of treatment.

For the combination product Neo-Synalar (neomycin sulfate and fluocinolone acetonide), two studies provided substantial evidence of effectiveness of the combination, showing that each component contributes to the beneficial effect in patients with corticosteroid-responsive dermatoses with secondary infection. The Leyden et al. study was a 1-week, multicenter, double-blind, randomized, parallel comparison of Neo-Synalar and Synalar in 240 analyzable patients, 141 of whom had confirmed infections. The Folan et al. study was a 2-week, multicenter, randomized, double-blind comparison of four treatment groups in 105 analyzable patients with paired lesions. The four groups were: (1) Neo-Synalar vs. Synalar (fluocinolone acetonide), (2) Neo-Synalar vs. neomycin, (3) neomycin vs. placebo, and (4) Synalar vs. placebo. Effectiveness of the two components was shown for the first week of therapy only.

The Director has determined that this finding of effectiveness should not be limited to neomycin in combination with one, specific corticosteroid because there is no corticosteroid that is unique with respect to therapeutic and toxic effects. See Haynes, R. C., Jr., and F. Murad, in "The Pharmacologic Basis of Therapeutics," 6th Ed., edited by A. G. Gilman, L. S. Goodman, and A. Gilman, the Macmillan Co., New York, p. 1482, 1980. Therefore, the Director considers the two adequate and well-controlled studies that were submitted in support of the neomycin/fluocinolone combination to provide substantial evidence of effectiveness for the other products listed above, each of which is an ointment, cream, or lotion that contains neomycin with an effective corticosteroid.

Accordingly, the Director reclassifies the drug products listed above as effective for the treatment of corticosteroid-responsive dermatoses with secondary infection. It should be noted, however, that the steroid-antibiotic combination has not been shown to provide greater benefit than the steroid component alone after 7 days of treatment. The Director also rescinds the notice of September 25, 1981, as it pertains to those drug products listed above, provided their new drug applications are supplemented in accord with this notice to delete all indications other than the indication set forth below. If a new drug application is not supplemented, then that drug product will remain subject to the September 25, 1981 notice. Submission of a supplemental new drug application in accord with this notice will constitute a withdrawal of a hearing request previously submitted in response to the September 25, 1981 notice; no further **Federal Register** notice will be issued for these drug products.

In addition to the holders of the applications specifically named above, this notice applies to any person who manufactures or distributes a drug product that is not the subject of an approved new drug application and that is identical to a drug product named above. It may also be applicable, under 21 CFR 310.6, to a related or similar drug product that is not the subject of an approved new drug application. It is the responsibility of every drug manufacturer or distributor to review this notice to determine whether it covers any drug product that the person manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product by writing to the Division of Drug Labeling Compliance (address above).

A. *Effectiveness classification.* FDA has reviewed all available evidence and concludes that the drug products are effective for the indication listed in the labeling conditions below.

B. *Conditions for approval and marketing.* FDA is prepared to approve abbreviated new drug applications and supplements to previously approved

new drug applications under conditions described herein.

1. *Form of drug.* These preparations are in cream, ointment, or lotion form suitable for topical administration.

2. *Labeling conditions.* a. The label bears the statement, "Caution: Federal law prohibits dispensing without prescription."

b. The drug is labeled to comply with all requirements of the act and regulations, and the labeling bears adequate information for safe and effective use of the drug. The indication is as follows:

For the treatment of corticosteroid-responsive dermatoses with secondary infection. It has not been demonstrated that this steroid-antibiotic combination provides greater benefit than the steroid component alone after 7 days of treatment. (See "WARNINGS" section).

c. The "WARNINGS" section contains the following statement:

Because of the concern of nephrotoxicity and ototoxicity associated with neomycin, this combination product should not be used over a wide area or for extended periods of time.

3. *Marketing status.* a. Marketing of such drug product that is now the subject of an approved or effective new drug application may be continued provided that on or before May 29, 1984, the holder of the application has submitted: (i) A supplement for revised labeling as needed to be in accord with the labeling conditions described in this notice, and complete container labeling if current container labeling has not been submitted, and (ii) a supplement to provide updating information with respect to items 6 (components), 7 (composition), and 8 (methods, facilities, and controls) of new drug application form FD–356H (21 CFR 314.1(c)).

b. Approval of an abbreviated new drug application (21 CFR 314.2) must be obtained before marketing such products. The requirements for bioavailability testing are waived for topically applied preparations (21 CFR 320.22). Marketing the drug products before approval of a new drug application will subject those products, and those persons who caused the products to be marketed, to regulatory action.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 507, 52 Stat. 1050–1053, 1055–1056 as amended (21 U.S.C. 352, 355, 357)) and under authority delegated to the Director of the National Center for Drugs and Biologics (21 CFR 5.70 and 5.82).

Dated: March 22, 1984.

Harry M. Meyer, Jr.,

Director, Center for Drugs and Biologics.

BILLING CODE 4160–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Colorado; Filing of Plat of Survey

March 21, 1984.

The plat of survey of the following described lands was officially filed in the Colorado State Office, Bureau of Land Management, Denver, Colorado, effective 10:00 a.m., March 21, 1984.

The supplemental plat, showing a subdivision of original lot 2, section 28, T. 2 N., R. 72 W., Sixth Principal Meridian, Colorado, was accepted March 16, 1984.

This supplemental plat was prepared to meet certain administrative needs of this Bureau.

All inquiries about these lands should be sent to the Colorado State Office, Bureau of Land Management, 1037—20th Street, Denver, Colorado 80202.

Timothy A. Kent,

Acting Chief Cadastral Surveyor for Colorado.

BILLING CODE 4310–84–M

[W–87122]

Nebraska; Application for Public Lands for State Indemnity Selection

March 21, 1984.

1. Under the provisions of Sections 2275 and 2276 of the Revised Statutes, 43 U.S.C. 851, 852, the State of Nebraska has filed application W–87122 to acquire public lands in lieu of certain school lands that were encumbered by other rights or reservations before the State's title could attach. Pursuant to the provisions of 43 CFR 2091.2–6, the lands described below are segregated from settlement, sale, locations or entry under the public land laws, including the mining laws, but not the mineral leasing laws or Geothermal Steam Act.

2. The following described lands were segregated in accordance with 43 CFR 2091.2–6 as of Septemeber 6, 1983:

Sixth Principal Meridian, Nebraska

T. 32 N., R. 14 W.,
  Sec. 1, lots 3, 4, and S½NW¼.
T. 33 N., R. 14 W.,
  Sec. 15, NW¼SW¼, SE¼SW¼.
T. 27 N., R. 20 W.,
  Sec. 21, NW¼.
T. 23 N., R. 21 W.,
  Sec. 1, lot 1, SE¼NE¼, and E½SE¼.
T. 24 N., R. 21 W.
  Sec. 35, NE¼SE¼.
T. 28 N., R. 21 W.,
  Sec. 9, W½SE¼.
T. 26 N., R. 22 W.,
  Sec. 33, SW¼SE¼.
T. 33 N., R. 27 W.,
  Sec. 8, lot 8.
T. 33 N., R. 29 W.,
  Sec. 31, lots 2 and 3.
T. 4 N., R. 30 W.,
  Sec. 4, lots 3 and 4;
  Sec. 5, lots 1 and 2.
T. 17 N., R. 30 W.,
  Sec. 24, SW¼SW¼.
T. 32 N., R. 30 W.,
  Sec. 29, N½SW¼.
T. 33 N., R. 32 W.,
  Sec. 31, lots 1, 3, and 4.
T. 19 N., 33 W.,
  Sec. 28, SW¼NW¼.
T. 6 N., R. 35 W.,
  Sec. 17, NE¼NE¼.
T. 31 N., R. 37 W.,
  Sec. 30, lot 2.
T. 22 N., R. 47 W.,
  Sec. 1, lots 10, 11, 12, 13, and 16;
  Sec. 12, lot 1.
T. 20 N., R. 50 W.,
  Sec. 2, S½NW¼.
T. 21 N., R. 51 W.,
  Sec. 22, E½SE¼.
T. 22 N., R. 52 W.,
  Sec. 35, E½NE¼, SW¼NE¼, and NE¼SE¼

The following described land was segregated in accordance with 43 CFR 2091.2–6 as of March 16, 1984:

T. 33 N., R. 30 W.,
  Sec. 31, SW¼SE¼.

The areas described aggregate 1,893.46 acres in Blaine, Brown, Cherry, Hayes, Holt, Hooker, McPherson, Morrill, Red Willow, and Rock Counties, Nebraska.

3. The segregation of the above described public lands shall terminate upon issuance of a document of conveyance to such lands, or upon publication in the **Federal Register** of a notice of termination of the segregation or the expiration of 2 years from the date of the filing of the selection application, whichever occurs first. However, where administrative appeal or review actions have been sought pursuant ot Part 4 or Subparts 2450 of 43 CFR, the segregative period shall continue in effect until publication of notice of termination of the segregation in the **Federal Register.**

44. Inquires concerning the segregation of the lands referenced above should be addressed to the Chief, Branch of Land Resources, Bureau of Land Management, Wyoming State

Office, P.O. Box 1828, Cheyenne, Wyoming 82003.

James L. Edlefsen,

Chief, Branch of Land Resources.

BILLING CODE 4310-22-M

Wyoming; Rawlins District Advisory Council and Grazing Advisory Board Meeting

AGENCY: Bureau of Land Management, Rawlins District Office, Rawlins, Wyoming, Interior.

ACTION: Joint meeting of the Rawlins District Advisory Council and Grazing Advisory Board.

SUMMARY: Notice is hereby given in accordance with Public Laws 94-463 and 94-579 that a joint meeting of the Rawlins District Multiple Use Advisory Council and Grazing Advisory Board will be held.

DATE: April 26, 1984, 9:30 a.m. until 4 p.m.

ADDRESS: Bel Air Inn, 23rd and Spruce Streets, Rawlins, Wyoming 82301.

FOR FURTHER INFORMATION CONTACT: David J. Walter, District Manager, Rawlins District, Bureau of Land Management, P.O. Box 670, Rawlins, Wyoming 82301 (307) 324-7171.

SUPPLEMENTARY INFORMATION: The meeting will begin at 9:30 a.m. at the Bel Air Inn in Rawlins, Wyoming. The agenda for this meeting will include:

(1) Cooperative Range Management Agreements (CMAs).

(2) Lander Resource Management Plan (RMP) Issues.

(3) Known Geologic Structures (KGSs).

(4) Status of Coal Unsuitability Petition.

(5) Stock Driveway Withdrawals.

(6) Cattleguard Maintenance.

(7) Changes in the 8100 Program.

(8) Election of new officers for the Advisory Council.

The primary purpose of the joint meeting is to review and make recommendations on nominations that have been received for CMAs. Issues for the Lander RMP, KGSs, and the coal unsuitability petition will also be discussed at the joint meeting. The remainder of the topics on the agenda are for consideration mainly by the Grazing Advisory Board.

The meeting is open to the public. Interested persons may make oral statements during the public comment period, or file written statements for consideration. Anyone wishing to make an oral statement must notify the District Manager on or before April 19, 1984. Depending on the number of persons who want to make a statement, a time limit may be established.

Summary minutes will be available for review at the Rawlins District Office. Copies may be obtained for the cost of duplication

David J. Walter,

District Manager.

BILLING CODE 4310-33-M

Minerals Management Service

Outer Continental Shelf Advisory Board Solicitation of Nominations to Regional Technical Working Groups

The Minerals Management Service is accepting nominations for consideration to fill a number of discretionary vacancies anticipated in 1984 on the North Atlantic, Mid-Atlantic, South Atlantic, Gulf of Mexico, Alaska, and Pacific Regional Technical Working Group (RTWG) Committees of the Outer Continental Shelf (OCS) Advisory Board.

The RTWG's represent one of three types of committees of the OCS Advisory Board. The Board includes, in addition to the RTWG's, a national Scientific Committee and a national OCS Policy Committee. The RTWG's have been established in each of six OCS leasing regions to advise the Director, Minerals Management Service, on technical matters of regional concern regarding both prelease and postlease activities of the OCS oil and gas leasing program.

The Associate Director for Offshore Minerals Management, through the OCS Regional Managers, implements the technical working group program on a regional level in order to facilitate understanding and participation of the parties most immediately affected by minerals leasing decisions and most knowledgeable on the technical aspects of offshore mineral development and its associated impacts. The RTWG's are comprised of Governor's technical representatives from the States within each leasing region; Federal ex officio representatives from the Minerals Management Service, the Fish and Wildlife Service, the Environmental Protection Agency, the National Oceanic and Atmospheric Administration, and the U.S. Coast Guard; and discretionary representatives from the oil and gas industry and other private and special interests. This solicitation relates only to the discretionary positions.

Secretarial selections and appointments to the RTWG's will be based on achieving a balance of representation and a range of technical expertise and knowledge relevant to OCS related activities within each region. Discretionary membership appointments are for 2 years. Nominees should be familiar with the OCS oil and gas leasing program and should be able to deal with specific technical problems of exploration, production, and transportation of offshore oil and gas as well as the economic and environmental factors involved. Additionally, nominees should have experience in or a working knowledge of interagency coordination at the Federal or State level and should be representative of one or more of the following disciplines:

—Geology
—Oceanography
—Transportation
—Land-Use Planning
—Economics
—Oil and Gas Industry
—Marine Recreation
—Terrestrial Wildlife
—Fisheries Biology
—Engineering
—Marine Biology
—Environment

This announcement is for recruitment of public and private sector members only. In order to be considered, letters of recommendation should be accompanied by a brief résumé and should be directed to the Manager, at the address listed below, of the OCS office located in the region of the applicant's residence, expertise, and interest. The deadline for receipt of nominations will be May 15, 1984. As the number of potential vacancies and the type of representation sought will differ for each RTWG, interested individuals should contact the appropriate OCS Regional Manager for specific information.

For additional information on individual RTWG's contact one of the OCS Regional Offices listed below:

North, Mid, and South Atlantic RTWG's: Manager, Atlantic OCS Office, Attention: RTWG Coordinator, Minerals Management Service, 1951 Kidwell Drive, Suite 601, Vienna, Virginia 22180, (703) 285–2165

Gulf of Mexico RTWG: Manager, Gulf of Mexico OCS Office, Attention: RTWG Coordinator, Minerals Management Service, P.O. Box 7944, 3301 N. Causeway Blvd. Metairie, Louisiana 70011, (504) 838–0627

Alaska RTWG: Manager, Alaska OCS Office, Attention: RTWG Coordinator, Minerals Management Service, 800 "A" Street, Anchorage, Alaska 99501, (907) 261–2307

Pacific RTWG: Manager, Pacific OCS Office, Attention: RTWG Coordinator, Minerals Management Service, 1340 W. 6th Street, Los Angeles, California 90017, (213) 688–2063

For additional information relating to the OCS Advisory Board, interested parties should contact Michele Tetley, Executive Secretary, OCS Advisory Board, Minerals Management Service, Department of the Interior, OIS/MS 640, Washington, D.C. 20240, telephone number (202) 343–9314.

Dated: March 22, 1984.

John B. Rigg,

Associate Director for Offshore Minerals Management.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–130 (Final)]

Chloropicrin From the People's Republic of China

Determination

On the basis of the record [1] developed in the subject investigation, the Commission unanimously determines, pursuant to section 735(b)(1) of the Tariff Act of 1930 (19 U.S.C. 1673(b)(1)), that an industry in the United States is materially injured by reason of imports from the People's Republic of China of chloropicrin, provided for in items 408.16, 408.29 and 425.52 of the Tariff Schedules of the United States, which have been found by the Department of Commerce to be sold in the United States at less than fair value (LTFV).

Background

The Commission instituted this investigation effective September 19, 1983, following a preliminary determination by the Department of Commerce that imports of chloropicrin from China are being sold in the United States at LTFV.

Notice of the institution of the Commission's investigation and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** of October 5, 1983 (48 FR 45480).

On October 7, 1983, the Department of Commerce published a notice in the **Federal Register** (48 FR 45816) postponing its final antidumping determination. Accordingly, the Commission published a notice in the **Federal Register** of October 26, 1983 (48 FR 49558) revising its schedule for the conduct of the investigation. The public hearing was held in Washington, D.C., of February 9, 1984, and all persons who requested the opportunity were permitted to appear in person or by counsel. The staff briefing of the Commission and the Commission's vote on the investigation occurred on March 6, 1984 in a public "Government in the Sunshine" meeting of the Commission.

The Commission transmitted its report on the investigation to the Secretary of Commerce on March 19, 1984. A public version of the Commission's report, Chloropicrin from the Peoples Republic of China (investigation No. 731–TA–130 (Final), USITC Publication 1505, 1984), contains the views of the Commission and information developed during the investigation.

By order of the Commission.
Issued: March 19, 1984.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[332–161]

Conditions of Competition Between Certain Domestic and Imported Fabricated Structural Steel Products

AGENCY: International Trade Commission.

ACTION: Institution of an investigation under Section 332(b) of the Tariff Act of 1930 (19 U.S.C. 1332(b)) concerning the conditions of competition between certain domestic and imported fabricated structural steel products, and the scheduling of a hearing in connection therewith.

EFFECTIVE DATE: March 16, 1984.

FOR FURTHER INFORMATION CONTACT: Peter Avery (202–523–0342) or Dennis Rapkins (202–523–0438), Minerals and Metals Division, U.S. International Trade Commission, Washington, D.C. 20436.

Background and Scope of Investigation

The Commission instituted the investigation, No. 332–161, on its own motion, following receipt on January 27 and March 1, 1984, of a request therefore from the Chairman of the Subcommittee on Trade, Committee on Ways and Means, U.S. House of Representatives.

In accordance with the Subcommittee's request, the study will include a review of the following points or questions with regard to the western U.S. market for fabricated steel products: (1) What are the recent trends in trade in steel and structural steel products into the western United States (as defined in previous Commission studies of the western U.S. steel industry)? What is the import penetration ratio and its trend line? What price differences have existed between domestic and imported

products? Which countries play a major role in the western U.S. market? (2) What are the tariff classifications and rates on these imports (and are there any classification problems)? (3) To the extent it can be determined from available sources, are there differences in the pricing of raw steel products by foreign suppliers which favor Korean fabricators and adversely affect domestic fabricators? (4) What programs does the Government of the Republic of Korea maintain to assist its steel fabricators, both domestically and with respect to exports? (5) What is the nature of the steel fabrication industry in the Republic of Korea (i.e., how many firms are involved, what is this relation to steel producers, and what are their level of sales and net income)?

In addition, the same questions regarding trends in steel trade, import penetration, price competition, tariff classifications, and major importers will be addressed for the national steel market. Moreover, the nature of the steel fabrication industries in other major supplier countries, including Canada, and the type of government programs which exist will be examined. The Commission expects to complete its study by October 26, 1984.

Public Hearing

A public hearing in connection with this investigation will be held at the International Trade Commission in Washington, D.C. on August 28, 1984, at 10 A.M. All persons shall have the right to appear by counsel or in person, to present information and to be heard. Requests to appear at the public hearing should be filed with the Secretary, U.S. International Trade Commission, 701 E Street, NW, Washington, D.C. 20436, not later than noon, August 21, 1984.

Written Submissions

In lieu of or in addition to appearance at the public hearing, interested persons are invited to submit written statements concerning the investigation. Commercial or financial information which a submitting party desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). All written submissions, except for confidential business information, will be available for inspection by interested persons. To be ensured of consideration by the Commission, written statements should be received at the earliest possible date, but no later than August 21, 1984. All submissions should be addressed to the Secretary at the Commission's Office in Washington, D.C.

By order of the Commission.

Issued: March 20, 1984.

Kenneth R. Mason,

Secretary.

[FR Doc. 84-8208 Filed 3-27-84; 8:45 am]

BILLING CODE 7020-02-M

[Investigation No. 337-TA-166]

Certain Fluidized Supporting Apparatus and Components Thereof; Investigation

AGENCY: International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint and a motion for temporary relief were filed with the U.S. International Trade Commission on February 23, 1984, pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), on behalf of UHI Corporation, 2464 Mariondale Avenue, Los Angeles, California 90017. The complaint alleges unfair methods of competition and unfair acts in the importation of certain fluidized supporting apparatus and components thereof into the United States, or in their rental and/or sale, by reason of alleged (1) defamation of complainant; (2) disparagement of complainant's fluidized supporting apparatus; (3) passing off; (4) false designation of origin; (5) interference with contractual relations; and (6) interference with prospective advantage. The Complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

The complaint requests that the Commission institute an investigation, conduct temporary relief proceedings, and issue a temporary exclusion order prohibiting importation of the articles in question into the United States, except under bond, and temporary cease and desist orders. After a full investigation, the complaint requests that the Commission issue a permanent exclusion order and permanent cease and desist orders.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and procedure (19 CFR 210.12).

Scope of investigation: Having considered the complaint, the U.S. International Trade Commission, on March 20, 1984, ordered that—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930 an investigation be instituted to determine whether there is a violation of subsection (a) of section 337 in the unlawful importation of certain fluidized supporting apparatus and components thereof into the United States, or in their sale, by reason of alleged (1) disparagement of complainant and complainant's fluidized supporting apparatus; (2) passing off; (3) false representation; and (4) interference with contractual relations, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) Pursuant to § 210.24(e) of the Commission's rules, the motion for temporary relief under subsections (e) and (f) of section 337 of the Tariff Act of 1930, which was filed on February 23, 1984, shall be forwarded to the presiding officer for an initial determination pursuant to § 210.53(b) of the rules.

(3) For the purpose of the investigation so instituted, the following are hereby named as parties upon whom this notice of investigation shall be served:

(a) The complainant is: UHI Corporation, 2464 Mariondale Avenue, Los Angeles, California 90017.

(b) The respondents are the following companies, alleged to be in violation of section 337, and are the parties upon whom the compliant is to be served:

Support Systems International, Inc., 4349 Corporate Road, Charleston, South Carolina 29401

Support Systems International (S.A.), 111 Bis, Route De Toulouse, 3400 Montpellier, France

(c) Denise T. DiPersio, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, 701 E Street, NW., Room 124, Washington, D.C. 20436, shall be the Commission investigative attorney, a party to this investigation; and

(4) For the investigation so instituted, Donald K. Duvall, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding officer. Pursuant to § 210.24(e) of the Commission's Rules of Practice

and Procedure, the presiding officer shall determine as expeditiously as possible whether or not temporary relief preceedings should be instituted.

Responses must be submitted by the named respondents in accordance with § 210.21 of the Commission's Rules of Practice and Procedures (19 CFR 210.21). Pursuant to §§ 201.16(d) and 210.21(a) of the rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Responses to the motion for temporary relief may be submitted by the named respondents in accordance with § 210.24(e)(3) of the Commission's rules. Any such responses must be filed within 20 days after service of the motion. Extensions of time for submitting responses to the compliant and/or the motion for temporary relief will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be as alleged in the compliant and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street, NW., Room 156, Washington, D.C. 20436, telephone 202/523–0471.

FOR FURTHER INFORMATION CONTACT: Denise T. DiPersio, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, telephone 202/523–0113.

Issued: March 22, 1984.
By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

[Investigation No. 713–TA–183 (Preliminary)]

Large Diameter Carbon Steel Welded Pipes From Brazil

AGENCY: International Trade Commission.

ACTION: Institution of a preliminary antidumping investigation and scheduling of a conference to be held in connection with the investigation.

EFFECTIVE DATE: March 21, 1984.

SUMMARY: The United States International Trade Commission hereby gives notice of the institution of a preliminary antidumping investigation under section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Brazil of carbon steel welded pipes, over 16 inches in outside diameter, provided for in item 610.32 of the Tariff Schedules of the United States, which are alleged to be sold in the United States at less than fair value.

FOR FURTHER INFORMATION CONTACT: Mr. David Coombs, Office of Investigations, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C. 20436, telephone 202–523–1376.

SUPPLEMENTARY INFORMATION:

Background

This investigation is being instituted in response to a petition filed on March 21, 1984, by counsel on behalf of Berg Steel Pipe Corporation, Panama City, Florida. The Commission must make its determination in this investigation within 45 days after the date of the filing of the petition, or by May 7, 1984 (19 CFR 207.17).

Participation

Persons wishing to participate in this investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided for in section 201.11 of the Commission's Rules of Practice and Procedure (19 CFR 201.11), not later than seven (7) days after the publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who shall determine whether to accept the late entry for good cause shown by the person desiring to file the notice.

Service of Documents

The Secretary will compile a service list from the entries of appearance filed in this investigation. Any party submitting a document in connection with the investigation shall, in addition to complying with § 201.8 of the Commission's rules (19 CFR 201.8), serve a copy of each such document on all other parties to the investigation. Such service shall conform with the requirements set forth in § 201.16(b) of the rules (19 CFR 201.16(b)).

In addition to the foregoing, each document filed with the Commission in the course of this investigation must include a certificate of service setting forth the manner and date of such service. This certificate will be deemed proof of service of the document. Documents not accompanied by a certificate of service will not be accepted by the Secretary.

Written Submissions

Any person may submit to the Commission on or before April 18, 1984, a written statement of information pertinent to the subject matter of this investigation (19 CFR 207.15). A signed original and fourteen (14) copies of such statements must be submitted (19 CFR 201.8).

Any business information which a submitter desires the Commission to treat as confidential shall be submitted separately, and each sheet must be clearly marked at the top "Confidential Business Data." Confidential submissions must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6). All written submissions, except for confidential business data, will be available for public inspection.

Conference

The Director of Operations of the Commission has sheduled a conference in connection with this investigation for 9:30 a.m. on April 16, 1984, in the Hearing Room of the U.S. International Trade Commission Building, 701 E Street, NW, Washington, D.C. Parties wishing to participate in the conference should contact the staff investigator, Mr. David Coombs (202–523–1376) not later than April 11, 1984, to arrange for their appearance. Parties in support of the imposition of antidumping duties in this investigation and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference.

Public Inspection

A copy of the petition and all written submissions, except for confidential business data, will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C.

For further information concerning the conduct of this investigation and rules of

general application, consult the Commission's Rules of Practice and Procedure, Part 207, Subparts A and B (19 CFR Part 207), and Part 201, Subparts A through E (19 CFR Part 201). Further information concerning the conduct of the conference will be provided by Mr. Coombs.

This notice is published pursuant to § 207.12 of the Commission's rules (19 CFR § 207.12).

Issued: March 22, 1984.

Certain Office Desk Accessories and Related Products; Decision Not To Review Initial Determination Amending Notice of Investigation

AGENCY: International Trade Commission.

ACTION: The Commission has determined not to review an initial determination (ID) to amend the notice of investigation to add allegations of infringement of U.S. Design Patent No. 270,649 and to change the allegation of false designation of origin or source to failure to mark country of origin.

SUPPLEMENTARY INFORMATION: The Commission did not receive any petitions for review of the ID or any comments from other Government agencies.

Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202-523-0161.

[Investigation No. 337-TA-147]

Certain Papermaking Machine Forming Sections for the Continuous Production of Paper, and Components Thereof; Decision Not To Review Initial Determination

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the Commission has determined not to review the presiding officer's initial determination (ID) that there is no violation of section 337 of the Tariff Act of 1930 in the above-captioned investigation. The Commission has adopted that portion of the presiding officer's ID relating to the noninfringement of U.S. Letters Patent 3,726,758. The Commission has taken no position on the other issues discussed in the ID, since the findings and conclusions of the presiding officer regarding noninfringement are dispositive of the question of whether there is a violation of section 337.

Authority: The authority for the Commission's action is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and in §§ 210.53-210.56 of the Commission's Rules of Practice and Procedure (47 FR 25134 (June 10, 1982), as amended by 48 FR 20225 (May 5, 1983) and 48 FR 21115 (May 11, 1983)); to be codified at 19 CFR 210.53-210.56.

SUPPLEMENTARY INFORMATION: On February 14, 1984, the presiding officer issued an ID that there is no violation of section 337 of the Tariff Act of 1930 in the unauthorized importation and sale of certain papermaking machine forming sections for the continuous production of paper, and components thereof. Complainant and respondents filed petitions for review of various parts of the ID, pursuant to § 210.54(a) of the Commission's rules. Having examined the record in this investigation, including the ID, the petitions for review, and the responses thereto, the Commission on March 15, 1984, determined not to review the ID.

Notice of this investigation was published in the **Federal Register** of May 11, 1983 (48 FR 21213).

Copies of the public version of the ID and all other nonconfidential documents on the record of this investigation are available for public inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, Docket Section, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, D.C. 20436, telephone 202-523-0471.

FOR FURTHER INFORMATION CONTACT: P. N. Smithey, Esq., Office of the General Counsel, United States International Trade Commission, telephone 202-523-0350.

Issued: March 19, 1984.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-97]

Certain Steel Rod Treating Apparatus and Components Thereof; Reopening of Investigation

AGENCY: International Trade Commission.

ACTION: Lifting of suspension and reopening of the above-captioned investigation upon joint motion of complainant and respondents in order to entertain motion to terminate the investigation on the basis of a settlement agreement.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation to determine whether there is a violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation or sale of certain steel rod treating apparatus and components thereof. Notice of the investigation was published in the **Federal Register** of January 28, 1981 (46 FR 9262)

On December 1, 1981, the Commission unanimously determined that there is a violation of section 337 in the unauthorized sale for importation of certain steel rod treating apparatus and components thereof which infringe U.S. Letters Patent 3,390,871. The Commission further determined that the appropriate remedy is an exclusive order pursuant to section 337(d) excluding from entry into the United States certain steel rod treating apparaus which are manufactured by or on behalf of Korf Industrie und Handel, GmbH, Korf Engineering, GmbH, Korf Industries, Inc., Ashlow, Ltd., Ashlow Corp., Mr. Willy Korf and/or Mr. Johann Heinrich Rohde, or any successor, assignee, parent company, affiliated

person, subsidiary, or related business entity of the above-named parties respondent, or which are sought to be imported by Georgetown Steel Corporation.

On December 30, 1981, the U.S. District Court for the District of South Carolina indicated that the court would hold U.S. Letters Patent 3,390,871 invalid and unenforceable. *Ashlow Ltd. et al* v. *Morgan Construction Co.* (D.S.C., Civ. No. 81–936–5).

On December 31, 1981, respondents Ashlow Ltd., Ashlow Corp., Korf Industries, Inc., Georgetown Steel Corp., Korf Industrie und Handel, Korf Engineering, Mr. Willy Korf and Mr. Johann Heinrich Rohde, moved the Commission to stay or suspend its exclusion order and for an expedited decision thereon (Motion No. 97–64). The Commission granted Motion No. 97–64, subject to certain measures designed to protect the *status quo* pending Morgan's exhaustion of its appeal rights. Specifically, the Commission issued an order permitting entry of the subject apparatus under bond pursuant to section 337(e), and suspended its investigation pending judicial proceedings. Notice of these actions was published in the **Federal Register** of January 20, 1982, 47 FR 2950.

Appeals were taken from the District Court decision and the Commission's action requiring posting of a bond.

The appeal from the Commission's action was stayed in the U.S. Court of Customs and Patent Appeals pending resolution by the U.S. Court of Appeals for the Fourth Circuit of the appeal by Morgan from the decision of the District Court. Following briefing and oral argument, the Fourth Circuit decided to delay resolution of that appeal until a decision had been issued by the U.S. Court of Appeals for the Federal Circuit (successor to the U.S. Court of Customs and Patent Appeals). The Court of Appeals for the Federal Circuit thereupon lifted its stay and briefing and oral argument followed. No decision has been issued by the Court of Appeals for the Federal Circuit.

Complainants and respondents have moved for and obtained a stay in the Court of Appeals for the Federal Circuit for a period of 70 days, during which time they have informed the court they will seek termination of the Commission's investigation on the basis of a settlement agreement, pursuant to section 210.51(c) of the Commission's Rules of Practice and Procedure. 19 CFR 210.51(c).

Written Comments

A copy of the motion for termination and the settlement agreement are available for inspection by the public during official working hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C. 20436, telephone 202–523–0161. Interested persons may submit written comments concerning termination of the investigation within ten (10) days of the date of publication of this notice in the **Federal Register**. The original and 14 copies of all such comments must be filed with the Secretary to the Commission, 701 E Street, NW., Washington, D.C. 20436. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Frank J Schuchat, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–0421.

[Investigation No. 337–TA–133]

Certain Vertical Milling Machines, Parts, Attachments, and Accessories Thereto; Termination of Investigation

AGENCY: International Trade Commission.

ACTION: Termination of investigation upon a finding of no violation of section 337 of the Tariff Act of 1930.

SUPPLEMENTARY INFORMATION: On November 17, 1982, the Commission instituted an investigation in response to a petition filed on behalf of Textron, Inc., of Providence, R.I. Bridgeport Machines is a division of Textron which manufactures, distributes, and sells vertical milling machines and their attachments and accessories in the United States. The Commission published a notice of investigation in the **Federal Register** of November 17, 1982, 47 FR 51821, which instituted an investigation to determine whether there is a violation of section 337 of the Tariff Act of 1930 in the unauthorized importation or sale of certain vertical milling machines and parts, attachments, and accessories thereto by reason of the alleged—

(a) Violation of section 43(a) of the Lanham Act, 15 U.S.C. § 1125(a);

(b) Infringement of Federally registered trademarks in violation of section 32(1) of the Lanham Act, 15 U.S.C. 1114(1);

(c) Infringement of common law trademark rights;

(d) Trademark dilution;

(e) Misappropriation simulation or adoption of shape design and trade dress;

(f) Passing off;

(g) False advertising; and

(h) Unfair competition.

The effect or tendency of which is to destory or substantially injure an industry which is efficiently and economically operated in the United States.

On March 1, 1984, the Commission unanimously determined that there was no violation of section 337 in investigation No. 337–TA–133 in the importation or sale of the vertical milling machines, parts, attachments, and accessories thereto in question.

Copies of the Commission's Action and Order, its Opinion, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

[Investigation No. 337–TA–180]

Certain X-Ray Image Intensifier Tubes and Instruments; Correction to Notice of Investigation

AGENCY: International Trade Commission.

ACTION: Correction of an error in notice of investigation published in the **Federal Register** of February 1, 1984.

SUMMARY: On January 26, 1984, the United States International Trade Commission issued a notice announcing the institution of the above-captioned

investigation. This notice, which was published in the **Federal Register** February 1, 1984 (49 FR 4046–4047), indicated that the investigation was being instituted to determine whether there is a violation of section 337 of the Tariff Act of 1930 in the unlawful importation of certain x-ray image intensifier tubes and instruments equipped with x-ray image intensifier tubes into the United States, or in their sale, by reason of (1) the alleged coverage of such tubes by claims 1 through 7 of U.S. Letters Patent 3,916,182 and (2) the alleged manufacture of such tubes by a process covered by claims 1 through 6 and 9 through 15 of U.S. Letters Patent 3,795,531. Notice is hereby given that the number of the first patent was listed incorrectly in the previously published notice. The correct number is 3,961,182. The prior notice accurately reflected the scope of the Commission's investigation in all other respects.

SUPPLEMENTARY INFORMATION: Copies of the patents, the complaint, the responses, and all other nonconfidential documents filed in connection with this investigation are available for public inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, Docket Section, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, D.C. 20436, telephone 202–523–0471.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 84-27]

NASA Advisory Council, Space Systems and Technology Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Systems and Technology Advisory Committee, Informal Advisory Subcommittee on Chemical Propulsion Technology.

DATE AND TIME: April 17 and 18, 1984, 8:30 a.m. to 4:30 p.m., April 19, 1984, 8:30 a.m. to 12:00 noon.

ADDRESS: National Aeronautics and Space Administration, George C. Marshall Space Flight Center, Building 4610, Room 5025, Marshall Space Flight Center, Alabama 35812.

FOR FURTHER INFORMATION CONTACT: Mr. Vance Houston, National Aeronautics and Space Administration, Code RST, Washington, D.C. 20546 (202/453–2852).

SUPPLEMENTARY INFORMATION: The Informal Advisory Subcommittee on Chemical Propulsion Technology was established to provide guidance and direction to the Chemical Propulsion research and technology programs of NASA's Office of Aeronautics and Space Technology. The Subcommittee, chaired by Dr. Sanders Rosenberg, is comprised of five members. The meeting will be open to the public up to the seating capacity of the room (approximately 50 persons, including the Subcommittee members and participants).

Type of meeting: Open

Agenda

April 17, 1984

8:30 a.m.—Chairperson's Remarks.
8:40 a.m.—Office of Aeronautics and Space Technology Propulsion Program Summary.
9:30 a.m.—High Pressure Liquid Oxygen/Hydrogen Technology Program.
1:30 p.m.—Advanced Orbital Transfer Vehicle Propulsion Technology Program.
3:00 p.m.—Liquid Oxygen/Hydrocarbon Technology Program.
4:30 p.m.—Adjourn.

April 18, 1984

8:30 a.m.—Lewis Research Center as Center of Excellence.
9:00 a.m.—Marshall Space Flight Center as Center of Excellence.
1:00 p.m.—MSFC Center of Excellence continued.
3:30 p.m.—Subcommittee Discussion.
4:30 p.m.—Adjourn.

April 19, 1984

8:30 a.m.—Subcommittee Business.
10:00 a.m.—Subcommittee Discussion in Preparation of Final Report.
12:00 noon—Adjourn.

NATIONAL SCIENCE FOUNDATION

Directorate for Engineering; Advisory Committee for Earthquake Hazard Mitigation; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Earthquake Hazard Mitigation (EHM).

Date and time: April 12, 1984—9:00 a.m. to 5:00 p.m. April 13, 1984—9:00 a.m. to 12 Noon.

Place: AIA Board Room, 1735 New York Avenue, N.W., Washington, D.C.

Type of meeting: Open.

Contact person: Rowena Peacock, Administrative Officer (CEE) National Science Foundation, Room 1130, Washington, D.C. TELEPHONE: (202) 357–9545.

Summary minutes: Minutes may be obtained from the contact person.

Agenda

Thursday, April 12, 1984

9:00–10:00—Welcome and Discussion of Directorate Activities
10:00–11:00—Report on EHM Activities
11:00–12:00—General Issues for Long-Range Planning
12:00–1:30—Lunch
1:30–5:00—General Issues for Long-Range Planning

Friday, April 13, 1984

9:00–12:00—Discussion of General Issues for Long-Range Planning
Adjournment

Dated: March 23, 1984.

M. Rebecca Winkler,

Committee Management Coordinator.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-250 and 50-251]

Florida Power and Light Co.; Consideration of Issuance of Amendments to Facility Operating Licenses and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. DPR–31 and DPR–41, issued to Florida Power and Light Company (the licensee), for operation of the Turkey Point Plant Unit Nos. 3 and 4 located in Dade County, Florida.

The proposed license amendments were initially noticed December 21, 1983 (48 FR 56503). This notice includes requested changes provided in a

submittal dated October 26, 1983 which were not included in the initial notice of December 21, 1983. The proposed amendments request the deletion of non-radiological Environmental Technical Specifications (Appendix B) which address the groundwater monitoring program and environmental protection limits. The justification for the requested deletions are based on the results of eight years of studies, the revised agreement with the South Florida Water Management District and an effective National Pollutant Discharge Elimination System (NPDES) Permit from the Environmental Protection Agency in accordance with the licensee's application for amendments dated September 12, 1983, as modified October 26, 1983.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the request for amendments involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility or a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The amendments would delete the non-radiological monitoring programs related to the groundwater monitoring and environmental protection limits. The amendments would not change any current limitations related to the operation of the plants. Since no operational limitations are being changed, the staff proposes to determine that the amendments do not involve a significant increase in the probability or consequences of an accident from any accident previoulsy evaluated, do not create the possiblity of a new or different kind of accident from any accident previously evaluated and do not involve a significant reduction in a margin of safety. The staff, therefore, proposes to determine that the amendments do not involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attn: Docketing and Service Branch.

By April 27, 1984, the licensee may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licenses and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limted to matters within the scope of the amendments under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendments request involve no significant hazards consideration, the Commission may issue the amendments and make them effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendments.

If the final determination is that the amendments involve a significant hazards consideration, any hearing held would take place before the issuance of any amendments.

Normally, the Commission will not issue the amendments until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result in derating or shutdown of the facility, the Commission may issue the license amendments before the expiration of the 30-day notice period, provided that its final determination is that the amendments involve no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Att: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of

the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union operator at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Steven A. Varga, Branch Chief, Operating Reactors Branch No. 1, Division of Licensing: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of the **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Harold F. Reis, Esquire, Lowenstein, Newman, Reis and Axelrad, 1025 Connecticut Avenue, NW., Suite 1214, Washington, D.C. 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for the amendments which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Environmental and Urban Affairs Library, Florida International University, Miami, Florida 33199.

Dated at Bethesda, Maryland, this 20th day of March 1984.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 70-27]

Negative Declaration Regarding Renewal of Special Nuclear Material License No. SNM–42; Babcock & Wilcox Co., Naval Nuclear Fuel Division, Lynchburg, Virginia

The U.S. Nuclear Regulatory Commission (the Commission) is considering the renewal of Special Nuclear Material License SNM–42 for the continued operation of the Naval Nuclear Fuel Division at Lynchburg, Virginia.

The Commission's Division of Fuel Cycle and Material Safety has prepared an Environmental Impact Appraisal for the proposed renewal of Special Nuclear Material License SNM–42. On the basis of this appraisal, the Commission has concluded that the environmental impact created by the proposed license renewal action would not be significant and does not warrant the preparation of an Environmental Impact Statement. Accordingly, it has been determined that a Negative Declaration is appropriate. The Environmental Impact Appraisal (NUREG–1049) is available for public inpection at the Commission's Public Document Room at 1717 H street, NW., Washington, D.C. Copies of NUREG–1049 may be purchased by calling (301) 492–9530 or by writing to the Publication Services Section, Division of Technical Information and Document Control, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, or purchased from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161.

Dated at Silver Spring, Maryland, this 22nd day of March 1984.

For the Nuclear Regulatory Commission.

R. G. Page,

Chief, Uranium Fuel Licensing Branch, Division of Fuel Cycle and Material Safety, NMSS.

BILLING CODE 8010–01–M

[Release No. 20775; File No. SR–SCCP–84–1]

Filing and Immediate Effectiveness of a Proposed Rule Change of Stock Clearing Corporation of Philadelphia

March 21, 1984.

Stock Clearing Corporation of Philadelphia ("SCCP") on March 1, 1984, submitted a proposed rule change to the Commission pursuant to Rule 19b–4 under the Securities Exchange Act of 1934 (the "Act"). 15 U.S.C. 78s(b)(1), that deletes a redundant rule, SCCP Rule 31, entitled "Audit Committee." Article IV, Section 8(i) of SCCP's By-laws already describes all standing committees of SCCP's Board of Directors, including its Audit Committee.

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Securities Exchange Act of 1934 and Rule 19b–4 thereunder. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate the proposed rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested presons are invited to submit written data, views and arguments concerning the submission within twenty-one days from the date of publication in the **Federal Register.** Persons desiring to make a written submission should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR–SCCP–84–1.

Copies of the submission, with accompanying exhibits, and of all written comments will be available for public inspection at the Securities and Exchange Commission's Public Reference Room, 450 Fifth Street, NW., Washington, D.C. Copies of the filing will also be available at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 84–8283 Filed 3–27–84; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 20774; File No. SR–PHILADEP–84–1]

Filing and Immediate Effectiveness of a Proposed Rule Change by Philadelphia Depository Trust Co.

March 21, 1984.

Philadelphia Depository Trust Company ("Philadep") on March 1, 1984, submitted a proposed rule change to the Commission pursuant to Rule 19b–4 under the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), that deletes a redundant rule, Philadep Rule 18, entitled "Audit Committee." Philadep By-Law Article IV, Section 8(i) already contains an identical description of Philadep's Audit Committee. Current Philadep Rule 29, "Standard of Care," will become Philadep Rule 18.

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Securities Exchange Act of 1934 and Rule 19b–4 thereunder. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate the proposed rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the submission within twenty-one days from the date of publication in the **Federal Register.** Persons desiring to make a written submission should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR–PHILADEP–84–1.

Copies of the submission, with accompanying exhibits, and of all written comments will be available for public inspection at the Securities and Exchange Commission's Public Reference Room, 450 Fifth Street, NW., Washington, D.C. Copies of the filing will also be available at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[File No.: 81–701]

PACCAR Financial Corp.; Application and Opportunity for Hearing

March 21, 1984.

Notice is hereby given that PACCAR Financial Corp. (The "Applicant"), a wholly owned subsidiary of PACCAR, Inc. ("PACCAR"), has filed an application pursuant to section 12(h) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), for exemption from certain requirements under sections 14(a) and 14(c) of the Act subject to certain conditions.

The application states in part:

Because Applicant's common stock is registered under section 12(g), of the Exchange Act, Applicant is required to comply with the proxy and information statement requirements of Regulations 14A and 14C under that Act.

Applicant believes that the exemptive order requested by it is appropriate in that as long as PACCAR continues to own all of Applicant's common stock, a proxy or information statement will be of no revelance to PACCAR.

Further, the information provided by a proxy or information statement will be either of little or no relevance to a holder of Applicant's debt securities, or will be otherwise publicly available in documents Applicant is required to file under section 13 of the Exchange Act.

For a more detailed statement of the information presented, all persons are referred to said application, which is on file in the Office of the Commission at the Public Reference Room, 450 Fifth Street, NW., Washington, D.C. 20549.

Notice is further given that any interested person not later than April 16, 1984 may submit to the Commission in writing his views or any substantial facts bearing on the application or the desirability of a hearing thereon. Any such communication or request should

be addressed to The Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request, and the issues of fact and law raised by the application which he desires to controvert.

Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof. At any time after said date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8025-01-M

Direct Business Loans; Interest Rates

The interest rate on section 7(a) Small Business Administration direct business loans (as amended by Pub. L. 97-35) and the SBA share of immediate participation loans is twelve and five-eights (12⅝) percent for the fiscal quarter beginning April 1, 1984.

On a quarterly basis, the Small Business Administration also publishes an interest rate called the optional "peg" rate (13 CFR 120.3(b)(2)(iii)). This rate is a weighted average cost of money to the government for maturities similar to the average SBA loan. This rate may be used as a base rate for guaranteed fluctuating interest rate SBA loans. For the April-June quarter of 1984, this rate will be eleven and five-eights (11⅝) percent.

Eward J. Myerson,

Acting Associate Administrator for Finance and Investment.

[FR Doc. 84-8359 Filed 3-27-84; 8:45 am]

BILLING CODE 8025-01-M

Maximum Annual Cost of Money to Small Business Concerns

13 CFR 107.301(c) sets forth the SBA Regulations governing the maximum annual cost of money to small business concerns for Financing by small business investment companies.

Section 107.301(c)(2) requires that SBA publish from time to time in the **Federal Register** the current Federal Financing Bank (FFB) rate for use in computing the maximum annual cost of money pursuant to § 107.301(c)(1). It is anticipated that a rate notice will be published each month.

13 CFR 107.301(c) does not supersede or preempt any applicable law that imposes an interest ceiling lower than the ceiling imposed by that regulation. Attention is directed to new subsection 308(i) of the Small Business Investment Act, added by section 524 of Pub. L. 96-221, March 31, 1980 (94 Stat. 161), to that law's Federal override of State Usury ceilings, and to its forfeiture and penalty provisions.

Effective April 1, 1984, and until further notice, the FFB rate to be used for purposes of computing the maximum cost of money pursuant to 13 CFR Section 107.301(c) is *12.565%* per annum.

Dated: March 20, 1984.

Edward J. Myerson,

Deputy Associate Administrator for Finance and Investment.

BILLING CODE 8025-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Priority System for the Airport Improvement Program

AGENCY: Federal Aviation Administration, DOT.

SUBJECT: Availability of the Airport Improvement Program Priority System for Information of the Aviation Public.

SUMMARY: This notice provides information on availability of copies of the Airport Improvement Program Priority System.

Section 505 of the Airport and Airway Improvement Act of 1982 (AAIA) (49 U.S.C. 2204) authorizes the Secretary to make grants for eligible projects under the Airport Improvement Program. Because the demand for these funds exceeds the amount available, the FAA is unable to fund all of those projects for which airport sponsors wish to obtain grants. The FAA has developed a priority system to help make decisions on the relative national priority of projects proposed during the year. Under this system, projects are favored which best carry out the purpose of the Act, with emphasis on those which improve safety and assure the integrity of the system.

The FAA is making this document available for review by the aviation public. Interested parties may call, write, or visit the following office to obtain the document: Office of Airport Planning and Programming, Grants-in-Aid Division, APP-500 (Room 620), Federal Aviation Administration, 800 Independence Avenue, S.W., Washington, D.C. 20591, Telephone: (202) 426-3067.

Issued in Washington, D.C., on March 23, 1984.

Paul L. Galis,

Director, Office of Airport Planning and Programming.

VETERANS ADMINISTRATION

Agency Information Collections Under OMB Review

AGENCY: Veterans Administration.

ACTION: Notice.

SUMMARY: The Veterans Adminstration has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This document contains forms and reporting requirements and lists the following information: (1) The Department or Staff Office issuing the requirement; (2) The title of the form or report; (3) The agency form number, if applicable; (4) How often the form or report must be filled out; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to fill out the form; and (8) An indication of whether section 3504(h) of Pub. L. 96-511 applies.

ADDRESSES: Copies of the forms, reports, and supporting document may be obtained from Patricia Viers, Agency Clearance Officer (004A2), Veterans Administration, 810 Vermont Avenue, NW, Washington, DC 20420, (202) 389-2146. Comments and questions about the items on this list should be directed to the VA's OMB Desk Officer, Dick Eisinger, Office of Management and Budget, 726 Jackson Place, NW, Washington, DC 20503, (202) 395-6880.

DATES: Comments on the forms and questionnaires should be directed to the OMB Desk Officer within 60 days of this notice.

Dated: March 22, 1984.

By direction of the Administrator:

Dominick Onorato,

Associate Deputy administrator for Information Resources Management.

Sunshine Act Meetings

Federal Register
Vol. 49, No. 61
Wednesday, March 28, 1984

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONTENTS

	Item
Federal Reserve System	1
Federal Home Loan Mortgage Corporation	2
Pacific Northwest Electric Power and Conservation Planning Council	3

1

FEDERAL RESERVE SYSTEM

AGENCY HOLDING THE MEETING: Board of Governors of the Federal Reserve System.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: Notice forwarded to **Federal Register** on March 16, 1984.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: Approximately 11:00 a.m., Monday, March 26, 1984, following a recess at the conclusion of the open meeting.

CHANGES IN THE MEETING: Addition of the following closed item(s) to the meeting: Proposed statement to the Senate Committee on Banking, Housing, and Urban Affairs, regarding S. 2181, the Financial Services Competitive Equity Act, and S. 2134, the Depository Institutions Holding Company Act Amendments of 1983.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board, (202) 452–3204.

Dated: March 26, 1984.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 84-8448 Filed 3-26-84; 4:02 pm]

BILLING CODE 6210-01-M

2

FEDERAL HOME LOAN MORTGAGE CORPORATION

DATE AND TIME: March 29, 1984, 1:30 p.m.

PLACE: 1776 G Street, NW., Washington, D.C., Conference Room 4–G.

STATUS: Closed.

CONTACT PERSON FOR MORE INFORMATION: Alan B. Hausman, 1776 G Street, NW., P.O. Box 37248, Washington, D.C. 20013, (202) 789–4763.

MATTERS TO BE CONSIDERED:

Closed:
Minutes of January 31, 1984 Board of Directors' Meeting
Minute Entry
Closed:
President's Report
Closed:
Financial Report
Minute Entry

Date sent to **Federal Register:** March 26, 1984.

Maud Mater,

Corporate Secretary.

BILLING CODE 6720-01-M

3

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL (NORTHWEST POWER PLANNING COUNCIL)

ACTION: Notice of meeting to be held pursuant to the Government in the Sunshine Act (5 U.S.C. 552b).

STATUS: Open. An executive session to discuss pending litigation and personnel matters will follow the meeting on April 12. This session will be closed to the public.

TIME AND DATE: April 11 and 12, 1984, 9:00 a.m.

PLACE: Red Lion Motor Inn/Riverside, 29th and Chinden Boulevard, Boise, Idaho.

MATTERS TO BE CONSIDERED:

- Prelimiary Council Decisions on Draft Amendment of the Columbia River Basin Fish and Wildlife Program
- Public Comment on Second Set of Issue Papers on Amendment of the Columbia River Basin Fish and Wildlife Program
- Presentation of Third Set of Issue Papers on Amendment of the Columbia River Basin Fish and Wildlife Program
- Staff Presentation of Bureau of Reclamation, Federal Energy Regulatory Commission, and Corps of Engineers FY 1985 Budget Proposals
- Council Decision on Proposed Amendment to the Council's Study of Large Thermal Plant Planning and Construction Schedules (Action 23.1)
- Staff Presentation on Death Spiral Issue Paper
- Staff Presentation on Northwest Power Planning Council Power Planning Division Workplan

FOR FURTHER INFORMATION CONTACT: Ms. Bess Wong (503) 222–5161

Edward Sheets,

Executive Director.

Part II

Department of Energy

48 CFR Ch. 9
Acquisition Regulations; Final Rule

DEPARTMENT OF ENERGY

48 CFR Ch. 9

Acquisition Regulations

AGENCY: Department of Energy.

ACTION: Final rule.

SUMMARY: This final rule completes the effort begun by the notice of proposed rulemaking published in the **Federal Register** on September 28, 1983 at 48 FR 43772. The purpose of the rule is to establish the Department of Energy Acquisition Regulation (DEAR). This regulation will be codified as Chapter 9 of Title 48 of the Code of Federal Regulations. Its purpose is to implement and supplement the Federal Acquisition Regulation (FAR) which has been separately promulgated by the General Services Administration, Department of Defense, and National Aeronautics and Space Administration as Chapter I of Title 48 of the Code of Federal Regulations. The FAR was published in the September 19, 1983 issue of the **Federal Register**. The FAR is being promulgated as the uniform, simplified, acquisition regulation called for by Executive Order 12352, Federal Procurement Reforms.

The FAR will supersede the Defense Acquisition Regulation, the Federal Procurement Regulations, and the National Aeronautics and Space Administration Procurement Regulation. Civilian agency implementations of the Federal Procurement Regulations will generally become outdated as a result of the promulgation of the FAR. For this reason, the Department of Energy Procurement Regulations (DOE–PR), codified at Chapter 9 of Title 41 of the Code of Federal Regulations, will not be used, with one exception, for solicitations issued after the April 1, 1984 effective date of the FAR and DEAR. The exception to this however is that Part 9–9, "Patents, Data, and Copyrights," of the DOE–PR will remain in effect. However, the provisions of 41 CFR 9–9.107–1 through 9–9.107–6 and 9–9.109–6 shall apply only to contracts with other than small business firms and domestic nonprofit organizations which do not fall within the provisions of 35 U.S.C. 202(a)(i), (ii), or (iii). This will be an interim procedure pending finalization of FAR coverage in this area and a Departmental rulemaking. As a practical matter, both the Federal Procurement Regulations and the DOE–PR, 41 CFR Chapters 1 and 9, respectively, will continue to be applicable for the administration of contracts awarded prior to the effective date of the FAR and DEAR.

The intended effect of the FAR is to simplify the Federal procurement process by adopting a uniform regulation for all agencies. The uniform regulation will eliminate the confusion caused contractors by differing policies among the various Federal agencies. The intended effect of the DEAR is to implement the FAR where required and to supplement the FAR in areas where there is no FAR coverage of policies unique to DOE.

EFFECTIVE DATE: This regulation will be effective April 1, 1984.

FOR FURTHER INFORMATION CONTACT:

Richard Langston, Procurement Policy Branch, MA–421.1, Procurement and Assistance Management Directorate, Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–8188

Robert Forst, Office of General Counsel, AGC for Procurement and Financial Incentives, GC–44, Department of Energy, Room 6B–158, 1000 Independence Avenue, SW, Washington, DC 20585, (202) 252–1526

SUPPLEMENTARY INFORMATION:

I. Background

II. Statutory & Regulatory Requirements

A. Executive Order 12291

B. Regulatory Flexibility Act

C. Paperwork Reduction Act

III. Public Comments

I. Background

The policies and procedures of the Federal government regarding the procurement of supplies and services have been developed in a largely independent fashion by the various agencies. Many statutes bearing on Federal contracting have been directed toward specific agencies. Federal agencies have traditionally developed their own contracting procedures with limited attention to uniformity among agencies. The result of this is a system of procurement policies which vary from agency to agency and cause confusion within the contracting community. As long ago as 1972, the Commission on Government Procurement recommended that there be a standard Government-wide procurement regulatory system. The Office of Federal Procurement Policy, created in 1974, has worked with the agencies and the public to create a uniform procurement regulation to be known as the Federal Acquisition Regulation (FAR).

The FAR has been codified as Chapter 1 of Title 48 of the Code of Federal Regulations. The FAR was published in the September 19, 1983 edition of the **Federal Register** with an effective date of April 1, 1984.

Because of differing statutory authorities among Federal agencies and because as a practical matter the FAR cannot contain all the procedural details of how to implement a particular policy, the FAR authorizes the agencies to issue implementing regulations. For this reason, DOE issued a notice of proposed rulemaking on September 26, 1983 at 48 FR 43772 inviting the public to comment on the draft of its regulation to implement and supplement the FAR. A correction notice was issued on October 25, 1983 at 48 CFR 49315. The only significant aspect of the correction notice involved the addition of 917.7108–3 which provides for managing Government property under special research contacts in accordance with FAR 45 and 945 when title is to remain with the Government.

II. Statutory & Regulatory Requirements

A. Executive Order 12291

This Executive Order, entitled "Federal Regulation", requires that certain rules be reviewed by the Office of Management and Budget prior to promulgation. In accordance with the memorandum from the Director, Office of Management and Budget to the Administrators of the Office of Federal Procurment Policy and the Office of Information and Regulatory Affairs, dated December 15, 1983, this final rule is exempt from the provisions of Executive Order 12291, pursuant to section 8(b) of the Order, because it deals with management of the agency's procurement function.

B. Regulatory Flexibility Act

This final rule was reviewed under the Regulatory Flexibility Act of 1980, Pub. L. 96–354, which requires preparation of a regulatory flexibility analysis for any rule which is likely to have significant economic impact on a substantial number of small entities. DOE certifies that this final rule will not have a significant economic impact on a substantial number of small entities and, therefore, no regulatory flexibility analysis has been prepared.

C. Paperwork Reduction Act

The information collection and recordkeeping requirements that are imposed on the public by this proposed rulemaking have been cleared by the Office of Management and Budget (OMB) under various control numbers, in accordance with section 3504(h) of the Paperwork Reduction Act of 1980, Pub. L. 96–511, and OMB's implementing

regulations at 5 CFR Part 1320. These requirements and their corresponding control numbers appear at 901.105. Pursuant to the request for public comments, DOE received two comments regarding paperwork reduction considerations. These comments are addressed at section III.

III. Public Comments

The Department of Energy (DOE) published a notice of proposed rulemaking on September 26, 1983 to establish the Department of Energy Acquisition Regulation. The notice invited public comments for a 60 day period ending November 25, 1983. Comments were received from seven organizations. In addition to general comments, the DOE received two comments concerning items which involve approvals by the Office of Management and Budget (OMB) as part of the clearance process required by the Paperwork Reduction Act of 1980, Pub. L. 96–511 and OMB's implementing regulations of 5 CFR Part 1320. Actions taken with regard to the Paperwork Reduction Act of 1980 issues are the first issues discussed. Other public comments and suggestions pertinent to the notice of proposed rulemaking and actions taken in response thereto are summarized in the paragraphs that follow those comments.

Comments Regarding Paperwork Reduction Act

Comment: Two organizations objected to the Department's proposal, at 952.219–9, that requires a contractor to report the percent and dollar value of subcontracts awarded to women-owned small businesses. The proposal included language that this information be inserted at the "Remarks" section of Standard Forms 294 and 295. The commenter asked that 952.219–9 be removed from the final rule.

Response: The DOE's proposal was based on an interim "Phase I" copy of Part 19 of the FAR which contained a requirement for a women-owned small business subcontracting program clause. This clause was not contained in the final FAR. Based on the concerns of the respondent and the deletion of the earlier FAR requirement, the Department has removed the requirement for such subcontract reporting. Section 952.219–9 and references to it have not been deleted. Nonetheless as a result of additional internal review prompted by the comment, the Department did revise 952.219–9 and its general instructions for use at 919.708, as well as the internal reporting instructions at 904.601–70(b)(4). Subcontract reports are required pursuant to FAR 19.704 for contracts which contain the Small Business and Small Disadvantaged Business Subcontracting Plan clause. These reports are furnished by means of semi-annual submissions of Standard Form 294 and quarterly submissions of Standard Form 295. The Department has reviewed these forms as well as its own need for such information. It was determined that the Department can fulfill its information requirements and at the same time reduce the paperwork burden imposed on its contractors. The SF 294 contains all the information needed except for the amount of labor surplus area subcontracting. The final rule has been revised to provide that DOE contractors need only submit their reports through use of an SF 294 on a quarterly basis with an annotation to indicate the amount of labor surplus area subcontracting if such reports are required by the terms of the contract. This action decreases from 6 to 4 the number of subcontract reports which must be submitted annually and simplifies the process by using a single form rather than two separate forms.

Comment: One organization objected to Article B–XXVII, "Sensitive Foreign Nations Controls" at 917.7113. They objected to the ambiguity caused by the reference to an "Attachment ——" in the clause at 952.204–3 of the proposed rule which is incorporated in Article B–XXVII. The commenter expressed concern that the attachment would contain reporting and recordkeeping requirements.

Response: Upon review, the Department agrees the clause may not be clear regarding what is intended by the reference to "Attachment ——". However, 904.404 describes the use of the clause and what is to be enclosed as an attachment.

The "——" is for a reference number of the particular contract attachment. National security requirements necessitate control when unclassified materials or information on nuclear technology may be made available to Sensitive Foreign Nations. Generally, special research contracts will not require the clause. However, some SRC's may deal with nuclear technologies, therefore the clause has been retained at 952.204–71 to be used under the appropriate circumstance. It has been rewritten to identify what is to be attached. Instructions for use of the clause are revised at 917.7113, Article B–XXVII to say that the clause is applicable when nuclear technology is involved. These requirements are included in the DOE paperwork clearance.

Other Comments

Comment: Two commenters asked questions concerning 904.404 which specifies clauses to be used in contracts which involve or have the potential to involve classified information. One reviewer was confused by the numbering of the clauses and another asked the definition of the word "off-site" as used in the clause which appeared at 904.404(d)(4) in the proposed rule.

Response: The Department agrees there may be confusion in the series of clauses dealing with security. The several clauses in question were included in the proposed rule at 952.204–1; 952.204–2; 952.204–3; and 952.204–4. To clarify the differing security clauses that apply to DOE contracts, the clauses included in the final rule have been renumbered. This renumbering more clearly indicates that the clause entitled "Security" at 952.204–1 of the proposed rule, renumbered in the final rule as 952.204–2, is to be used in DOE contracts instead of the FAR clause of the same title. The other clauses are supplemental to the FAR and implement DOE requirements and have accordingly been numbered with "— 70" identifications. The purpose and intent of the clause at 952.204–72, of the final rule "Disclosure of Information" was clarified at this instruction for use as well as at 904.404(d)(4) by removing the words "off-site" and substituting a reference to the institutions own facilities.

Comment: Two respondents commended DOE for its efforts to reduce paperwork burden through use of the annual representations and certifications technique as proposed at 904.70. One of these commenters also suggested that the Department make these procedures mandatory rather than optional.

Response: The treatment of this subject is relocated to 915.406–5 in this final rule. Based on the comments received and further discussions within the Department, DOE has further expanded this topic. The coverage in the final rule being published today makes it possible to place a representations and certifications on record with a contracting activity for a period of 3 years. During that period, it will be possible to file a simplified certification attesting to the currency of the record copy and identifying any differences from the record copy that may exist for an individual bid or proposal. The DOE expects this simplified procedure to benefit organizations who submit frequent bids or proposals to the Department. It will contribute to the

Department's efforts to reduce such paperwork burdens. DOE expects all of its contracting activities to adopt these simplified procedures. Because the technique is new the Department has elected to provide for its use on an optional basis.

Comment: One commenter discussed 915.105, "Competition". The commenter suggested that there may be confusion as a result of recent legislation and regulation, both proposed and final. The commenter suggested that paragraph (b) of 915.105 be an unequivocal statement of the Department's policy. The commenter stated the belief that subparagraphs (b)(2) and (b)(6) of 915.105 of the proposed rule were correct and observed with regard to subparagraph (b)(2) that 41 U.S.C. 252(c)(5) authorizes the negotiation of any service to be rendered by any university and suggested that pending legislation. S. 338, will authorize noncompetitive procedures for "an essential research capability to be provided by an educational institution." Regarding subparagraph (b)(6) the commenter also stated that FPR Amendment 230 and FPR Temporary Regulation 75 encourage unsolicited proposals and stated that FPR 1–1003.2 provides that unique or innovative research proposals need not be synopsized in the *Commerce Business Daily* if doing so would disclose the originality of thought or innovativeness of the proposed research.

Response: The recent legislation and regulation mentioned by the commenter is presumed to be Pub. L. 98–72 and FPR Temporary Regulation 75. Pub. L. 98–72 amended the Small Business Act to improve small business access to Federal procurement information by making it harder for agencies to award sole source contracts. The commenter appears to be equating the exceptions listed at paragraph (b) of 915.105 as being exceptions to the new synopsis requirements of Pub. L. 98–72. This is not the case and the Department disagrees with the apparent conclusion. The exceptions listed at 915.105(b) are exceptions to the general requirement for competition in its traditional sense. They are different and apart from the exceptions to the requirement to synopsize acquisition solicitations in the Commerce Business Daily which were recently changed by FPR Temporary Regulation 75 as a result of Pub. L. 98–72. The DOE anticipates that a Federal Acquisition Circular will be issued prior to April 1 to assure that this recent legislation is reflected in the FAR. There is no need to change this section of the final rule at this time.

Comment: One commenter questioned the DOE's authority regarding the statement at 915.401 to the effect that subpart 15.4 of the FAR does not apply to special research contracts, program opportuntity notices, or program research and development notices. The reviewer asked whether the DOE had obtained a FAR deviation in this area or had separate statutory authority in this matter.

Response: The intent of the DEAR is recognition that the DOE has developed over an extended period of years several highly specialized types of solicitation and award mechanisms. The DOE has statutory authority to negotiation the Special Research Contract and the Program Opportunity Notice. These authorities include section 31(c) of the Atomic Energy Act of 1954 and section 302c(5) of the Federal Property and Administrative Services Act of 1949 for the Special Research Contract and the Federal Non-nuclear Energy Research and Development Act of 1974 for the Program Opportunity Notice. The Program Research and Development Announcement was developed as a result of experience gained from the Program Opportunity Notice and was first promulgated as part of the Energy Research and Development Administration Procurement Regulation in 1976. Later, it was promulgated, in the DOE–PR following public comment in June 1979. The DOE does not consider any of these special solicitation and contract types to represent a deviation from the FAR. They are supplemental to the FAR. For this reason, they were assigned "70" series numbers (917.71, 917.74, and 917.75 respectively) as described at 901.104–2.

Comment: One reviewer offered several observations concerning 909.5, "Organizational Conflicts of Interest." The reviewer suggested that DOE delete this topic and rely solely on the FAR coverage of this topic. The organization urged that organizational conflicts of interest (OCI) guidance in the FAR be utilized for DOE procurements in lieu of the guidance contained Subpart 909.5. In particular, the organization asserted that, upon completion of a DOE contract, all reports, technical data, etc., are essentially in the "public domain" thereby diminishing any unfair competitive advantage. The organization also noted that the Department's patent policy reduces the potential for OCI and that no fixed term/duration is indicated in the DOE OCI provision (thus imposing a serious and unmanageable restriction on DOE and its contractors).

Response: The OCI requirements contained at Subpart 909.5 reflect the Department's efforts to comply with statutory criteria contained in Pub. L. 95–39 and Pub. L. 95–70. Pursuant to these laws (made specifically applicable to DOE through Section 644 of Pub. L. 95–91), the Secretary of DOE was specifically required to promulgate regulations governing the avoidance of OCI in accordance with specific criteria contained within each of those statutes. Moreover, the OCI regulation that was finalized (44 FR 2556, January 11, 1979), in compliance with the statutory criteria of Pub. L. 95–39 and Pub. L. 95–70, reflected the opinions and recommendations expressed by interested parties commenting on the Department's proposed rule of March 27, 1978, (43 FR 12727).

The Department is not certain it fully understands the specific focus of the particular questions raised by the commenter. If the nature of the inquiries concerns OCI as it applies to research and development contracts, there is in general, little difference between the OCI coverage of the FAR and that of the proposed notice. Pursuant to 909.570–7, OCI disclosure or representation with respect to research and development contracts is specifically required only for research and development conducted pursuant to the Federal Energy Administration Act of 1974, as amended. A general OCI clause (DEAR 952.209–71) is included in contracts falling into that very limited category.

A degree of difference between the proposed rule and FAR OCI requirements does exist with respect to contracts for technical consulting and management support services. The Department has a special contract clause (DEAR 952.209–72) which is to be included in all contracts of that type. This clause does provide a fixed term/duration in its OCI restrictions with regard to information first provided to a particular contractor which will eventually be available to all. Although there are distinctions, as noted above, between the FAR and the DOE proposed OCI coverage depending on the type of contractual situation, in general, the OCI coverage in the FAR and the proposed rule are in agreement. The Department's OCI policy supplements and does not contradict the OCI policy set forth in the FAR. Both are based on the principle of avoiding bias and unfair competitive advantage (see DEAR 909.570–4 and FAR 9.505).

The FAR is not unlike the proposed rule in its recognition of the possible need to guard against OCI *after* contract completion. Again, the important thing

to remember is that the need for OCI coverage depends in large part on the particular *type* of contract. It may be that because of a particular contractual situation (e.g., technical consulting and management support services) more detailed OCI coverage will be necessary; and, depending on the particular factual situation, when OCI coverage is required, it may be necessary to impose OCI restraint (to avoid the circumstances of unfair competitive advantage or bias) that extends *beyond* contract completion. (With respect to technical consulting and management support contracts the fixed term/duration OCI restriction for access to and use of "Internal" data extends for six months after either completion of the contract or until such information is released or otherwise made available to the public (DEAR 952.209–72(b)(2)). Moreover, the FAR specifically implies that the period of restriction will vary (and could extend beyond contract completion) depending on the factual circumstances (see FAR 9.508–2).

In summary, while the circumstances that the commenter has mentioned (reports in the "public domain" reducing the potential for OCI, and patent ownership impacting on the issue of OCI) may affect OCI, the more important point is that need for OCI coverage must first be established; and this depends, in large part, on the type of contract involved. Once the need is established, the type of OCI coverage may very well be affected by factors such as reports being in the "public domain" and patent ownership rights, etc.

Finally, the commenter has also suggested that 909.570–3(a) be modified to remove proposed subcontractors and consultants from its definition in order that a prime not be held in default for an OCI at the subcontractor level. It should first be noted that Pub. L. 95–39 and Pub. L. 95–70 explicitly require that OCI coverage apply to subcontractors. It is for this reason that subcontractors and consultants have been included within the definition of OCI contained at 909.570–3(a). In carrying out these requirements, subcontractors and consultants are required to submit their own OCI disclosure or representation and this is evaluated by the contracting officer who is responsible for making an OCI assessment. The prime is not responsible for either evaluating OCI information or making an OCI assessment with respect to subcontractors or consultants.

The Department may, in certain situations (for example, with respect to technical consulting and management support services), terminate a contract for default in a so-called "breach" situation. This could, for example, be based on a post-award finding that a subcontractor did have an OCI. However, 909.570–10 requires that in these types of situations "every reasonable action to avoid or mitigate the effects of the conflict" be taken before terminating.

Comment: One commenter suggested that 915.501 represented a departure from the FAR definition of "unsolicited proposal." The same reviewer had previously suggested the same thing during the rulemaking which resulted in "Change 7" of the DOE PR promulgated on April 15, 1983 at 48 FR 16450. The reviewer also made reference to Pub. L. 98–72 which contains a definition of "unsolicited proposal" and to FPR Temporary Regulation 75.

Response: The Department had never intended that the statement at 915.501 be taken as a literal interpretation that there is some separate definition of unsolicited proposal with respect to special research contracts which are separately covered at 917.71. The Department's intent had been to highlight the separate treatment afforded unsolicited proposals received from educational institutes under the Department's special research contract provisions at 917.71. To avoid misconception of the Department's intent, the final rule being published today deletes the paragraph entitled "Unsolicited proposals" from 915.501. Additionally, the definition of research proposal at 917.7101(c) is changed by referencing the definition of unsolicited proposal at FAR 15.501.

Comment: One comment suggested that 917.70 regarding cost participation varied from guidance contained in OMB Circulars A–88 and A–124 and requested that universities be exempt from the policy.

Response: The reviewer did not explain how the guidance of 917.70 departed from OMB Circulars A–88 and A–124. The cost participation policy of DOE is general policy with emphasis on cost sharing for demonstration projects. This portion of the policy is necessitated by the Federal Non-nuclear Energy Research and Development Act of 1974, which requires consideration of cost sharing for such projects. Section 917.7001(a) explains when cost sharing is required and 917.7002(c) describes situations in which cost sharing is unlikely. The DOE agrees that a contract with a university for the performance of basic research is not a situation in which cost participation is expected. On the other hand, if a university were to propose a demonstration project then cost participation would be expected. The DOE finds no merit in the suggestion to exempt universities from 917.70. No change is made in the final rule published today.

Comment: One commenter stated that 917.7108–6 which concerns the selection of a field office for negotiation and award of special research contracts ignores the existence of DOE Order 4220.1 which sets forth policy and procedures concerning the cognizant office concept.

Response: DOE Order 4220.1 issued in 1979, concerned a cognizant office concept for contracting with educational institutions. The cognizant office for a particular educational institution is responsible for, among other things, negotiating basic agreements that would contain all the basic terms and conditions for subsequent contract awards by any DOE contracting activity. The order itself is undergoing internal review. If the review reveals a need to amend applicable acquisition regulations, that amendment will be handled through a future rulemaking.

Comment: One commenter observed that 917.71, Special Research Contracts, appears to be a reprint of 9–4.51 of the DOE–PR. The reviewer attached a copy of a letter previously submitted to the Department during the course of a rulemaking relating to Change 7 of the DOE–PR. The commenter suggested that the Department reconsider these earlier suggestions in the context of this rulemaking. The commenter went on to state that the provisions of paragraphs (b)(4), (d), and (e) of 917.7107–1 of the proposed rule, require an extraordinary amount of paperwork and administrative time.

Response: The commenter's observation is correct that 917.71 is merely a rearrangement of 9–4.51 of the DOE–PR. The Department previously considered the commenter's comments regarding Change 7 to the DOE–PR and published its response on April 15, 1983, at 48 FR 16450. The nature of the commenter's earlier comments would necessitate a fundamental reconsideration of the Special Research Contract. Such an action is beyond the scope of this rulemaking. The intent of this rulemaking is merely to implement and supplement the FAR not to establish new policy or make significant changes in previous policy. Due to a minor format change, to correctly include a section title inadvertently omitted in the proposed rule, 917.7107–1 has been renumbered and retitled as 917.7107–2 "Financial arrangements" in this final

rule. The requirements at 917.7107–2(b)(4), and (c) and (d) of this final rule all relate to situations in which the contractor shares in the cost of the project. They are instructional in nature and relate to completion of an Appendix A of the Special Research Contract format. To consider changes in this section would necessitate consideration of changes in other sections of the special research contract format. Such changes are beyond the scope of this rulemaking.

Comment: A commenter suggested that the requirements at 917.7108–1(c) for prior approval of the Contracting Officer to transfer title of equipment to a university contractor is contrary to FAR property provisions.

Response: The first sentence of paragraph (c)(4) of Alternate I of FAR 52.245–5 requires the prior approval of the Contracting Officer. Alternate I is for use when the contract is for the conduct of basic or applied research at nonprofit educational institutions or at nonprofit organizations whose primary purpose is the conduct of scientific research.

Comment: A commenter suggested that 917.7112–4 concerning prior approvals be compressed and simply make reference to portions of OMB Circular A–21 which contains guidance on prior approvals. The commenter also suggested that paragraphs (a) (5), (8), and (9) be deleted.

Response: The DOE prefers to provide the details included in the proposed rule. This prevents misunderstanding which might otherwise occur. For this same reason, the final rule retains paragraphs (a) (5), (8), and (9).

Comment: One commenter suggested that 917.7112–5 fails to recognize that OMB Circular A–88, which applies to Federal contracts as well as Federal grants, has established the concept of cognizant audit agencies. The commenter went on to state that OMB is considering extension to universities and nonprofit organizations of the single audit concept now prescribed by OMB Circular A–102 for awards to state and local governments.

Response: The Department agrees that OMB Circular A–88 involves the assignment of a single cognizant audit agency to individual educational institutions. The proposed rule does not conflict with this circular. If the DOE requires an audit of an educational institution for which another agency has cognizance, the Department will simply rely on the services of that cognizant agency. The Department is aware that OMB is considering such an extension of OMB Circular A–102. The Department will consider any future changes as may be required by the conclusion of OMB's consideration.

Comment: One commenter suggested that Article A–II of 917.7113 contains a different definition of "equipment" in paragraph (a)(2) than that contained in OMB Circular A–21 at paragraph J.13. The same reviewer also provided a general statement that paragraph (a)(5) (regarding indirect cost rates) should be consistent with A–21.

Response: The Department agrees on the issue of definition. The definition is based on a dollar value. The change is made in the final rule to include the $500 threshold currently cited in Circular A–21. The Department believes paragraph (a)(5) is consistent with A–21. However, for other reasons the term "predetermined" is being revised to "applicable" to reflect possible use with nonprofit organizations. No intent is changed. The applicable rates established by the cognizant negotiating agency will be used. They may be predetermined, fixed-carry forward, or other.

Comment: One commenter suggested that Article B–VIII at 917.7113 should be updated to include the more recent OMB Circular A–124 coverage of Patents.

Response: The Department agrees and the final rule includes appropriate updates.

Comment: One commenter suggested that Article B–XI, "Payments", at 917.7113 is inconsistent with the FAR.

Response: The Department's procedures are consistent with the FAR. The issue is clearer when reading 917.7112–3 and paragraph (c)(1) of Article B–XI. The FAR coverage is located at 32.406.

Comment: One commenter suggested that Article B–XIX, "Buy America Act", of 917.7113 is not appropriate to a special research contract providing for research services rather than the acquisition of supplies.

Response: The DOE agrees. Article B–XIX has been removed.

Comment: A commenter suggested that Article B–XXII, "Foreign Travel", of 917.7113 is redundant to paragraph (f) of Article B–XXX "Additional Approvals."

Response: The article is not considered by the Department to be redundant. Article B–XXII is a special provision alerting the contractor to this requirement which might otherwise be missed at Article B–XXX, a lengthy article.

Comment: One commenter suggested that the clause entitled "Preference for Privately Owned U.S. Flag Commercial Vessels" is not applicable to university contracts. The clause questioned is Article V–XXXVII of 917.7113.

Response: DOE agrees that ocean transportation of supplies is unlikely under a special research contract and has removed the clause.

Comment: One commenter suggested that 924.705 be revised to be consistent with OMB Circular A–124.

Response: The cited reference has been renumbered as 927.705 in the final rule. These provisions are not inconsistent with OMB Circular A–124. Pub. L. 96–517, provides small businesses and domestic nonprofit organizations the right to elect to retain title to subject inventions. DOE has separate statutory authority to grant patent waivers. The notice has been expanded to point this out and to explain that small businesses and domestic nonprofit organizations normally need not request a waiver since they have the right, pursuant to Pub. L. 96–517 and OMB Circular A–124, to elect to retain title to subject inventions.

Comment: One commenter suggested that Part 927, "Patents, Data and Copyrights" be reserved pending publication of such coverage in the FAR.

Response: The DOE has elected not to reserve Part 927. Pending FAR publication on this subject, DOE has chosen to provide that OMB Circular A–124 coverage be extended to small businesses and domestic nonprofit organizations. Patent coverage for other organizations will continue to be that found at 41 CFR Part 9–9. The final rule published today explains at 927.3 the Department's treatment of this topic. The DOE's statutory patent policy necessitates that the Department maintain this coverage in the final rule. When FAR coverage is available, the Department will make such adjustments as may be required.

Comment: One commenter pointed out that 931.205–18 restricts the allowability of independent research and development costs by requiring that the relevance of these costs to DOE be demonstrated. The commenter suggested that this section be deleted on the basis that the test of allowability should be uniform regardless of agency involved.

Response: DOE does not agree and follows a policy that funds authorized for payment of cost allocation for IR&D programs must be expended only for efforts relevant to the mission for which the appropriation was made.

Comment: One commenter stated that paragraph (a)(1) of 932.7104, "Payment Procedures," should be made inapplicable to research contracts with educational institutions. The commenter discussed OMB Circular A–125 (which

does not mandate inspection period) and suggested that delivery of a technical report did not equate to delivery of an end item susceptable to an inspection period. The commenter asked that the section be modified.

Response: It is assumed the commenter is addressing the procedures in 932.7104 requiring inclusion of inspection periods in research contracts. The Department does not agree that technical reports under research contracts are not receivables subject to oversight and review. Such reports are necessary before final payments and closeout of a contract can be accomplished. In the Department's view, the payment procedures presented at 932.7104 are applicable to all contracts except the exemptions at 932.7103. No change is made in the final rule.

Comment: One commenter suggested that 932.7107–1 did not take cognizance of the fact that university contracts are usually funded on an advance payment basis either through a letter of credit or by advance Treasury Check. The commenter went on to suggest that 932.7107–1(b) be revised to exclude university contracts and to add an additional sentence to provide that the "Advance Payment" clause at FAR 52.232–12 be included in university contracts.

Response: The Department cannot exclude university contracts from use of the "Allowable Cost and Payment" clause at FAR 52.216–7 as it is required by the FAR for cost reimbursement contracts. When advance payments are to be furnished, the FAR itself explains that the clause, "Advance Payments," at FAR 52.232–12 with its Alternate IV is to be used. It is not proper for the DEAR to restate FAR guidance.

Comment: One commenter suggested that the intent of the guidance at 936.603–72(b) "Evaluation of qualifications and performance data," would be enhanced by adding the phrase "unless no satisfactory response is received from any other compatible highly qualified firm" between the word "considered" and the words "and where size and simplicity."

Response: DOE agrees and has adopted the suggestion. Subsection 936.603–72(b) is found at 936.602–3(c)(1) of the final rule.

Comment: A commenter stated that the definition of "capital equipment" at 945.101 differed from that in OMB Circular A–21. The proposed rule spoke of an acquisition cost of $1000 or greater and a service life of 1 year or more while the OMB definition speaks of an acquisition cost of $500 or greater and a useful life of greater than 2 years.

Response: The DOE could not find a definiton of "capital equipment" in Circular A–21. That circular speaks to definitions of "Equipment" and "Capital Expenditures" which have different meanings. "Capital equipment" is equipment for which the "capital expenditure" was $1000 or more. This definition was established for accounting, reporting and control purposes. Circular A–21 deals with the allowability of certain cost reimbursements by the Government. Prior to the publication of this rule, DOE used a threshold of $500. The explanation for this is that DOE's previous, and earlier, definition was based on a definition at Subpart 12.5, "Property," of the General Accounting Office Policy and Procedures Manual for Guidance of Federal Agencies. That manual used the $500 threshold. More recently the General Accounting Office issued an opinion, B114365(2), April 4, 1980, that revised the threshold upward in light of inflation and in the interest of reducing administrative costs of managing low cost property items. The DOE definition reflects this more recent decision dealing with reporting and control. A–21 shall continue to apply for reimbursements of cost under a contract with an educational institution.

Comment: One commenter stated that no 945.608–2 could be found even though 945.608–5 refers to it.

Response: This was the result of an error in the Federal Register. The title line for this section was inadvertently omitted on page 43880, although the text was included and the section was listed in the Table of Contents at page 43874. The title line should have appeared below the third sentence of 945.607–2 and above the paragraph designated (b)(1).

Comment: A commenter noted that 952.215–18, "Order of Precedence," makes reference to a provision 952.215–1 which could not be found.

Response: The Department agrees and the reference in 952.215–18 has been removed as there is no provision at 952.215–1.

Comment: One commenter was critical of the Department's policy at 972 and implementing clauses at 952.272 concerning "Foreign Ownership, Control or Influence" (FOCI) as related to universities. The commenter considered the provisions to be unduly burdensome for universities which have numerous foreign involvements such as foreign students, exchange programs and cooperative research programs. The commenter asked that universities be exempt from these policies. Also, the commenter thought that including unclassified, sensitive information in the FOCI provisions was inappropriate.

Response: The Department has relocated the FOCI provisions to 904.70 in order to consolidate provisions of an administrative nature. The solicitation provision and contract clause have been moved to 952.204–73 and 952.204–74 respectively. In response to this commenter's and others' concern about including unclassified sensitive information in the FOCI provision, DOE has eliminated this information from the scope of this provision. Now, only contractors requiring access to classified information and special nuclear material must comply with the FOCI provision. In response to the commenter's more general concern, the Department points out there are few instances in which this subpart would be applicable to universities. Very few universities have contracts that require access to classified information or special nuclear material. DOE's primary concern is that the classified information or special nuclear material be protected from coming under FOCI. The DOE believes that universities, when seeking a DOE contract which requires access to classified information or special nuclear material, can answer the questions as completely as possible listing any qualifications. DOE cannot exempt universities from complying with the provisions of this subpart just as DOE has not, and will not, exempt universities from receiving, when necessary, facility security clearances or security clearances for individuals.

Comment: One commenter offered several comments regarding specific sections of Part 970 including a general observation that the proposed rule appears to mix together differing management concepts. The commenter also suggested the possibility of forming a task group to review this portion of the new regulation with the intent of clarifying it.

Response: The content of Part 970 has evolved over an extended period of years and can generally be traced to procurement regulations of the Atomic Energy Commission, the Energy Research and Development Administration, and the Department of Energy. The same provisions are, in general merely being promulgated as Part 970 of the Department of Energy Acquisition Regulations that implement the new Federal Acquisition Regulation. Establishment of a task group to review Part 970 is beyond the scope of this effort. The rulemaking, being finalized today (as was explained in the Preamble of the notice of the proposed rule) does not establish new policy. It is, in

general, a reformatting of the existing DOE–PR, with deletion of old portions which would duplicate new FAR coverage, and the insertion of necessary Departmental procedures at those places the FAR requires agency implementation. No action is being taken, at this time, on the commenter's specific comments relating to 970.22, "Application of Labor Policy;" 970.31, "Contract Cost Principles and Procedures, 970.44, "Contractor Procurement;" or 970.52, "Contract Clauses for Management and Operating Contracts." The Department is, however, making changes based on the two other comments made by this commenter. Concern was expressed that the proposed rule did not contain the provision previously found at DOE–PR 9–50.601–2(b) which authorized a contractor with an approved purchasing system to make determinations of nonavailability from domestic sources for individual acquisitions not exceeding $25,000. The commenter anticipated delays in obtaining approval to acquire items clearly not available from domestic sources. To alleviate this concern, a section 970.2501 has been added which references the list of excepted items found at FAR 25.108(d). The commenter also stated that 970.1508–408(a) did not discuss the exemptions normally available regarding submission and certification of cost or pricing data. Section 970.1508–408 has been corrected in the final rule to read 970.1508–1, "Cost or Pricing Data." A new paragraph (b)(3) has been added to this subsection to note that the exemptions at FAR 15.804–3 apply to subcontractors under management and operating contracts.

Comment: One commenter noted that 970.2270–4(e), "Conduct of employees and consultants of DOE Management and Operating certain other contractors," and contained an extraneous and misleading statement: "Therefore, there is no general prohibition against employees as other citizens." The commenter suggested it be deleted.

Response: The statement was the result of a typographical error. It has been deleted. The corrected section has been renumbered and relocated to 970.2272.

In addition to the changes resulting from public comments received pursuant to this rulemaking, the Department wishes to highlight four areas in this final rule. They involve Subpart 909.4, "Debarment, Suspension, and Ineligibility;" Part 950, "Extraordinary Contractual Actions," Part 972, "Foreign Ownership, Control or Influence Over Contractor;" and Part 953, "Forms."

As was mentioned in the notice of proposed rulemaking, DOE has been conducting a separate rulemaking concerning its procedures regarding the debarment or suspension of contractors and assistance recipients. The purpose of the separate rulemaking was to establish uniform procedural coverage of this topic for financial assistance recipients as well as contractors. These procedures have been placed at 10 CFR Part 1035. Completion of this separate rulemaking, published in the **Federal Register** on February 3, 1984, at 49 FR 4314 necessitated minor revision of 909.4. The coverage being included in the final rule published today directs readers to 10 CFR Part 1035 for guidance concerning debarment and suspension and advises that the FAR is the source for guidance concerning ineligibility. In addition to 909.4, 944.202–1, 944.202–2, 944.303, 944.305–2, 970.4403(f), and 970.5204–22 have also been amended.

At Part 950, "Extraordinary Contractual Action" of the final rule published today the Department has made the requirements of FAR Part 50 applicable to the processing of claims under Pub. L. 85–804. As such, the Department applies the requirements of FAR Part 50 to DOE without further implementation. Any future changes to Departmental policy and procedure in this area will be undertaken through a separate rulemaking.

The proposed rule contained Part 972, Foreign Ownership, Control or Influence Over Contractor. The FOCI provision in the rule being published today is being relocated from Part 972 to 904.70 because this provision is more appropriately placed in Part 904 which discusses administrative matters.

This subpart is intended to help DOE identify and prevent situations in which FOCI over contractors with access to classified information and special nuclear material may pose an undue risk to the common defense and security. The DOE has been developing this provision through a separate rulemaking as an amendment to the DOE Procurement Regulations (See notice of proposed rulemaking, 48 FR 34396, July 28, 1983). The final rule amending the DOE procurement regulation (See 49 FR 7374, February 29, 1984) addressed the public comments received and the specific changes made resulting from the comments. That discussion is not repeated here.

The final rule published today substantively contains the same language as the final rule on FOCI which was incorporated into the DOE procurement regulation. The following summarizes the significant changes that have been made to the FOCI provisions and that were discussed in the February 29 **Federal Register** rule mentioned above. Unclassified sensitive information which was previously included in the scope of the subpart is now excluded. In addition to focusing on the DOE's evaluation efforts, on potential threats to classified information and special nuclear material, this change allows for a simplified process that will enable DOE to monitor FOCI on a corporation-by-corporation basis, utilizing the existing security facility process, rather than on a contract-by-contract basis. The revised language also includes examples of types of plans that can be utilized to mitigate the foreign influence, if deemed necessary. Finally, a new subsection has been added describing when contract termination will be considered.

The Department has deleted Part 953, "Forms," in the final rule being published today. Part 53 of the FAR contains contract related forms for use by Government employees and those seeking or having Government contracts. The DOE has elected to utilize the FAR forms without introducing new forms of its own. Forms for use by DOE employees for internal administrative purposes will be developed and utilized in accordance with the DOE Directive related to forms. Such internal forms are not considered to be of interest to the general public and the DOE does not propose to publish such forms in the DEAR. If the Department does develop forms for use by the public, it will publish these through rulemaking and obtain such approvals as necessary.

In addition to the actions discussed above, numerous revisions, additions, edits, deletions and sequential repositionings are being made in the text published in the final rule today to correctly identify and align certain parts, subparts, sections, or subsections into a more logical or required location. Corrections to erroneous citations and cross references and paragraph number changes are being made to properly tract the numbering system of the FAR. Many of these revisions were suggested by the **Federal Register**. Syntax changes are also being made to some text that appeared in the proposed rule to more clearly and succinctly express its intent and meaning. In some cases, relatively minor substantive changes have been made. The revisions are summarized as follows:

(1) Subsection 901.104–70 of the proposed rule described a procedure by which the Department's regulation

would show certain parts or subparts as "Reserved" if there was no need to implement the FAR at such parts or subparts. Further discussion with the staff responsible for publication of the Code of Federal Regulations has indicated there is no need for such a practice. If the DEAR does not implement or supplement a particular FAR part or subpart, there will be nothing indicated and the reader will rely on the FAR only. This subsection of the proposed rule is deleted in the final rule.

(2) Subsection 901.603–72(b) was revised to delete the paragraph as unnecessary. As a result, paragraph (c) becomes paragraph (b).

(3) Section 902.1, "Definitions," was changed to delete the authority to ratify unauthorized contract and/or contract modification awards from the listing of authorities of the "Head of the Contracting Activity." This results from an earlier change in the DOE–PR at 47 FR 21539, May 19, 1982, which had not been noted in the proposed rule.

(4) Subsection 903.101–3 regarding "Standards of Conduct," was amended to add a requirement that contracting activities maintain a "Standards of Conduct Notebook for Acquisition and Assistance personnel" and that DOE acquisition and assistance personnel review it on an annual basis and certify their understanding of its contents.

(5) Section 904.403 was amended to delete the specific dates noted for each DOE Order cited therein. The most current order is always applicable.

(6) Subsection 904.601–70 was amended to delete the reference to Standard Form 295 from paragraph (b)(4) for reasons explained in the discussion of public comments of this preamble. The reference to Part 953 as the place where forms illustrations are found was also deleted by the omission of subparagraph (b)(5) of this section since there is no Part 953.

(7) Subsection 904.601–70 was revised at paragraph (b)(2) and (b)(3) to refer to "small purchase limit" rather than the proposed specific dollar limitation of $10,000.

(8) Subpart 904.70 in the proposed rule covered representations and certifications. This section was rewritten and moved to 915.406–5. Coverage on "Foreign Ownership, Control, or Influence over Contractors" was added as a new section under 904.70. This had been located at Part 972 in the proposed rule. Changes were made as was explained in the public comments section of this preamble.

(9) Section 905.403 was edited to add a new paragraph (b)(3) to provide that contracting officers advise the Office of Congressional Relations 48 hours prior to the time of contract execution for Special Research Contracts of $50,000 or greater.

(10) Section 907.102 was amended to delete reference to specific DOE Orders involving acquisition planning and in lieu thereof referenced the complete series of 5700 series of DOE Orders.

(11) Section 908.7119, regarding the acquisition of "gas masks and canisters" and was deleted as these items are no longer stockpiled by DOE.

(12) Section 908.7120, regarding acquisition "masking devices" was deleted as they are no longer stockpiled by DOE.

(13) Section 908.7121(c) was amended to add text, inadvertently omitted in the proposed rule, that lithum is available at no cost through the DOE, Oak Ridge Operations Office.

(14) Subsection 909.104–70 was amended to delete the "–70" reference and to reidentify the subsection as 909.104–1, "General Standards," to be the same as FAR. Paragraphs (a) and (c) were reidentified as paragraphs (b) and (g) respectively (the appropriate FAR paragraphs which the DOE text implements).

(15) Subsections 909.570–14 and –15 were created to include, as a separate section, the examples and format language included the proposed rule as Appendix A and B to 909.570. The **Federal Register** suggested the change.

(16) Section 910.004 was revised to identify the language in the proposed rule as paragraph (f) and give it a title, "Specifications for concrete using fly ash." It is now consistent with FAR. A new paragraph (g) was added to contain the language included in the proposed rule at 917.7200. The paragraph more directly deals with specification requirements.

(17) Section 915.105, "Competition" was revised at (a)(1) to raise the threshold for documenting noncompetitive small purchases from $500 to $1,000 in order to conform to FAR.

(18) Section 915.105(c)(2). Regarding the format for a "Justification for Noncompetitive Acquisition" has been removed. This is internal guidance adequately covered in the DOE Directive System.

(19) Subsection 915.106–1 was deleted as unnecessary. FAR coverage will suffice.

(20) Section 915.200 was amended to redesignate paragraph (1) as paragraph (b) and move paragraph (2) to new 915.201 as paragraph (a).

(21) Section 915.201 was added as a new section titled "National Emergency." The text at paragraph (2) of 915.200 was relocated as paragraph (a). The language in the proposed rule at 915.201(b) supports the FAR text at 915.201(a).

(22) Section 915.404 was deleted. The language in FAR 15.404 "Presolicitation Notices and Conferences," at paragraph (c), was deemed sufficient upon re-evaluation.

(23) Subpart 915.5 was revised to more closely follow the sections and subsections of the FAR. Separate "–70" DOE designations were not considered necessary on re-evaluation. Most of the revised language is additional implementation of FAR text. Only editorial changes were made in the text. Location was the major revision and is recapped as follows:

915.503: Added as a new section titled "General." Relocated paragraph (a) from 915.504–72 as complementary language to FAR paragraph (c)(5) of FAR 15.503. Added new language as a paragraph (f) to better explain that unsolicited proposals for the performance of support services are not acceptable.

915.504: Added as a new section. See 915.504–70.

915.504–70: Re-identified as 915.504 Advance Guidance except paragraph (e) which moved to a new subsection 915.506–2 "Evaluation." 915.504–70 deleted and last sentence of paragraph (b)(7) was deleted as being unclear.

915.504–71: Relocated as paragraph (g) of new subsection 915.506–2 since it deals with evaluating a contractor per Subpart 909.1 and FAR. No text change. 915.504–71 deleted.

915.504–72: Relocated paragraph (a) as paragraph (c)(5) of new 915.503 General. Pargraph (b) was reidentified as 915.505, Content of Unsolicited Proposals. Paragraph (b)(5) of FAR 15.505 deals with the thrust of this paragraph. A correct reference to subpart on Cost Participation was added. Paragraph (c) was relocated under the new subpart 915.506–2 Evaluation. 915.504–72 deleted.

915.505: A new section, "Content of unsolicited proposals" was added. See 915.504–72 Comment.

915.506: Re-positioned paragraph (a) to a new 915.509 Limited use of data, which was deemed a more appropriate location.

915.506–70: Paragraph (a) was relocated as paragraph (b) of a new 915.506–1, "Receipt and Initial Review." This language supported the text of FAR 15.506–(b) thus the new section believed more appropriate than a –70 DOE supplement. The remaining paragraphs of this section were

identified as more appropriate to FAR 15.506–2, thus repositioned a new 15.506–2.

915.506–1: Added as a new section titled "Receipt and Initial Review" in order to clearly implement FAR. Paragraph (a) of 915.506–70 relocated to this section as paragraph (b) which implements FAR 915.601–1(b).

915.506–2: Added as new section, "Evaluation". Paragraph (c) of 915.504–72 of the proposed rule repositioned to this section to support text of FAR 15.506–2.1.

915.507–70: Deleted "–70" Reference and re-identified as paragraph (d) under a new 915.507 Contracting Method. No need for a supplemental DOE paragraph.

915.509: Added as new section titled "Limited Use of Data." Paragraph (a) of 915.506 relocated to this section Text was appropriate to use of data.

915.570: Deleted as the text was placed at 943.170.

(24) 915.611(d) Moved, without change, to 915.612(g).

(25) Subsection 915.805–70 was edited to add a paragraph (e) which was inadvertently omitted from **Federal Register** issuance. The paragraph permits contracting officers to waive the requirement for audit.

(26) Subsection 915.971–2 was edited to delete the last sentence included in the proposed rule. Internal coordination of this language indicated it was being misunderstood and was not clear. The idea was added back as a new paragraph (h) of 915.971–4.

(27) Subsection 915.971–4 was revised to add (in addition to paragraph (h) referenced above) a new paragraph (g) to reflect increases to fee schedules that may be necessary if a fixed price contract is negotiated. The curves are based on a cost reimbursement type contract.

(28) Subsection 915.971–5 was revised. Paragraph (a) was rewritten and subdivided into additional paragraphs to provide a better understanding of what was intended and the applicability of the additional paragraphs in the subsection. Language was added to include specific adjustment factors if fixed price contracts are negotiated or the contractor furnishes its own financing. These were overlooked in the proposed rule.

(29) Section 915.971–6 was amended at (a)(10) to add language to identify the term "equipment" to be that which becomes Government-owned. Paragraph (a)(10) was amended to state equipment addressed at this section does not include "special equipment."

(30) Section 917.7007 was added to provide guidance on in-kind contributions. This guidance was omitted from the proposed rule due to an administrative oversight. The provision was in the DOE–PR 9–4.5907 as a result of rulemaking completed on July 22, 1983, at 48 FR 33642.

(31) Subsection 917.7106–2 was amended at paragraph (g) to add a new subparagraph (1) to indicate that field offices are responsible for the cost/price analysis of a SRC proposal.

(32) Section 917.7107; and Subsection 917.7107–1 were amended to correct format errors. Section 917.7107 was retitled "Contract Content," Section 917.7107, "General," in the proposed rule was reidentified as subsection 917.7107–1 "General," in the final rule. Subsection 917.7107–1 of the proposed rule was reidentified as 917.7107–2, "Financial requirements," in the final rule. Minor text edits made and the paragraphs were subdivided for easier reading.

(33) Section 917.7113 was amended by adding "or other nonprofit institutions" to the title line so that it now reads "Format for Special Research Contracts with educational institutions or other nonprofit institutions." This corrects an error as Special Research Contracts have previously been available to both educational institutions and other nonprofit institutions.

(34) Subpart 917.72 was relocated in paragraph (g) of 910.004 with minor edits to fit a single paragraph format.

(35) Subpart 917.73 was relocated as a paragraph at 945.303–1 with minor edits to fit a single paragraph format.

(36) Subpart 917.74 was amended to reidentify this subpart as 917.72 and to renumber all sections and subsections accordingly. Additionally, the text of 917.7401 (proposed rule) was added to subpart 917.7400 (proposed rule) "Scope of part," and 917.7401 (proposed rule) was deleted.

(37) Subpart 917.75 was amended to renumber the subpart as 917.73.

(38) Subpart 917.76 was amended to renumber the subpart as 917.74.

(39) Subpart 917.77 was amended to renumber the subpart as 917.75.

(40) Subsection 917.7502–2(b)(2) was reidentified as 917.7301–2(b)(2) and was amended to add a requirement that concurrence be obtained from the Procurement Director of the office assigned to issue a Program Research and Development Announcement before that solicitation technique is chosen.

(41) Section 919.102 of the proposed rule has been deleted because the final FAR includes this information.

(42) Subsection 919.502–2 was added to emphasize that architect-engineer acquisition procedures must conform to the Brooks Act, (Pub. L. 92–582) as implemented at FAR Part 36.

(43) Subsection 919.705–5 was added and titled "Awards involving subcontracting plans." A paragraph (b) was added to implement the FAR.

(44) Subsection 919.705–6 was added and titled "Postaward responsibilities of the contracting officer." A requirement was added to require the contracting officer to submit a copy of the information given to SBA, as a result of FAR 19.705–6, to the Office of Small and Disadvantaged Business Utilization, DOE HQ.

(45) Section 920.302 was deleted. This section limited the usage of certain clauses in DOE Construction contracts.

(46) Subsection 922.403–70, "General," was changed to become 922.470 "Applicability." The unnumbered paragraphs of the proposed rule were numbered (a) and (b) respectively. Subpart 922.4 of the FAR was reserved. Subpart 922.4 had anticipated a FAR subpart. Since FAR 22.4 was in essence, reserved, subpart 922.4 (proposed rule number) has been renumbered with minor reformating to more properly reflect the content to be that of the DOE.

(47) Subsection 922.403–71, "Noncoverage (Davis-Bacon and Copeland Acts)," was amended to move the paragraph cited therein to other sections. Paragraphs (a) (1), (2), (3), (4), (5), (6), (7), and (8) were repositioned as subparagraphs of paragraph (c) of the new section 922.470 "Applicability," discussed in note (46). Paragraphs (b) and (c) were moved to be paragraphs (d) and (e) of the new 922.470.

(48) Subsection 922.403–72, "Administrative controls and criteria for application of the Davis-Bacon Act in operational or maintenance activities," was relocated to Part 970 as 970.2273 since the subject matter dealt with operating contracts it was considered more appropriate to Part 970, "DOE Management and Operating Contracts."

(49) Subsection 922.403–7301 contained unnecessary language and was deleted.

(50) Subsection 922.403–7302, "Specific examples," Was renumbered as 922.471 and titled, "Decisions and other guides in difficult areas." The text of this renumbered section was unchanged except for paragraph (h) "Experimental Installations;" which was moved to become paragraph (c) of the 970.2273 established in part 970. The text of this paragraph dealt with work in DOE owned facilities by operating contractors.

(51) Section 922.404, "Wage Determinations," included no text in the proposed rule. This section was renumbered as 922.472 and the paragraphs at 922.404–2 and 922.404–70

were added to it and renumbered accordingly.

(52) Section 922.405, "Administration and enforcement," was renumbered as 922.473. Paragraphs (a) and (b) of 922.405–70, "Responsibilities," were relocated to this section.

(53) Subsection 922.405–70, "Responsibilities," was deleted. Paragraphs (a) and (b) were relocated to 922.473 as (a) and (b).

(54) Section 922.470, "Applicability," was added. See Note (46).

(55) Section 922.471, "Decisions and other guides in difficult areas," was added. See note (49).

(56) Section 922.472 "Wage determinations," was added. See note (51).

(57) Section 922.473, "Administration and enforcement," was added. See Note (52).

(58) Subpart 922.70 was added as a new subpart as a result of repositioning the text previously contained in the proposed rule at 970.2270–1.

(59) Section 922.803 was amended to delete paragraph (c) regarding "referral lists." Such referral lists are not maintained for the purposes cited in (c).

(60) Section 923.7001 was amended to delete the second paragraph as it involved management and operating contracts which are separately covered at Part 970.

(61) Section 932.7103 was amended to add a paragraph (e) to clarify that the interest penalties do not apply to contracts awarded prior to October 1, 1982, unless provided for by a contract clause.

(62) Subpart 924.70 was relocated to 927.70 in the final rule. Narrative material in this subpart that duplicated material appearing at 927.402–4 of the proposed rule has been deleted from the final rule as relocated at 927.70. Solicitation and contract provisions that duplicated provisions contained in 952.227 of the proposed rule have been deleted from the material relocated at 927.70.

(63) Subsection 924.702 was amended to delete the text at paragraph (c). It duplicated language at 952.227–76 and was unnecessary.

(64) Section 924.703 of the proposed rule has been deleted with an instruction added at 927.7003 to use the notice at FAR 15.413–2(e) for solicited proposals and FAR 15.509(d) for unsolicited proposals in its stead.

(65) Subsection 925.902–70 was deleted in the final rule.

(66) Section 925.903 was added to require submission of determinations and reports required therein to the Procurement Review Office Hqs.

(67) Subsection 927.402–4 dealing with the treatment of data under management and operating contracts was moved to 970.2702 so that Part 970 will be a single repository, to the extent possible, of regulations governing such contracts.

(68) Subpart 927.70. See item (62) above.

(69) Section 927.7000(c) which appeared in the proposed rule at 924.7000(c) and 952.227–74.4, has been restyled as a representation by the external evaluator to require their signature.

(70) Section 927.7002, in the final rule which appeared at 927.702 in the proposed rule was amended to direct the use by proposers of the proprietary data marking legend at FAR 52.215–12 for solicited proposals and FAR 15.509 for unsolicited proposals. This is in lieu of the single DOE Notice that appeared in the proposed rule at 927.702(c). Conforming changes have been made elsewhere.

(71) Subsection 928.101–70; 928.102–70; and 928.103–70 were added as new subsections covering review requirements for the different types of bonds. These subsections resulted from clarifying the intent of 928.106–70 of the proposed rule which was then deleted. The intent of the change was to align the DOE review requirements with the applicable bond type.

(72) Subsection 928.106–70 was deleted. See Note (71).

(73) Part 930 was deleted in its entirety. The FAR is adding the same language in its first revision. The DOE language appears unnecessary and would be a duplication.

(74) Subsection 934.005–2 was moved in its entirety to become a section in 970 as its content on mission-oriented solicitations addressed contractors subject to 970 of this regulation. It has been designated 970.70.

(75) Section 935.014 was added and titled, "Government property," to implement the FAR provision that agencies can establish different thresholds for vesting title of property in the contractor. FAR stated $5,000; DOE prefers $1,000. This involves property under research contracts with educational and nonprofit institutions.

(76) Section 935.070 entitled, "Contract Clauses," was added to include a requirement for a "Key Personnel" clause. The clause was added at 952.235–70. The clause, previously found at FPR 1–7.404–6, appears to have been inadvertently omitted from FAR. The clause is needed for research contracts.

(77) Section 936.202 was added and titled "Specifications" by deleting the "–70," "–71," and "–72" designations from 936.202–70, –72 respectively. No text changes; only minor edits to accommodate new structure.

(78) Subsection 936.202–72 of the proposed rule was revised to increase dollar limits. The suffix "–72" was also removed as per previous comment. Paragraph (a) includes a provision that allows DOE to charge the full cost of specification and drawing packages for construction solicitations up to a maximum of $100. The actual cost of reproducing packages has sometimes exceeded $100 per set. The limit has been increased to $500 per set.

(79) Subsection 936.602–2, "Evaluation Boards," was added to reidentify text in the proposed rule as an implementation of the FAR text rather than supplemental text. This section includes the information in the proposed rule at 936.603–71(a).

(80) Subsection 936.602–3, "Evaluation board functions," was added to better implement the FAR. It includes the information in the proposed rule at 936.603–72 (a) and (c); 936.603–73; 936.603–74, and 936.603–77.

(81) Subsection 936.602–4, "Selection authority," was added. The text was taken from 936.603.75 and was designated (b) in the new location.

(82) Subsection 936.603–70 was renumbered in the final rule as 936.602–70.

(83) Subsection 936.603–71 was corrected. The identification should have properly read 936.602–3, "Evaluation board functions." The Department has repositioned the first half of paragraph (a) into a new 936.602–2, "Evaluation boards," and renumbered paragraphs accordingly in both the "–2" and "–3" subsections.

(84) Subsection 936.603–72 was deleted. The text was relocated under a new 936.602–3, "Evaluation Board Functions." Paragraph (a) became (a)(2). (b) became c(1) and (c) became (c)(2).

(85) Subsection 936.603–73 was deleted. The language was relocated as paragraph (c)(3) of 936.602–3 to correspond with FAR.

(86) Subsection 936.603–74 was deleted. The text of paragraph (a) became (a)(1) of 936.602–3. Paragraphs (b) and (c) became (c)(4) of 936.602–3.

(87) Subsection 936.603–75 was relocated to 936.602–4, "Selection authority" and the text designated as paragraph (b) to correspond to FAR 36.602–4.

(88) Subsection 936.603–76 was deleted and the text was moved to become part of the existing text at 936.601 "Policy" as it addresses policy and procedure issues.

(89) Subsection 936.603–77, was amended to move text to become

paragraph (c)(5) of 936.602–3 to correspond with the FAR.

(90) Subsections 936.606–70, –71, –72, –73 were renumbered to delete the dash references. Their text becomes part of 936.606, "Negotiations," which addresses price proposals, contract prices and fees.

(91) Subsection 936.606–74 was deleted as unnecessary.

(92) Section 936.670 was deleted as unnecessary.

(93) Subsection 936.600–3, "Work oversight in architect-engineer contracts," was added to provide instruction on and requirements for an inspection clause in architect-engineer contracts. The clause was relocated at 952.236–71.

(94) Section 936.702, "Forms for use in contracting for architect services" was added to furnish instructions for use of the clause at 952.236–70.

(95) Section 936.7200 was deemed to be inappropriate as a separate part on negotiation. Paragraph (a) text was deleted as duplicating 936.605. The text of (a)(1) through b(1)(vii) was properly numbered and moved to be part of 936.605. The remainder of 936.7200 text was retitled as "Acquisition of special equipment," and arranged into appropriate paragraphs 936.7200, "Scope of Part"; 936.7201 "Definitions;" and 936.7202, "Description of Services."

(96) Section 936.7302 "Outline of agreement for rental of third party owned construction equipment" was added to move into Part 936, the third party agreement format published in the proposed rule at 970.3604.

(97) Section 942.000 was rewritten to better define the policy, responsibilities and structure of contract administration in the DOE as compared to the Department of Defense. Sections 942.001, 942.002 were added to establish and describe this relationship and contract administration policies of the DOE.

(98) Section 942.803 was revised at paragraph (c) to more clearly identify the actions of the contracting officer in dealing with questioned cost in auditor reports.

(99) Section 943.170 was added as a result of revisions to 917.7111. The issue deals with modifying a contract to extend it. It was proposed at 917 because the text addresses contracts resulting from unsolicited proposals. Since the issue deals with modifyng a contract to extend the performance period, it was relocated to Part 943.170 as a unique DOE modification requirement. It has been titled "Extension of contracts resulting from unsolicited proposals."

(100) Section 944.101 was amended to delete the first two sentences as being confusing and misleading.

(101) Subsection 944.202–1, "Responsibilities," was added to be more specific in the responsibilities of the contracting officer in consenting to subcontract awards.

(102) Subsection 944.202–2, "Considerations," was added to include a requirement to refer to the DOE Consolidated List of Debarred, Suspended, Ineligible or Voluntarily Excluded Awardees.

(103) Section 944.302–70 was amended to delete the"–70" suffix. Paragraph (a) was edited to clarify the intent of the language in the proposed rule. FAR paragraph (a) allows agencies to establish lower thresholds than the $10,000,000 in FAR if such are considered appropriate for contractor procurement system reviews. The proposed rule imposed a DOE requirement of $5,000,000 in Government sales for DOE cognizant contractors. The final rule amends this to $5,000,000 of sales to the DOE and only in those instances where there is sufficient subcontracting to support a review. Due to the changes in paragraph (a) some of the text in (b) was included in (a) to conform with FAR 44.302(a). Paragraph (c) of the proposed rule was reidentified as paragraph (b) and (c) to be compatible with FAR paragraphs. The last sentence of 944.305–71 was relocated as paragraph (d) of this section.

(104) Section 944.305 was determined to be a duplication of FAR language and was deleted.

(105) Subsection 944.305–1.70 was considered to apply to contracts covered by Part 970. Appropriate language was included in 970.44 and 944.305–70 was deleted.

(106) Subsection 944.305–1.71 was deleted as not applicable as a separate DOE subsection. The text of (a) and (b) was located as paragraph (b) of 944.302 and paragraph (c) was added to 944.302–70 as a separate paragraph (d).

(107) Subsection 944.305–1.72 was reidentified as 944.305–1, "Responsibilities," since FAR 44.305–1 addresses review requirements.

(108) Subsection 944.305–2 was deleted as being duplicative language of paragraph (c) at FAR 305–2 Notification.

(109) Subsection 944.305–3 was deleted. Paragraph (b) was considered to be duplicative of FAR. Paragraph (c) was relocated to 944.307, "Reports."

(110) Section 944.307 "reports," was added to include a portion of the language of old 944.305–3 since it amplifies the current language of FAR 44.307 Reports.

(111) Section 945.000 "Scope of part," was created to clarify the applicability of the DOE rules cited in the Part 45 and FAR 45 to DOE management and operating contractors and restated in a different way, the applicability of special test equipment and special tooling requirements of the FAR previously stated at 945.102–72 of the proposed rule.

(112) Section 945.101 was revised to delete the inclusion of special test equipment and special tooling, which was incorrectly stated.

(113) Subsection 945.102–72 was deleted since the subject was addressed in a new 945.000.

(114) Subsection 945.303–1 was added to state DOE policies concerning furnishing of special nuclear materials to contractors. This represented a repositioning of material in the proposed rule at 971.73.

(115) Subsection 945.502–71, was amended at paragraph (b) to provide for physical inventories once each year. The paragraph discusses the inventory and control of sensitive items.

(116) Subsection 945.505–14 was revised to indicate new dates for submission of the semiannual reports required by this section.

(117) Subsection 945.570–5 was revised at paragraph (d) to add a reference which establishes mileage standards for specific types of vehicles. A statement was also added concerning the standard against which vehicle use must be measured.

(118) Subsection 945.570–8 was revised to delete the last sentence on contracting officer guidance in preparation and submission of the motor vehicle reports.

(119) Subsection 945.603–71, "Disposal procedures for radioactively contaminated personal property," was added to reference 41 CFR 109–45.50 regarding procedures for disposal of radioactively contaminated property.

(120) Subsection 945.607–2 was amended to move paragraph (b) into a new 945.608–2, "Standard Screening." Paragraph (b) and (e) were rewritten into a single paragraph (b). There was no change in content.

(121) Subsection 945.608–70 was deleted as it duplicated 945.607–2.

(122) Subsection 945.608–2 was added and titled, "Standard screening." The text of paragraph (b) of 945.607–2 was relocated to a paragraph b(1). The text covered standard screening which was the subject of FAR 45.607.

(123) Section 947.508 was added at the request of Maritime Administration. The title is "Procedures," and covers ocean transportation by U.S. Flag Vessels. The

added text requires copies of contract awards involving foreign suppliers, which will require ocean transportation, be forwarded to the Maritime Administration.

(124) Section 952.100 was amended to use the term "contract clauses" in lieu of the term "general provisions." The FAR uniform contract format references inclusion of "clauses" and not "provisions." The term "provisions" is assigned for use in solicitations.

(125) Subsection 952.212–72, "Uniform Reporting System Clause," of the proposed rule was deleted from the final rule.

(126) Subsection 952.215–18, "Order of Precedence." of the proposed rule was revised to follow the correct section topics of the uniform contract format and to reflect post award situations. The final sentence of this subsection, which referred to 952.215–1, was deleted as this was an erroneous reference mistakenly left in from a preliminary draft of the notice of proposed rulemaking.

(127) Subsection 952.215–70 was added as a new solicitation provision entitled "Required Subcontractor Representations and Certifications." The purpose of the provision is to alert contractors to the need to obtain certain certifications from their subcontractors if their own contracts include certain clauses listed therein.

(128) Subsections 952.222–70 and 952.222–71, both dealing with clauses for determinations, were deleted. The clauses were considered superfluous and DOE will rely only on the FAR coverage in this area.

(129) Subsection 952.227–74.2 "Rights to Proposal Data" of the proposed rule has been relocated to 952.227–82.

(130) Subsection 952.227–80 was added to include a new solicitation provision entitled "Technical Data Certification." It's purpose is to assure that DOE does not pay monies to acquire technical data which it or another Government agency may have already acquired or has the right to acquire. The provision also requires the offeror or proposer to identify any proprietary data it intends to withhold pursuant to the "Rights in Technical Data" clause at 952.227–75. It has been included because many DOE contracting activities have as a practical mater been using such a certification in their solicitations. The second portion of this certification implements the requirements of the solicitation provision at 952.227–83.

(131) Subsection 952.227–81 was added to include a new solicitation provision entitled "Royalty Payments Certifications." The purpose of the clause is to assure that the DOE does not include royalty payments in a contract price if it or another Government agency has previously paid for such rights. Several DOE contracting activities had been using this provision in their solicitations. This certification implements the requirements of 41 CFR 9–9.111, as incorporated by 927.300 of this regulation.

(132) Subsection 952.227–82, "Rights to proposal data" was added. See comment (129).

(133) Subsection 952.227–83, "Rights in Technical Data Solicitation Instruction" was added to relocate the language which appeared in the proposed rule at 924.704–2 and 952.227–74.5 dealing with identification of proprietary data.

(134) Subsection 952.227–84, which appeared in the proposed rule at 924.705 and 952.227–74.6, describing the right to of proposers to request patent waivers has been revised to point out that small businesses and domestic nonprofit organizations may retain title to subject inventions; pursuant to OMB Circular A–124 and Pub. L. 96–517.

(135) Subsection 952.231–70 was added to include a clause entitled "Date of Incurrence of Costs." The clause was previously used by DOE, when appropriate, and its original source is FPR 1–7.204–3. Its use is appropriate, in cost-reimbursement type contracts when the parties wish to record in the contract their advance agreement on certain items of cost. The nature of DOE's mission is such that it has a high proportion of cost-reimbursement type contracts and it has chosen to continue use of this clause by placing it in the Department's implementing regulation.

(136) Subsection 952.232–70 was amended to clarify its intent. The language in the proposed rule at paragraph (c) required the contracting officer to insert the number of calendar days after receipt or completion of work to establish when "constructive acceptance" would be deemed to occur. The intent was to esablish that constructive acceptance would occur on the last day of the stated inspection period. To preclude potential misinterpretations, the second sentence of paragraph (c) was appropriately revised.

(137) Subsection 952.232–71 was amended to add a new provision at paragraph (d) establishing that a payment will be considered to have been made on the date the Government check was dated or an electronic transfer of funds transfer payment. This change pursuant to guidance contained in Federal Procurement Regulations—Temporary Regulation 66, Supplement 1. Proposed paragraph (d) renumbered as (e).

(138) Subsection 952.232–73 amended to add new provision (d) requiring for contractors to identify the contractor's authorized official for providing the required payment data. This change based on guidance contained in the Federal Procurement Regulations—Temporary Regulation 66, Supplement 1. Proposed paragraph (d) renumbered as (e).

(139) Subsection 952.235–70: See Note (76) above.

(140) Subsection 952.236–71 was added to include the text of a clause prescribed for inclusion in architect-engineer contracts as 609–3. The text is relocated from 936.

(141) Subsection 952.250–1, "Nuclear Hazards Indemnity" was edited to change the term "article" as stated in the clause at this section to read "clause." The term "article" is no longer used in the FAR system. The term "clause" is preferred. The "–1" reference was also changed to a "–70" reference to indicate it is a DOE supplemental clause.

(142) Subsection 952.250–2, "Nuclear Hazards Indemnity—Product Liability" was edited. See comment for 952.250–1 for description of change. The "–2" reference also changed to "–71" to indicate it is a DOE clause.

(143) Subsection 952.250–70 was added by renumbering 952.250–1.

(144) Subsection 952.250–71 was added by renumbering 952.250–2.

(145) Section 970.0404, "Safeguarding Classified Information," was established in the final rule to remind a contracting activity awarding a management and operating contract that there may be security requirements that must be included therein. Appropriate locations of the required clauses were cited. Four subsections were established. They basically are a restatement of the same language in the proposed rule at 904.4. Edits were made to be consistent with the part 970 format. No new language was added.

(146) Subpart 970.08, "Required Sources of Supplies and Services" was added by moving text which had been at Subpart 970.51 of the proposed rule.

(147) Subpart 970.10, "Specifications, Standards, and other Statement of Work Descriptions" was established in order to relocate the text in the proposed rule at 970.5204–37 from the clauses section. The text states that clause language should be created. (It is not actual clause language as are the other subsections of subpart 970.52.) The text is more properly placed in the subpart that contains the direction that a statement of work is necessary under management and operating contracts.

970–5204–37 was amended to refer to 970.10.

(148) Section 970.1509–1 was amended at paragraph (e) to add language to clarify that approval of the Procurement Executive is necessary if maximum fee amounts are exceeded.

(149) Section 970.1509–4 was amended to paragraph (d) to clarify when the approval of Procurement Executive is necessary.

(150) Section 970.1509–6 was amended to identify situations when the fee schedules may not reflect adequate compensation.

(151) Section 970.1901 was amended at paragraph (a) adding a reference to "52.219–9 as modified by 952.219–9." This addition is intended to clarify that management and operating contracts and their subcontracts will contain the FAR clause on "Small and Disadvantaged Business Subcontracting Plan."

(152) Section 970.1901(d), regarding use of small business concerns, was changed such that all acquisitions of construction by Management and Operating contractors are set aside for small business concerns rather than just those between $10,000 and $3,000,000. As a practical matter, Management and Operating contractors have been setting aside small purchases for small business concerns.

(153) Section 970.2205 was deleted. The language not applicable to management and operating contracts.

(154) Section 970.2207 was deleted. See note for comment (153).

(155) Section 970.2208 was amended to simplify the language. Much of the text included in the proposed rule did not directly address management and operating contractors. The title was also changed to the same as FAR 22.8, "Equal Employment Opportunity."

(156) Subsection 970.2270–1 was moved, as written to Section 922.7001, "Responsibilities." The text is more applicable to prime construction contracts.

(157) Subsection 970.2273 was added and titled "Administrative controls and criteria for application of the Davis-Bacon Act in operational or maintenance activities." This subsection was created by repositioning the text located in the proposed rule at 922.403–72 under the same title.

(158) Subpart 970.23 was established to identify, in appropriate text sections of the final rule, DOE requirements for "Environmental Conservation and Occupational Safety Programs." The language is basically a repeat of what was in the proposed rule at 923.7001 and 923.7002 but edited to appropriate language for Part 970. Paragraphs (b), (c) and (d) of Part 970.2303–2, "Clauses," was included in the final rule to provide the instruction language for applicable clauses. The same as that which preceded the clauses at 970.5204–2(b); 970.5204–28 and 952.233–75 of the proposed rule. To be consistent it was deemed appropriate to move the instruction language into the subpart establishing the need for the respective clause.

(159) Section 970.2701 was amended to add a new paragraph (a) to affirm that in patent related matters, the provisions of 41 CFR 9–9:1 apply to management and operating contracts.

(160) Subpart 970.28 was amended to add a new 970.2870 to include language discussing the applicability of indemnification to operating and management contracts and identifying the contract clause required for management and operating contracts. No new language was developed. It was a restatement of subpart 950.70 of the proposed rule.

(161) Subsection 970.3100–1 was revised to delete references to contract types which were already defined elsewhere and actually had no direct applicability to Management and Operating contracts. Additional examples were added to the definition of direct on-site costs.

(162) Subsection 970.3100–2(a) and (b) were edited to delete an unnecessary and confusing sentence on allocating cost dealing with the same purpose, in like circumstances, and being both direct and indirect. The term final cost objective was also deleted as being misleading under a Management and Operating contract. Unnecessary language relating to overhead expense and its allocation basis was also deleted from paragraph (b). This language was not considered to be directly associated with Management and Operating contractors. The last sentence (b)(4) was deleted as non-applicable since the DOE establishes the accounting period for Management and Operating contracts.

(163) Section 970.3201 was edited to add language to identify the Controller as having involvement in the financing of management and operating contracts.

(164) Section 970.3202(c) was edited to add necessary language to clarify that changes in the specified requirements for special bank account agreements shall not be considered a deviation to the DEAR. Text was added to provide that any additional requirements required by the Treasury Department should be included.

(165) Section 970.3271 was created to reposition the "Special Bank Account Agreement" in the proposed rule at 970.5204–17 to the main text of the Part. This text is an agreement which is a contract itself. It is not a clause. It has been moved to stress its importance to the Financing of Management and Operating contracts. The location is now consistent with other outlines and suggested formats included in the final rule.

(166) Section 970.3604 dealing with a format for rental of construction equipment was moved and repositioned in 936.7302.

(167) Section 970.3607 "Architect-Engineer/Construction Services," was rewritten for clarity at paragraph (a).

(168) Subpart 970.51 was edited to move certain sections into Subpart 970.8 whose title was corrected to read: Required Sources of Supplies and Services by adding "and services." Without text changes 970.5102 became 970.0801; 970.5104 became 970.0811; 970.5105 became 970.0870; 970.5106 became 970.0871; 970.5107 became 970.0872; 970.5103 renumbered 970.5102.

(169) Subsection 970.5204–19 regarding printing was rewritten for clarity.

(170) Subsection 970.5204–48 was deleted as it is judged duplicative of a provision at 970.1901(a).

(171) Part 971 was modified to rearrange the contents into a more logical sequence and to improve the language on review requirements. Additions were added to identify the data required to be furnished by DOE field offices to be furnished to Headquarters for review and approvals.

(172) Other edits or title changes being made in the final rule published today are as follows:

901: Part title change to same as FAR: "Federal Acquisition Regulation System."

902.100: Revised definition to delete reference to delegation from Procurement Executive.

903.302–70: Deleted the "–70" which should have been excluded in the proposed rule.

904.601–70: Retitled to read: "Procurement and Assistance Data Systems" (PADS).

904.702: The title in paragraph (b) deleted as unnecessary.

905.403–70: Deleted the "–70" which should have been excluded in the proposed rule.

909.404: The reference in proposed rule, 10 CFR 1035.13(J) changed to read 10 CFR 1035.15.

905.404–1: The term "application" added in paragraph (a) to be consistent with FAR.

905.502: The term "Newspaper" was added to paragraph (a) to be consistent with FAR.

908.800–70: Retitled as 908.82 "Policy." The same as FAR. The "–70" designation not necessary.
913: Part title changed to same as FAR: "Small Purchase and Other Simplified Purchase Procedures."
914.407–8: Revised the stated protest receipt times to be consistent with GAO Manual requirements.
914.502–70: Deleted the "–70" and identified the text as paragraph (a).
915.307–70: Deleted the "–70" and retitled to be consistent with FAR. No separate DOE designation was considered necessary.
915.305–70: Paragraphs (a) and (b) were switched to give a better introduction. The remainder of the subsection was divided into paragraphs to provide better reading.
915.405–1: Renumbered as 915.405 and retitled "General."
915.612: Edited to delete references to "SEB Handbook" as "Regulations Handbook No. 1."
915.970.3: Correction to the proper form identification.
915.1002–70: Deleted the "–70" which should have been excluded in the proposed rule.
916.603–70: This subsection was determined to be part of 916.603–2 "Application:" Its contents amplified 916.603–2(f).
917.604–71 & 917–605–70: "–70" titles deleted as the language is not DOE unique but implements and clarifies the FAR.
917.74, 75, 76, 77: All sections and subsections were renumbered and edited to be identified as 917.72; 917.74; 917.75; respectively. Minor syntax edits made and 917.7404 (as reidentified) corrected to read solicitations as its subject matter and not competition.
922.202(2): Correctly identified as 922.202 "Policy."
922.608–3: Correctly identified as "Protest against Eligibility."
949.111–70: Correctly identified as 949.111 "Review of Proposed Settlements."
949.111–71: Subsection title was deleted and the two paragraphs assigned to 949.111 as paragraphs (c) and (d).
949.505–70: Deleted the –70 reference and identified subsection as 949.505. Other termination clauses. This is consistent with FAR format. The text of the clause was repositioned to clause section at 952.249–70.
951.102–70 and –71: Deleted the " –70/71" reference and identified the text paragraphs under 951.102. This move consistent with FAR format.
970: All titles in the table of contents and text were edited to be same as or closer to the titles of the FAR. Several had to be different of necessity. Changes made in: 970.8; 970.803; 970.1508; 970.1901; 970.2001; 970.2213; 970.27; 970.2701; 970.46; 470.4801; 970.49; 970.51.
970: The term "Management and Operating" was added in front of the term Contractor in several locations in Part 970—since 970 applies to Management and Operating contracts.
970–0803–7: Title deleted. Text became applicable to 970.0803 which was retitled "Acquisition of Utility Services" as paragraph (c).
970.0803–70: "–70" title deleted. Text became applicable as paragraph (d) of 970.0830.
970.1508–3: Reidentified as 970.1508 Price Negotiation.
970.1508–408: Reidentified as 970.1508–5.
970.1508–4: Deleted title only. Text positioned as—1508.
970.1509: Properly identified as "Fees for management and operating contracts."
970.2201: Unnecessary language in opening sentence deleted.
970.2204: Language not necessary deleted and a single paragraph added.
Subsection 970.2270–2 was renumbered as 970.2270.
Subsection 970.2270–3 was renumbered as 970.2271.
Subsection 970.2270–4 was renumbered as 970.2272.
970.2903: Titles deleted from paragraphs.
970.3100: Minor edits made to clarify intent.
970.3103–3: Language of (a)(2) simplified.

The Department of Energy appreciates the comments and suggestions received from the public as well as its own employees, and has made the corresponding changes discussed above. Because of the need to have a regulation in place as of the effective date of the FAR, the rule being published today is effective April 1, 1984. However, in view of the size of the Department's Acquisition Regulation and the overall number of changes made, additional comments will be taken for a period of sixty days after the April 1st effective date. The Department will consider all comments received as part of an ongoing process to amend its Acquisition Regulation as discussed at 901.301–72.

List of Subjects in 48 CFR Chapter 9

Government procurement, DOE acquisition regulation.

Authority: Section 161 of the Atomic Energy Act of 1954, 42 U.S.C. 2201 and Section 644 of the Department of Energy Organization Act, 42 U.S.C. 7254. For the reasons set out in the preamble, Chapter 9 of Title 48 of the Code of Federal Regulations is amended as set forth below.

Issued in Washington, D.C. March 15, 1984.

Berton J. Roth,

Director, Procurement and Assistance Management Directorate.

Title 48 of the CFR is amended by establishing chapter 9 to read as follows:

CHAPTER 9—DEPARTMENT OF ENERGY

Part and Title

SUBCHAPTER A—GENERAL

901—Federal Acquisition Regulations System
902—Definitions of words and terms
903—Improper business practices and personal conflicts of interest
904—Administrative matters
905—Publicizing contract actions

SUBCHAPTER B—ACQUISITION PLANNING

907—Acquisition planning
908—Required sources of supplies and services
909—Contracting qualifications
910—Specifications, standards, and other purchase descriptions
912—Contract delivery or performance

SUBCHAPTER C—CONTRACTING METHODS AND CONTRACT TYPES

913—Small purchase and other simplified purchase procedures
914—Formal advertising
915—Contracting by negotiation
916—Types of contracts
917—Special contracting methods

SUBCHAPTER D—SOCIOECONOMIC PROGRAMS

919—Small business and small disadvantaged business concerns
920—Labor surplus area concerns
922—Application of labor laws to Government acquisitions
923—Environment, conservation, and occupational safety
924—Protection of privacy and freedom of information
925—Foreign acquisition

SUBCHAPTER E—GENERAL CONTRACTING REQUIREMENTS

927—Patents, data, and copyrights
928—Bonds and insurance
931—Contract cost principles and procedures
932—Contract financing
933—Disputes and appeals

SUBCHAPTER F—SPECIAL CATEGORIES OF CONTRACTING

935—Research and development contracting
936—Construction and architect-engineer contracts
937—Service contracting

SUBCHAPTER G—CONTRACT MANAGEMENT
942—Contract administration
943—Contract modifications
944—Subcontracting policies and procedures
945—Government property
947—Transportation
949—Termination of contract
950—Extraordinary contractual actions
951—Use of government sources by contractors

SUBCHAPTER H—CLAUSES AND FORMS
952—Solicitation provisions and contract clauses

SUBCHAPTER I—AGENCY SUPPLEMENTARY REGULATIONS
970—DOE management and operating contracts
971—Headquarter's review and approval of contract actions

PART 901—FEDERAL ACQUISITION REGULATIONS SYSTEM

Subpart 901.1—Purpose, Authority, Issuance

Sec.
901.101 Purpose.
901.102 Authority.
901.103 Applicability.
901.103–70 Exclusions.
901.104 Issuance.
901.104–1 Publication and code arrangement.
901.104–2 Arrangement of regulations.
901.104–3 Copies.
901.105 OMB control numbers.

Subpart 901.2—Administration

901.201–1 The two councils.

Subpart 901.3—Agency Acquisition Regulations

901.301 Policy.
901.301–70 Acquisition letters.
901.301–71 Amendment of regulation.
901.301–72 Other issuances related to acquisition.
901.303 Codification and public participation.

Subpart 901.4—Deviations From the FAR

901.402 Policy.
901.403 Individual deviations.
901.404 Class deviations.

Subpart 901.5—Agency and Public Participation

901.570 Rulemaking.

Subpart 901.6—Contracting Authority and Responsibilities

901.601 General.
901.601–70 Responsibility of the Head of the Contracting Activity.
901.603 Selection, appointment and termination of appointment.
901.603–1 General.
901.603–70 Modification of appointment.
901.603–71 Ratification of unauthorized contract awards.
901.603–72 Responsibility of other government personnel.
901.603–73 Contracting officer's representatives.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy of 1954, as amended (42 U.S.C. 2168).

Subpart 901.1—Purpose, Authority, Issuance

901.101 Purpose.

(a) This subpart establishes Chapter 9, the Department of Energy Acquisition Regulation, within Title 48, the Federal Acquisition Regulation System, of the Code of Federal Regulations. The short title of this regulation shall be DEAR.

(b) The purpose of the DEAR is to implement the Federal Acquisition Regulations (FAR) where further implementation is needed, and to supplement the FAR when coverage is needed for subject matter not covered in the FAR. The DEAR is not, by itself, a complete document as it must be used in conjunction with the FAR. When a FAR Part or Subpart is adequate for use without further DOE implementation, no mention is cited in the DEAR. Therefore the order of use is (1) FAR; (2) DEAR.

901.102 Authority.

The DEAR and amendments thereto are issued by the Procurement Executive pursuant to a delegation from the Secretary in accordance with the authority of section 644 of the Department of Energy Organization Act of 1977 (Pub. L. 95–91), the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 252), as amended, and other applicable law.

901.103 Applicability.

The FAR and DEAR apply to all DOE acquisitions of supplies and services which obligate appropriated funds unless otherwise specified in this regulation. These regulations shall be used as guides to the extent practicable for acquisitions using non-appropriated funds.

901.103–70 Exclusions.

Certain DOE policies and procedures which might otherwise come within the scope of this regulation may be excluded from the DEAR where there is appropriate justification, such as:

(a) Subject matter which bears a security classification (See FAR 4.402).

(b) Subject matter which deals with assistance programs where the award instruments are other than acquisition contracts and purchase orders. The DOE financial assistance policies are codified separately at Part 600 of Title 10 of the Code of Federal Regulations.

(c) Subject matter which deals with the Department's sales programs. These matters are codified separately at various parts of Title 10 of the Code of Federal Regulations.

(d) Subject matter which is procedural in nature and which is internal to the operation of the Department. These matters are contained in the DOE Directives System.

(e) Instructional or training material that more fully explains matters covered in the FAR and DEAR.

901.104 Issuance.

901.104–1 Publication and code arrangement.

(a) The DEAR and its subsequent changes are published in (1) daily issues of the **Federal Register**, (2) cumulative form of the Code of Federal Regulations, and (3) a separate loose-leaf edition.

(b) The DEAR is issued as Chapter 9 of Title 48 of the Code of Federal Regulations.

901.104–2 Arrangement of regulations.

(a) *General.* The DEAR is divided into the same parts, subparts, sections, subsections and paragraphs as is the FAR. However, when the FAR coverage is adequate by itself, there will be no corresponding DEAR part, subpart, etc.

(b) *Numbering.* Where the DEAR implements the FAR, the implementing part, subpart, section or subsection of the DEAR will be numbered and captioned, to the extent feasible, the same as the FAR part, subpart, section or subsection being implemented except that the implementation will be preceded with a 9 or a 90 such that there will always be three numbers to the left of the decimal. For example, the DEAR implementation of FAR 1.104–1 is shown as 901.104–1 and the DEAR implementation of FAR 24.1 is shown as 924.1. Material which supplements the FAR will be assigned the numbers 70 and up. For example, by statute, DOE requires a more comprehensive organizational conflicts of interest review than is contemplated by FAR 9.5. This supplementary material is identified as 909.570.

(c) *References and citations.* (2) This regulation may be referred to as the Department of Energy Acquisition Regulation or the DEAR.

(3) References to FAR materials within this regulation will include FAR and the identifying number, for example, FAR 1.104–2(c)(3). References to DEAR materials within this regulation will simply cite the identifying number, for example, 901.104–2(c)(3).

901.104–3 Copies.

(a) Copies of the DEAR published in the **Federal Register** or Code of Federal

Regulations may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Requests should reference the DEAR as Chapter 9 of Title 48. The Code of Federal Regulations is printed in paperback edition and updated annually. Requests for the CFR version of the DEAR should reference Chapter 9 of Title 48.

(b) Loose-leaf copies of the DEAR are distributed within DOE in accordance with a distribution list maintained by the Policy Office in the Procurement and Assistance Management Directorate, Headquarters.

901.105 OMB control numbers.

The Paperwork Reduction Act of 1980, Pub. L. 96–511, and the Office of Management and Budget's implementing regulations at 5 CFR Part 1320, require that reporting and recordkeeping requirements affecting 10 or more members of the public be cleared by that Office. Shown below are DEAR citations containing such requirements and their control numbers.

DEAR	Title	Control No.
913.505–2	Agency order form in lieu of Optional Forms 347 and 348.	1910–3000
915.406–5	Offeror representations and certifications.	1910–3100
917.72	Program opportunity notice for commercial demonstrations.	1910–3200
917.73	Program research and development (R&D) announcement.	1910–3200
919.708	Small business report	1910–3300
922–804–2(b)(2).	Affirmative action compliance requirements for construction.	1910–3400
927.402–3	Technical data certification	1910–3500
928–103–3	Payment bond	1910–3600
928.170	Fidelity bond	1910–3600
936.7301	Outline of agreement for rental of contractor-owned equipment.	1910–3700
945.508	Physical inventory	1910–3800
945.607–2	Recovering precious metals	1910–3800
945.608–2	Agency screening	1910–3800
949.505	Other termination clauses	1910–3900
952.204–2	Security requirements	1910–1800
952.204–70	Classification	1910–1800
952.204–71	Sensitive Foreign nations controls.	1910–1800
952.204–72	Disclosure of information	1910–1800
952.204–73	Foreign ownership, control, or influence over contractor (Representation).	1910–1800
952.204–74	Foreign ownership, control, or influence over contractor.	1910–1800
952.209–70	Organizational conflicts of interest—disclosure or representation.	1910–0900
952.209–71	Organizational conflicts of interest—general.	1910–0900
952.209–72	Organizational conflicts of interest—special clause.	1910–0900
952.212–71	Priorities, allocations and allotments for DOE atomic energy programs.	1910–4000
952.212–73	Cost and schedule control systems criteria.	1910–1400
952.215–70	Required subcontractor representations and certifications.	1910–4000
952.217–70	Acquisition of real property	1910–4000
952.219–9	Small business and small disadvantage business subcontracting plan.	1910–4000
952.223–71	Safety and health (Government-owned or leased facility).	1910–0300
952.223–72	Radiation protection and nuclear criticality.	1910–0300
952.223–74	Nuclear facility safety applicability.	1910–0300
952.223–75	Preservation of individual occupational radiation exposure records.	1910–0300
952.227–71	Patent rights—small business firms or nonprofit organizations.	1910–4000
952.227–71(h).	Utilization of subcontractor inventions report.	1910–4000
952.227–80	Technical data certification	1910–4000
952.227–81	Royalty payments certification	1910–4000
952.227–83	Identification of proprietary data	1910–4000
952.227–84	Notice of right to request patent waiver.	1910–0800
952.235–70	Key personnel	1910–4000
952.245–2	Government property (fixed-price contracts).	1910–4000
952.245–5	Government property (cost-reimbursement, time and material, or labor hour contracts).	1910–4000
952.247–70	Foreign travel	1910–2100
952.249–70	Termination clause for cost reimbursement architect-engineer contracts.	1910–4000
970.5203–2	Examination of records by comptroller general.	1910–4100
970.5204–1	Security	1910–1800
970.5204–2	Safety and health (Government-owned or leased).	1910–0300
970.5204–9	Accounts, records, and inspection.	1910–1700
970.5204–10	Foreign ownership, control, or influence over contractors.	1910–1800
970.5204–11	Changes	1910–4100
970.5204–12	Contractor's organization	1910–4100
970.5204–13	Allowable costs and fixed-fees (CPFF management and operating contracts).	1910–4100
970.5204–14	Allowable costs and fixed-fees (support contracts).	1910–4100
970.5204–19	Printing	1910–1300
970.5204–21	Property	1910–4100
970.5204–22	Contractor procurement	1910–4100
970.5204–23	State and local taxes	1910–4100
970.5204–24	Subcontractor's certificate of current cost or pricing data.	1910–4100
970.5204–26	Nuclear safety	1910–0300
970.5204–27	Consultant or other comparable employment services of contractor employees.	1910–4100
970.5204–29	Permits and licenses	1910–4100
970.5204–30	Notice of labor disputes	1910–4100
970.5204–31	Litigation and claims	1910–4100
970.5204–32	Requirement bonds and insurance—exclusive of Government property (cost-type contracts).	1910–4100
970.5204–33	Priorities, allocations and allotments.	1910–4100
970.5204–34	Sensitive foreign nations control.	1910–1800
970.5204–38	Special clause for procurement of construction.	1910–4100
970.5204–41	Preservation of individual occupational radiation exposure records.	1910–0300
970.5204–42	Key personnel	1910–4100
970.5204–45	Termination	1910–4100
970.5204–50	Cost and schedule control systems.	1910–1400

Subpart 901.2—Administration

901.201–1 The two councils.

(b) The DOE representative to the Civilian Agency Acquisition Council will be a staff member of the Policy Office, Procurement and Assistance Management Directorate, Headquarters, appointed for that purpose by the Procurement Executive.

(d) The Policy Office will be responsible for coordination with all interested Departmental elements regarding proposed FAR revisions and advocating revisions sought by DOE.

Subpart 901.3—Agency Acquisition Regulations

901.301 Policy.

(a) Acquisition policies and procedures will be issued in the DEAR by the Procurement Executive after appropriate coordination with other officials.

(b) Implementing procedures, instructions, and guides which are necessary to clarify or to implement the DEAR within DOE may be issued by the Heads of the Contracting Activities. Contracting activities have the authority to establish the review and approval levels for various acquisition actions, within their respective organizations, up to the dollar authority level delegated to that organization by the Procurement Executive provided the implementing procedures, instructions and guides:

(1) Are consistent with the policies and procedures contained in this regulation as implemented and supplemented from time to time;

(2) Follow the format, arrangement, and numbering system of this regulation; to the extent practicable, and

(3) Contain no material which duplicates, paraphrases, or is inconsistent with the contents of this regulation.

901.301–70 Acquisition letters.

From time to time the Procurement Executive may, after coordination with the General Counsel, issue advisory Acquisition Letters to furnish interim guidance to contracting activities.

901.301–71 Amendment of regulation.

This regulation may be amended from time to time by the Procurement Executive with appropriate concurrences from other officials (e.g. Counsel, and any other appropriate Headquarters offices) in accordance with 901.570.

901.301–72 Other issuances related to acquisition.

In addition to the FAR and DEAR, there are other issuances which deal with acquisition. Among these are the Federal Property Management Regulations, the DOE Property Management Regulations, and DOE Directives.

(a) The Federal Property Management Regulations, FPMR, are published by the General Services Administration to guide and govern the Federal agencies in matters pertaining to the management of property and records and other programs and activities of the type

administered by GSA. The FPMRs are codified as Chapter 101 of Title 41 of the Code of Federal Regulations.

(b) The DOE Property Management Regulations, DOE–PMR, implement and supplement the FPMR regarding the utilization, management and disposition of personal property. The DOE–PMRs are codified as Chapter 109 of Title 41 of the Code of Federal Regulations.

(c) The DOE Directives System contains the policies and procedures governing the internal operation of the Department. Because of the need to involve the public through the rulemaking process of the Administrative Procedure Act, as explained at 901.5, such policies and procedures as may directly affect contractors or the general public will be published in the DEAR following the rulemaking procedures established by the Administrative Procedure Act and the DOE Organization Act, Pub. L. 95–91. Policies and procedures which are generally of interest to or used only by DOE personnel will be published in the DOE Directives System.

901.303 Codification and public participation.

(a) The DEAR is codified as Chapter 9 of Title 48 of the Code of Federal Regulations.

(b) Procedures for public participation are described at 901.5.

Subpart 901.4—Deviations From the FAR

901.402 Policy.

(a) Requests for authority to deviate from the provisions of the FAR or the DEAR shall be submitted in writing as far in advance as the exigencies of the situation will permit. Each request for deviation shall contain the following:

(1) A statement of the deviation desired, including identification of the specific paragraph number(s) of the FAR or DEAR;

(2) The reason why the deviation is considered necessary or would be in the best interest of the Government;

(3) If applicable, the name of the contractor and identification of the contract affected;

(4) A statement as to whether the deviation has been requested previously and, if so, circumstances of the previous request;

(5) A description of the intended effect of the deviation;

(6) A statement of the period of time for which the deviation is needed; and

(7) Any pertinent background information which will contribute to a full understanding of the desired deviation.

901.403 Individual deviations.

In individual cases, deviations from either the FAR or the DEAR will be authorized only when essential to effect a necessary acquisition or where special circumstances make such deviations clearly in the best interest of the Government. Heads of Contracting Activities (HCAs) or designees are authorized to approve deviations from the DEAR, except for cost principles, in individual cases within their delegated dollar authority, after coordination with Counsel and such other DOE personnel as required. No deviations from the FAR may be authorized at the local level. A copy of each deviation and its supporting documentation shall be provided to the Procurement Executive. Deviations, either in excess of an HCA's delegated dollar authority or involving the cost principles contained in Part 931, or any FAR deviation, shall not be made unless such action is authorized by the Procurement Executive after consultation with General Counsel and any other appropriate Headquarters office, on the basis of a written justification stating clearly the special circumstances involved. For deviations from policies and procedures or clauses involving patents, data and copyrights, the concurrence of the Assistant General Counsel for Patents shall be obtained as provided in Part 927.

901.404 Class deviations.

Where deviations from the FAR, or DEAR in classes of contracts, are considered necessary, requests for authority to deviate shall be submitted in writing to the Procurement Executive who will, after appropriate coordination with other officials (e.g., Counsel, and such other DOE personnel as required), consider the submission, and in the case of FAR deviations, consider the submission jointly with the Chairperson of the Civilian Agency Acquisition Council as appropriate. Class deviations to the FAR or the DEAR involving patents, data, and copyrights shall be forwarded to the Procurement Executive, Headquarters, via the Assistant General Counsel for Patents. Where circumstances preclude obtaining prior concurrence of the Chairperson of the Civilian Agency Acquisition Council, the Procurement Executive may authorize the deviation and subsequently inform the Chairperson of the Civilian Agency Acquisition Council of the deviation including the circumstances under which it was required.

Subpart 901.5—Agency and Public Participation

901.570 Rulemaking.

(a) Section 553(a)(2) of the Administrative Procedure Act (5 U.S.C. 553), provides an exception from the standard public rulemaking procedures to the extent that the rule involves a matter related to agency management or personnel or to public property, loans, grants, benefits or contracts. OFPP Policy Letter 83–2 requires rulemaking for substantive acquisition rules but allows significant discretion in the matter. However, notwithstanding either of these, section 501(b)(3) of the Department of Energy Organization Act, Pub. L. 95–91, 91 Stat. 565 (42 U.S.C. 7191(b)(3)), provides that the exception shall not be available with respect to public property, loans, grants, or contracts within DOE. Accordingly, DEAR has been promulgated and may be revised from time to time in accordance with the rulemaking procedures of the Administrative Procedure Act and the DOE Organization Act. This procedure generally involves issuing a notice of proposed rulemaking inviting public comment, review and analysis of comments received, and publication of a final rule. The final rule includes a discussion of the public comments received and describes actions taken as a result of the comments.

(b) All acquisition rulemakings will be done either by or with the concurrence of the Policy Office, Procurement and Assistance Management Directorate, Headquarters and authorized for issuance by the Procurement Executive or his or her Deputy.

Subpart 901.6—Contracting Authority and Responsibilities

901.601 General.

Contracting authority vests in the Secretary of Energy. The Secretary has delegated this authority to the Procurement Executive. The Procurement Executive has redelegated this authority to the Heads of the Contracting Activities. These delegations are formal written delegations containing dollar limitations and conditions. Each HCA in turn makes formal contracting officer appointments within the contracting activity.

901.601–70 Responsibility of the Head of the Contracting Activity.

The Head of the Contracting Activity, as defined at FAR 2.1 as supplemented by 902.100 of this regulation, is responsible for the conduct of an effective and efficient acquisition

program. Adequate controls shall be established to assure compliance with applicable laws, regulations, procedures, and the dictates of good management practices. Periodic reviews shall be conducted by qualified personnel, preferably assigned to positions other than in the particular acquisition office or portion thereof being reviewed, to determine the extent of adherence to prescribed policies, regulations, and good management practices, and to identify any needs for improvement, guidance and/or training.

901.603 Selection, appointment and termination of appointment.

901.603-1 General.

The DOE system for the selection, appointment, and termination of appointment of contracting officers is established in DOE Order 4200.4, Selection, Appointment, and Termination of Contracting Officers.

901.603-70 Modification of appointment.

To modify a contracting officer's authority, the present appointment shall be revoked and a new certificate issued.

901.603-71 Ratification of unauthorized contract awards.

(a) The Government is not generally bound by agreements or contractual commitments made to contractors or prospective contractors by persons to whom acquisition authority has not been delegated. Such unauthorized acts may be in violation of the Federal Property and Administrative Services Act, other Federal laws, the FAR, the DEAR, and good acquisition practice; e.g., certain requirements of law and regulation necessary for the proper establishment of a contractual obligation may not be met, such as certification of the availability of funds, determinations and findings, competition of sources, determination of contractor responsibility, price/cost analysis, administrative approvals, negotiation of appropriate contract clauses, etc.

(b) Unauthorized commitments shall not be ratified unless it would have been otherwise proper to enter into a contract prior to the commitment. As used herein, the phrase "otherwise proper" means that a ratification of an unauthorized commitment can be made only if there occurred no violation of any substantive legal requirements; (e.g., there can be no ratification unless a sole source can be justified; a determination made that the contractor is not debarred or otherwise ineligible for award; the organizational conflicts of interest reviews and determinations, if required, are completed; and where all other substantive legal requirements have been met.) Whenever it is discovered that any person is performing work as a result of an unauthorized commitment, that person shall be advised that such work is being performed at their own risk pending establishment of valid contractual coverage. The HCA shall then be notified of the circumstances. If the HCA agrees that the work appears to be without valid authorization, the HCA will take appropriate steps to resolve the matter if within his or her area of cognizance. If outside the HCA's normal area of cognizance, the Procurement Executive and Senior Program Official will be notified by the HCA. If they determine that an unauthorized commitment exists, they will arrange for valid contractual coverage if appropriate. The contracting officer shall direct the disposition of all products and deliverables received by the Government as a result of an unauthorized commitment.

(c) Requests received by contracting officers for ratification of commitments made by personnel lacking contracting authority shall be processed as follows:

(1) The individual who made the unauthorized contractual commitment shall be required to furnish the contracting officer all records and documents concerning the committment and a complete, written statement of facts, including, but not limited to, a statement as to why the acquisition office was not used, why the proposed contractor was selected and a list of other sources considered, description of work to be performed or products to be furnished, estimated or agreed upon contract price, citation of appropriation available, and a statement as to whether the contractor has commenced performance. Under exceptional circumstances, such as when the person who made the unauthorized commitment is no longer available to attest to the circumstances of the unauthorized commitment, the Procurement Executive may waive the requirement that the responsible employee initiate and document the request; *provided,* the cognizant Assistant Secretary or the Head of the Contracting Activity determines in writing that the commitment was in fact made by an employee who shall be identified in the determination.

(2) The request for ratification, an approved justification for non-competitive acquisition, and the information required by (c)(1) above must be forwarded to the cognizant program Assistant Secretary, or HCA, based on the source of funds for the proposed contract, for that person's concurrence, together with recommended corrective actions to preclude recurrence.

(3) If the Assistant Secretary, or HCA concurs with the request for ratification, the request and concurrence shall be forwarded to the Procurement Executive. The Procurement Executive will review the request, the Justification for Non-Competitive Acquisition, any comments or information submitted by the contracting officer which should be considered in evaluation of the request, and the information submitted in accordance with (c)(2) above. Based upon this review and advice from the Office of General Counsel, the Procurement Executive, will proceed as follows:

(i) If the request submitted does not appear to be justified, it will be returned to the concurring Assistant Secretary or equivalent official without approval with an explanation of the decision not to ratify.

(ii) If the request and the recommended corrective actions appear justified and adequate, the Procurement Executive may ratify the action, return the file to the contracting officer for action, and monitor the implementation of the corrective action plan.

(iii) A detailed record of the review shall be maintained for audit purposes.

901.603-72 Responsibility of other Government personnel.

(a) Responsibility for the decision of what to buy and when to buy rests with program and certain staff offices and the head of the agency or designee. Responsibility for determining how to buy, the conduct of the buying process, and execution of the contract rests with the contracting activity, the contracting officer in particular.

(b) Personnel not delegated contracting authority may not commit the Government, formally or informally, to any type of contractual obligation. However, program personnel who must use the contracting process to accomplish their programs, must support the contracting officer in ensuring that:

(1) Requirements are clearly defined and specified;

(2) Competitive sources are solicited, evaluated, and selected;

(3) Quality standards are prescribed and met;

(4) Performance or delivery is timely;

(5) Prices, estimated costs, and fees are reasonable; and

(6) Files are documented to substantiate the judgments, decisions, and actions taken.

901.603-73 Contracting officer's representatives.

(a) A contracting officer may designate other Government personnel to act as authorized representatives for such functions as technical monitoring, inspection, approval of shop drawings, testing, approval of samples, and other functions of a technical natural not involving a change in the scope, price, terms or conditions of the contract or order. Such designation shall be in writing and shall contain specific instructions as to extent to which the representative may take action for the contacting officer, but will hot contain authority to sign contract documents. The responsibilities and limitations of the contracting officer's representatives may be set forth in the contract or in a separate letter, a copy of which shall be furnished to the contractor.

(b) A person assigned to and performing primary duty within a contracting office, and who is under the supervision of a contracting officer, does not require designation as a representative to perform assigned duties. The contracting officer cannot authorize subordinates to sign any contract document or letter where the signature of a contracting officer is required.

PART 902—DEFINITIONS OF WORDS AND TERMS

Subpart 902.1—Definitions

Sec.
902.100 Definitions.

Subpart 902.2—Definitions Clause

902.200 Definitions clause.

Authority: Section 644 of the Department of Energy (Organization Act, Pub. L. 95-91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 902.1—Definitions

902.100 Definitions.

The following definitions are in addition to those stated in FAR 2.1.

"Acquisition Executive," as that term is defined in OMB Circular A-109, means the Assistant Secretary, Management and Administration. The Acquisition Executive, as contrasted to the Procurement Executive, is involved in monitoring the development of major systems and the review of their progress as they evolve through the major systems acquisition process. Details regarding internal major system acquisition procedures may be found in the DOE Directives.

"Contracting Activity" means a DOE organizational element which has authority to award contracts.

"Head of the Agency" means the Secretary, Deputy Secretary, or Under Secretary.

"Head of the Contracting Activity (HCA)" means, in addition to the element specified in the FAR, a DOE Official who has met the following requirements: first, has been delegated authority to award contracts and appoint contracting officers by the Procurement Executive; and second, has been designated as an HCA. A partial listing of the durties specifically reserved to the HCA or designee includes:

(a) Authority to establish review and approval levels for contract actions within the organization, up to the dollar level delegated.

(b) Authority to approve deviations from the DEAR in accordance with 901.403.

(c) Authority to appoint contracting officers.

(d) Authority to make administrative determinations regarding withdrawals of bids before award in mistake-in-bid cases.

"Procurement Executive" means the individual appointed as such by the Head of the Agency pursuant to Executive Order 12352. The Director, Procurement and Assistance Management Directorate, has been appointed as the DOE Procurement Executive. Duties of the Procurement Executive include:

(a) Prescribe and publish agency acquisition policies, regulations and procedures;

(b) Enter into, make determinations and decisions and take other actions, consistent with appropriate policies, regulations and procedures with respect to purchases, contracts, leases, sales agreements and other transactions, except those required by law or regulation to be made by other authority;

(c) Designate contracting officers and representatives thereof;

(d) Establish clear lines of contracting authority;

(e) Exercise priorities authority on behalf of the agency, in accordance with the provisions of the Defense Production Act of 1950 (50 U.S.C. App. 2071, et seq.), Department of Defense Delegation of Priorities Authority, dated October 21, 1958, and applicable policies and regulations; and the Energy Conservation and Policy Act, Pub. L. 94-164;

(f) Evaluate and monitor the agency's acquisition system performance;

(g) Manage and enhance career development of the acquisition work force;

(h) Examine, in coordination with the OFPP, the acquisition system to determine specific areas where Government-wide performance standards should be established and applied and participate in the development of Government-wide acquisition policies, regulations and standards;

(i) Determine areas for agency unique standards and develop unique agency-wide standards;

(j) Be the advocate for competition; and

(k) Certify to the agency head that the acquisition system meets approved standards.

"Senior Program Official" means the Assistant Secretaries; Administrators of Administrations; Chairman, Federal Energy Regulatory Commission; Director, Office of Energy Research; and heads of DOE Headquarters staff offices.

Subpart 902.2—Definitions Clause

902.200 Definitions clause.

As prescribed by FAR 2.2, insert the clause at FAR 52.202-1, Definitions, but modify it to limit the definition, at paragraph (a) of the clause, to encompass only the Secretary, Deputy Secretary, and Under Secretary of the Department of Energy. The contracting officer shall also add a paragraph (d) (or (c) in case Alternate I is used), which defines "DOE" as meaning the United States Department of Energy.

PART 903—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

Subpart 903.1—Safeguards

Sec.
903.101 Standards of conduct.
903.101-3 Agency regulations.

Subpart 903.2—Contractor Gratuities to Government Personnel

903.203 Reporting suspected violations of the Gratuities clause.
903.204 Treatment of violations.

Subpart 903.3—Reports of Identical Bids and Suspected Antitrust Violations

903.302-2 Reporting requirements.

Subpart 903.4—Contingent Fees

903.408-1 Responsibilities.

Subpart 903.5—Other Improper Business Practices

903.502 Subcontractor kickbacks.

Subpart 903.6—Contracts With Government Employees or Organizations Owned or Controlled by Them

903.603 Responsibilities of the contracting officer.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95-91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 903.1—Safeguards

903.101 Standards of conduct.

903.101-3 Agency regulations.

Detailed rules applicable to the conduct of DOE employees are set forth in 10 CFR Part 1010. To ensure that contracting personnel are informed of the high standards to be met and that they maintain current knowledge of the standards of conduct, all contracting activities shall maintain a "Standards of Conduct Notebook for Acquisition and Assistance Personnel." The notebook will contain a copy of 10 CFR Part 1010 and any other DOE or local directives on standards of conduct. All contracting personnel and their supporting personnel shall certify they have read and understand the contents of the notebook by signing a certificate to that effect. This shall be done at least annually.

Subpart 903.2—Contractor Gratuities to Government Personnel

903.203 Reporting suspected violations of the Gratuities clause.

(a) Suspected violations of the Gratuities clause shall be reported to the Head of the Contracting Activity (HCA) in writing detailing the circumstances. The HCA will evaluate the report and if the allegations appear to support a violation the matter will be referred to the Procurement Executive for disposition.

903.204 Treatment of violations.

Apparent violations will be processed in accordance with the debarment and suspension rules set forth at Title 10, Part 1035, of the Code of Federal Regulations.

Subpart 903.3—Reports of Identical Bids and Suspected Antitrust Violations

903.302-2 Reporting requirements.

(a) Executive Order 12430 of July 6, 1983, revoked the requirement of Executive Order 10936 of April 24, 1961, to submit a report to the Attorney General on identical bids.

(b) Potential anti-competitive practices, such as described in FAR 3.301, and antitrust law violations as described in FAR 3.303, evidenced in bids or proposals shall be reported to the Office of General Counsel through the Head of the Contracting Activity with a copy to the Procurement Executive. The Office of General Counsel will provide reports to the Attorney General as appropriate.

Subpart 903.4—Contingent Fees

903.408-1 Responsibilities.

(b) Each Standard Form 119 completed in connection with a DOE contract, together with other relevant information, shall be reviewed by Counsel prior to the initiation of appropriate action.

Subpart 903.5—Other Improper Business Practices

903.502 Subcontractor kickbacks.

(b) Contracting officers shall report suspected violations of the Anti-Kickback Act through the Head of the Contracting Activity, or designee, to the Office of General Counsel.

Subpart 903.6—Contracts With Government Employees or Organizations Owned or Controlled by Them

903.603 Responsibilities of the contracting officer.

(a) When the needs of the Government cannot be reasonably supplied by sources other than employees of the Government or sources which are substantially owned or controlled by Government employees, the contracting officer shall submit, through the HCA, a request to the Procurement Executive, with appropriate justification, for approval of an exception to the prohibitions contained in FAR 3.601.

PART 904—ADMINISTRATIVE MATTERS

Subpart 904.4—Safeguarding Classified Information Within Industry

Sec.
904.401 Definitions.
904.402 General.
904.403 Responsibilities of contracting officers.
904.404 Contract clauses.

Subpart 904.6—Contract Reporting

904.601 Federal procurement data system.
904.601-70 Procurement and Assistance Data System (PADS).

Subpart 904.7—Contractor Records Retention

904.702 Applicability.

Subpart 904.8—Contract Files

904.803 Contents of contract files.
904.804-1 Close out by the office administering the contract.
904.805 Disposal of contract files.

Subpart 904.70—Foreign Ownership, Control, or Influence Over Contractors

904.7000 Purpose.
904.7001 Applicability.
904.7002 Definitions.
904.7003 Disclosure of foreign ownership, control, or influence.
904.7004 Findings, determination, and contract award or termination.
904.7005 Solicitation provision and contract clause.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95-91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 904.4—Safeguarding Classified Information Within Industry

904.401 Definitions.

"Classified Information" means any information or material that is owned by, produced by or for, or is under the control of the United States Government, and determined pursuant to provisions of Executive Order 12356, April 2, 1982 (47 FR 14874, April 6, 1982), or prior orders, or as authorized under the Atomic Energy Act of 1954, as amended, to require protection against unauthorized disclosure, and is so designated.

"Restricted Data" means data which is defined in section II, of the Atomic Energy Act of 1954, as amended, as "all data concerning: (1) Design, manufacture, or utilization of atomic weapons; (2) the production of special nuclear material; or (3) the use of special nuclear material in the production of energy, but shall not include data declassified or removed from the Restricted Data category pursuant to section 142."

904.402 General.

(a) The basis of DOE's security requirements is the Atomic Energy Act of 1954, as amended.

(b) *DOE security regulations.* DOE regulations concerning national security information are codified at 10 CFR Part 1045. Supplemental material is found in the DOE Directives. Foreign ownership, control, or influence over contractors as it relates to security is discussed at 904.70.

(c) *Special requirements regarding foreign release.* Statutory requirements to be observed in connection with the release of Restricted Data to foreign governments are contained in the Atomic Energy Act of 1954, Sections 141 and 144.

(d) *Prohibition against the dissemination of certain unclassified information.* Section 148 of the Atomic Energy Act (42 U.S.C. 2168) prohibits the

unauthorized dissemination of unclassified nuclear information with respect to the atomic energy defense programs pertaining to:

(1) The design of production facilities or utilization facilities;

(2) Security measures (including security plans, procedures, and equipment) for the physical protection of: (i) Production or utilization facilities, (ii) nuclear material contained in such facilities, or (iii) nuclear material in transit; or

(3) The design, manufacture, or utilization of any atomic weapon or component if the design, manufacture, or utilization of such weapon or component was contained in any information declassified or removed from the Restricted Data category pursuant to Section 142 of the Atomic Energy Act.

(k) Further information on this subject may be found at 10 CFR Part 710.

904.403 Responsibilities of contracting officers.

(a) *Presolicitation Phase.* If access to Restricted Data may be required, security clearances shall be obtained as noted in DOE Order 5631.2.

(c) *Award Phase.* Contracts which may require the processing or storage of Restricted Data or Special Nuclear Material require application of the provisions of DOE Orders 5634.1; 5635.1; and 5632.2. DOE regulations relating to the protection of Restricted Data may also be found under 10 CFR Part 1016.

9004.404 Contract clause.

(d) The security clauses to be used in DOE contracts are found at 952.204. They are:

(1) *Security, 952.204–2.* This clause is required in contracts under section 31 (research assistance) or 41 (ownership and operation of production facilities) of the Atomic Energy Act of 1954, as amended, and in other contracts and subcontracts, the performance of which involves or is likely to involve classified information. The DOE system is separate from that of the Department of Defense and the DEAR clause shall be used instead of that at FAR 52.204–2.

(2) *Classification, 952.204–70.* This clause is to be used in all contracts which involve classified information.

(3) *Sensitive foreign nation controls, 952.204–71.* This clause is required in unclassified research contracts which may involve making unclassified information about nuclear technology available to certain sensitive foreign nations. The contract specialist shall consult the local security office for a listing of nations involved. (The attachment referred to in the clause should set forth the applicable requirements of the DOE regulations on dissemination of unclassified published and unpublished technical information to foreign nations.)

(4) *Disclosure of information, 952.204–72.* This clause should be used in place of the clauses entitled "Security" and "Classification" in contracts with educational institutions for research work performed in their own institute facilities that are not likely to produce classified information.

Subpart 904.6—Contract Reporting

904.601 Federal procurement data system.

(c) DOE's data collection point is the Office of Procurement Support, Headquarters.

904.601–70 Procurement and Assistance Data System (PADS).

(a) The Procurement and Assistance Data System (PADS) is the Department of Energy's system for collection of Federal Procurement Data System (FPDS) data.

(b) DOE Order 1331.1A, entitled "Requirements and Procedures for the Procurement and Assistance Data System," requires that all data be entered into PADS within five (5) working days after the award in the following manner:

(1) Contracting activities shall report the information required by this subpart for new awards and modifications.

(2) For each prime contract action over the small purchase limit, contracting officers shall complete an Individual Procurement Action Report (IPAR), DOE F 4200.40, and submit it to their data entry point for input to the PADS system. Detailed information on completing IPAR forms is contained in the publication entitled "Handbook for Preparation of Individual Procurement Action Reports." A copy of each completed IPAR form shall be inserted in the pertinent contract file.

(3) Prime contract awards below the small purchase limit shall be reported either:

(i) Individually, by completion and submission of an IPAR; or

(ii) On a summary basis, by completion and submission of a DOE F 4200.31, Award Action Quarterly Report. Summary reports shall be submitted within 15 calendar days after the end of each Federal fiscal quarter.

(4) Contracting officers shall assure that contractors whose contracts include the Small and Small Disadvantaged Business Subcontracting Plan clause, FAR 52.219–9, submit the required reports on Standard Forms 294.

Subpart 904.7—Contractor Records Retention

904.702 Applicability.

(b) Contracts containing the Safety and Health clause at 952.223–71, the Radiation Protection and Nuclear Criticality clause at 952.223–72, or the Nuclear Safety clause at 952.223–74 must also include the Preservation of Individual Occupational Radiation Exposure Records clause at 952.223–75 which will necessitate retention of records in accordance with schedules contained in Chapter V of DOE Order 1324.2, and any pertinent superseding provisions, rather than those found at FAR 4.7. These schedules are required by DOE, pursuant to an agreement with the General Accounting Office, in situations where prudence dictates longer retention periods for records involving employee health matters.

Subpart 904.8—Contract Files

904.803 Contents of contract files.

(a) (29) The record copy of the Individual Procurement Action Report shall be included in the file section containing procurement management reports.

904.804–1 Closeout by the office administering the contract.

(a) The Head of the Contracting Activity shall ensure that necessary procedures and milestone schedules are established to meet the requirements of FAR 4.804–1, and that resources are applied to effect the earliest practicable deobligation of excess funds and the timely closeout of all contract files which are physically completed or otherwise eligible for closeout action.

(b) Quick closeout procedures for cost reimbursable and other than firm fixed price type contracts are covered under 942.708.

904.805 Disposal of contract files.

Contract files shall be disposed of in accordance with applicable DOE Order 1324.2.

Subpart 904.70—Foreign Ownership, Control, or Influence Over Contractors

904.7000 Purpose.

This subpart sets forth the Department of Energy policies and procedures regarding foreign ownership, control, or influence (FOCI) over contractors. The procedures are designed to protect against an undue risk to the common defense and security which may result if classified information or special nuclear material is made available to DOE contractors or

subcontractors who are owned, controlled, or influenced by foreign governments, individuals, or organizations. The procedures require certain offerors/ bidders and contractors/subcontractors to submit information which will help DOE to determine whether award of a contract to a firm, or continued performance of a contract by a firm, may pose an undue risk to the common defense and security because of FOCI over the offeror/bidder or contractor/subcontractor.

904.7001 Applicability.

The provisions of this subpart shall apply to all offerors/bidders, contractors, and subcontractors who will or do have access to classified information or a significant quantity of special nuclear material as defined in 10 CFR Part 710. In this subpart, the term "contractor" shall also mean subcontractor at any tier, the term "contract" shall also mean subcontract at any tier, and the term "special nuclear material" shall also mean significant quantity of special nuclear material as defined in 10 CFR Part 710.

904.7002 Definitions.

"Foreign interest" means any of the following:

(1) Foreign government or foreign government agency or instrumentality thereof;

(2) Any form of business enterprise organized under the laws of any country other than the United States or its possessions;

(3) Any form of business enterprise organized or incorporated under the laws of the U.S., or a State or other jurisdiction within the U.S. which is owned, controlled, or influenced by a foreign government, agency, firm, corporation, or person, or

(4) Any person who is not a U.S. citizen.

"Foreign ownership, control, or influence" means the situation where the degree of ownership, control, or influence over an offeror/bidder or a contractor by a foreign interest is such that a reasonable basis exists for concluding that compromise of classified information or special nuclear material may possibly result.

"Contracting Officer" means the DOE contracting officer.

904.7003 Disclosure of foreign ownership, control, or influence.

(a) If a contract requires a contractor to have access to classified information or a significant quantity of special nuclear material, the DOE must determine whether access to the information or material by a contractor who is or may be subject to FOCI may pose an undue risk to the common defense and security before a contract can be awarded.

(b) If during the performance of a contract, the contractor comes under FOCI, then the DOE must determine whether any further access to the classified information or special nuclear material may pose an undue risk to the common defense and security through the possible compromise of that information or material. If the DOE determines that such a threat or potential threat exists, the contracting officer shall consider the alternatives of negotiating an acceptable method of isolating the foreign interest which owns, controls, or influences the contractor or terminating the contract.

(c) It is essential for the DOE to obtain information about FOCI which is sufficient to help the Department determine whether award of a contract to a person or firm, or the continued performance of a contract by a person or firm, may pose undue risk to the common defense and security. Therefore, the provision specified at 952.204–73 shall be included in solicitations that involve offerors/ bidders or contractors that are subject to 904.7001.

(d) The contracting officer shall not award or extend any contract subject to this subpart, exercise any options under a contract, modify any contracts subject to this subpart, or approve or consent to a subcontract subject to this subpart unless: (1) The contractor provides the information required by the solicitation provision at 952.204–73, or (2) the contractor certifies that it has previously submitted the information requested in 952.204–73 as part of a facility security clearance and that this information is accurate, complete, and current, and (3) the contracting officer has made a positive determination in accordance with 904.7004.

904.7004 Findings, determination, and contract award or termination.

(a) Based on the information disclosed by the offeror/bidder or contractor, and after consulting with the DOE Office of Safeguards and Security, the contracting officer must determine that award of a contract to an offeror/bidder or continued performance of a contract by a contractor will not pose an undue risk to the common defense and security. The contracting officer need not prepare a separate finding and determination addressing FOCI; however, the memorandum of negotiation shall include a discussion of the applicability of this subpart and the resulting determination.

(b) In those cases where FOCI does exist, and the DOE determines that an undue risk to the common defense and security may exist, the offeror/bidder or contractor shall be requested to propose within a prescribed period of time a plan of action to avoid or mitigate the foreign influences by isolation of the foreign interest.

(c) The types of plans that a contractor can propose are: measures which provide for physical or organizational separation of the facility or organizational component containing the classified information or special nuclear material; modification or termination of agreements with foreign interests; diversification or reduction of foreign source income; assignment of specific security duties and responsibilities to board members or special executive level committees; or any other actions to negate or reduce FOCI to acceptable levels. The plan of action may vary with the type of foreign interest involved, degree of ownership, and information involved so that each plan must be negotiated on a case by case basis. If the offeror/bidder or contractor and the DOE cannot negotiate a plan of action that isolates the offeror/bidder or contractor from FOCI satisfactory to the DOE, then the offeror/bidder shall not be considered for contract award and affected existing contracts with a contractor shall be terminated.

904.7005 Solicitation provision and contract clause.

(a) The contracting officer shall insert the representation at 952.204–73, Foreign Ownership, Control, or Influence Over Contractor, in all solicitations for contracts subject to 904.7001.

(b) The contracting officer shall insert the clause at 952.204–74, Foreign Ownership, Control, or Influence Over Contractor, in new contracts and contract modifications to existing contracts subject to 904.7001.

PART 905—PUBLICIZING CONTRACT ACTIONS

Subpart 905.2—Synopses of Proposed Contracts

Sec.
905.205 Special situations.

Subpart 905.4—Release of Information

905.403 Requests from Members of Congress.
905.404–1 Release procedures.

Subpart 905.5—Paid Advertisements

905.502 Authority.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic

Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 905.2—Synopses of Proposed Contracts

905.205 Special situations.

(a) *Research and development (R&D) advance notices.* If, a result of an R&D Sources-Sought Synopsis, a subsequent synopsis is issued, the latter synopsis shall contain information regarding the earlier synopsis, and identify the special qualifications, expertise, experience, or facilities deemed necessary to perform the work satisfactorily. The purpose of this added notice is to alert potential sources that their proposal preparation effort as well as the Government evaluation effort will be unnecessarily expended if they do not possess these special qualifications.

Subpart 905.4—Release of Information

905.403 Requests from Members of Congress.

(a) *Individual requests.* In addition to having access to the information available to the general public, Membe... of Congress shall, upon their request, be given full and detailed information regarding any particular Departmental acquisition. The information provided shall be fully responsive to the member's request unless such a response would disclose classified matter, information not to be released pursuant to law, business confidential information or information which would be prejudicial to the competitive process. The contracting officer shall promptly consult with appropriate specialists such as security analysts or legal counsel and the Office of Congressional Affairs to determine whether circumstances exist which will allow the release of additional information. In such instances, the Congressional requestor shall be provided an interim reply furnishing the information which is readily releasable. The interim reply shall set forth the reasons which preclude release of any requested material and describe generally what steps, if any, are being taken to make such information available.

(b) *Required notices of award.* The Office of Congressional Affairs, Headquarters, is responsible for advising Members of Congress regarding Departmental activities likely to have an impact on their constituents. To facilitate this advice, contracting officers shall notify the Office of Congressional Affairs regarding pending awards for significant new starts or modifications significantly expanding the previous scope of a contract. The transmittal of such notices to the Office of Congressional Affairs shall be as follows:

(1) Notice of awards of $500,000 or greater, but less than $1,000,000 shall be forwarded 48 hours prior to the time of contract execution.

(2) Notice of source selection for a contemplated award of $1,000,000 or greater shall be forwarded 48 hours prior to the public announcement of the source selection. Such notices need not be duplicated at time of award.

(3) Notice of awards of $50,000 or greater, under Special Research Contracts as described at 917.71, shall be forwarded 48 hours prior to the time of contract execution.

905.404-1 Release procedures.

(a) *Application.* Offices contemplating the release of long range acquisition planning estimates shall coordinate with the Office of Procurement Support, Procurement and Assistance Management Directorate, Headquarters, in advance of the release of such planning estimates.

Subpart 905.5—Paid Advertisements

905.502 Authority.

(a) *Newspapers.* When it is deemed necessary to use paid advertisements in newspapers and trade journals, written authority for such publication shall be obtained from the Head of the Contracting Activity or designee.

PART 907—ACQUISITION PLANNING

Subpart 907.1—Acquisition Plans

Sec.
907.102 Policy.

Subpart 907.3—Contractor Versus Government Performance

907.307 Appeals.

Subpart 907.4—Equipment Lease or Purchase

907.401 Acquisition considerations.
907.402-70 Purchase versus lease comparison.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95-91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 907.1—Acquisition Plans

907.102 Policy.

Acquisition plans are required as an element of project management plans which are required for major system acquisitions and major projects. The 5700 Series of DOE Directives establish the project management system which controls the planning and administration of major projects. This project management system calls for the preparation of project management plans which have as an annex the advance acquisition plan. Acquisition plans will be developed for other acquisitions when the potential benefit justifies their development.

Subpart 907.3—Contractor Versus Government Performance

907.307 Appeals.

An appeal of a decision to convert to contract or to continue in-house performance may be made by an affected party. Appeals shall be made in writing, be based only on specific alleged material deviation (or deviations),from OMB Circular A-76, and be supported by appropriate documentation. Appeals must be delivered within 15 working days of the announced decision, to the contracting officer. The contracting officer shall process any such appeal in accordance with internal Departmental procedures.

Subpart 907.4—Equipment Lease or Purchase

907.401 Acquisition considerations.

(c) The factors in FAR 7.401 (a) and (b), the guidelines prescribed in FPMR 101-25.5 and 907.402-70 of this chapter for making purchase or lease determinations shall be applied to the acquisition of all types of equipment. These factors and guidelines shall be used in making purchase versus lease determinations at time of original acquisition, when lease renewals are being considered, or at other times as circumstances warrant.

(d) Contracting officers shall assure the use of applicable purchase versus lease factors and guidelines in all acquisition and supply operations under their jurisdiction.

(e) Excess lists shall be consulted prior to leasing equipment in both original and renewal leasing actions. Also, leased equipment shall be offered for utilization by other DOE offices and DOE contractors prior to release whenever an accumulated credit toward purchase of the equipment will be lost.

(f) Unavailability of funds is not adequate justification for a decision to lease when purchase is indicated by a purchase versus lease comparison to be the more economical course of action. In such circumstances, it it essential that every effort be made to follow the purchase course of action. This is true both with respect to those studies made at the time leases are renewed or when other circumstanc warrant.

907.402–70 Purchase versus lease comparison.

(a) A comparative cost analysis of the alternative methods of acquisition (i.e., purchase, lease, or lease with option to purchase or any other legally acceptable method) shall be performed to determine which method shall provide the Government with the lowest overall cost (price and other factors considered), over the life of the equipment. The method chosen shall be that which offers the greatest advantage to the Government under the circumstances which pertain to each situation.

(b) Responsibilities of acquisition officials, head of program offices, and controller and finance divisions are as follows:

(1) *Acquisition officials:*

(i) Contracting officers shall assure the use of applicable purchase versus lease guidelines in all acquisition and supply operations under their jurisdiction.

(ii) Maintain all purchase versus lease analyses and studies, and other pertinent data used to support administrative actions taken.

(2) *Heads of Program Offices:* Prepare comparative cost analyses for alternative methods of equipment acquisition and submit to the contracting officer.

(3) *Controller and Finance Divisions:* Provide financial policy guidance and assistance to the program offices in preparing comparative cost analyses.

(c) A purchase or lease determination supported by a comparative cost analysis is essential to the equipment acquisition process. To develop a comparative cost analysis properly, it is necessary to bring together "overall costs" of the equipment over the stated life of the equipment. Overall costs shall include, but not be limited to, cost elements as purchase cost, rental cost, lease cost, maintenance cost for purchased equipment, site preparation cost and installation cost. In performing a comparative cost analysis of the alternative methods of acquisition, it is necessary to give consideration to equipment life and residual value.

(1) The cost of equipment for the stated equipment life should be calculated for each acquisition method offered. Examples of plans are:

(i) *Purchase*—Outright purchase after installation and acceptance of equipment.

(ii) *Lease with Purchase Option*—Lease with option to purchase at predetermined intervals of time. The purchase price is usually reduced by subtracting rental credits as set forth in the offeror's proposal.

(iii) *Long Term Lease*—Such plans may provide multi-year leasing at determinable prices where the agency exercises a renewal option at the end of each fiscal year.

(iv) *Lease-to-Ownership Plan or Lease with Title Tranfer Plan*—A plan whereby title transfers after payment of *n* months of rental, but usually with no obligation, or less obligation, to continue to lease than in the installment purchase plan described below.

(v) *Installment Purchase Plan*—A plan whereby the Government exercises an option to purchase the equipment upon payment of *n* months of payments. It is frequently offered as a fixed term installment plan usually for 36 or 60 months in which the Government either is granted title immediately, or title is passed at the end of the contract.

(2) Equipment life, which is a forecast or projection of the period of time which begins with the installation of the equipment and ends when the requirement for the equipment is terminated, is based upon requirements which should be stipulated in the solicitation document. Equipment life is not synonymous with the actual life of the equipment.

(3) Usually, at the end of the stated equipment life, the equipment still has some residual value to the Government. This value may reflect the fact that the initial using activity may well keep the equipment longer than planned or some other Government activity may reutilize the equipment. The future lease payments saved, as well as the resale value of the equipment at the end of the stated equipment life, affect residual value. The residual value varies with each component (item) of equipment and its activity. However, it is generally expected that after a five-year equipment life the equipment should still be worth approximately 20–30% of the purchase price and after eight years, about 10%. The "purchase price" is the lowest evaluated purchase price offered by a responsible and responsive offeror. Instead of the straight purchase price, the sum of all invoice payments to be made to the Contractor may be used as the basis for this calculation. Any procurement option (e.g., Purchase, Lease-to-Ownership, etc.) that results in the Government owning the system(s) will have the residual value deducted from the systems life cost for evaluation purposes.

(4) Care should be taken during negotiations to ensure that the Government retains accrued credits and/or equity under any lease or installment purchase plan should the agency requirement cease or funds no longer be available. It is desirable to negotiate for the transfer of accrued credits to GSA should this case arise, so that GSA can find another user and retain the equity and any purchase option credits. At least a 90 day transfer plan should be available. The negotiator also has to be careful that equipment discontinuance is not hampered by restrictions on when the equipment can be dropped from the plan, or restrictions on the adding of new equipment. Ideally, the contract should contain no penalities for cancellation at the end of each fiscal year. It is imperative, however, that statutory "anti-deficiency" restraints be considered before entering into any multi-year lease or installment plan contracts.

(5) Particular caution should be exercised in entering into a lease-to-ownership or installment purchase plan because often the problems of ownership such as risk of loss or damage, taxes and insurance immediately fall on the Government and hence are avoided by the contractor. These plans offer real profit advantages to a contractor when they can pass the costs and risks on to the Government. Accordingly, since the offeror does not have to include such contingencies in his pricing, commensurate price reductions must be a part of the negotiation objectives under these conditions.

PART 908—REQUIRED SOURCES OF SUPPLIES AND SERVICES

Subpart 908.8—Acquisition of Printing and Related Supplies

Sec.

908.802 Policy.

Subpart 908.11—Leasing of Motor Vehicles

908.1100 Scope of subpart.
908.1102 Presolicitation requirements.
908.1104 Contract clauses.
908.1170 Leasing of fuel-efficient vehicles.

Subpart 908.70—Use of Excess Materials From GSA Inventories

908.7001 Use of excess materials from General Services Administrative inventories.

Subpart 908.71—Acquisition of Special Items

908.7100 Scope of subpart.
908.7101 Motor vehicles.
908.7101–1 Scope of section.
908.7101–2 Consolidated acquisition of new vehicles by General Services Administration.
908.7101–3 Direct acquisition.
908.7101–4 Replacement of motor vehicles.
908.7101–5 Used vehicles.
908.7101–6 Acquisition of fuel-efficient vehicles.
908.7101–7 Government license tags.
908.7102 Aircraft.

908.7103 Office machines.
908.7104 Office furniture and furnishings.
908.7105 Filing cabinets.
908.7106 Security cabinets.
908.7107 Alcohol.
908.7108 Helium.
908.7109 Fuels and packaged petroleum products.
908.7110 Coal.
908.7111 Arms and ammunition.
908.7112 Materials handling equipment replacement standards.
908.7113 Calibration services.
908.7114 Wiretapping and eavesdropping equipment.
908.7115 Forms.
908.7116 Electronic data processing tape.
908.7117 Tabulating machine cards.
908.7118 Rental of post office boxes.
908.7119 [Reserved]
908.7120 [Reserved]
908.7121 Special materials.

Subpart 908.72—Use of Acquisition and Supply Management Support Services at the Nevada Test Site

908.7200 Scope of subpart.
908.7201 Policy.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 908.8—Acquisition of Printing and Related Supplies

908.802 Policy.

(b) The Joint Committee on Printing, Congress of the United States periodically publishes "Government Printing and Binding Regulations" These regulations and DOE Order 1340.1A, Chapter VI, "Printing and Related Activities," govern the acquisition, use, and disposal of printing. Inclusion of printing requirements (limited exceptions are set forth in paragraphs 35–2 through 35–4 of the Government Printing and Binding Regulations) in contracts for supplies and services is prohibited unless specifically approved by the Director, Office of Administrative Services, Headquarters. Contracting officers shall insert the clause at 952.208–70.

Subpart 908.11—Leasing of Motor Vehicles

908.1100 Scope of subpart.

This subpart prescribes procedures for the leasing, from commercial concerns, by DOE offices and its authorized contractors, of motor vehicles that comply with Federal Motor Vehicle Safety Standards and applicable State motor vehicle safety regulations. It does not apply to motor vehicles leased outside the United States. Motor vehicle acquisition policies are at 908.7101.

908.1102 Presolicitation requirements.

(a)(4) Commercial vehicle lease sources may be used only when the General Services Administration (GSA) has advised that it cannot furnish the vehicle(s) through the Interagency Motor Pool System and it has been determined that the vehicle(s) are not available through the GSA Consolidated Leasing Program.

908.1104 Contract clauses.

(e) The clause at 952.208–7, Tagging of Leased Vehicles, shall be inserted whenever a vehicle(s) is to be leased over 60 days, except for those vehicles exempted by FPMR 41 CFR 101–38.6.

908.1170 Leasing of fuel-efficient vehicles.

(a) All sedans and station wagons and certain types of light trucks, as specified by GSA, that are acquired by lease for 60 continuous days or more for official use by DOE or its authorized contractors, are subject to the requirements of the Energy Policy and Conservation Act of 1975 (EPCA), Pub. L. 94–163 and of Executive Order 12003 and subsequent implementing regulations. Accordingly, the Director of Administration and Heads of Contracting Activities shall submit annually to the Director, Property and Equipment Management Division, Office of Policy, Procurement and Assistance Management Directorate, Headquarters, for approval, a forecast of plans for the lease of such vehicles during the fiscal year. Such forecast shall be submitted so as to arrive at Headquarters on or before November 1 of each year.

(b) Two copies of each proposal/request to commercially lease such vehicles shall also be forwarded to the Director, Property and Equipment Management Division, Office of Policy, Procurement and Assistance Management Directorate, Headquarters, for review and certification/approval prior to submission to GSA under the Consolidated Lease Program or execution of commercial lease agreements. All such documentation will be reviewed by this official and a determination made as to conformance with applicable annual forecasts and pertinent public laws and their implementations. (See DOE–PMR 41 CFR 109–38.13.)

(c) Leased vehicles will meet the miles-per-gallon criteria of, and be incorporated in, the approved plan of the fiscal year in which leases are initiated, reviewed, extended, or increased in scope. Vehicle leases will specify the vehicle model type to be provided.

Subpart 908.70—Use of Excess Materials From GSA Inventories

908.7001 Use of excess materials from General Services Administration inventories.

(a) It is the policy of DOE to comply with the provisions of the Federal Property Management Regulations 41 CFR Part 101–14, National Defense Stockpile, as supplemented from time to time by FPMR Bulletins.

(b) Section 328.2 of Defense Mobilization Order II provides that "Under such policies and procedures as the Administrator of General Services may prescribe, Government agencies which directly or indirectly use strategic and critical materials shall fulfill their requirements through the use of materials in Government inventories that are excess to the needs thereof."

(c) DOE offices shall fulfill their requirements for strategic and critical materials through use of the excess strategic and critical materials in the GSA inventories.

(d) General Services Administration (DS), Washington, D.C. 20406, should be contacted directly for any detailed information concerning specifications, prices, and methods of placing the order.

Subpart 908.71—Acquisition of Special Items

908.7100 Scope of subpart.

This subpart sets forth requirements and procedures for the acquisition of special items by DOE and contractors authorized to use special sources of supply to the extent indicated herein.

908.7101 Motor vehicles.

908.7101–1 Scope of section.

Acquisitions by purchase of motor vehicles shall be in accordance with this section.

908.7101–2 Consolidated acquisition of new vehicles by General Services Administration.

(a) New vehicles shall be procured in accordance with FPMR 41 CFR 101–25.304, 101–26.501, and 101–38.13, and DOE-PMR 41 CFR 109–25.304, 109–38.13, and 109–39.51.

(b) Orders for all motor vehicles shall be submitted on GSA Form 1781, Motor Vehicle Requisition—Delivery Order—Invoice, in accordance with FPMR 41 CFR 101–26.501. Requisitions for sedans, station wagons, and certain light trucks as specified by GSA, should contain a certification that the acquisition is in conformance with Pub. L. 94–163, and Executive Order 12003 and 12375 and subsequent implementations.

(c) The schedule of dates for submission of orders is contained in FPMR 41 CFR 101–26.501–4. Heads of Contracting Activities shall consolidate and submit their requirements for passenger automobiles early in the fiscal year. Requisitions for sedans, station wagons and certain types of light trucks shall be submitted through Headquarters as outlined in 908.7101–6. Requisitions for all other types of vehicles shall be submitted directly to GSA.

908.7101–3 Direct acquisition.

Vehicles may be acquired by DOE activities directly rather than through GSA when a waiver has been granted by GSA. A copy of the activity's request to GSA for a waiver shall be forwarded to the Director, Property and Equipment Management Division, Office of Policy, Procurement and Assistance Management Directorate, Headquarters. In those cases involving general purpose vehicles where GSA refuses to grant a waiver and where it is believe that acquisition through GSA would adversely affect or otherwise impair the program, authority for direct acquisition shall be obtained from the above-mentioned Headquarters official, prior to acquisition. In the acquisition of special purpose vehicles for use by DOE and its authorized contractors, the Head of the Contracting Activity may authorize direct purchases. The purchase price for sedans and station wagons, shall not exceed any statutory limitation in effect at the time the acquisition is made. (See DOE–PMR 41 CFR 109–38.5101–4).

908.7101–4 Replacement of motor vehicles.

(a) The replacement of motor vehicles shall be in accordance with the replacement standards prescribed in FPMR 41 CFR 101–38.9 and DOE–PMR 41 CFR 109–38.9.

(b) Heads of Contracting Activities may arrange to sell, as exchange sales, used motor vehicles being replaced and to apply the proceeds to the purchase of similar new vehicles. However, in the event personnel are not available to make such sales, or it is in the best interest of the DOE office, GSA may be requested to sell the used vehicles.

908.7101–5 Used vehicles.

Normally, DOE does not purchase or authorize contractors to purchase used vehicles. However, Heads of Contracting Activities may authorize the purchase of used vehicles where justified by special circumstances; e.g., when new vehicles are in short supply, the vehicles are to be used for experimental or test purposes, or the vehicles are acquired from exchange sale. In accordance with DOE–PMR 41 CFR 109–38.5101–5, the statutory passenger vehicle allocation requirements for DOE shall apply to any purchase of used vehicles except in the case of vehicles to be used exclusively for experimental or test purposes.

908.7101–6 Acquisition of fuel-efficient vehicles.

(a) All purchases of sedans and station wagons, and certain types of light trucks as specified by GSA, are subject to the requirements of the Energy Policy and Conservation Act of 1975 (EPCA), Pub. L. 94–163, and of Executive Orders 12003 and 12375 and subsequent implementing regulations. Accordingly, the Director of Administration and Heads of Contracting Activities will submit annually to the Director, Property and Equipment Management Division, Office of Policy, Procurement and Assistance Management Directorate, Headquarters for approval, a forecast of plans for the purchase of such vehicles during the fiscal year. Such forecast shall be submitted so as to arrive at Headquarters on or before November 1 of each year. Additionally, the original and 2 copies of requisitions (GSA form 1781) for purchase of such vehicles shall also be forwarded to the above official for review and certification/approval prior to submission to GSA. All such documentation will be reviewed by this official and a determination made as to conformance with applicable annual forecasts and pertinent public laws and their implementations. (See DOE–PMR 41 CFR 109–38.13.)

(b) Sedans, station wagons, and light trucks requisitioned according to an approved forecast, but not contracted for by GSA until the subsequent fiscal year, will be included in the acquisition plan for the miles-per-gallon criteria of the year in which GSA signs the purchase contract along with the new vehicles planned for acquisition that year.

908.7101–7 Government license tags.

(a) Government license tags shall be procured and assignments recorded by DOE offices in accordance with FPMR 41 CFR 101–38.303.

(b) The letter "E" has been designated as the prefix symbol for all DOE official license tags. Assignments of specific "blocks" of tag numbers and the maintenance of tag assignment records, is performed by the Director, Property and Equipment Management Division, Office of Policy, Procurement and Assistance Management Directorate, Headquarters. Assignments of additional "blocks" of tag number will be made upon receipt of written requests from field offices.

(c) Special license tags for security purposes shall be purchased in accordance with state and local laws, regulations, and procedures.

(d) In the District of Columbia, official Government tags shall be obtained from the Department of Transportation, Motor Vehicles Services Branch, District of Columbia, for all motor vehicles (except vehicles exempt for security purposes) based or housed in the District.

(e) See DOE–PMR 41 CFR 109–38.3 and 109–38.6 for additional guidance.

908.7102 Aircraft.

Acquisition of aircraft shall be in accordance with DOE–PMR 41 CFR 109–38.5205.

908.7103 Office machines.

Acquisitions of office machines by DOE offices and its authorized contractors shall be in accordance with FPMR 41 CFR 101–25.104, 101–25.302, 101–25.302–3, 101–25.302–4, and 101–25.302–6, and 101–25.403, and DOE–PMR 41 CFR 109–25.302, 109–25.302–3, and 109–25.4.

908.7104 Office furniture and furnishings.

Acquisitions of office furniture and furnishings by DOE offices shall be in accordance with FPMR 41 CFR 101–25.104, 101–25.302, 101–25.302–1, 101–25.302–5, 101–25.302–7, and 101–25.302–8, 101–25.404 and 101–26.505, and DOE–PMR 41 CFR 109–25.302, 109–25.302–1, and 109–25.350.

908.7105 Filing cabinets.

Acquisitions of filing cabinets shall be in accordance with FPMR 41 CFR 101–26.308 and 101–25.302–2 and DOE–PMR 41 CFR 109–25.302–2.50.

908.7106 Security cabinets.

(a) Acquisitions of security cabinets shall be in accordance with FPMR 41 CFR 101–26.507 and the "prerequisites to ordering" criteria contained in FPMR 41 CFR 101–25.302–2 and DOE–PMR 41 CFR 109–25.302–2.50.

(b) Fixed-price prime contractors and lower tier subcontractors may use GSA acquisition sources for security cabinets in accordance with FPMR 41 CFR 101–26.407 and FAR 51.

908.7107 Alcohol.

(a) This section covers (1) Bureau of Alcohol, Tobacco and Firearms, (ATF), Treasury Department, alcohol regulations applicable to DOE, (2) delegations of authority to submit

applications to purchase tax-free alcohol or specially denatured alcohol, and (3) purchases of alcohol by DOE or authorized contractors. To the fullest extent practicable, alcohol for use by DOE or its cost-type contractors shall be procured on a tax-free basis.

(b) ATF regulations relating to the acquisition and use of alcohol free of tax, by Government agencies, are set forth in 26 CFR 213.141–213.146. Copies of excerpts from these regulations may be secured from the Bureau of Alcohol, Tobacco and Firearms, Department of Treasury, Washington, D.C. 20226. These regulations shall be followed in the acquisition of alcohol.

(c) ATF Form 1444/1486, "Tax Free Spirits or Specially Denatured Spirits for Use of United States," shall be used for acquisitions of specially denatured alcohol and ethyl alcohol. Section I of the form is the application for permission to acquire and Section II is the permit. If acquisition from more than one warehouse is desirable, separate applications must be made for withdrawal from each warehouse. When permits are no longer required, they should be forwarded to the Bureau of Alcohol, Tobacco and Firearms for cancellation. Alcohol procured by use of the ATF form referred to in this subsection shall be used exclusively on DOE work.

(d) The Procurement Executive has been authorized to sign and delegate to others authority to sign applications under Bureau of Alcohol, Tobacco and Firearms regulations relating to the acquisition and use of alcohol free of tax. Specific DOE personnel have been delegated authority to execute Part I of Form 1444/1486 by letters to the Director, Bureau of Alcohol, Tobacco and Firearms without power of redelegation. Copies of such letters have been furnished to field offices. Only the individuals so authorized shall execute Section I of these forms. Requests by field offices for new authorizations or changes to existing authorizations shall be submitted by letter to the Procurement Executive.

(e) Applications on the ATF Form 1444/1486 shall be executed in duplicate by an authorized DOE official and mailed directly to the address on the application. Only one permit will be provided to each field organization. Due to the numerous locations managed by field operations offices, the exact shipping address need not be shown in block 3 of the form. Shipments, however, must be addressed to the "Department of Energy at various locations within the United States". The ATF will assign the application a permit number and return it to the requestor. Distribution of certified copies shall be controlled and each holder of a certified copy recorded.

(f) Annually, the Bureau of Alcohol, Tobacco and Firearms publishes printed lists of Distilled Spirits Plants, Bonded Warehouses and Denaturing Plants Authorized to Operate. Copies of these lists and supplies of Form 1444/1486 may be secured by written request to the Director, Bureau of Alcohol, Tobacco and Firearms, Special Operations Branch, Washington, DC 20226.

(g) A signed copy of the permit shall accompany the original purchase order issued to the plant or warehouse, where it shall be retained or returned with the shipment. Subsequent orders shall refer to the permit on file in the plant or warehouse if it was retained.

(h) When alcohol is shipped, the shipper prepares the required form as specified by Bureau of Alcohol, Tobacco and Firearms regulations and forwards them to the consignee. Upon receipt of the receiving report covering the shipment, the officer who signed the purchase order shall execute the certificate of receipt and forward it to the appropriate Regional Director, Bureau of Alcohol, Tobacco and Firearms. The carrier transporting the alcohol shall also be given a receipt as specified by Bureau of Alcohol, Tobacco and Firearms regulations.

(i) Abandoned and forfeited alcohol which has come into the custody or control of a Federal agency may be obtained by following the procedure set forth in FPMR 41 CFR 101–43.4.

908.7108 Helium.

(a) Acquisitions of helium by DOE and its authorized contractors shall be in accordance with this section.

(b) The helium act (Pub. L. 86–777, as amended (50 U.S.C. 167(d)) provides that, to the extent that supplies are readily available, whether in gaseous or liquid form, DOE shall purchase all major requirements of helium from the Secretary of Interior, Bureau of Mines, or from the Bureau of Mines distribution contractors eligible to sell Bureau of Mines helium to Federal agencies and their users in accordance with 30 CFR Part 602.

(c)(1) Purchases may be made directly from the Bureau of Mines by forwarding a purchase order in duplicate to: Bureau of Mines, Division of Helium Operations, 1100 South Fillmore Street, Amarillo, Texas 79101.

(2) Purchases may be made from those commercial firms listed in the Bureau of Mines as eligible to sell helium to Federal users.

(i) The purchase document shall contain the following statement: "Helium furnished under this contract shall be Bureau of Mines Helium."

(ii) A copy of each acquisition document shall be furnished to the address in paragraph (c)(1) of this section.

908.7109 Fuels and packaged petroleum products.

Acquisitions of fuel and packaged petroleum products by DOE offices shall be in accordance with FPMR 41 CFR 101–26.602. When contractors are authorized, consistent with 951, to acquire such products from Defense sources, they shall do so in accordance with FPMR 41 CFR 101–26.602.

908.7110 Coal.

DOE offices and authorized contractors may participate in the Defense Fuel Supply Center (DFSC) coal contracting program for carload or larger lots. If participation is desired, estimates shall be submitted to DFSC in accordance with FPMR 41 CFR 101–26.602.

908.7111 Arms and ammunition.

Pursuant to 10 U.S.C. 4655, the Secretary of the Army is authorized to furnish arms, suitable accouterments for use therewith, and ammunition for the protection of public money and property.

908.7112 Materials handling equipment replacement standards.

Materials handling equipment shall be purchased for replacement purposes in accordance with the standards in FPMR 41 CFR 101–25.405 and DOE–PMR 41 CFR 109–25.4. Heads of Contracting Activities are authorized to replace an item earlier than the date specified in such standards under unusual circumstances. A written justification shall be placed in the purchase file.

908.7113 Calibration services.

Orders for calibration services may be placed with the National Bureau of Standards, Washington, D.C. 20234, by either DOE acquisition offices or its authorized contractors. Copies of the letters authorizing contractors to order calibration services on behalf of DOE shall be sent to the Bureau of Standards, Attention: "Administrative Services Division."

908.7114 Wiretapping and eavesdropping equipment.

Acquisition by DOE offices and contractors of devices primarily designed to be used surreptitiously to overhear or record conversations is prohibited.

908.7115 Forms.

(a) DOE forms shall be obtained by DOE offices in accordance with DOE Order 1322.2A, "Forms Management." Cost-type contractors shall obtain DOE forms through the DOE contracting officer.

(b) Standard, optional, and certain other agency forms as listed in the GSA Supply Catalog will be obtained by DOE offices in accordance with FPMR 41 CFR 101–26.302.

(c) Marginally punched continuous forms shall be obtained in accordance with FPMR 41 CFR 101–26.703.

908.7116 Electronic data processing tape.

(a) Acquisitions of electronic data processing tape by DOE offices shall be in accordance with FPMR 41 CFR 101–26.508.

(b) Acquisitions of electronic data processing tape by authorized contractors shall be in accordance with FPMR 41 CFR 101–26.508–1. However, if adequate justification exists, Heads of Contracting Activities may authorize contractors to obtain their tape from other sources. When such an authorization is granted, a copy of the authorization and justification shall be retained in the contract file.

908.7117 Tabulating machine cards.

DOE offices shall acquire tabulating machine cards in accordance with FPMR 41 CFR 101–26.509.

908.7118 Rental of post office boxes.

DOE offices and authorized contractors may rent post office boxes on an annual basis, or for shorter periods by quarters, where necessary. Payments for annual rentals are to be made in advance at the beginning of the fiscal year, and for periods of less than a year, either in advance for the whole period or at the beginning of each quarter in which the box is to be used.

908.7119 [Reserved]

908.7120 [Reserved]

908.7121 Special materials.

This section covers the purchase of materials peculiar to the DOE program. While purchases of these materials are unclassified, quantities, destination or use may be classified. See appropriate sections of the Classification Guide. Contracting activities shall require authorized contractors to obtain the special materials identified in the following subsections in accordance with the procedures stated therein.

(a) *Heavy water.* The Senior Program Official or designee controls the acquisition and production of heavy water for a given program. Orders shall be placed directly with the cognizant Senior Program Official or designee.

(b) *Precious metals.* The Oak Ridge Operations Office is responsible for maintaining the DOE supply of precious metals. These metals are platinum, palladium, iridium, osmium, rhodium, ruthenium, gold and silver. Oak Ridge Operations Office has assigned management of these metals to NLO, Inc., P.O. Box 39158, Cincinnati, Ohio 45239. DOE offices and authorized contractors shall coordinate with NLO, Inc., regarding the availability of the above metals prior to the purchase of these metals on the open market.

(c) *Lithium.* Lithium is available at no cost other than normal packing, handling, and shipping charges. The excess quantities at Oak Ridge are to be considered as the first source of supply, prior to procurement of lithium or lithium compounds from any other source.

Subpart 908.72—Use of Acquisition and Supply Management Support Services at the Nevada Test Site

908.7200 Scope of subpart.

This subpart sets forth DOE policy for the use of the acquisition and supply management support services at the Nevada Test Site (NTS). The provisions of this subpart shall be applied to contractors carrying out authorized projects at the NTS.

908.7201 Policy.

As an integral part of its responsibility for furnishing project-related materials, equipment, and technical services, the Nevada Operations Office shall, except in special cases, provide to the fullest practicable extent, the necessary acquisition and supply management support services required to support the technical efforts of all organizations sponsoring experiments or participating in the scientific aspects of experiments conducted at the NTS. Furthermore, all organizations that are carrying out projects or performing work at the NTS will make the fullest practicable use of these facilities and services to prevent unnecessary duplication and to assure maximum efficiency and economy.

PART 909—CONTRACTOR QUALIFICATIONS

Subpart 909.1—Responsible Prospective Contractors

Sec.
909.104–1 General standards.

Subpart 909.4—Debarment, Suspension, and Ineligibility

909.402 Policy.
909.404 Consolidated lists of debarred, suspended, and ineligible contractors.
909.406 Debarment.
909.406–3 Procedures.
909.407 Suspension.
909.407–3 Procedures.

Subpart 909.5—Organizational Conflicts of Interest

909.500 Scope of subpart.
909.570 DOE organizational conflicts of interest.
909.570–1 Scope of section.
909.570–2 Policy.
909.570–3 Definitions.
909.570–4 Criteria for recognizing organizational conflicts of interest.
909.570–5 Disclosure of organizational conflicts of interest.
909.570–6 Notices and representations: Action required of contracting officers.
909.570–7 Disclosure or representation.
909.570–8 Contract clauses.
909.570–9 Evaluation, findings, and contract award.
909.570–10 Action in lieu of termination.
909.570–11 Architect-engineering and construction contracts.
909.570–12 Subcontractors and consultants.
909.570–13 Remedies.
909.570–14 Examples.
909.570–15 Disclosure format.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 909.1—Responsible Prospective Contractors

909.104–1 General standards.

A prospective contractor, in order to be determined as responsible, in the opinion of the contracting officer, must meet the following standards as they relate to the particular acquisition under consideration:

(b) Have an established system of accounting and financial controls which the contracting officer determines will permit the effective administration of the type of contract proposed, particularly if under its terms, the costs incurred are a factor in determining the amount payable under the contract, or if advance or progress payments are requested.

(g) If a bid or proposal for a construction contract qualifies any major equal opportunity requirement included or referenced in a solicitation, the qualification shall constitute grounds for a determination that the offeror is not eligible for award. In the case of construction acquisition actions by DOE prime contractors, this determination shall be made only with the approval of the DOE contracting officer.

Subpart 909.4—Debarment, Suspension, and Ineligibility

909.402 Policy.

DOE debarment and suspension regulations are contained in 10 CFR Part 1035. Ineligibility regulations are contained in the FAR.

909.404 Consolidated lists of debarred, suspended, and ineligible contractors.

The GSA Consolidated List of Debarred, Suspended, and Ineligible Contractors (GSA List) and the DOE Consolidated List of Debarred, Suspended, Ineligible and Voluntarily Excluded Awardees (DOE List) shall be reviewed in accordance with 10 CFR 1035.15.

909.406 Debarment.

909.406-3 Procedures.

(a) Information of possible fraud, waste, abuse, or other forms of wrongdoing which may constitute or contribute to grounds for debarment or suspension shall be reported in accordance with 10 CFR 1035.5(c).

909.407 Suspension.

909.407-3 Procedures.

(a) See 909.406-3.

Subpart 909.5—Organizational Conflicts of Interest

909.500 Scope of subpart.

DOE acquisitions will be processed in accordance with 909.570 below rather than as provided at FAR subpart 9.5 with respect to organizational conflicts of interest.

909.570 DOE organizational conflicts of interest.

909.570-1 Scope of section.

This section sets forth Department of Energy policies and procedures regarding organizational conflicts of interest (OCI) and is issued pursuant to section 644 of the Department of Energy Organization Act (Pub. L. 95-91) to implement the requirements of the Federal Nonnuclear Energy Research and Development Act of 1974 (Pub. L. 93-577), as amended, and the Federal Energy Administration Act of 1974 (Pub. L. 93-275), as amended.

909.570-2 Policy.

It is the policy of the DOE to identify and avoid or mitigate organizational conflicts of interest before entering into contracts, agreements, and other arrangements.

909.570-3 Definitions.

"Affiliates" means business concerns which are affiliates of each other when either directly or indirectly one concern or individual controls or has the power to control another, or when a third party controls or has the power to control both.

"Architect-engineering services" means the work or effort of a professional nature associated with the study, test, design, supervision, and construction, alteration, or repair of real property including utilities and appurtenances thereto. Such services embrace conceptual design and Title I, Title II, and Title III work, as defined in 936.605(c).

"Contract" for purposes of implementing policy on organizational conflicts of interest, means any contract, agreement or other arrangement with the Department.

"Contractor" means any person, firm, unincorporated association, joint venture, partnership, corporation or affiliates thereof, which is a party to a contract with the Department.

"Evaluation services or activities" means any work or effort, the principal purpose of which involves the independent study of technology, process, product, or policy.

"Offeror" means any person, firm, unincorporated association, joint venture, partnership, corporation or affiliates thereof, submitting a bid or proposal, solicited or unsolicited, to the Department to obtain a contract or modification thereof.

"Organizational conflicts of interest" means that a relationship or situation exists whereby an offeror or a contractor (including chief executives and directors, to the extent that they will or do become involved in the performance of the contract, and proposed consultants or subcontractors where they may be performing services similar to the services provided by the prime) has past, present, or currently planned interests that either directly or indirectly, through a client relationship relate to the work to be performed under a Department contract and which (1) may diminish its capacity to give impartial, technically sound, objective assistance and advice, or (2) may result in it being given an unfair competitive advantage. It does not include the normal flow of benefits from the performance of the contract.

"Research and development" means any work or effort, the principal purpose of which involves (1) theoretical analysis, exploration, or experimentation; or (2) extension of investigative findings and theories of a scientific or technical nature into practical application for experimental and demonstration purposes, including the experimental production and testing of models, devices, equipment, materials, and processes.

"Subcontractor" means any subcontractor of any tier which performs work under a contract.

"Technical consulting and management support services" means any work or effort, the principal purpose of which is to provide internal assistance to any program element or other organizational component of the Department in the formulation or administration of its programs, projects, or policies, which requires the contractor to be given access to internal or proprietary data. Such services typically include assistance in the preparation of program plans; evaluation, monitoring or review of contractors' activities or proposals submitted by prospective contractors; preparation of preliminary designs, specifications, or statements of work.

909.570-4 Criteria for recognizing organizational conflicts of interest.

(a) *General.* Two questions should generally be asked in determining whether organizational conflicts of interest exist: (1) Are there conflicting roles which might bias a contractor's judgment in relation to its work for the Department? (2) Is the contractor being given an unfair competitive advantage based on the performance of the contract? The ultimate determination as to whether organizational conflicts of interest exist should be made in the light of common sense and good business judgment based upon the relevant facts and the work to be performed. While it is difficult to identify, and to prescribe in advance, a specific method for avoiding all the various situations or relationships which might involve potential organizational conflicts of interests, Department personnel must pay particular attention to proposed contractual requirements which call for the rendering of advice, or consultation or evaluation services, or similar activities that lay direct groundwork for the Department's decisions on future acquisitions, research and development programs, production and regulatory activities.

(b) *Situations or relationships involving organizational conflicts of interest.* The following general examples (which are not all-inclusive) illustrate situations or relationships where potential organizational conflicts of interest frequently arise. Specific examples are set forth at 909.570-14.

(1) Contract performance involving the preparation and furnishing of complete or essentially complete specifications which are to be used in

competitive acquisition for the furnishing of products or services.

(2) Contract performance involving the preparation and furnishing of a detailed plan for specific approaches or methodologies that are to be incorporated in a competitive acquisition.

(3) Contract performance involving access to internal information not available to the public concerning Departmental plans or programs and related opinions, clarifications, interpretations, and positions.

(4) Contract performance involving access to proprietary information which cannot lawfully be used for purposes other than those authorized by the owners.

(5) Contract performance involving evaluation of the contractor's products or services, or the products or services of another party, where the contractor is or has been substantially involved in their development or marketing.

(6) Contract performance involving the preparation and furnishing of advice to the Department in a technical area where the contractor is also providing consulting assistance in the same area to any other organization.

(7) Contract performance involving the preparation and furnishing of advice to the Department on a regulatory matter where the contractor is also providing assistance on the same or similar matter to any organization regulated by the Department.

(c) *Other considerations.* An organizational conflict of interest may exist or arise:

(1) Even though no follow-on acquisition is anticipated;

(2) Even though a hardware exclusion clause may not be appropriate; and

(3) When a contract is awarded on a noncompetitive or a sole source basis.

(d) An organizational conflict of interest is more likely to be disclosed if a contract is competitive. Accordingly, greater care shall be exercised in the absence of competition.

909.570–5 Disclosure of organizational conflicts of interest.

(a) When submitting solicitations and unsolicited proposals for (1) evaluation services or activities; (2) technical consulting and management support services and professional services; (3) research and development conducted pursuant to the authority of the Federal Energy Administration Act of 1974 (Pub. L. 93–275), as amended; and (4) other contractual situations where special organizational conflicts of interest provisions are noted in the solicitation and included in the resulting contract, offerors shall be required to disclose relevant information bearing on the possible existence of any organizational conflicts of interest or complete the representation required by 909.570–7. This requirement shall also apply to all modifications of contracts of the types noted above except those issued under the Changes clause. Where, however, a disclosure statement of the type required by the Organizational Conflicts of Interest Disclosure or Representation provision has previously been submitted with regard to the contract being modified, only an updating of such statement shall be required. Information submitted by offerors pursuant to the disclosure requirement shall be treated by the Department, to the extent permitted by law, as confidential information to be used solely for OCI purposes.

(b) When the Government finds that an organizational conflict of interest exists or may exist with respect to an offeror or contractor, no contract or contract modification award covered by 909.570–7 shall be made until the organizational conflict of interest has been adequately avoided or mitigated, except as provided in 909.570–9.

909.570–6 Notices and representations: Action required of contracting officers.

The disclosure or representation required by 909.570–7 is designed to alert the contracting officer to situations or relationships which may constitute either present or anticipated organizational conflicts of interest with respect to a particular offeror or contractor. However, this disclosure or representation may not identify a potential organizational conflict of interest involving a successful offeror that could affect the offeror's participation in subsequent acquisitions arising out of or related to work performed under a contract that results from the solicitation currently under consideration. Accordingly, whenever such potential conflicts are foreseeable by the Government, a special notice also shall be included in the solicitation informing offerors of the fact that such a potential conflict is foreseen and that a special contract clause designed to avoid or mitigate such conflict will be included in any resultant contract as required by 909.570–7. Such notice shall specify the proposed extent and duration of restrictions to be imposed with respect to participation in subsequent acquisitions. A fixed term of reasonable duration is measured by the time required to eliminate what would otherwise constitute an unfair competitive advantage. This is a variable; and in no event shall an exclusion be stated which is not related to specific expiration date or an event certain. In the event a contractor, having performed on one contract, later seeks work that stems or may be deemed to stem directly from prior performance, such contractor shall not be precluded from proposing on follow-on work unless the prior contract contained an appropriate follow-on restriction.

909.570–7 Disclosure or representation.

The disclosure or representation provision at 952.209–70 shall be included in all solicitations, scope modifications, and unsolicited proposals for (a) evaluation services or activities; (b) technical consulting and management support services and professional services; (c) research and development conducted pursuant to the authority of the Federal Energy Administration Act of 1974 (Pub. L. 93–275), as amended; and (d) other contractual situations where special organizational conflicts of interest provisions are noted in the solicitation and included in the resulting contract. 909.570–15 contains a suggested outline for the disclosure submission.

909.570–8 Contract clauses.

(a) *General contract clause.* Except where a special clause has been determined to be appropriate, all contracts subject to the disclosure or representation requirement of 909.570–7 shall include the clause set forth at 952.209–71.

(b) *Special contract clauses.* (1) If it is determined from the nature of the proposed contract that a potential organizational conflict of interest may exist, the Contracting Officer may determine that such conflict can be avoided through the use of an appropriate special contract clause. Examples of the types of clauses which may be employed include, but are not limited to, the following:

(i) Hardware exclusion clauses which prohibit the acceptance of production contracts following a related nonproduction contract previously performed by the contractor;

(ii) Software exclusion clauses;

(iii) Clauses which require the contractor (and/or certain of its key personnel) to avoid certain organizational conflicts of interest;

(iv) Clauses which provide for the protection of the confidentiality of data and guard against its unauthorized use; and

(v) Clauses that prohibit other segments or divisions of the contractor from becoming involved in the performance of the contract work or

being in a position to influence such work.

If deemed appropriate, the prospective contractor may be given the opportunity to negotiate the terms and conditions of the clause and its application including the extent and time period of any restrictions.

(2) Contracts for technical consulting and management support services, as defined in 909.570–3, are particularly susceptible to organizational conflicts of interest. Therefore, the clause set forth at 952.209–72 shall be included in all contracts for technical consulting and management support services. This clause, after any appropriate modification, may also be included in any contract for professional services and evaluation services and activities.

909.570–9 Evaluation, findings, and contract award.

(a) The contracting officer or selection official, as appropriate, shall evalute all relevant facts submitted by an offeror pursuant to the requirements of 909.570–6 and such other relevant information as may be available concerning possible organizational conflicts of interest. After evaluation all such information in accordance with the criteria of 909.570–4 and prior to any award, a finding shall be made by the contracting officer whether possible organizational conflict of interest exist with respect to a particular offeror or whether there is little or no likelihood that such conflicts exist. When formal Source Evaluation Board procedures are applicable, the finding shall be made by the Source Selection Official. If the finding indicates that such conflicts exist, then the contracting officer shall:

(1) Disqualify the offeror from award; or

(2) Avoid such conflicts by the inclusion of appropriate conditions in the resulting contract; or

(3) If such conflicts cannot be avoided by an appropriate contract clause, and the Secretary or the Secretary's designee has nevertheless determined that award of the contract to the offeror is in the best interest of the United States, the contract may be awarded. Where such a public interest determination is made, an appropriate written finding and determination shall be published in the **Federal Register** and an appropriate clause included in the contract to mitigate the conflict, to the extent feasible, prior to any award.

(b) Examples of circumstances justifying the determination permitted by 909.570–9(a)(3) include, but are not limited to:

(1) Situations where the public exigency will not otherwise permit; and

(2) Situations where the work or services cannot otherwise be obtained.

909.570–10 Action in lieu of termination.

If, after award, a possible organizational conflict of interest is identified by the contractor or other sources and the contracting officer determines that such a conflict does in fact exist and that it would not be in the best interest of the Government to terminate the contract as provided in the clauses required by 909.570–8, the contracting officer shall take every reasonable action to avoid or mitigate the effects of the conflict.

909.570–11 Architect-engineering and construction contracts.

(a) The award of related architect-engineering services and construction contracts or subcontracts to the same contractor can result in self-inspection of construction work and permit the contractor to render biased decisions. Such contract awards shall not be permitted unless a waiver is obtained prior to award from the Department's Procurement Executive.

(b) The award of architect-engineering services contracts, the principal purpose of which is to provide evaluation services and activities or technical consulting and management support services, shall be subject to the requirements of 909.570–7 and 909.570–8(b)(2).

909.570–12 Subcontractors and consultants.

The contracting officer shall require offerors and contractors to obtain for the Department a disclosure or representation in accordance with 909.570–7 from subcontractors and consultants who may be performing services similar to the services provided by the prime, except that subcontractors shall not normally be required to submit the disclosure or representation if such subcontract is for supplies. Such disclosure or representation may be submitted by the subcontractors and consultants directly to the contracting officer and they shall be treated by the Department, to the extent permitted by law, as confidential information to be used solely for OCI purposes. The contracting officer shall assure that contract clauses in accordance with 909.570–8 are included in subcontracts or consultant agreements involving peformance of work under a prime contract covered by this subpart.

909.570–13 Remedies.

In addition to such other remedies as may be permitted by law or contract, for a breach of any of the restrictions in this subpart or for nondisclosure or misrepresentation of any relevant facts required to be disclosed by this subpart, the Department may disqualify the contractor for subsequent Department contracts. Contractors and offerors may also be subject to the criminal penalties expressed in 18 U.S.C. 1001 for such violations.

909.570–14 Examples.

(a) In development work it is normal to select firms which have done the most advanced work in the field. It is to be expected that these firms will design and develop around their own prior knowledge. Development contractors can frequently start production earlier and more knowledgeably than can firms which did not participate in the development, and this affects the time and quality of production, both of which are important to the Government. In many instances, the Government may have financed such development. Thus, the development contractor may have an unavoidable competitive advantage which is not considered unfair and no prohibition should be imposed.

(b) The following examples illustrate types of situations and relationships where organizational conflict of interest questions frequently arise, but they are not all-inclusive.

(1) Contractor A, in connection with the performance of a study contract, is given information by the Department regarding Department plans for future acquisitions. This information is not available to interested industrial firms. *Guidance.* Normally this would constitute an OCI and the contractor should not be permitted to compete with such firms for work relating to such plans.

(2) Company A, in response to a requests for proposals (RFP), proposes to undertake certain analyses of an energy savings device as called for in the RFP. The company is one of several companies considered to be technically well qualified. In response to the inquiry in the RFP, A advises that it is currently performing similar analyses for the manufacturer of the device. *Guidance.* Normally this would constitute an OCI and a contract for that particular work would not be awarded to Company A because it would be placed in a position in which its judgment could be biased in relationship to its work for the Department. Since there are other well qualified companies available, there would be no reason for granting a waiver of the policy.

(3) Accounting Firm A, in response to a requests for proposals (RFP), proposes to undertake an analysis of the profitability of one segment of the

energy industry. The firm is one of several firms considered to be technically well qualified. In response to the inquiry in the RFP, A advises that it derives a substantial portion of its income from the industry to be studied. *Guidance.* Normally this would constitute an OCI and a contract would not be awarded to Firm A because it would be placed in a position in which its judgment could be biased in relationship it its work for the Department.

(4) Company A prepares updated Government specifications for a standard refrigerator to be procured competitively. *Guidance.* Normally this would constitute an OCI and Company A shall not be allowed for a reasonable period of time to compete for supply of the refrigerator.

(5) Company A designs or develops new electronics equipment and, as a result of the design or development, prepares specifications. *Guidance.* Normally this would not constitute an OCI and the company may supply the electronics equipment.

(6) A tool company and/or a machinery company representing the American Tool Institute works under the supervision and control of Government representatives to refine specifications or to clarify the requirements of a specific acquisition. *Guidance.* Normally this would constitute an OCI and these companies may supply the item.

(7) Prior to acquisition of Automatic Data Processing (ADP) Equipment, Company A is awarded a contract to develop software to automate a DOE function. Since the software can be written to favor a particular vendor's commercial ADP hardware, a potential conflict of interest exists. *Guidance.* Normally this would constitute an OCI and Company A should be barred from at least the initial follow-on ADP hardware acquisition using the software developed under its development contract.

(8) Company A receives a contract to define the detailed performance characteristics a Government agency will require for the purchase of rocket fuels. A has not developed the particular fuels. At the time the contract is awarded, it is clear to both parties that the performance characteristics arrived at will be used by the Government agency to choose competitively a contractor to develop or produce the fuels. *Guidance.* Normally this would constitute an OCI and Company A shall not be permitted to bid on this acquisition.

(9) Company A receives a contract to prepare a detailed plan for the acquisition of services aimed at the advanced scientific and engineering training of the Department's personnel. It suggests a curriculum which the agency endorses and incorporates in requests for proposals to various institutions to establish and conduct such training. *Guidance.* Normally this would constitute an OCI and Company A shall not be permitted to bid on this acquisition.

(10) Consulting Firm A, in response to an RFP, proposes to undertake an evaluation of the environmental impacts of coal-fired powered plants as called for in the RFP. The company is one of several companies considered to be technically well qualified. In response to the inquiry in the RFP, A advices that it derives a substantial portion of its income from companies which manufacture nuclear power plants. *Guidance.* Normally this would constitute an OCI and a contract for that particular work would not be awarded to Firm A because it would be placed in a position in which its judgment could be biased in relationship to its work for the Department.

(11) Consulting Firm A derives a substantial portion of its income from Company B in connection with the study of natural gas production. Company B is also heavily involved with motor gasoline marketing. A discloses these facts in response to an RFP for a study of motor gasoline marketing. *Guidance.* Normally this would constitute an OCI and a contract for the study of motor gasoline marketing plants would not be awarded to Firm A because it would be placed in a position in which its judgment could be biased in relation to its work for the Department.

(12) Firm A, because of its unique technical expertise, has been requested to assist the Department in the evaluation of proposals which will result from a competitive solicitation. Firm A also plans to submit a proposal in response to this game solicitation. *Guidance.* Normally this would constitute a conflict and Firm A should be precluded from participating in the solicitation. In a particular case, it may be desirable (e.g., when the competitive field in narrow) to allow a separate division or affiliate of Firm A to submit a proposal; but in such a case, of course, Firm A would not itself participate in the evaluation of this proposal, which would be undertaken by DOE personnel or another firm.

909.570-15 Disclosure format.

(a) With respect to past, present, and currently planned interests (financial, contractual, organizational, or otherwise), the offeror should furnish a list of past, present, and currently planned activities (including contracts) which relate to the work to be performed under the solicitation.

(b) The list may be in columnar format showing:

(1) The company (or agency) for which the work is being, has been, or will be performed;

(2) Nature of the work (a brief description);

(3) Period of performance for the work;

(4) Dollar value of the work; and

(5) Sales and marketing activity.

(c) Similar information to (b) above should be provided by the covered subcontractors and consultants relating to the work to be performed by them under the solicitation.

PART 910—SPECIFICATIONS, STANDARDS, AND OTHER PURCHASE DESCRIPTIONS

910.004 Selecting specifications or descriptions for use.

(f) *Specification for concrete using fly ash.* Pursuant to the Resource Conservation and Recovery Act of 1976, 42 U.S.C. 6962, the Environmental Protection Agency has promulgated rules at Part 249 of Title 40 of the Code of Federal Regulations regarding the use of certain waste byproducts as generally acceptable substitutes for energy intensive raw materials. When cement or concrete is being acquired, specifications should include provisions to allow for the use of (as an optional or alternate material) cement or concrete which contains fly ash. However, specifications should not be revised to allow the use of fly ash if it can be determined that for a particular project or application reasonable performance requirements for the cement or concrete will not be met, or that the use of fly ash would be inappropriate for technical reasons. Architect-engineer contracts should include provisions assuring that the provisions of 40 CFR Part 249 are considered in developing specifications.

(g) *Measurement principles for sources and special nuclear material transfers.*

(1) Certain principles regarding the resolution of measurement differences have been developed which should be used as guides in the preparation of contracts or other agreements by DOE in which monetary payments or credits depend on quantity and quality of source and special nuclear material. The provisions providing for the resolution of measurement differences must be such that resolution is always accomplished while at the same time

minimizing any advantage one party might have over the other.

(2) Each contract, lease or agreement should contain a:

(i) Clause describing material to be transferred;

(ii) Clause specifying the method by which the quantity and quality are to be measured and reported;

(iii) Clause specifying the procedures to be used in resolving any differences arising as a result of such measurements;

(iv) Clause providing for the use of an umpire to settle unresolved differences in the analytical samples; and

(v) Clause specifying in detail which party shall bear the costs of revolving a difference and what constitutes such costs.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95-91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

PART 912—CONTRACT DELIVERY OR PERFORMANCE

Subpart 912.3—Priorities, Allocations, and Allotments

Sec.
912.300 Scope of subpart.
912.302 General.
912.304 Solicitation provision and contract clause.

Subpart 912.5—Suspension of Work, Stop-Work Orders, and Government Delay of Work

912.503 Stop-work orders.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95-91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 912.3—Priorities, Allocations, and Allotments

912.300 Scope of subpart.

This subpart implements and supplements FAR Subpart 12.3—Priorities, Allocations, and Allotments, and implements the regulations and procedures of the Defense Materials System (DMS) and the Defense Priorities System (DPS) in solicitations and contracts in support of authorized national defense and those energy programs which maximize domestic energy supplies. (See 15 CFR Parts 330-354).

912.302 General.

(d) Programs which maximize domestic energy supplies are eligible for priorities and allocations support depending on an executive decision made on a case-by-case basis. Eligibility is pursuant to section 104(a) of the Energy Conservation and Policy Act, Pub. L. 94-163, which added a new section 101(c) to the Defense Production Act. Guidance is provided by 10 CFR Part 216 and Department of Energy publication DOE/PR-0042, "Priorities and Allocations Support for Energy: Keeping Energy Orders on Schedule," dated August 1980. Rated orders and ACM orders placed in support of authorized energy programs are equivalent to orders placed in support of authorized defense programs under DMS/DPS and receive the same preferential treatment throughout the industrial supply chain.

(e) Heads of Contracting Activities shall ensure that members of their staff and contractors under their jurisdiction are advised of the provisions of the DMS and DPS regulations and that the related procedures are followed to ensure training and adherence to the regulations and procedures throughout the industrial supply chain. Under DMS and DPS, it is mandatory that the priority rating be extended through the industrial chain from supplier to supplier.

912.304 Solicitation provision and contract clause.

(a) The contracting officer shall insert the provision at 952.212-70, Rated or Authorized Controlled Material Orders (Atomic Energy) in solicitations that will result in the placement of rated orders or ACM orders for authorized DOE atomic energy programs.

(b) The contracting officer shall insert the clause at 952.212-71, Priorities, Allocations, and Allotments for DOE Atomic Energy Programs, in contracts that are placed in support of authorized DOE atomic energy programs.

(c) The use of the provisions at 952.212-70 and the clause at 952.212-71 is optional for industrial delivery orders of $2,500 or less.

(d) The contracting officer shall insert the provision at 952.212-70 (Alternate I) Rated or Authorized Controlled Material Orders (Domestic Energy Supplies), in solicitations that may result in the placement of rated orders or ACM orders for authorized energy programs.

(e) The contracting officer shall insert the clause at 952.212-71 (Alternate I) Priorities, Allocations, and Allotments-Special E.P.C.A. clause if it is believed the contract involves a program the purpose of which is to maximize domestic energy supplies.

Subpart 912.5—Suspension of Work, Stop-Work Orders, and Government Delay of Work

912.503 Stop-work orders.

(b) Approval before issuance of a stop-work order shall be obtained at one organizational level above the contracting officer or at such higher level as the Head of the Contracting Activity may require.

PART 913—SMALL PURCHASES AND OTHER SIMPLIFIED PURCHASE PROCEDURES

Subpart 913.3—Fast Payment Procedure

Sec.
913.301 General.

Subpart 913.4—Imprest Fund

913.403 Agency responsibilities.

Subpart 913.5—Purchase Orders

913.505-2 Agency order forms in lieu of Optional Forms 347 and 348.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95-91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 913.3—Fast Payment Procedure

913.301 General.

The fast payment procedure delineated in FAR Subpart 13.3 is not to be utilized by DOE.

Subpart 913.4—Imprest Funds

913.403 Agency responsibilities.

(d) If imprest funds are to be used, the HCA shall issue detailed procedures for the control of such funds.

Subpart 913.5—Purchase Orders

913.505-2 Agency order forms in lieu of Optional Forms 347 and 348.

The combination purchase request/order/receipt form may be used in lieu of the Optional Form 347 for small purchases.

PART 914—FORMAL ADVERTISING

Subpart 914.2—Solicitation of Bids

Sec.
914.201-5 Part IV Representations and instructions.
914.201-7 Contract clauses.
914.201-70 Preparation of invitations for bids.

Subpart 914.4—Opening of Bids and Award of Contract

914.401 Receipt and safeguarding of bids.
914.402-1 Unclassified bids.
914.406 Mistakes in bids.

914.406–3 Other mistakes disclosed before award.
914.406–4 Mistakes after award.
914.407–8 Protests against award.
914.407–70 Protest authorities.
914.408–2 Award of classified contracts.

Subpart 914.5—Two-Step Formal Advertising

914.502 Conditions for use.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 914.2—Solicitation of Bids

914.201–5 Part IV—Representations and instructions.

(a) *Section K, Representations, certifications, and other statements of bidders.*

(1) DOE contracting activities may elect to adopt the simplified representations and certifications technique, described at 915.406–5, in their formally advertised acquisitions.

(b) Include the solicitation provision at 952.215–70 if the resulting contract will contain any of the clauses referenced therein.

914.201–7 Contract clauses.

(b)(1) When contracting by formal advertising, the contracting officer shall insert the clause at FAR 52.214–27, Price Reduction for Defective Cost or Pricing Data—Modifications-Formal Advertising, in all solicitations and contracts.

914.201–70 Preparation of invitations for bids.

When an option is to be employed, the option quantity should be for an amount which bears a reasonable relationship to the initial firm quantity amount. For procedures to be used in setting the option quantity, see FAR 17.2.

Subpart 914.4—Opening of Bids and Award of Contract

914.401 Receipt and safeguarding of bids.

(c) Envelopes, or other outer covering, containing identified bids shall be time-stamped (indicating the place, date, and time of receipt) upon receipt, either in a mail room or other receiving point at the address specified in the invitation.

914.402–1 Unclassified bids.

(d) At the bid opening, the relative merits of any bid shall not be discussed by the person opening the bids or the contracting officer, with the bidders, their representatives, or with casual observers. No statements shall be issued by the bid opener or the contracting officer at a bid opening bearing on the award, the possibility of a readvertisement, mistakes in bids, etc.

914.406 Mistakes in bids.

914.406–3 Other mistakes disclosed before award.

(e) Pursuant to FAR 14.406–3(e), the Procurement Executive, has been delegated authority by the Secretary to make the determinations under FAR 14.406–3. In the case of mistakes in bids alleged after opening of bids and before award, the Procurement Executive has redelegated this authority to Heads of Contracting Activities without power of redelegation and to make administrative determinations regarding withdrawal of bids as provided for in paragraphs (a) and (c) of FAR 14.406–3, providing that each such determination shall be approved by Legal Counsel.

914.406–4 Mistakes after award.

The Procurement Executive has been delegated authority to make the determinations under FAR 14.406–4. Mistakes in bids after award, together with the data set forth in FAR 14.406–4(e), shall be submitted to the Procurement Executive for decision.

914.407–8 Protests against award.

(a) *General.* Protests must be received within ten working days after the basis for protest is known or should have been known *except that* protests based upon alleged improprieties in any type of solicitation which are apparent prior to bid opening or the closing date for receipt of initial proposals shall be filed prior to bid opening or the closing date for receipt of initial proposals.

(b) Protests before award.

(3) The Head of the Contracting Activity or designee shall obtain, through the Office of Procurement Review, Headquarters, approval of the Procurement Executive to make an award where a protest has been submitted to either the DOE or to the Comptroller General.

914.407–70 Protest authorities.

(a) The Procurement Executive has the authority and responsibility for processing, reviewing, and providing to the General Accounting Office (GAO) all information relevant to a protest filed with GAO and otherwise representing DOE in all matters relating to such protests. In the case of protests filed with DOE Headquarters, the Procurement Executive shall decide such protests. The authorities and responsibilities concerning GAO protests have been delegated to the Director, Business Clearance Division, Office of Procurement Review, Headquarters.

(b) The Head of the Contracting Activity (HCA) shall decide all agency protests made to the contracting activity, with the following exceptions:

(1) The HCA is the signatory contracting officer; or

(2) Prior to making final disposition of the protest, the action is protested to GAO or DOE Headquarters; or

(3) The HCA finds that the issues raised have the potential for significant impact on DOE acquisition policy or the accomplishment of programmatic requirements.

(c) If a protest is filed with the Contracting Activity, and a decision is made by the Head of Contracting Activity, the agency will not entertain a protest to the Procurement Executive.

914.408–2 Award of classified contracts.

DOE regulations regarding the safeguarding of restricted data and procedures for its destruction are contained at 10 CFR Part 795.

Subpart 914.5—Two-Step Formal Advertising

914.502 Conditions for use.

(c) Use of the two-step formal advertising method shall be approved by the Head of Contracting Activity. The contracting officer shall submit a written request for approval justifying its use in accordance with FAR 14.502.

PART 915—CONTRACTING BY NEGOTIATION

Subpart 915.1—General Requirements for Negotiation

Sec.
915.105 Competition.

Subpart 915.2—Negotiation Authorities

915.200 Scope of subpart.
915.201 National emergency.
915.204 Personal or professional services.
915.213 Technical equipment requiring standardization and interchangeability of parts.
915.215 Otherwise authorized by law.

Subpart 915.3—Determinations and Findings to Justify Negotiation

915.307 Signatory authority.

Subpart 915.4—Solicitation and Receipt of Proposals and Quotations

915.401 Applicability.
915.405–1 General.
915.406–5 Part IV Representations and instructions.
915.413 Disclosure and use of information before award.
915.413–2 Alternate II.

Subpart 915.5—Unsolicited Proposals

915.501 Definitions.
915.502 Policy.
915.509 General.

915.504 Advance guidance.
915.505 Content of unsolicited proposals.
915.506 Agency procedures.
915.506-1 Receipt and initial review.
915.506-2 Evaluation.
915.507 Contracting methods.
915.509 Limited use of data.

Subpart 915.6—Source Selection

915.610 Written or oral discussions.
915.612 Formal source selection.
915.613 Alternate source selection procedures.

Subpart 915.8—Price Negotiation

915.801 Definitions.
915.804-2 Requiring certified cost or pricing data.
915.804-3 Exemptions from or waiver of submission of certified cost or pricing data.
915.804-6 Procedural requirements.
915.804-8 Contract clauses.
915.804-70 Uncertified cost or pricing data.
915.805-5 Field pricing support.
915.805-70 Audit as an aid in proposal analysis.
915.808 Price negotiation memorandum.

Subpart 915.9—Profit

915.903 Contracting officer responsibilities.
915.905 Profit-analysis factors.
915.970 DOE structured profit and fee system.
915.970-1 General.
915.970-2 Weighted guidelines system.
915.970-3 Documentation.
915.970-4 Exceptions.
915.970-5 Special considerations—contracts with nonprofit organizations (other than educational institutions).
915.970-6 Contracts with educational institutions.
915.970-7 Alternative techniques.
915.970-8 Weighted guidelines application considerations.
915.971 Profit and fee-system for construction and construction management contracts.
915.971-1 General.
915.971-2 Limitations.
915.971-3 Factors for determining fees.
915.971-4 Considerations affecting fee amounts.
915.971-5 Fee schedules.
915.971-6 Fee base.
915.972 Special consideration for cost-plus-award-fee contracts.

Subpart 915.10—Preaward and Postaward Notifications, Protests, and Mistakes

915.1002 Debriefing of unsuccessful offerors.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95-91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 915.1—General Requirements for Negotiation

915.105 Competition.

(a)(1) Negotiated acquisition shall be on a competitive basis to the maximum practical extent (FAR 15.105) and reasonable competition shall be obtained in making small purchases in excess of $1,000 (FAR 13.106). There are, however, circumstances where one source (or group of sources) has exclusive capability to perform the work within the time required and at reasonable prices; e.g., by reason of experience, specialized facilities, or technical competence. In such circumstances, the initiating program office may conclude that only one source (or group of sources) is qualified to perform the work and, therefore, may recommend that a contract be negotiated only with that source or group. (In the case of a "group sole source" situation, a justification is required for limiting competition to that group and for the allocation of work among members of the group.) The recommendation, in writing, shall be contained in a separate document entitled, "Justification for Noncompetitive Acquisition," and shall examine the reasons for the acquisition being noncompetitive in accordance with paragraph (c) below.

(2) For a noncompetitive acquisition, a recommended justification shall be attached to the acquisition request when the request is sent to a contracting officer for action.

(3) A justification for noncompetitive acquisition is also required where "new" acquisitions (i.e., outside the contractual scope of work) are initiated through modifications to existing contracts.

(4) If a noncompetitive acquisition has been justified and approved, in accordance with this section, as part of an annual acquisition plan and such plan has been reviewed and approved, it will not be necessary to resubmit the justification for approval at the time each individual acquisition action is processed. Such justifications shall be made a part of the permanent contract file (see subpart 904.8 and FAR subpart 4.8).

(b) The provisions of this regulation do not apply to:

(1) Acquisitions of electric power or energy, gas (natural or manufactured), water or other utility services;

(2) Acquisitions of educational services from nonprofit institutions;

(3) Acquisitions resulting from program opportunity notices, or program research and development announcements (which are forms of competitive solicitations);

(4) Acquisitions from or through other Government agencies;

(5) Contracts which are subject to separate justification for recompetition or extension;

(6) Contracts resulting from unsolicited proposals (because they are subject to the approval procedures for justifications for unsolicited proposals);

(7) Special Research Contracts with educational institutions and extensions thereof (because they are subject to the separate process for SRCs); and

(8) Subscriptions to periodicals (within the small purchase limitations).

(c)(1) The justification for noncompetitive acquisition shall examine the reasons for the acquisition being noncompetitive and shall contain, in the first sentence of the document, an appropriate recommendation (e.g., "I recommend that negotiations be conducted only with (name of entity) for the supplies and services described herein.") For small purchases the justification for noncompetitive acquisitions should be in accordance with small purchase procedures.

(2) Each justification shall set forth enough facts and circumstances to clearly and convincingly establish that competition would not have been feasible or practicable. Procedural guidance is provided in DOE Order 4200.1.

Subpart 915.2—Negotiation Authorities

915.200 Scope of subpart.

(b) Section 302(c) of the Federal Property and Administrative Services Act of 1949, as amended, authorizes the negotiation of contracts, and is applicable to AEC (now DOE) acquisitions. Section 302(c)(15) of the Federal Property and Administrative Services Act of 1949, as amended, permits negotiation when otherwise authorized by law, provided, that in such event the requirements of that Act shall apply. Accordingly, when the Federal Property and Administrative Services Act of 1949, as amended, or the Atomic Energy Act of 1954, as amended, or other law is used as the basis for negotiation, the requirements of section 304 of the Federal Property and Administration Services Act of 1949, as amended, are applicable, except as provided in these regulations.

915.201 National emergency.

(a) Contracts to support industrial mobilization plans may be negotiated under section 302(c)(1) of the Federal Property and Administrative Services Act of 1949, as amended, or section 302(c)(15) of that Act and the Atomic Energy Act of 1954, as amended, if the requisite circumstances exist and the required findings and determinations can be made.

915.204 Personal or professional services.

(d) Formal advertising procedures shall not be used for contracts for architect-engineer or other professional engineering services. Such contracts may be negotiated under section 302(c)(4) of the Federal Property and Administrative Services Act of 1949, as amended, or section 302(c)(15) of that Act and the Atomic Energy Act of 1954, as amended. However, the exemption provided for in 915.903(d)(1)(ii) does not apply to contracts negotiated under section 302(c)(4) of the Federal Property and Administrative Services Act of 1949, as amended. Professional architect-engineer services shall be negotiated in accordance with Subpart 936.6 and FAR Subpart 36.6.

(e) Surveying, mapping, and field or laboratory tests of construction workmanship and materials and equipment should be classified as professional services when they clearly require planning, direction, supervision, and interpretation by professional engineers as a condition of performance, or when the contractor will be required to assume responsibility for the professional adequacy and accuracy of results. Depending upon the nature and requirements of a particular contract professional engineering services may involve activities such as the following:

(1) Overall direction of the technical work;

(2) Supervision of work performed by technicians, sub-professionals, or nonprofessional employees;

(3) Determination of the methods or procedures for accomplishing the requirements of the contract;

(4) Interpretation of the methods or procedures for accomplishing the requirements of the contract; and

(5) Direct performance of required professional services.

(f) When the services are such that the planning and execution can be performed by personnel having only a practical knowledge of the use of instruments and techniques, such as routine aerial photographing and testing, and do not require any professional engineering competence or judgment, the "personal or professional services" exception to the formal advertising requirement is not applicable.

(g) In 1959, the American Society of Civil Engineers (ASCE) adopted a policy statement that land surveying, engineering surveying, geodetic surveying, and cartographic surveying, commonly designated as surveying and mapping, are a part of the civil engineering profession. The report of the ASCE Task Committee on Status of Surveying and Mapping may be used for guidance in determining which positions should be considered as professional and which should be considered subprofessional.

915.213 Technical equipment requiring standardization and interchangeability of parts.

If section 302(c)(13) of the Federal Property and Administrative Services Act of 1949, as amended, and the Atomic Energy Act of 1954, as amended, are used as the basis of negotiation, determinations and findings shall state the authority for negotiations.

915.215 Otherwise authorized by law.

(a)(3) The Atomic Energy Act of 1954, as amended, and the Atomic Energy Community Act of 1955, as amended, contain various exemptions from section 3709 of the Revised Statutes, as amended. Pursuant to section 310 of the Federal Property and Administrative Services Act of 1949, as amended, these references to section 3709 shall be construed to authorize acquisition pursuant to section 302(c)(15) of the Federal Property and Administrative Service Act of 1949, as amended, without regard to the advertising requirements of section 302(c) and 303 of the Act. The situations enumerated in FAR 15.201 through 15.215 are illustrative of situations which could support a determination and finding under the Atomic Energy Act of 1954, as amended, that advertising is not reasonably practicable or, as appropriate, that negotiation is necessary in the interest of common defense and security.

(4) The Atomic Energy Act of 1954, as amended, also provides in section 162 that the President may, in advance, exempt any specific action of the Department of Energy in a particular matter carried out under the authority of the Atomic Energy Act of 1954, as amended, from the provisions of law relating to contracts whenever he determines that such action is essential in the interest of common defense and security.

(5) Every contract negotiated under the authority of section 302(c)(15) of the Federal Property and Administrative Services Act of 1949, as amended, and the Atomic Energy Act of 1954, as amended, shall be supported by a determination and finding justifying use of such authority.

Subpart 915.3—Determinations and Findings to Justify Negotiation

915.307 Signatory Authority.

Determinations and findings supporting negotiation under the authority of the Federal Property and Administrative Services Act of 1949, section 302(c)(11) (FAR 15.211), with respect to contracts which will not require the expenditure of more than $25,000 may be executed by the Procurement Executive. Determinations and findings for contracts in excess of $25,000 negotiated pursuant to section 302(c)(11), and in support of all contracts negotiated pursuant to sections 302(c)(12) and 302(c)(13) of the Federal Property and Administrative Services Act of 1949, as amended (FAR 15.211, 15.212 and 15.213) shall be executed by the Head of the Agency.

Subpart 915.4—Solicitation and Receipt of Proposals and Quotations

915.401 Applicability.

In addition to the exclusions included at FAR 15.401, FAR 15.4 is not applicable to Special Research Contracts (See 917.71), Program Opportunity Notices (See 917.72), or Program Research and Development Announcements (See 917.73).

915.405–1 General.

Approval for the use of solicitation for information or planning purposes shall be obtained from the Head of the Contracting Activity.

915.406–5 Part IV Representations and Instructions.

(a) Section K, Representations, certifications and other statements of offerors or quoters. (1) To minimize the paperwork burden imposed by the repetitious submission of contract representations and certifications with each bid or proposal submitted, DOE contracting activities may permit a repetitious bidder or offeror the optional use of simplified representations and certifications, provided acceptable comprehensive representations and certifications have been sumitted to the DOE contracting activity within three years of the anticipated contract award date and are currently on file with the awarding activity. Bidders and offerors shall, through use of the simplified representations and certifications only be asked to furnish with each bid or proposal a certification that the previously filed record copy remains current, or indicate any change relative to the individual submission, along with certain minimal information such as type of organization and whether the bidder or offeror is a small, small/disadvantaged, or women-owned small business concern and whether the work will be performed in a labor surplus area. Select additional representations and certifications may also be required depending on the nature of the individual acquisition. These additional

representations and certifications, such as "Organizational Conflicts of Interest Disclosure or Representation" and "Cost Accounting Standards Notices and Certification" shall be separately identified in Section K of the uniform contract format when they are required. (also see (a)(5) below)

(2) Use of the optional simplified representations and certifications is predicated upon the single submission of an acceptable comprehensive representations and certifications rather than the repetitive submission of these items with each bid or proposal. It is required, therefore, that any comprehensive representations and certifications submitted by a potential contractor in anticipation of using the simplified approach be evaluated by the contracting activity based upon the statutory and/or regulatory requirements which mandate the various representations and certifications. The submitter also should be advised of the submissions acceptability, thus permitting use of the simplified representations and certifications. When utilizing the optional simplified representations and certifications, bidders or offerors shall be advised of the need to identify any individual items that may differ from their comprehensive representations and certifications which are on record. Obvious, unintentional errors should be treated as minor informalities whenever possible. Each contracting activity permitting use of the simplified approach shall establish internal procedures to maintain control of comprehensive submittals submitted by an offeror or bidder in support of the simplified approach and to assure notification to the submitter or their acceptance or rejection.

(3) The following format illustrates a simplified representations and certifications approach which may be used if the contracting activity permits use of simplified representations and certifications.

Representations and Certifications

(1) The bidder/offeror certifies:

(a) It is ( ) a Corporation, incorporated in the state of ———; ( ) an individual; ( ) a partnership; ( ) a nonprofit or educational institution; ( ) a state or local government; and,

(b) It is ( ), is not ( ), a small business ( ), a small and disadvantaged business ( ), a women-owned small business ( ), a labor surplus area concern ( ).

(c) Its Data Universal Numbering System (DUNS) establishment number is:

(2) The offeror/bidder represents that the following persons are authorized to communicate on its behalf with the Government in connection with this solicitation: list names and telephone numbers of appropriate personnel.

Phone ———
Name ———

(3) The offer/bidder (check (i) or (iii)):

(i) ( ) Certifies that the comprehensive representations and certifications submitted to the DOE *(insert appropriate DOD contracting activity)* on *(insert date)* remain current and accurate with respect to this bid or proposal submitted in response to solicitation *(insert number)* dated *(insert date)* except as amended hereby.

(ii) ( ) certifies the following specific representations and certifications differ from the disclosures previously filed: *(list any differences);* and revised representation and certification are therefor submitted.

(iii) ( ) acknowledges a comprehensive representations and certifications has not previously been placed on record with the contracting activity and such a comprehensive representations and certifications data package is completed and being submitted with respect to this bid or proposal in response to solicitation no. ——— dated ———.

(4) By signing below, the bidder/offeror certifies that the representations and certifications are accurate, current and complete. The bidder/offeror further certifies that it will notify the contracting activity of any changes affecting a comprehensive representations and certifications if one has been placed on records.

Solicitation Number ———
Signature ———
Date ———
Type Name ———
Title and ———
Address ———

---

(4) The following is a comprehensive listing by topic with source citation of the representations and certifications which are required to be submitted with individual bids or proposals and which must be filed with an accepted by the DOE contracting activity to allow use of the simplified representations and certifications described at 915.406–5(a)(3).

Comprehensive Representations and Certifications

(i) Certificate of Independent Price Determination FAR 52.203–2

(ii) Contingent Fee Representation and Agreement FAR 52.203–4

(iii) Type of Business Organization-Formal Advertising (Negotiation) FAR 52.214–2 (FAR 52.215–6)

(iv) Parent Company and Identifying Data FAR 52.214–8

(v) Place of Performance-Formal Advertising (Negotiation) FAR 52.214–14 (FAR 52.215–20)

(vi) Small Business Concern Representation FAR 52.219–1

(vii) Small Disadvantaged Business Concern Representation FAR 52.219–2

(viii) Women-Owned Small Business Concern Representation FAR 52.219–3

(ix) Walsh-Healey Public Contracts Act Representation FAR 52.222–19 (need be completed only for contracts for the manufacture or furnishing of supplies to be performed in the United States and which exceed $10,000).

(x) Certification of Nonsegregated Facilities FAR 52.222–21

(xi) Previous Contracts and Compliance Reports FAR 52.222–22.

(xii) Affirmative Action Compliance FAR 52.222–25 (not applicable to construction contracts)

(xiii) Clean Air and Water Certification FAR 52.223–1

(xiv) Buy American Certificate FAR 52.225–1

(5) Additional representations and certifications which may be required, depending on the nature of the acquisition, are listed by topic and source below. Although they may be included in the single comprehensive submission, they may also be required for the simplified submission since they are unique to an instant solicitation.

(i) Foreign Ownership, Control, or Influence-Representation.

(ii) Jewel Bearings and Related Items Certificate FAR 52.208–2.

(iii) Organizational Conflicts of Interest Disclosure Representation 952.209–70

(iv) Preference for Labor Surplus Area Concerns FAR 52.220–1

(v) Recovered Material Certification FAR 52.223–4

(vi) Balance of Payments Program Certificate FAR 52.225–6

(vii) Cost Accounting Standards Notices and Certification FAR 52.230–1, or FAR 52.230–2

(viii) Permits, Authorities and Franchises FAR 52.247–2

(ix) Technical Data Certification 952.227–80

(x) Royalty Payments Certification 952.227–81

(b) *Section L Instructions, Conditions and Notices to offerors and quoters.* A proposal may include technical data and other data, including trade secrets and privileged or confidential commercial or financial information, which the proposer does not want disclosed to the public or used by the Government for any purposes other than proposal evaluation. Procedures for handling and protecting such data and information are discussed at 927.402–3(d)(2).

(d) Insert the notice at 952.215–70 in solicitations if the resulting contract will contain any of the clauses referenced therein.

915.413 Disclosure and use of information before award.

915.413-2 Alternate II.

The procedures discussed at FAR 15.413-2 may be used if approved at a level above the contracting officer. See also 927.70.

Subpart 915.5—Unsolicited Proposals

915.501 Definitions.

"Notice of program interest" means a method by which broad general technical problem areas needing investigation are published in order to stimulate the flow of unsolicited proposals. The notice describes problems, not desired solutions.

"Project officer" means the individual designated by the responsible official, or designee, having responsibility for the unsolicited proposal.

"Receiving office" means the office designated as the central control point for the receipt, distribution, accountability, and status reporting of unsolicited proposal.

"Responsible official" means the Senior Program Official or the head of the staff office within whose area of responsibility the work contemplated by the unsolicited proposal falls.

915.502 Policy.

(a) Present and future needs demand the involvement of all resources in exploring alternative energy sources and technologies. To achieve this objective, it is DOE policy to encourage external sources of unique innovative methods, approaches, and ideas by stressing submission of unsolicited proposals for government support. In furtherance of this policy and to ensure the integrity of the acquisition process through application of reasonable controls, the DOE:

(i) Disseminates information on areas of broad technical concern whose solutions are considered relevant to the accomplishment of DOE's assigned mission areas;

(ii) Encourages potential proposers to consult with program personnel before expending resources in the development of written unsolicited proposals;

(iii) Endeavors to distribute unsolicited proposals to all interested organizations within DOE;

(iv) Processes unsolicited proposals in an expeditous manner and, where practicable, keep proposers advised as discrete decisions are made;

(v) Assures that each proposal is evaluated in a fair and objective manner; and,

(vi) Assures that each proposal will be used only for its intended purpose and the information contained therein will not be divulged without prior permission of the proposer.

(b) Extensions of contract work resulting from unsolicited proposals shall be processed in accordance with the procedures at 943.107.

915.503 General.

(c)(5) When the DOE receives a document for a commercial demonstration which might otherwise qualify as an unsolicited proposal, but its substance is generally known and may be obtained without restriction by formal competitive solicitation or program opportunity notice, or its substance closely resembles that of a pending formal competitive solicitation or program opportunity notice, the DOE's policy of obtaining competition applies.

(f) Unsolicited proposals for the performance of support services are, except as discussed in this paragraph, unacceptable as the performance of such services is unlikely to necessitate innovative or unique concepts. There may be rare instances in which an unsolicited proposal offers an innovative or unique approach to the accomplishment of a support service. If such a proposal offers a previously unknown or an alternative approach to generally recognized techniques for the accomplishment of a specific service(s) and such approach will provide significantly greater economy or enhanced quality, it may be considered for acceptance. Such acceptance shall, however, require approval of the acquisition of support services in accordance with applicable DOE Directives and be processed as a deviation to the prohibition herein in accordance with Subpart 901.4.

915.504 Advance guidance.

(b)(6) A notice of program interest can be used to provide notification of areas of DOE interest and to stimulate the flow of unsolicited proposals. Each program office should publish periodically a listing of broad, general, technical problems and areas needing investigation using the following guidelines.

(i) The notice shall be coordinated in advance with the head of the contracting office that will be expected to award any contracts which may result from the notice, so that advance preparations can be made for processing proposals in accordance 915.506 and to assure that some form of competitive solicitation, e.g. a program research and development or request for proposal, is not possible.

(ii) Concurrence shall be obtained from the appropriate procurement Advisor in the Office of Procurement Support, Headquarters when it is not possible to identify which contracting office(s) will make possible award(s).

(iii) The notice should contain, but need not be limited to, the following information:

(A) A number assigned by the program office for control and reference purposes;

(B) A brief description of the board, general, technical program or areas needing investigation (generally 50 words or less).

(C) Restrictions, if any, as to who may submit proposals.

(D) A contact (name and telephone number) within the program office or divisions, where additional information may be obtained.

(E) An expiration date, as needed. An expiration date for a Notice of Program Interest is not to be considered a formal due date or common cut-off date for the submission or receipt of unsolicited proposals as is associated with formal solicitations. Rather the expiration date is an approximation of the time after which program interests or directions may be expected to change less the necessary administrative time that will be needed for the evaluation and possible award of contracts resulting from the notice.

(F) A statement that DOE reserves the right to support or not to support any or all proposals in whole or in part.

(G) A statement that DOE assumes no responsibility for any costs associated with specific proposal preparation.

(H) The number of proposal copies required and address of the receiving office to which proposals should be mailed.

(I) A reference that detailed information concerning contracting policy and procedures is contained in the DEAR, copies of which are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

(iv) The notice content should be consolidated at the responsible office level and should be in the format that best reflects the needs of that specific office; e.g., letter, booklet, bulletin, or related documents and coordinated in advance with the Unsolicited Proposal Management Officer identified at 915.506(b).

(v) The notice should be given wide distribution including mailings to industry associations, including small business associations, schools, colleges and universities, appropriate professional and scientific journals, other DOE offices, as well as individuals

and organizations that request copies on a one-time basis.

(vi) Copies of the notice shall be given to the Unsolicited Proposal Management Officer identified at 915.506(b).

915.505 Content of unsolicited proposals.

(b)(5) Unsolicited proposals for nonnuclear energy demonstration activities not covered by existing formal competitive solicitations or program opportunity notices should contain information along the lines of the information requirements at 917.7201–5. They may include a request for federal assistance or participation, and shall be subject to the cost sharing provisions of 917.70.

915.506 Agency procedures.

(b) Unless otherwise specified in a notice of program interest, all unsolicited proposals should be submitted to the Procurement and Assistance Management Directorate, U.S. DOE, Attn: Unsolicited Proposals Management Officer, MA432, Washington, D.C. 20585. If the proposer has ascertained the cognizant program office through preliminary contacts with program staff, the proposal may be submitted directly to that office. In such instances, the proposer should separately send a copy of the proposal cover letter to the Unsolicited Proposal Management Officer to assure that the proposal is logged in the Department's automated tracking system for unsolicited proposals.

915.506–1 Receipt and initial review.

(b) The DOE receiving office shall acknowledge receipt of an unsolicited proposal, complete a preliminary review, and establish accountability. It will send copies of the unsolicited proposal to the responsible official(s). Each unsolicited proposal that is circulated for a comprehensive evaluation shall have an agency control number and legend attached or imprinted on it by the receiving office identifying it as an unsolicited proposal and stating that it shall be used only for purposes of evaluation.

915.506–2 Evaluation.

(a) The responsible official is responsible for assignment of a project officer and such personnel as may be necessary to evaluate the proposal fairly and objectively. In some instances the responsible official may find it advantageous to subject the proposal to external rather than internal evaluation. In such cases, the prior written permission of the proposer shall be obtained. Proposals for demonstration projects will be evaluated in accordance with the Federal support criteria set forth in 917.7203.3 (a) through (h) and the evaluation criteria set forth in 917.7204(c).

(1) The submission of innovative methods, approaches, or ideas is not restricted to those problems or technical areas published in a DOE notice of program interest.

(c) If, after evaluation, it is decided that a proposal will not be supported, it is the responsibility of:

(1) The project officer to prepare a written statement setting forth the basis for rejection of the unsolicited proposal, submit one copy to the responsible official and retain one copy in the permanent file.

(2) The responsible official to prepare a letter to the proposer with copies to the receiving office and the project officer.

(d) If the decision is to support a proposal, a written justification is required which shall address each of the evaluation factors contained in FAR 15.506–2. The justification shall be appended to the procurement request.

(e) Unsolicited proposal justificiations shall contain a recommedation, concurrence (when needed), and approval as follows: (In the case of cost shared contracts, review levels shall be based on the sum of the contractor and Government shares.)

(1) The recommendation shall be prepared and reviewed within the initiating office at such levels as are deemed appropriate by the Senior Program Offical for acquisitions initiated by the Headquarters or by the Head of the Contracting Activity for field initiated acquisitions. In establishing levels for the review of such recommendations, the Senior Program Official or Head of the Contracting Activity shall assure that the recommendation is reviewed at a senior organizational level in order to assure that competition is sought when appropriate. See FAR 15.507 and 15.508.

(2) The more complex and costly transactions will benefit from early coordination with counsel. Justifications exceeding $1,000,000, or such lower level as counsel may determine, shall be submitted by the initiator to counsel, at the Headquarters or field location of the initiator, for concurrence prior to forwarding to the contracting officer.

(3) The justification, following review of the recommendation and concurrence of counsel (if required or considered appropriate), shall be forwarded to the cognizant contracting officer for approval. If the justification is acceptable to the cognizant contracting officer, final approval shall be sought at such level as the Head of the Contracting Activity may require. In specifying the level for final approval, the Head of the Contracting Activity shall require final approval at a level above contracting officer as required by FAR 15.105(c). The Head of the Contracting Activity shall further assure that the official designated as the reviewing official is a contracting officer.

(g) Notwithstanding the decision to accept an unsolicited proposal, organizations and individuals are subject to the policies concerning the responsibility of prospective contractors set forth in 909.1 and FAR 9.1.

915.507 Contracting methods.

(d) Subpart 917.70, which outlines DOE's cost participation policy, shall be followed in determining the extent to which the DOE will participate in the cost for the proposed effort.

915.509 Limited use of data.

(a) An unsolicited proposal may include technical data and other data, including trade secrets and privileged or confidential commercial or financial information, which the proposer does not want disclosed to the public or used by the Government for any purpose other than proposal evaluation. Procedures for handling and protecting such data and information are set forth at 927.402–3(d)(3).

Subpart 915.6—Source Selection

915.610 Written or oral discussions.

(c) The contracting officer shall point out to each offeror within the competitive range any ambiguities or uncertainties in its proposal. For research, development, and demonstration contracts, the discussions are intended to assist the Source Evaluation Board (SEB) in understanding fully the proposals and their strengths and weaknesses based upon the individual efforts of each proposer, in assuring that the meanings and points of emphasis of solicitation provisions have been adequately conveyed to the offerors so that all offerors are competing equally on the basis intended by the Government, and in evaluating the qualifications of the personnel proposed by each firm. Where the proposed award is not for research, development, or demonstration, (e.g., supplies and services) the contracting officer should point out instances in which aspects of a proposal contain a weakness in relation to the Government's requirements.

915.612 Formal source selection.

(a) Negotiated competitive acquisitions of $5 million or less are not subject to the SEB Handbook unless specifically required by the Procurement Executive. For acquisitions under $5 million, less formal procedures are used. For acquisitions under $5 million, but more than $1 million, source evaluation panels may be established. These panels may follow the policies and procedures set forth in the SEB Handbook as a guide. For acquisitions under $1 million, less formal source evaluation and selection procedures shall be used.

(b) The contracting officer may form teams to evaluate the technical, business and management, and cost aspects of proposals. When teams are used, each will function independently of the other and report its findings to the contracting officer. The contracting officer will discuss those findings with the teams (or representatives thereof) separately or together, as may be more helpful. The contracting officer will negotiate and execute the contractual instrument, using, in many cases, some of the same specialists who participated in earlier evaluations and discussions. Part 971 sets forth administrative requirements for the review and approval of certain contract actions.

(c) In selections other than where price is the determining factor, the evaluation procedures set forth in (c) (1), (2), and (3) below should be considered.

(1) *Technical evaluation.* Generally, the contracting officer must rely on scientific and engineering personnel for assistance in reviewing proposals from a technical point of view. It is imperative, therefore, that technical evaluations and findings be fully documented and reviewed by responsible personnel. The report shall reflect the scoring and ranking of the proposals. The report shall also include a narrative evaluation specifying the strengths and weaknesses of each proposal, and any reservations or qualifications that might bear upon the selection of sources for negotiation and award. Concrete technical reasons supporting a determination of unacceptability with regard to any proposal shall be included. After evaluation and preparation of written and signed evaluation findings by the technical evaluators, such evaluations and proposals shall be returned to the contracting officer or authorized representative, and maintained as a permanent record in the contract file.

(2) *Business and management evaluation.* Management capabilities of the offeror to perform the required work in a timely manner must be appraised. In making this appraisal, the following factors, as appropriate, and as stated in the solicitation must be considered: the company's management organization; past performance; reputation for reliability; availability of required facilities; cost controls; ability to control, maintain, and account for any property provided by the Government; the offeror's willingness to devote its resources to the proposed work with appropriate diligence; and other pertinent administrative and business information that may have been requested in the solicitation, such as certifications and representations.

(3) *Price/cost determinations.* Each proposal requires some form of price/cost analysis. The evaluation should consider items such as categories and amounts of labor, indirect costs, materials, travel, computer time, as well as information with regard to the contractor's past cost performance, including contracts or subcontracts for like services or supplies. The contracting officer must exercise judgment in determining the extent of analysis in each case and any desire to obtain assistance from personnel trained in this discipline.

(d) Personnel from the DOE, other Government agencies, consultants, and contractors including those who operate or manage Government-owned facilities may be used in the evaluation process as advisors when their services are necessary and available. When personnel outside the Government, including those of contractors who operate or manage Government-owned facilities, are used as advisors, approval and disclosure procedures as required by 927.7003 shall be followed. In all instances, such personnel will be required to comply with DOE conflict of interest regulations and nondisclosure of information requirements.

(e) The SEB procedures are intended to provide the Source Selection Official with sufficient information to select an offeror for negotiation on the basis of its proposal. However, it is within the discretion of the Source Selection Official to select multiple offerors from those within the competitive range for negotiation and to direct that discussions be reopened with those offerors and that best and final offers be obtained on the basis of fully definitized contract documents executed by the offerors. The contracting officer should seek correction of each offeror's correctable weaknesses using only technical and other information which the Government is entitled to use for this purpose. At the conclusion of discussions, a final common cut-off date which allows a reasonable opportunity for submission of best and final offers shall be established and all participants notified.

(q) Except as provided in 915.612(e), revised proposals are evaluated, selection is made, and negotiations may be conducted with the selected offeror but only to definitize a final agreement on price, terms, and conditions, etc. (No factor which could have had any effect on the selection process may be changed after the common cut-off date for discussions).

915.613 Alternative source selection procedures.

Source Evaluation Board (SEB) procedures shall be used for all negotiated competitive prime acquisitions expected to exceed $5 million, excepting acquisitions for architect-engineer services, and acquisitions specifically waived by the Procurement Executive. Guidance regarding the designation and operation of the SEB are set forth in the SEB Handbook.

Subpart 915.8—Price Negotiation

915.801 Definitions.

"Field Pricing Support" is synonymous with "pricing support" and within the Department of Energy means the advice provided the contracting officer by auditors, price or cost analysts, quality assurance personnel, engineers, program office personnel, small business, legal, financial or other specialists based on their review and analysis of a contractor's proposal notwithstanding their organizational location.

915.804-2 Requiring certified cost or pricing data.

(a) The certification requirements of FAR 15.804-2 need not be applied to cost-reimbursement contracts placed with educational institutions subject to the cost principles at FAR Subpart 31.3, or State, local or Federally recognized Indian Tribal governments subject to the cost principles at FAR Subpart 31.6.

915.804-3 Exemptions from or waiver of submission of certified cost or pricing data.

(b)(2)(iii) Heads of Contracting Activities, for contracts estimated to be within the limits of their delegated authority, may approve the finding required by FAR 15.804-3(b)(2)(iii) that the lowest price received is unreasonable.

(c)(8) Heads of Contracting Activities, for contracts estimated to be within the limits of their delegated authority, may approve the finding required by FAR 15.804-3(c)(8) that the price is unreasonable even though it is a catalog or market price.

(g) Heads of Contracting Activities, for contracts estimated to be within the limits of their delegated authority, may, without power of redelegation, authorize individual or class exemptions for exceptional cases in accordance with FAR 15.804–3(g).

(i) Heads of Contracting Activities, for contracts estimated to be within the limits of their delegated authority, may, without power of redelegation, waive the requirements for cost or pricing data under the circumstances set forth in FAR 15.804–3(i) provided that any such waivers are promptly reported to the Procurement Executive.

915.804–6 Procedural requirements.

(e) Heads of Contracting Activities, for contracts estimated to be within the limits of their delegated authority, may, without power of redelegation, waive the requirements for cost or pricing data under the circumstances set forth in FAR 15.804–6(e) provided that any such waivers are promptly reported to the Procurement Executive.

(i) Heads of Contracting Activities, for contracts estimated to be within the limits of their delegated authority, may, without power of redelegation, waive the requirements for subcontractor cost or pricing data under the circumstances set forth in FAR 15.804–6(i), provided that any such waivers are promptly reported to the Procurement Executive.

915.804–8 Contract clauses.

(a) The clause prescribed at FAR 52.215–22, Price Reduction For Defective Cost or Pricing Data, shall only be included in negotiated contracts where a Certificate of Current Cost or Pricing Data was obtained.

(b) The contracting officer shall, insert the clause at FAR 52.215–23, Price Reduction for Defective Cost or Pricing Data—Modifications, in solicitations and contracts when the clause prescribed in paragraph (a) above has not been included, unless the contractor will otherwise not be required to submit certified data pursuant to 915.804–2(a).

915.804–70 Uncertified cost or pricing data.

Anytime an offeror or contractor is not required to submit certified cost or pricing data (proposals of $500,000 or less) the contracting officer may require the offeror or contractor to submit uncertified cost or pricing data. The amount of data required to be submitted should be limited to that data necessary to allow the contracting officer to determine the reasonableness of the price.

915.805–5 Field pricing support.

(a)(1) Field pricing reports as prescribed in FAR 15.805–5(a)(1) are not required for the negotiation of DOE contract prices or modifications thereof. The term "field pricing report" refers to the Department of Defense (DOD) system for obtaining a price and/or cost analysis report from a cognizant DOD field level contract management office wherein requests for the review of a proposal submitted by an offeror are initiated and the recommendations made by the various specialists of the management office are consolidated into a single report that is forwarded to the office making the contract award for use in conducting negotiations. In the DOE, such review activities, except for reviews performed by professional auditors, are expected to be accomplished by pricing support personnel located in DOE Contracting Activities. The DOE contracting officer shall formally request the assistance of appropriate pricing support personnel, other than auditors, for the review of any proposal that exceeds $500,000, unless the contracting officer has sufficient data to determine the reasonableness of the proposed cost or price. Such pricing support may be requested for proposals below $500,000, if considered necessary for the establishment of a reasonable pricing arrangement. Contracting officers, however, are not precluded by this section from requesting pricing assistance from a cognizant DOD contract management office, provided an appropriate cross-servicing arrangement for pricing support services exists between the DOE and the servicing agency.

(c)(1) When an audit is required pursuant to 915.805–70, "Audit as an aid in proposal analysis", the request for audit shall be sent directly to the Federal audit office assigned cognizance of the offeror or prospective contractor. A copy of each such request for audit, without enclosures, shall be forwarded to the Director, Audit Management Division, Office of Inspector General, Washington, D.C. When the cognizant agency is other than the Defense Contract Audit Agency or the Department of Health and Human Services, and an appropriate cross-servicing agreement has not been established, the need for audit assistance shall be coordinated with the Directorate of Procurement and Assistance Management, Office of Policy, Policy and Procedures Division.

(2) The request for audit shall establish the due date for receipt of the auditor's report and in so doing shall allow as much time as possible for the auditor's review.

(e)(6) Copies of technical analysis reports prepared by DOE technical or other pricing support personnel shall not normally be provided to the auditor. The contracting officer or the supporting price, cost, or financial analyst at the contracting activity shall determine the monetary impact of the technical findings.

915.805–70 Audit as an aid in proposal analysis.

(a) Auditors are professional accountants who, although organizationally independent, are the principal advisors to contracting officers on contractor accounting and cost matters.

(b) Audit as an aid in the negotiation of price or cost arrangements in DOE contract awards shall be utilized as provided by this subsection.

(c) Preaward audit services include:

(1) The submission of an auditor's report which sets forth the results of the review and analysis of cost data submitted by offerors as part of their pricing proposals, reviews of contractor's accounting systems, recorded contract costs, and financial condition other related matters; and

(2) Personal consultation and advice regarding the use of the auditor's report in the negotiation and award of a contractual instrument.

(d) When a contract price will be based on cost or pricing data (FAR 15.804) submitted by the offerors, the DOE contracting officer or authorized representative shall request a review by the cognizant Federal audit activity prior to the negotiation of any contract or modification including modifications under advertised contracts in excess of:

(1) $500,000 for a firm fixed-price contract or a fixed-price contract with economic price adjustment provisions; or

(2) $1,000,000 for all other contract types, including initial prices, estimated costs of cost-reimbursement contracts, interim and final price redeterminations, and target and settlement of incentive contracts.

(e) The requirement for auditor reviews of proposals which exceed the thresholds specified in paragraph (d) above may be waived at a level above the contracting officer when the reasonableness of the negotiated contract price can be determined from information already available. The contract file shall be documented to reflect the reason for any such waiver, provided, however, that independent Government estimates of cost or price

shall not be used as the sole justification for any such waiver.

(f) Ordinarily, preaward reviews by an auditor should not be requested for actions below the thresholds specified in paragraph (d) of this section. Before requesting such audits, the contracting officer should consider using recent audit reports, price negotiation memorandums, or other pertinent information regarding the offeror to establish the reasonableness of proposed price. However, auditor reviews should be considered for proposals below the specified thresholds when the contracting officer determines that:

(1) The available data is inadequate for determining the reasonableness of the contractor's cost proposal;

(2) The contractor's estimating, accounting, or purchasing methods are not reliable; or

(3) The best interest of the Government will be served by an audit review, after giving consideration to the cost of the audit, type of audit and value of the proposed contract amount.

915.808 Price negotiation memorandum.

(b) Whenever an audit review was requested and a report was obtained, the contracting officer shall inform the cognizant audit activity of the disposition of each audit finding and recommendation by either forwarding a copy of the price negotiation memorandum to the auditor; or by advising the auditor, in writing, if an award was cancelled or not made to the audited entity; whichever is applicable.

Subpart 915.9—Profit

915.903 Contracting officer responsibilities.

(d)(1)(ii) The statutory limitations on profit and fees as set forth in FAR 15.903(d)(1) (i), (ii) and (iii) shall be followed, except as exempted for DOE architect-engineer contracts covering Atomic Energy Commission (AEC) and Bonneville Power Administration (BPA) functions. Pursuant to section 602(d) (13) and (20) of the Federal Property and Administration Services Act of 1949, as amended, those former AEC functions, as well as those of the BPA, now being performed by DOE are exempt from the 10 and 6 per centum cost and fee restrictions on contracts for architect-engineer services.

(d)(2) Waivers to apply the maximum cost-plus-award-fee percentage in 915.972(a)(3) in those situations that shall result in potential fees exceeding the limitations cited in FAR 15.903(d)(1) (i), (ii), and (iii) shall be forwarded to the Procurement Executive.

(f) In cases where a change or modification calls for substantially different work than the basic contract, the contractor's effort may be radically changed and a detailed analysis of the profit factors would be a necessity. Also, if the dollar amount of the change or contract modification is very significant in comparision to the contract dollar amount, a detailed analysis should be made.

(g) The estimated costs on which the maximum fee is computed pursuant to the statutory limitations set forth in FAR 15.903(d)(1) shall include facilities capital cost of money when this cost is included in cost estimates.

915.905 Profit-analysis factors.

A profit/fee analysis technique designed for a systematic application of the profit factors in FAR 15.905–1 provides contracting officers with an approach that will ensure consistent consideration of the relative value of the various factors in the establishment of a profit objective and the conduct of negotiations for a contract award. It also provides a basis for documentation of this objective, including an explanation of any significant departure from it in reaching a final agreement. The contracting officer's analysis of these prescribed factors is based on information available prior to negotiations. Such information is furnished in proposals, audit data, performance reports, preaward surveys and the like.

915.970 DOE structured profit and fee system.

This section implements FAR 15.902 and 15.905.

915.970–1 General.

(a) *Objective.* It is the intent of DOE to remunerate contractors for financial and other risks which they may assume, resources they use, and organization, performance and management capabilities they employ. Profit or fee shall be negotiated for this purpose; however, when profit or fee is determined as a separate element of the contract price, the aim of negotiation should be to fit it to the acquisition, giving due weight to effort, risk, facilities investment, and special factors as set forth in this subpart.

(b) *Commercial (profit) organization.* Profit or fee prenegotiation objectives for contracts with commercial (profit) organizations shall be determined as provided in this subpart.

(c) *Nonprofit organizations.* It is DOE's general policy to pay fees in contracts with nonprofit organizations other than educational institutions and governmental bodies; however, it is a matter of negotiation whether a fee will be paid in a given case. In making this decision, the DOE negotiating official should consider whether the contractor is ordinarily paid fees for the type of work involved. The profit objective should be reasonable in relation to the task to be performed and the requirements placed on the contractor.

(d) *Educational institutions.* It is DOE policy not to pay fees under contracts with educational institutions.

(e) *State, local and Indian tribal governments.* Profit or fee shall not be paid under contracts with State, local, and Indian tribal Governments.

915.970–2 Weighted guidelines system.

(a) To properly reflect differences among contracts and the circumstances relating thereto and to select an appropriate relative profit/fee in consideration of these differences and circumstances, weightings have been developed for application by the contracting officer to standard measurement bases representative of the prescribed profit factors cited in FAR 15.905 and paragraph (d) of this section. This is a structured system, referred to as weighted guidelines. Each profit factor or subfactor, or component thereof, has been assigned weights relative to their value to the contract's overall effort. The range of weights to be applied to each profit factor is also set forth in paragraph (d) of this section. Guidance on how to apply the weighted guidelines is set forth in 915.970–8.

(b) Except as set forth in 915.970–4, the weighted guidelines shall be used in establishing the profit objective for negotiation of contracts where cost analysis is performed.

(c) The negotiation process does not contemplate or require agreement on either estimated cost elements or profit elements. Accordingly, although the details of analysis and evaluation may be discussed in the fact-finding phase of the negotiation process in order to develop a mutual understanding of the logic of the respective positions, specific agreement on the exact weights of values of the individual profit factors is not required and need not be attempted.

(d) The factors set forth below are to be used in determining DOE profit objectives. The factors and weight ranges for each factor shall be used in all instances where the weighted guidelines are applied.

Profit factors	Weight ranges (percent)
I. Contractor Effort (Weights applied to cost):	
A. Material acquisitions:	
1. Purchased parts	1 to 3.
2. Subcontracted items	1 to 4.
3. Other materials	1 to 3.
B. Labor skills:	
1. Technical and managerial:	
a. Scientific	10 to 20.
b. Project management/administration	8 to 20.
c. Engineering	8 to 14.
2. Manufacturing	4 to 8.
3. Support services	4 to 14.
C. Overhead:	
1. Technical and managerial	5 to 8.
2. Manufacturing	3 to 6.
3. Support services	3 to 7.
D. Other direct costs	3 to 8.
E. G&A (General Management) expenses	5 to 7.
II. Contract Risk (type of contract—weights applied to total cost of items IA thru E).	0 to 8.
III. Capital Investment (Weights applied to the net book value of allocable facilities).	5 to 20.
IV. Independent Research and Development:	
A. Investment in IR&D program (Weights applied to allocable IR&D costs).	5 to 7.
B. Developed items employed (Weights applied to total of profit $ for items IA thru E).	0 to 20.
V. Special Program Participation (Weights applied to total of Profit $ for items IA thru E).	−5 to +5.
VI. Other Considerations (Weights applied to total of Profits $ for items 1A thru E).	−5 to +5.
VII. Productivity/Performance (special computation).	(N/A)

915.970–3 Documentation.

Determination of the profit or fee objective, in accordance with this subpart shall be fully documented. A worksheet, DOE Form F 4220.23 has been developed to assist the contracting officer in this effort. Since the profit objective is the contracting officer's pre-negotiation evaluation of a total profit allowance for the proposed contract, the amounts developed for each category of cost will probably change in the course of negotiation. Furthermore, the negotiated amounts will probably vary from the objective and from the pre-negotiation detailed application of the weighted guidelines technique to each element of the contractor's input to total performance. Since the profit objective is viewed as a whole rather than as its component parts, insignificant variations from the pre-negotiation profit objective, as a result of changes to the contractor's input to total performance, need not be documented in detail. Conversely, significant deviations from the profit objective necessary to reach a final agreement on profit or fee shall be explained in the price negotiation memorandum prepared in accordance with FAR 15.808.

915.970–4 Exceptions.

(a) For contracts not expected to exceed $500,000, the weighted guidelines need not be used; however, the contracting officer may use the weighted guidelines for contracts below this amount if he or she elects to do so.

(b) For the following classes of contracts, the weighted guidelines shall not be used:

(1) Commercialization and demonstration type contracts;

(2) Management and operating contracts;

(3) Construction contracts;

(4) Construction management contracts;

(5) Contracts primarily requiring delivery of material supplied by subcontractors;

(6) Termination settlements; and

(7) Contracts with educational institutions.

(c) In addition to paragraphs (a) and (b) above, the contracting officer need not use the weighted guidelines in unusual pricing situations where the weighted guidelines method has been determined by the DOE negotiating official to be unsuitable. Such exceptions shall be justified in writing and shall be authorized by the Head of the Contracting Activity. The contract file shall include this doucmentation and any other information that may support the exception.

(d) If the contracting officer makes a written determination that the pricing situation meets any of the circumstances set forth above, other methods for establishing the profit objective may be used. For contracts other than those subject to Subpart 917.6, the selected method shall be supported in a manner similar to that used in the weighted guidelines (profit factor breakdown and documentation of profit objectives); however, investment or other factors that would not be applicable to the contract shall be excluded from the profit objective determination. It is intended that the methods will result in profit objectives for noncapital intensive contracts that are below those generally developed for capital intensive contracts.

915.970–5 Special considerations—contracts with nonprofit organizations (other than educational institutions).

(a) For purposes of identification, nonprofit organizations are defined as those business entities organized and operated exclusively for charitable, scientific, or educational purposes, of which no part of the net earnings inure to the benefit of any private shareholder or individual, of which no substantial part of the activities is attempting to influence legislation or participating in any political campaign on behalf of any candidate for public office, and which are exempt from Federal income taxation under section 501 of the Internal Revenue Code.

(b) In computing the amount of profit or fee to be paid, the DOE negotiating official shall take into account the tax benefits received by a nonprofit organization. While it is difficult to establish the degree to which a remuneration under any given contract contributes to an organization's overall net profit, the DOE negotiating official should assume that there is an element of profit in any amount to be paid.

(c) In order to assure consideration of the tax posture of nonprofit organizations during a profit or fee negotiation, the DOE negotiating official shall calculate the fee as for a contract with a commercial concern and then reduce it at least 25 percent. However, depending on the circumstances, the contracting officer may pay profit or fees somewhere between this amount and the appropriate profit or fee as if it were a commercial concern. When this is the case, the contract file shall be documented to specifically state the reason or reasons.

(d) Where a contract with a nonprofit organization is for the operation of Government-owned facilities, the fee should be calculated using the procedures and schedules applicable to operating contracts as set forth in Part 970.

915.970–6 Contracts with educational institutions.

In certain situations the DOE may contract with a university to manage or operate Government-owned laboratories. These efforts are generally apart from, and not in conjunction with, their other activities, and the complexity and magnitude of the work are not normally found in standard university research or study contracts. Such operating contracts are subject to the applicable provisions set forth in Part 970.

915.970–7 Alternative techniques.

(a) Profit or fees to be paid on construction contracts and construction management contracts shall be determined in accordance with the applicable profit/fee technique for such contracts set forth in 915.971.

(b) Profit and fee to be paid on contracts under $500,000, not using the weighted guidelines, shall be judgmentally developed by the contracting officer by assigning individual dollar amounts to the factors appropriate to DOE profit considerations discussed in 915.970–2(d).

(c) Contracts which require only delivery or furnishing of goods or services supplied by subcontractors shall include a fee or profit which, in the

best judgment of the contracting officer, is appropriate. It would be expected that there would be a declining relationship of profit/fee dollars in relation to total costs. The higher the cost of subcontracts, for example, the lower the profit/fee ratio to these costs.

(d) Profit/Fee considerations in termination settlements are often a question of equity. They are a matter of negotiation. They should not, however, exceed what would have otherwise been payable under weighted guidelines had the termination not occurred.

915.970–8 Weighted guidelines application considerations.

(a) *General.* (1) 915.970–2(d) lists those DOE factors which are given consideration for profit/fee determination in all cases in which profit is to be specifically negotiated. This section discusses these factors and provides guidance on how they should be evaluated.

(2) The profit/fee elements (factors or subfactors) relating to Contractor Effort, as shown 915.970–2(d), item I, are similar to those cost elements contained in most contract pricing proposals. Often, individual proposals will be in a different format, but, since these factors and subfactors are broad and basic, they provide sufficient guidance to evaluate all items of cost generally found in proposals.

(3) In making a judgment of the value of each factor, the contracting officer should recognize the definition, description, and purpose of the factors, together with consideration for evaluating them as set forth herein.

(4) The effect of the Facilities Capital Cost of Money cost principle (FAR 31.205–10) has been recognized in the weights assigned for arriving at profit and fee objectives; consequently, no offset is necessary or will be made to the prenegotiation profit objectives for cost of money recognized as a cost.

(b) *Contractor effort.* (1) This factor is a measure of how much the contractor is expected to contribute to the overall effort necessary to meet the contract performance requirements in an efficient manner. This factor, which is apart from the contractor's basic responsibility for contract performance, takes into account what resources are necessary, and what the contractor must do, to accomplish a in the contract. This factor recognizes that, within a given performance output or within a given sales dollar figure, necessary efforts on the part of individual contractors can vary widely in both value and quantity, and, that the profit objective should reflect the extent and nature of the contractor's contribution to total performance. The evaluation of this factor requires an analysis of the cost content of the proposed contract, as discussed in paragraphs (b) (2) through (4) of this section. *Not to be included as part of the cost base (for purposes of computing profit) is any amount calculated for the cost of money for facilities capital computed in accordance with Cost Accounting Standard 414.*

(2) The following comprise the base elements for measuring contractor effort:

(i) *Material acquisition.* Analysis of material acquisition cost items shall include an evaluation of the managerial and technical effort necessary to obtain the required purchased parts, subcontracted items or services, and other materials, including consideration of the number of orders and supplies and whether established sources are available or new sources must be developed. In reviewing this element:

(A) The contracting officer shall determine whether the contractor will obtain the material and tooling by routine orders from readily available suppliers (particularly orders of substantial value in relation to the total contract cost) or by subcontracts, and shall consider the extent to which the prime contractor will be required to develop complex specifications involving creative design or close tolerance manufacturing requirements.

(B) Consideration shall be given to the managerial and technical efforts necessary for the prime contractor to administer subcontracts and select subcontractors, including efforts to break out sole source subcontractors through the introduction of competition. These determinations and considerations shall be made for purchases of raw materials or basic commodities, purchases of processed material, including all types of components of standard or near standard characteristics, and purchases of pieces, assemblies, subassemblies, special tooling, and other products special to the end item. In the application of this criterion, it should be recognized that the contribution of the prime contractor to his purchasing program may be substantial. This may apply in the management of subcontracting programs involving many sources, new complex components and instrumentation, incomplete specifications, and close surveillance by the prime contractor's representative.

(C) Recognized costs proposed as direct material costs, or proposed as material overhead costs, such as scrap charges, shall be treated and evaluated as material costs for profit evaluation.

(D) Intracompany transfers which are accepted at price, in accordance with FAR 31.205–2(e), shall be evaluated as material. Other intracompany transfers shall be evaluated by individual components of cost, i.e., material, labor, and overhead.

(ii) *Labor (technical and managerial, manufacturing, and support services).* Analyses of the labor cost content of the contract shall include evaluation of the comparative quality and level of the talents, skills, and experience of those personnel to be employed for contract performance. In reviewing this element:

(A) Technical and managerial labor shall be evaluated, for the purpose of assigning profit dollars, by giving consideration to the amount of notable scientific, unusual or scarce engineering, and top management talent needed in contrast to journeyman engineering effort, professional staff, or closely related supporting personnel. The diversity, or lack thereof, of scientific, engineering and managerial specialties, required for contract performance and the corresponding need for related supervision and coordination shall be evaluated. By way of definition, project management and administration labor falling within this category includes senior project management personnel who oversee and direct the work, and usually consist of the project managers, project engineers, and comparable management personnel who form the project management team that plans, directs, and takes responsibility for the execution of the program or project assignment. The cost element for project management and administration labor usually applies to architect-engineer (A–E) contracts. The weight assigned will take into consideration the dollar amount of the project supervised.

(B) Manufacturing labor shall be evaluated by giving consideration to the variety and range of required manufacturing labor skills (i.e., department heads, supervisors, skilled and unskilled labor) and the contractor's manpower resources for meeting these requirements.

(C) Support services labor shall be evaluated in a manner similar to the above by assigning higher weights to professional-type skills and lower weights to semi-professional or other type skills required for contract performance. Support services labor represents those classifications of direct labor whose efforts are not identifiable with the descriptions of labor in paragraph (b)(2)(ii)(A) and (b)(2)(ii)(B) of this subsection and may include labor classifications assigned exclusively for contract performance, such as on-site

A–E firm employees performing project activities related to accounting, contract administration (including reporting), cost engineering, secretarial, clerical and the like. Care should be taken that direct charges of this nature are appropriately classified as direct rather than indirect, and that like activities are not allocated indirectly either to this contract or to the contractor's other work assignments. A weighting in excess of 9 percent for support service contract labor normally will be justified only when the quality, skill, and experience of the support labor warrants a weighting corresponding to category (A), above.

(iii) *General management (overhead and general and administrative (G&A) but exclusive of IR&D costs).* In reviewing this element:

(A) Analysis of overhead and G&A expenses includes evaluation of the makeup of these expenses and how much they contribute to contract performance. This analysis shall include a determination of the amount of labor within the expense pools and how this labor would be treated if it were considered as direct labor under the contract. The allocable labor elements shall be given the same profit consideration that they would receive if they were treated as direct labor. The other elements of these expense pools shall be evaluated to determine whether they are routine expenses (such as utilities, supplies, and maintenance) and hence given lesser profit consideration, or whether they contribute significantly to contract performance. Depreciation expenses on facilities capital will be excluded from consideration since the profit reward for facilities capital investment is separately weighted as discussed in 915.970–8(d). The composite of the individual determinations in relation to the elements of the expense pools will be the profit consideration given the pools as a whole. The procedure for assigning relative values to such expenses differs from the method used in assigning values for the direct labor. The upper and lower limits assignable to the direct labor are absolute. In the case of overhead expenses, individual expenses may be assigned values outside the range as long as the composite ratio is within the range.

(B) It is not necessary that the contractor's accounting system break down the overhead expenses within the classification of technical and managerial (or engineering) overhead, manufacturing overhead, and general and administrative expenses, unless dictated otherwise by Cost Accounting Standards (CAS). The contractor whose accounting system only reflects one overhead rate on all direct labor need not make changes to reflect more detail data (if CAS exempt) to correspond with the above classifications. In evaluating such a contractor's overhead rate, the negotiating official can break out the applicable sections of the composite rate which can be classified as technical, managerial, or engineering overhead, manufacturing overhead, and general and administrative expenses and follow the appropriate evaluation technique.

(C) There is a critical factor to consider in the determination of profit in this area. Management problems surface in various degrees and the management expertise exercised to solve them shall be considered as an element of profit. For example, a new program for an item that is on the cutting edge of the state of the art will cause more problems and require more managerial time and abilities of a higher order than a follow-on contract. If new contracts create more problems and require a higher profit consideration, follow-ons shall be adjusted downward as many of the problems may have been solved. In any event, an evaluation shall be made of the underlying managerial effort involved on a case-by-case basis.

(D) It may not be necessary for the negotiating official to make a separate profit evaluation of overhead expenses with each acquisition of substantially the same circumstance or service with the same contractor. Where an analysis of the profit weight to be assigned to the overhead pool has been made, the weight to be assigned may be used for future contracts with the same contractor until there is a change in the cost composition of the overhead pool or the contract circumstances, or until the factors discussed in paragraph (C) above are relevant.

(iv) *Other direct costs (exclusive of CAS 414, Facilities Capital Cost of Money).* In evaluating this element, it should be remembered:

(A) Proposals, particularly for research and development, often list as direct costs the kinds of expenses usually treated as indirect for other contracts. Examples are travel and subsistence, consultants, telephone, computer costs and reports reproduction. The accounting treatment of a cost category does not change the weight appropriate to the cost being evaluated.

(B) The weight ranges in the format cover the broad categories of direct material, labor, and G&A expenses. Although cost submissions may vary from the way shown in the format, all cost categories contained in submissions will fall under one of the broad groupings shown in the format. Because other direct costs are not direct material or direct labor, it follows that they will be considered as indirect costs for weighting purposes.

(C) *Contract risk.* (1) This factor reflects the policy of the Department of Energy that contractors bear an equitable share of cost risk, and to compensate them for the assumption of that risk. A contractor's risk associated with costs to perform under a Government contract is usually minimal under cost-reimbursement-type contracts. In developing a prenegotiation profit or fee objective, the negotiating official will need to consider the type of contract to be negotiated and the anticipated contractor cost risk. This consideration is one of the most important factors in arriving at a prenegotiation profit or fee objective.

(2) Profit/Fee allowances for contractor assumption of cost risk require a determination of the degree of cost responsibility the contractor assumes, and the reliability of the cost estimates in relation to the task assumed. This factor is specifically limited to the risk of costs of contract performance, including unallowable cost elements. Thus, such risks on the part of the contractor as reputation, losing a commercial market, losing potential profits in other fields, or any risk on the part of the contracting activity, such as the risk of not acquiring an effective product or service, are not within the scope of this factor.

(3) The first and basic determination of the degree of cost responsibility assumed by the contractor is related to the sharing of total risk of performance cost by the Government and the contractor through the selection of contract type. The extremes are a cost-plus-fixed-fee contract, requiring only that the contractor use his best efforts to perform a task, and a firm-fixed-price contract. A cost-plus-fixed-fee contract reflects a minimum assumption of cost responsibility, whereas a firm-fixed-price contract reflects a complete assumption of cost responsibility.

(4) The second determination is that of the reliability of the cost estimates. Sound price negotiation requires well-defined contract objectives and reliable cost estimates which, among other things, take the difficulty of the task into consideration. Prior production experience assists the contractor in preparing reliable cost estimates on new contracts for similar items.

(5) Contractors are likely to assume greater cost risk when confident that contracting officers analyze the risk incident to proposed contracts and show they are willing to compensate contractors for it. Generally, a cost-plus-fixed-fee contract will not justify a reward for risk in excess of 0.5 percent, nor will a firm-fixed-price contract justify a reward of less than the minimum on the following weighted guidelines. Where proper contract-type selection has been made, the reward for risk, by contract type, will usually fall into the following percentage ranges which are applied to total recognized contract costs, exclusive of facilities capital cost of money:

(i) Type of contract and percentage ranges for profit objectives developed for equipment and supply contracts:

Cost-Plus-Fixed-Fee—0 to 0.5%
Cost-Plus-Incentive-Fee:
  With Cost Incentives Only—1 to 2%
  With Multiple Incentives—1.5 to 3%
Fixed-Price-Incentive:
  With Cost Incentives Only—3 to 5%
  With Multiple Incentives—4 to 6%
Prospective-Price-Redeterminable—4 to 6%
Firm-Fixed-Price—6 to 8%

(ii) Type of contract and percentage ranges for profit objectives developed for research and development contracts:

Cost-Plus-Fixed-Fee—0 to 0.5%
Cost-Plus-Incentive-Fee:
  With Cost Incentives Only—1 to 2%
  With Multiple Incentives—1.5 to 3%
Fixed-Price-Incentive:
  With Cost Incentives Only—2 to 4%
  With Multiple Incentives—3 to 5%
Prospective-Price-Redeterminable—3 to 5%
Firm-Fixed-Price—5 to 7%

(iii) Type of contract and percentage ranges for profit objectives developed for contracts for services.

Cost-Plus-Fixed-Fee—0 to 0.5%
Cost-Plus-Incentive-Fee—1 to 2%
Fixed-Price-Incentive—2 to 3%
Firm-Fixed-Price—3 to 4%

(6) In assessing the selection and application of a weighting factor, the DOE negotiating official should remember:

(i) These ranges may not be appropriate for all acquisitions. For instance, a fixed-price-incentive contract that is closely priced with a low ceiling price and high incentive share may be tantamount to a firm fixed price contract. In this situation, the contracting officer may determine that a basis exists for high confidence in the reasonableness of the estimate and that little opportunity exists for cost reduction without extraordinary efforts. On the other hand, a contract with a high ceiling and low incentive formula can be considered to contain cost-plus-incentive-fee contract features. In this situation, the contracting officer may determine that the Government is retaining much of the contract responsibility and that the risk assumed by the contractor is minimal. Similarly, if a cost-plus-incentive-fee contract includes an unlimited downward (negative) fee adjustment on cost control, it could be comparable to a fixed-price-incentive-contract. In such a pricing environment, the negotiating official may determine that the Government has transferred a greater amount of cost responsibility to the contractor than is typical under a normal cost-plus-incentive-fee contract.

(ii) The acquisition may not obviously fit a specific category shown. For example, effort under a particular A–E contract may better fall into the category of R&D, rather than services. Judgment is required, therefore, in establishing the category and weights to be applied in each case.

(iii) The contractor's subcontracting program may have a significant impact on the contractor's acceptance of risk under a contract form. It can cause risk to increase or decrease in terms of both cost and performance. This consideration shall be a part of the contracting officer's overall evaluation in selecting a factor to apply for cost risk. It may be determined, for instance, that the prime contractor has effectively transferred real cost risk to a subcontractor and the contract cost risk evaluation, as a result, may be below the range that would otherwise apply for the contract type being proposed. This situation will be found to exist only in a few extraordinary situations under circumstances of (A) a follow-on production contract, in which a substantial portion of the total contract costs represents a single subcontract or a few subcontracts, and (B) the fullest incentive reward and penalty feature on cost performance having been passed by the prime contractor to the subcontractor. In an acquisition in which all of these circumstances are found to exist, a lower than usual profit weight may be applied to the aggregate of all recognized costs, including the subcontract portion. The contract risk evaluation should not be lowered, however, merely on the basis that a substantial portion of the contract costs represents subcontract costs (when there is no substantial transfer of the contractor's risk) since such action eventually can result in an undue or undesirable lessening of the amount of work let on subcontracts.

(iv) In making a contract cost risk evaluation in an acquisition that involves executing a definitive contract for a letter contract, unpriced change orders, and unpriced orders under basic ordering agreements, the effect on total contract cost risk as a result of having partial performance before a definitive contract is executed should be considered. Under some circumstances it may be concluded that the amount of cost risk has been effectively reduced. Under other circumstances it may be apparent that the contractor's cost risk remained substantially unchanged. To be equitable, the determination of a profit weight for application to the total of all recognized costs, both those incurred and those yet to be expended, must be made with consideration of all attendant circumstances and not be just the portion of costs incurred, or percentage of work completed, prior to the execution of a definitive contract.

(v) Time and material, labor hour, and overhaul contracts priced on a time and material basis shall be considered to be cost-plus-fixed-fee contracts for the purpose of establishing a profit weight in the evaluation of the contractor's assumption of contract cost risk.

(d) *Capital investment (facilities).* (1) This element relates to the consideration to be given in the profit objective in recognition of the investment risk associated with the facilities employed by the contractor. Measurement of the amount of facilities capital employed is discussed in 930.7001–4 and 930.7001–8. Five to twenty percent of the net book value of facilities capital allocated to the contract is the normal range of weight for this profit factor. The key factors that the negotiating official shall consider in evaluating this factor are:

(i) The overall cost effectiveness of the facilities employed;

(ii) Whether the facilities are general purpose or special purpose items;

(iii) The age of the facilities;

(iv) The relationship of the remaining writeoff life of the investment and the length of the program(s) or contract(s) on which the facilities are employed; and

(v) Special contract provisions that reduce the contractor's risk of recovery of facilities capital investment (termination-protection clauses, multiyear cancellation ceilings, etc.).

(2) To assist in evaluating new investment, the contracting officer should request the contractor to submit reasonable evidence that the new facilities are part of an approved investment plan and that achievable benefits to the Government will result from the investment. New industrial facilities and equipment shall receive maximum weight when they—

(i) Are to be acquired by the contractor primarily for Government and energy related business and effort;

(ii) Have a long service life;

(iii) Have a limited economic life due to limited alternative uses; and

(iv) Reduce the total life cycle cost of the products produced for, or services to, the Department of Energy.

To the extent that the new investment represents routine replacement of existing assets, a lesser weight shall be assigned.

(e) *Independent research and development.* This factor rewards contractors in two ways:

(1) As a reward for the contractor's investment in a viable independent research and development program; considering, among other things, the program's quality, scope, and resources employed. The normal weight range for this factor is from 5 to 7 percent of allowable IR&D costs allocable to the prospective contract.

(2) As a reward for contractors who assume the extra risk of developing items with energy program applications on their own initiative with no direct Government assistance and little or no indirect Government assistance. Profit weights in the range of 0 to 20 percent of the basic profit dollars (total of profit dollars for items I.A. through I.E., 915.970–2(d)) are normal for this factor. The weight selection is to be based on the amount of assistance provided by the Government through independent research and/or development expense allowance under previous Government contracts and the extent the contractor already has been compensated for independent development through prior sales of the identical item to the Government.

(f) *Participation in special programs.* (1) A composite percentage weight within the range of −5 percent to +5 percent of the basic profit objective (total of profit dollars for items I.A. through I.E., 915.970–2(d)) may be assigned for this profit objective. This profit factor, which may apply to special circumstances as well as a particular acquisition, relates to rewards of outstanding achievement in contractor participation in the Government's small business, small disadvantaged business, women-owned small business concerns, labor surplus, energy conservation and other special programs. Participation that is rated as merely satisfactory shall be assigned a weight of zero, generally. Evidence of effective support may justify a plus weight and poor support a negative weight.

(2) In assessing this factor, the negotiating official shall:

(i) Give favorable consideration to the contractor's policies and procedures that effectively support Government small business and small disadvantaged business subcontracting programs. Any unusual effort that the contractor displays in subcontracting with these concerns, particularly for development-type work likely to result in later production opportunities, and the overall effectiveness of the contractor in subcontracting with, and furnishing assistance to, such concerns shall be considered. Conversely, failure or unwillingness on the part of the contractor to support these Government policies shall be viewed as evidence of poor performance for the purpose of establishing a profit objective.

(ii) Make a similar review and evaluation of the contractor's policies and procedures supporting the Government's labor surplus area program. In particular, favorable consideration shall be given to a contractor who (A) makes a significant effort to help find jobs and provide training for the hardcore unemployed, or (B) promotes maximum subcontractor utilization of certified eligible concerns.

(iii) Give favorable consideration to the contractor's initiatives and accomplishments in the conservation of energy and in carrying out any other special Government programs.

(g) *Other considerations.* (1) Particular situations may justify consideration of a profit allowance in addition to those specifically identified elsewhere in the guidelines. These situations shall be identified and the reason(s) for their use documented in the price negotiation memorandum. An assigned weight of −5 to +5 percent of the basic profit objective is the normal range for this profit factor depending on the circumstances of the particular acquisition. A zero weight designates a satisfactory or average effort.

(2) Examples of "other considerations" are described in the following subparagraphs.

(i) *Cost-control and other past accomplishments.* This factor allows additional profit opportunities to a prospective contractor that has previously demonstrated its ability to perform similar tasks effectively and economically. In addition, consideration should be given to (A) measures taken by the prospective contractor that result in productivity improvements and (B) other cost-reduction accomplishments that will benefit Government contracts. Among other things, consideration should be given to the contractor's efforts to explore additional production opportunities or to improve or develop new product, manufacturing or performance technologies to reduce production cost.

(ii) *Complexity of R&D or services assignment.* A weighting for the complexity of the R&D or services assignment will be considered when a contract, such as an A–E contract, relates to a DOE project facility. The following complexity categories are to be used for the purpose of establishing the appropriate fee weight:

(A) *Class A*—Manufacturing plants involving continuous closed processes or other complicated operations requiring a high degree of design particle accelerators; complex laboratories or industrial units especially designed for processing, testing or handling highly radioactive materials; facilities to be used for research, development, experimental or demonstration purposes which involve advance or unique design considerations that are peculiar to the purposes for which the facility is built.

(B) *Class B*—Normal manufacturing processes and assembly operations such as ore dressing, metal working plants and simple processing plants; power plants and accessory switching and transformer stations; water treatment plants; sewage disposal plants; hospitals and ordinary laboratories.

(C) *Class C*—Permanent administrative and general service buildings, permanent housing, roads, railroads, grading, sewers, storm drains and water and power distribution systems.

(D) *Class D*—Construction camps and facilities and other construction of a temporary nature.

(iii) *Operating capital.* This factor includes consideration of the level of the contractor's operating or working capital investment required for effective contract performance. This level will vary, depending on such circumstances as (A) the nature of the work and duration of the contract, (B) contract type and dollar magnitude, (C) the reimbursement or progress payment rate, (D) the contractor's financial management practices, and (E) the frequency of and time lag between billings and Government payments. Such circumstances should be taken into account in determining what profit adjustment, if any, is appropriate under this subfactor. When the contractor will invest relatively few dollars for operating capital purposes (because of cost reimbursement and progress payment rates, or when an advance payment method (such as a letter of credit) is used to finance the contractor), a negative adjustment may be appropriate.

(h) *Productivity/Performance adjustment for follow-on contracts.* (1) One of the objectives of the DOE profit policy is to reduce costs needed to achieve national energy goals by encouraging contractor investment in modern cost-reducing facilities and other improvements in efficiency and performance. To the extent that costs serve as the basis for pricing (both cost and profit), success in reducing costs can serve in turn to reduce the magnitude of prospective profit dollars on follow-on contracts. For example, a cost-plus-award-fee contract may be awarda as the first of two or more contracts required for a major energy program. The incentive to increase productivity or performance and reduce cost under the first contract works against the contractor on any follow-on contracts because the reduced level of costs becomes a part of the basis for pricing subsequent contracts. In order to mitigate the relative loss of prospective profit dollars on a follow-on contract that occurs when costs are reduced under the predecessor contract or contracts due to productivity or performance gains, a special "Productivity/Performance Reward" may be included in the prenegotiation profit objective of a pending follow-on acquisition under certain circumstances.

(2) The "Productivity/Performance Reward" may be applied when all of the following criteria are met:

(i) The pending acquisition is for a follow-on contract.

(ii) Reliable actual cost data relating to the predecessor contract or contracts is available to establish a fair and reasonable cost baseline.

(iii) Changes made in the configuration of the item being acquired or in the technical aspects of the services being performed are not likely to invalidate price comparability.

(3) The amount of productivity or performance reward for a given follow-on contract is based on the estimated cost reduction on the predecessor contract or contracts that can be attributed to productivity or performance gains. Set forth below are principles and procedures that apply to estimating cost reductions and calculating the productivity or performance reward:

(i) The contractor shall prepare and support the cost reduction estimate.

(ii) The overall contract cost decrease shall be based on estimated decreases measured at the unit cost level, or equivalent.

(iii) The lowest average unit cost or its equivalent (exclusive of profit) for a preceding performance period or production run shall serve as the unit cost baseline.

(iv) A technique shall be employed to determine that portion of the cost decrease attributable to productivity or performance gains as opposed to other factors such as the effects of quality differences between the base contract and the pending acquisition.

(v) When the parties agree that the estimated overall contract cost decrease is materially affected by price level differences between the base period and the current point in time, an economic price adjustment may be applied to the estimate.

(vi) The reward shall be calculated by multiplying the contract cost decrease due to productivity/performance gains by the base profit objective rate.

(vii) The degree of review and validation of the data supporting the reward calculation shall be commensurate with the materiality of this profit element in relation to the overall price objective.

(4) There may be several methods advanced, by both contracting officers and contractors, to quantify productivity/performance gains. Any technique may be acceptable, provided it equitably takes into account the principles and procedures listed above.

915.971 Profit and fee-system for construction and construction management contracts.

915.971-1 General.

(a) Business concerns awarded a DOE construction or construction management contract shall be paid a profit or fee if requested or solicited. The profit or fee objective for a construction or construction management contract shall be an amount appropriate for the type of effort contained therein. It is the intent of DOE to (1) reward contractors based on the complexity of work, (2) reward contractors who demonstrate and establish excellent records of performance and (3) reward contractors who contribute their own resources, including facilities and investment of capital.

(b) Standard fees or across-the-board agreements will not be used or made. Profit or fee objectives are to be determined for each contract according to the effort or task contracted for thereunder.

(c) Profit or fee payable on fixed-price and cost-reimbursable construction or construction management contracts shall be established in accordance with the appropriate procedures and schedules set forth in this subpart.

915.971-2 Limitations.

Amounts payable under construction and construction management contracts shall not exceed amounts derived from the schedules established for this purpose. Requests to pay fees in excess of these levels shall be forwarded to the Procurement Executive for review and approval.

915.971-3 Factors for determining fees.

(a) The profit policy stated in 915.971-1(a) reflects, in a broad sense, recognition that profit is compensation to contractors for the entrepreneurial function of organizing and managing resources (including capital resources), and the assumption of risk that all costs of performance (operating and capital) may not be reimbursable.

(b) The best approach calls for a structure that allows judgmental evaluation and determination of fee dollars for prescribed factors which impact the need for, and the rewards associated with, fee or profit, as follows.

(i) Management risk relating to performance, including the (A) quality and diversity of principal work tasks required to do the job, (B) labor intensity of the job, (C) special control problems, and (D) advance planning, forecasting and other such requirements;

(ii) The presence or absence of financial risk, including the type and terms of the contract;

(iii) The relative difficulty of work, including consideration of technical and administrative knowledge, skill, experience and clarity of technical specifications;

(iv) Degree and amount of contract work required to be performed by and with the contractor's own resources, including the extent to which the contractor contributes plant, equipment, computers, or working capital (labor, etc.);

(v) Duration of project;

(vi) Size of operation;

(vii) Benefits which may accrue to the contractor from gaining experience and know-how, from establishing or enhancing a reputation, or from being enabled to hold or expand a staff whose loyalties are primarily to the contractor; and

(viii) Other special considerations, including support of Government programs such as those relating to small and small disadvantaged business in subcontracting, energy conservation, etc.

(c) The total fee objective and amount for a particular negotiation is established by judgmental considerations of the above factors, assigning fee values as deemed

appropriate for each factor and totaling the resulting amounts.

(d) In recognition of the complexities of this process, and to assist in promoting a reasonable degree of consistency and uniformity in its application, fee schedules have been developed which set forth maximum fee amounts that contracting activities are allowed to negotiate for a particular transaction without obtaining prior approval of the Procurement Executive. In addition, the fee negotiation objective established in accordance with 915.971–3(a), (b), and (c) shall not exceed the applicable fee schedule amounts without prior approval of the Procurement Executive. To facilitate application to a contract, the fee amounts are related to the total cost base which is defined as total operating and capital costs.

915.971–4 Considerations affecting fee amounts.

(a) In selecting final fee amounts for the various factors in 915.971–3 of this section, the DOE negotiating official will have to make several judgments as discussed in this subsection.

(b) Complexity of a construction project shall be considered by analysis of its major parts. For a project which includes items of work of different degrees of complexity, a single average classification should be considered, or the work should be divided into separate classifications. The following class identifications are appropriate for proper fee determinations.

(1) *Class A*—Manufacturing plants involving continuous closed processes or other complicated operations requiring a high degree of design layout or process control; nuclear reactors; atomic particle accelerators; complex laboratories or industrial units especially designed for handling radioactive materials.

(2) *Class B*—Normal manufacturing processes and assembly operations such as ore dressing, metal working plant and simple processing plants; power plants and accessory switching and transformer stations; water treatment plants; sewage disposal plants; hospitals; and ordinary laboratories.

(3) *Class C*—Permanent administrative and general service buildings, permanent housing, roads, railroads, grading, sewers, storm drains, and water and power distribution systems.

(4) *Class D*—Construction camps and facilities and other construction of a temporary nature.

(c) Normal management elements of principal tasks relating to a construction contract cover several categories of tasks with differing rates of application throughout the construction period. The principal elements of management effort are outlined in this paragraph. Although each project has a total management value equal to 100% for all elements, the distribution of effort among the various elements will be different for each project due to differences in project character or size. The basic management elements and the normal range of efforts expected to apply for a normal sized project are as follows. When the normally expected effort will not be performed by a contractor, this fact should be considered in arriving at appropriate fee amounts.

Management elements	Effort range	
	Minimum	Maximum
I. *Broad project planning.*—Overall project planning and scheduling, establishment of key project organization and consultation with the A–E and DOE. Performed by highest level of contractor's officers, technical personnel and project manager	15	25
II. *Field planning.*—Mobilization and demobilization of top field organization from the contractor's existing organization and from other sources as necessary. Detailed project planning and scheduling for construction of facilities. Performed by the project manager and top field professional staff	15	20
III. *Labor supervision.*—Direct supervision of manual employees. Performed by contractor's subprofessional staff, such as superintendents and foremen (some salaried and some hourly rate). This includes the contractor's personnel to coordinate and expedite the work of subcontractors	12	16
IV. *Acquisition and subcontracting.*—Acquisition of other than special equipment. Selection of subcontractors and execution and administration of subcontracts. Performed by contractor's staff under supervision and direction of elements I and II	12	10
V. *Labor relations and recruitment (manual).*—Performed by the contractor's staff under supervision and direction of elements I, II and III. This includes demobilization of work forces	7	11
VI. *Recruitment of supervisory staff.*—Staffing required to supplement the organization under elements I and II, and demobilization during completion of the project. Performed by contractor's permanent staff and recruitment personnel under supervision and direction of management elements I and II	4	6
VII. *Expediting.*—Expediting contracting performed by contractor's staff and by subcontractors. Performed by contractor's staff under supervision and direction of elements I and II	4	6
VIII. *Construction equipment operations.*—This includes mobilization and demobilization. Performed by contractor's staff under supervision, direction and coordination of elements I, II, and IV.	4	6
IX. *Other services.*—Timekeeping, cost accounting, estimating, reporting, security, etc., by the contractor's staff under supervision and direction of elements I and II	4	6

(d) Fee considerations dealing with the duration of a project are usually provided by the consideration given to the degree of complexity and magnitude of the work. In only very unusual circumstances should it be necessary to separately weight, positively or negatively, for the period of services or length of time involved in the project when determining fee levels.

(e) The size of the operation is to a considerable degree a continuation of the complexity factor, and the degree and amount of work required to be performed by and with the contractor's own resources. Generally, no separate weighting, positively or negatively, is required for consideration of those factors.

(f) The degree and amount of work required to be performed by and with the contractor's own resources affect the level of fees. Reasonable fees should be based on expectations of complete construction services normally associated with a construction or construction management contract. In the case of a construction contract, reduced services can be in the form of excessive subcontracting or supporting acquisition actions and labor relation interfaces being made by the government. If an unusual amount of such work is performed by other than the contractor, it will be necessary to make downward adjustments in the fee levels to provide for the reduction in services required.

(g) The type of contract to be negotiated and the anticipated contractor cost risk shall be considered in establishing the appropriate fee objective for the contract.

(h) When a contract calls for the contractor to use its own resources, including facilities and equipment, and to make its own cost investment (i.e., when there is no letter-of-credit financing), a postive impact on the fee amount shall be reflected.

915.971–5 Fee schedules.

(a) The schedules included in this paragraph, adjusted in accordance with provisions stated herein and 915.971–6, provide maximum fee levels for construction and construction management contracts. The fees are related to the estimated cost (fee base) for the construction work and services to be performed. The schedule in paragraph (d) sets forth the basic fee schedule for construction contracts. The schedule in paragraph (f) sets forth the basic fee schedule for construction management contracts. A separate schedule in paragraph (h) has been developed (i) for determining the fee applicable to special equipment purchases and (ii) to reflect a differing level of fee consideration associated with the subcontractor effort under construction management contracts. (See 915.971–6(c) and 915.971–6(d)).

(b) The schedules cited in paragraph (a) above provides the maximum fee amount for a CPFF contract arrangement. If a fixed-price type contract is to be awarded, the fee amount set forth in the fee schedules shall be increased by an amount not to exceed 4 percent of the fee base.

(c) The fee schedule shown in paragraphs (d) and (f) assumes a letter of credit financing arrangement. If a contract provides for or requires the contractor to make their own cost investment for contract performance (i.e., when there is no letter-of-credit financing), the fee amounts set forth in the fee schedules shall be increased by an amount equal to 5 percent of the fee amount as determined from the schedules.

(d) The following schedules sets forth the base for construction contracts.

CONSTRUCTION CONTRACTS SCHEDULE

Fee base	Fee	Fee, percent	Increment, percent
$100,000	$5,400	5.40	5.25
$300,000	15,900	5.30	5.00
$500,000	25,900	5.18	4.72
$1,000,000	49,500	4.95	3.33
$3,000,000	116,100	3.87	2.82
$5,000,000	172,500	3.45	2.53
$10,000,000	299,000	2.99	2.16
$15,000,000	408,000	2.72	1.90
$25,000,000	598,000	2.39	1.68
$40,000,000	850,000	2.13	1.46
$60,000,000	1,142,000	1.90	1.28
$80,000,000	1,396,000	1.75	1.24
$100,000,000	1,646,000	1.65	1.03
$150,000,000	2,161,000	1.44	.80
$200,000,000	2,561,000	1.28	.65
$300,000,000	3,211,000	1.07	.50
$400,000,000	3,711,000	.93	.35
$500,000,000	4,061,000	.81	
Over $500 million	4,061,000		[1].35

[1] 0.35 percent excess over $500 million.

(e) When using the Construction Contracts Schedule for establishing maximum payable basic fees, the following adjustments shall be made to the Schedule fee amounts for (1) complexity levels, (2) excessive subcontracting, (3) normal contractor services performed by the government or another contractor:

(i) The target fee amounts, set forth in the fee schedule, shall not be adjusted for a Class A project, which is maximum complexity. A Class B project requires a 10 percent reduction in amounts. Class C and D projects require a 20 percent and 30 percent reduction, respectively. The various classes are defined in 915.971–4(b).

(ii) The target fee schedule provides for 45 percent of the contract work to be subcontracted for such things as electrical and other specialties. Excessive subcontracting results when such efforts exceed 45 percent of the total contract work. To establish appropriate fee reductions for excessive subcontracting, the negotiating official should first determine the amount of subcontracting as a percentage of the total contract work. Next, the negotiating official should determine a percentage by which the prime contractor's normal requirement (based on a requirement for doing work with its own forces) is reduced due to the excessive subcontracting and, finally, multiply the two percentages to determine a fee reduction factor.

(iii) If acquisition or other services normally expected of the contractor (see 915.971–4(c)) are performed by the government, or another DOE prime or operating contractor, a fee reduction may also be required. The negotiating official should first determine what percentage of the total procurement or other required services is performed by others. Then the negotiating official should apply this percentage reduction to the normally assigned weightings for the management services or effort as discussed in 915.971–4(c) to arrive at the appropriate reduction factor.

(f) The following schedule sets forth the base fee for construction management contracts:

CONSTRUCTION MANAGEMENT CONTRACTS SCHEDULE

Fee base	Fee	Fee, percent	Increment, percent
$100,000	$5,400	5.40	5.25
$300,000	15,900	5.30	5.00
$500,000	25,900	5.18	4.72
$1,000,000	49,500	4.95	3.33
$3,000,000	116,100	3.87	2.82
$5,000,000	172,500	3.45	2.53
$10,000,000	299,000	2.99	2.16
$15,000,000	408,000	2.72	1.90
$25,000,000	598,000	2.39	1.68
$40,000,000	850,000	2.13	1.46
$60,000,000	1,142,000	1.90	1.28
$80,000,000	1,396,000	1.75	1.24
$100,000,000	1,646,000	1.65	1.03
Over $100 million	1,646,000		[1] 1.03

[1] 1.03 percent over $100 million.

(g) When applying the basic Construction Management Contracts Schedule for determining maximum payable fees, no adjustments are necessary to such payable fees for contractor Force account labor used for work which should otherwise be subcontracted until such Force account work exceeds, in the aggregate, 20 percent of the base. Excessive use of Force account work results when such effort exceeds 20 percent of the fee base; and, when this occurs, appropriate fee reductions for such excessive Force account labor shall be computed as follows:

(1) Determine the percentage amount of Force account work to total contractor effort.

(2) Determine the percentage amount of subcontract work reduced due to the use of Force account work.

(3) Multiply the two percentages to determine the fee reduction factor. It is not expected that reductions in the Construction Management Contracts Schedule fee amounts will be made for complexity, reduced requirements and similar adjustments as made for construction contracts.

(h) The schedule of fees for consideration of special equipment purchases and for considerations of the subcontract program under a construction management contract is as follows:

SPECIAL EQUIPMENT PURCHASES/ SUBCONTRACT WORK SCHEDULE

Fee base	Fee	Fee, percent	Increment, percent
$100,000	$1,500	1.50	1.50
$200,000	3,000	1.50	1.47
$490,000	5,940	1.48	1.30
$600,000	8,720	1.45	1.28
$800,000	11,300	1.41	1.15
$1,000,000	13,600	1.36	1.00
$2,000,000	23,600	1.18	.80
$4,000,000	39,600	.96	.62
$6,000,000	52,000	.87	.62
$8,000,000	64,400	.81	.57
$10,000,000	75,800	.76	.55
$15,000,000	102,300	.68	.45
$25,000,000	147,300	.59	.42
$40,000,000	210,300	.53	.36
$60,000,000	282,300	.47	.30
$80,000,000	346,300	.44	.28
$100,000,000	404,800	.41	.25
$150,000,000	514,300	.34	.15
$200,000,000	589,300	.29	.09
$300,000,000	679,300	.23	
Over $300 million	679,300		[1] .09

[1] 0.09 percent excess over $300 million.

915.971–6 Fee base.

(a) The fee base shown in the Construction Contracts Schedule and Construction Management Contracts Schedule represents that estimate of cost to which a percentage factor is applied to determine maximum fee allowances. The fee base is the estimated necessary allowable cost of the construction work or other services which are to be performed. It shall include the estimated cost for, but is not limited to, the following as they may apply in the case of a construction or construction management contract:

(1) Site preparation and utilities.

(2) Construction (labor-materials-supplies) of buildings and auxiliary facilities.

(3) Construction (labor-materials-supplies) to complete/construct temporary buildings.

(4) Design services to support the foregoing.

(5) General management and job planning cost.

(6) Labor supervision.
(7) Procurement and acquisition administration.
(8) Construction performed by subcontractors.
(9) Installation of government furnished or contractor acquired special equipment and other equipment.
(10) Equipment (other than special equipment) which is to become Government property (including a component of Government property).

(b) The fee base for the basic fee determination for a construction contract and construction management contract shall include all necessary and allowable costs cited in paragraph (f)(2) as appropriate to the type of contract; except, any home office G&A expense paid as a contract cost per cost principle guidance and procedures shall be excluded from the fee base. The fee base shall exclude:
(1) Cost of land.
(2) Cost of engineering (A&E work).
(3) Contingency estimate.
(4) Equipment rentals or use charges. (See 936.70.)
(5) Cost of government furnished equipment or materials.
(6) Special equipment as defined in 936.7200(b)(4).

(c) A separate fee base shall be established for special equipment for use in applying the Special Equipment Purchases or Subcontract Work Schedule (see 915.971–5(f)). The fee base for determination of applicable fees on special equipment shall be based on the estimated purchase price of the equipment.

(d) The fee base under the Construction Management Contracts Schedule for a maximum basic fee determination for a construction management contract shall be comprised of only the costs of the construction manager's own efforts. However, it is recognized that in the case of construction management contracts, the actual construction work will be performed by subcontractors. In most cases the subcontract awards for the construction work will be made by the construction management contractor. Occasionally the contract may involve management of construction performed under a contract awarded by the Department or by one of the Department's operating contractors. In these cases, the actual cost of the subcontracted construction work shall be excluded from the fee base used to determine the maximum basic fee (under the Construction Management Contracts Schedule) applicable to a construction management contract. A separate fee base for additional allowances (using the Special Equipment Purchases or Subcontract Work Schedule) shall be established, which shall be comprised of those subcontract construction costs, special equipment purchases, and other items' costs that are contracted for or purchased by the construction manager.

915.972 Special considerations for cost-plus-award-fee contracts.

(a) When a contract is to be awarded on cost-plus-award-fee basis in accordance with 916.404–2, several special considerations are appropriate.

(1) The base fee portion of the fee objective of an award fee contract may range from 0% up to the 50% level of the fee amount for a Cost-Plus-Fixed-Fee (CPFF) contract, arrived at by using the weighted guidelines or other techniques (such as those provided in 915.971 for construction and construction management contracts). However, the base amount should not normally exceed 50% of the otherwise applicable fixed fee. In the event this 50% limit is exceeded, appropriate documentation shall be entered into the contract file. In no event shall the base fee exceed 60% of the fixed fee amount.

(2) The base fee plus the amount included in the award fee pool should normally not exceed the fixed fee (as subjectively determined or as developed from the fee schedule) by more than 50%. However, in the event the base fee is to be less than 50% of the fixed fee, the maximum potential award fee may be increased proportionately with the decreases in base fee amounts.

(3) The following maximum potential award fees shall apply in award fee contracts: (percent is stated as percent of fee schedule amounts).

Base fee percent	Award fee [illegible]	Maximum total percentage
50	100	150
40	120	160
30	140	170
20	160	180
10	180	190
0	200	200

(b) Prior approval of the Procurement Executive, is required for total fee (base plus award fee pool) exceeding the guidelines in 915.972(a)(3). Additionally, in the event use of the award fee guidelines exceeds the statutory limitations discussed in FAR 15.903(d)(1)(i), (ii) and (iii), prior approval of the Procurement Executive shall also be required.

Subpart 915.10—Preaward and Postaward Notifications, Protests, and Mistakes

915.1002 Debriefings of unsuccessful offerors.

(a) Debriefings must be requested within 10 working days of receipt of notification of elimination from consideration or announcement of selection. Contracting officers shall advise unsuccessful offerors of this limitation in such notification letter(s). Debriefings will be provided at the earliest feasible time, which normally shall be after announcement of the selection decision and prior to award of the contract. However, when the exigency of the situation will not permit delaying the award in order to debrief unsuccessful offerors, such debriefing may be conducted after award of the contract. The contracting officer, may if it is decided the facts justifies such action, receive and act upon request received at a later date. Also see 924.202(b).

PART 916—TYPES OF CONTRACTS

Subpart 916.2—Fixed-Price Contracts

Sec.
916.203 Fixed-price contracts with economic price adjustment.
916.203–4 Contract clauses.
916.206 Fixed-ceiling-price contracts with retroactive price redetermination.
916.206–3 Limitations.
916.207 Firm-fixed-price, level-of-effort term contracts.
916.207–3 Limitations.

Subpart 916.3—Cost-Reimbursement Contracts

916.301–3 Limitations.
916.303 Cost-sharing contracts.
916.306 Cost-plus-fixed-fee contracts.
916.307 Contract clauses.

Subpart 916.4—Incentive Contracts

916.404–2 Cost-plus-award-fee contracts.
916.405 Contract clauses.

Subpart 916.6—Time-And-Materials, Labor-Hour, and Letter Contracts

916.603 Letter contracts.
916.603–2 Application.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy of 1954, as amended (42 U.S.C. 2168).

Subpart 916.2—Fixed-Price Contracts

916.203 Fixed-price contracts with economic price adjustments.

916.203–4 Contract clauses.

(d)(2) The Head of the Contracting Activity, or designee, for contracts estimated to be within the limits of their delegated authority, may approve the

use of an economic price adjustment clause when appropriate in accordance with FAR 16.203-4(d)(1).

916.206 Fixed-ceiling-price contracts with retroactive price redetermination.

916.206-3 Limitations.

(d) The Head of the Contracting Activity, or designee, for contracts estimated to be within the limits of delegated authority, may approve the use of a fixed-ceiling-price contract with retroactive price redetermination.

916.207 Firm-fixed-price, level-of-effort term contracts.

916.207-3 Limitations.

(d) The Head of the Contracting Activity, or designee, for contracts estimated to be within the limits of their delegated authority, may approve the use of a firm-fixed-price, level-of-effort term contract in excess of $100,000.

Subpart 916.3—Cost-Reimbursement Contracts

916.301-3 Limitations.

(c) The determination and findings required by FAR 16.301-3(c) may be approved at a level above the contracting officer. Such determination and findings shall be prepared using the following format:

Department of Energy

Determination and Findings

Authority To Use Cost-Reimbursement Type Contract

I hereby find that:

(1) The Department of Energy proposes to contract with (name of proposed contractor) for (describe work, service, or product) (identify program or project). The estimated cost is ($——) (if contract is CPFF type, insert, "plus a fixed fee of ($——) which is —— percent of the estimated cost exclusive of fee").

(2) (Set forth facts and circumstances that show why it is impracticable to secure property or services of the kind or quantity required without the use of the proposed type of contract or why the proposed method of contracting is likely to be less costly than other methods.)

I hereby determine that:

On the basis of the above findings it is impracticable to secure the property or services of the kind or quality required without the use of a (insert contract type————) type of contract, or the (insert contract type ————) method of contracting is likely to be less costly than any other method.

Date ————————————

(Signature) ————————————

916.303 Cost-sharing contracts.

(b) DOE cost participation policies and application are at Subpart 917.70, Cost Participation.

916.306 Cost-plus-fixed-fee contracts.

(c)(2) The head of the Contracting Activity, or designee, for contracts estimated to be within their delegated authority, may approve (sign) the determination and findings establishing the basis for application of the statutory price or fee limitations.

916.307 Contract clauses.

(j) The contracting officer shall insert the clause at FAR 52.216-15, Predetermined Indirect Cost Rates, modified as specified in 952.216-15 in solicitations and contracts when a cost-reimbursement research and development contract with a State or local government is contemplated and predetermined indirect cost rates are to be used.

Subpart 916.4—Incentive Contracts

916.404-2 Cost-plus-award-fee contracts.

(d) *Fee Determination Plans.*—Award fee arrangements limited to technical performance considerations are prohibited because they may increase cost disproportionately to any benefits gained. Instead, the award fee arrangement shall include both technical performance (including scheduling as appropriate) and business management considerations tailored to the needs of the particular situation. In addition, in a situation where cost estimating reliability and other factors are such that the negotiation of a separate predetermined incentive sharing arrangement applicable to cost performance is detemined both feasible and advantageous, cost incentives may be added. The resulting contract would then be identified as a cost-plus-incentive-fee/award-fee combination type. The goals and evaluation criteria should be results-oriented. The award fee should be concentrated on the end product of the contract, that is, output, be it hardware, research and development, demonstration or services, together with business management considerations. However, input criteria such as equal employment opportunity, small business programs, functional management areas, such as safety, security, etc., should not be disregarded and may be appropriate criteria upon which to base some part of the award fee. Specific goals or objectives shall be established in relation to each performance evaluation criterion against which contractor performance is measured.

916.405 Contract clauses.

(e) Award fee contracts should include in the contract schedule the ARTICLES shown below. The Articles may be modified to meet individual situations and any ARTICLE or specified requirement therein should be deleted when it is not applicable to a given contract. If substantial changes are believed appropriate, consultation with the Director, Office of Policy, Headquarters, is advisable.

ARTICLE (Insert Article Number)—ESTIMATED COST, BASE FEE, AND AWARD FEE

The estimated cost of this contract is $ (Insert Amount). A base fee of $ (Insert Amount) is payable in accordance with the ARTICLE entitled "Payment of Base and Award Fee." In addition, a maximum Award Fee of $ (Insert Amount) is available for payment in accordance with the ARTICLE entitled "Payment of Base and Award Fee."

ARTICLE (Insert Article Number)—PAYMENT OF BASE AND AWARD FEE

Base Fee. The government will make payment of the base fee in (Insert Number) increments. The amount payable shall be based on the progress as determined by the Contracting Officer and shall be subject to any withholdings as may be provided for elsewhere in this contract.

Award Fee. The government will promptly make payment of any Award Fee upon the submission, by the contractor to the Contracting Officer or his authorized representative, of a public voucher or invoice in the amount of the total fee earned for the period evaluated. Payment shall be made without the need for a contract modification.

ARTICLE (Insert Article Number)—DETERMINATION OF AWARD FEE EARNED

A. The government shall at the conclusion of each specified evaluation period(s) evaluate the contractor's performance for a determination of award fee earned. The contractor agrees that the determination as to the amount of award fee earned will be made by the government Fee Determination Official (FDO) and such determination concerning the amount of award fee earned is binding on both parties and shall not be subject to appeal under the "Disputes" clause or to any other appeal clause.

B. It is agreed that the evaluation of contractor performance shall be in accordance with the Performance Evaluation Plan referenced in the ARTICLE entitled "Performance Evaluation Plan" and that the contractor shall be promptly advised in writing of the determination, and the reasons why it was or was not earned. It is further agreed that the contractor may submit a self-evaluation of performance for each period under consideration. While it is recognized that the basis for determination of the fee shall be the evaluation by the government, any self-evaluation which is received within (Insert Number) days after the end of the period being evaluated, may be given such consideration, if any, as the FDO shall find appropriate.

C. The FDO may, in his sole discretion, specify in any fee determination that fee not earned during the period evaluated may be

accumulated and be available for allocation and/or "Distribution of Award Fee" shall be adjusted to reflect such allocations.

ARTICLE (Insert Article Number)—PERFORMANCE EVALUATION PLAN

A. A contractor Performance Evaluation Plan upon which the determination of award fee shall be based, including the criteria to be considered under each area evaluated and the percentage of award fee, if any, available for each area, will be unilaterally established by the government. A copy of the plan shall be provided to the contractor (Insert Number) calendar days prior to the start of the first evaluation period.

B. The Performance Evaluation Plan shall set forth the criteria upon which the contractor will be evaluated for performance relating to any (1) Technical including Schedule requirements if appropriate, (2) Management, and (3) Cost Functions selected for evaluation.

C. The Performance Evaluation Plan may, consistent with the contract, be revised unilaterally by the government at any time during the period of performance. Notification of such changes shall be provided to the contractor (Insert Number) calendar days prior to the start of the evaluation period to which the change will apply.

ARTICLE (Insert Article Number)—DISTRIBUTION OF AWARD FEE

A. The total amount of award fee available under this contract is assigned to the following evaluation periods in the following amounts:

Evaluation Period ——————————
Available Award Fee ——————————

B. In the event of contract termination, either in whole or in part, the amount of award fee available shall represent a pro-rata distribution associated with evaluation period activities or events as determined by the Fee Determination Official.

The contract clauses required for cost reimbursement contracts should be modified for use under award fee contracts as cited below:

(i) The words "base fee and award fee" should be substituted for the term "fixed-fee" where it appears in the clause at FAR 52.243–2, Changes.

(ii) The words "base fee" should be substituted for the word "fee" where it appears in the clauses at FAR 52.232–20, Limitation of Costs, and FAR 52.232–22, Limitation of Funds.

(iii) The words "base fee, if any, and such additional fee as may be awarded as provided for in the schedule" should be substituted for the term "fee" wherever it appears in the clause at FAR 52.216–7, Allowable Cost and Payment.

Subpart 916.6—Time-And-Materials, Labor-Hour, and Letter Contracts

916.603 Letter contracts.

916.603–2 Application.

(c) In accordance with FAR 16.603–2(c), a letter contract shall provide for definitization of the contract not more than 180 days after the date of award or after completion of 40 percent of the work to be performed, whichever occurs first, unless approved in advance by the Procurement Executive.

(d) In accordance with FAR 16.603–2(d), the amount of funds obligated under a letter contract shall not exceed 50 percent of the estimated cost of the definitive contract unless approved in advance by the Procurement Executive.

(f) Letter contract awards should be reported in the Procurement and Assistance Data System as soon after award as possible. Should it be necessary to modify a letter contract prior to its definitization, such actions shall be handled and reported as formal modifications as they occur. The actual definitization of the letter contract in turn, shall be accomplished by formal modification and be reported as such.

PART 917—SPECIAL CONTRACTING METHODS

Subpart 917.5—Interagency Acquisition Under the Economy Act

Sec.
917.502 General.
917.504 Ordering procedures.
917.505–70 Methods of financing employed by DOE.
917.505–71 Cost-reimbursement standards.

Subpart 917.6—Management and Operating Contracts

917.600 Scope of subpart.
917.604 Identifying management and operating contracts.
917.605 Award, renewal, and extension.

Subpart 917.70—Cost Participation

917.7000 Scope of subpart.
917.7001 Policy.
917.7002 Application.
917.7003 Amount of cost participation.
917.7004 Disposition of property and equipment furnished or acquired.
917.7005 Records.
917.7006 Payments under contracts with third party cost contributions.
917.7007 In-kind contributions.

Subpart 917.71—Special Research Contracts With Educational Institutions

917.7100 Scope of subpart.
917.7101 Definitions.
917.7102 General.
917.7103 Research program objectives.
917.7104 Other objectives.
917.7105 Unsolicited research proposals.
917.7106 Selection, preparation, and award.
917.7106–1 General.
917.7106–2 Responsibilities.
917.7106–3 Review of research proposals.
917.7106–4 Compensation for personal services of professional staff.
917.7106–5 Notice of selection or rejection.
917.7106–6 Selection of field office.
917.7106–7 Information to be furnished to field office.
917.7106–8 Changes in scope and level.
917.7106–9 Notification of contract execution.
917.7107 Contract content.
917.7107–1 General.
917.7107–2 Financial requirements.
917.7108 Personal property.
917.7108–1 Transfer of title to equipment to nonprofit educational or research institutions.
917.7108–2 Acquisition of excess Government personal property.
917.7108–3 Management of Government-owned equipment.
917.7108–4 Reports.
917.7109 Reporting requirements.
917.7109–1 Purpose of reports.
917.7109–2 Notice of Energy R&D Project.
917.7109–3 Progress reports.
917.7109–4 Technical reports.
917.7109–5 Special reports.
917.7109–6 Final report.
917.7109–7 Summary and distribution of reports.
917.7110 Dissemination of results.
917.7110–1 Prompt dissemination.
917.7110–2 Publication.
917.7111 Extension of contracts.
917.7111–1 Renewal proposals.
917.7111–2 Evaluation of requests for renewals.
917.7111–3 Authorization to renew.
917.7112 Administration.
917.7112–1 Responsibilities of program offices.
917.7112–2 Responsibilities of field offices.
917.7112–3 Payments under special research contracts.
917.7112–4 Approval of deviations in performance and other specified actions.
917.7112–5 Auditing.
917.7112–6 Security.
917.7113 Format for Special Research Contracts (SRC) with educational institutions or other nonprofit institutions.

Subpart 917.72—Program Opportunity Notices for Commercial Demonstrations

917.7200 Scope of subpart.
917.7201 Policy.
917.7201–1 General.
917.7201–2 Determination to use and approval of content.
917.7201–3 Federal support criteria.
917.7201–4 Information to be included in program opportunity notices.
917.7201–5 Information to be provided in proposals offered pursuant to program opportunity notices.
917.7202–1 Forms of assistance and participation.
917.7202–2 Cost participation.
917.7203 Method and criteria for evaluation and selection.
917.7204 Award or support.
917.7205 Unsolicited proposals for commercial demonstrations.
917.7206 Optional two-step method.

Subpart 917.73—Program Research and Development Announcements

917.7300 Scope of subpart.
917.7301 Policy and prerequisites.
917.7301–1 General.
917.7301–2 Determination to use and approval of content.

917.7301-3 Information to be included.
917.7301-4 Information to be provided in proposals.
917.7302 Cost participation.
917.7303 Method and criteria for evaluation and selection.
917.7304 Award or support.

Subpart 917.74—Acquisition, Use, and Disposal of Real Estate

917.7400 Scope of subpart.
917.7401 General.
917.7402 Policy.
917.7403 Application.
917.7404 Competition.

Subpart 917.75—Multiple Awards—Phased Acquisitions

917.7500 Scope of subpart.
917.7501 RFP provisions.
917.7502 Evaluation.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95-91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 917.5—Interagency Acquisition Under the Economy Act

917.502 General.

The Head of the Contracting Activity shall make the determination prescribed in FAR 17.502.

917.504 Ordering procedures.

(b) In addition to the items noted at FAR 17.504(b), agreements shall include:

(1) The parties to the interagency agreement.

(2) Agreement number, or modification number, if any as appropriate.

(3) Period covered by interagency agreement and/or duration of the work.

(4) Cost estimate of the project and the amount of funds to be provided by the DOE including (i) the total estimated cost of the work for the period of time specified in the agreement; (ii) the capital equipment, if any, approved for acquisition under the agreement; and (iii) limitations, if any, on the reimbursement of costs by DOE which are not set forth in the agreement. If DOE participates with another agency or agencies in sponsoring a work project, the amount of contribution to be made by each agency and the basis for distributing the costs incurred shall be specified.

(5) Method of financing to be used.

(6) Standard clauses, and reporting requirements as appropriate.

917.505-70 Methods of financing employed by DOE.

(a) Except as specified in (b) and (c) below DOE prefers to finance work done by servicing agencies by reimbursement on the basis of current billings for progress payments.

(b) A consolidated working fund advance shall be used to finance small or medium construction projects buy or the acquisition of goods or services of lesser value from the servicing agency within the same fiscal year in which the advance is made, only after a determination has been made that the reimbursement basis is not to be used.

(c) An appropriation transfer shall be used to finance larger construction projects buy or the acquisition of more costly goods or services from the servicing agency where the work will extend beyond the fiscal year in which the transfer is made, only after a determination has been made that the reimbursement basis is not to be used.

917.505-71 Cost-reimbursement standards.

(a) Incurred cost necessary or incident to the performance of the work of servicing agencies are to be considered allowable for cost-reimbursement purposes. Such costs include direct and, where applicable, indirect costs:

(b) Direct costs are the costs that can be directly identified with work under the agreement. Examples of such costs are salaries and wages, technical services, materials, travel and transportation, communications, and any facilities and equipment expressly approved for purchase under the interagency agreement.

(c) Indirect costs shall be limited to the properly allocable portion of costs that are not charged directly to the work but which can be shown as mutually benefiting the work covered by the interagency agreement as well as other work of the servicing agency. Justification for any such charges shall be required, and the basis of allocation must be reasonable. Where agreements are entered into under authority of section 601 of the Economy Act of 1932, the servicing agency's charge for any indirect costs may include appropriately allocable charges for "general administration" or "central agency overhead," as provided in Comptroller General Decision, 56 Comp. Gen. 275 (1977) as modified by 57 Comp. Gen. 674 (1978). However, general administrative or central agency overhead is chargeable only to the extent specified in the interagency agreement.

Subpart 917.6—Management and Operating Contracts

917.600 Scope of subpart.

This subpart implements FAR Subpart 17.6, Management and Operating Contracts. DOE implementing procedures and requirements to be followed in the selection, award, and administration of Management and Operating Contracts are at Part 970.

917.604 Identifying management and operating contracts.

(a) Single purpose contracts for the operation of process development units, pilot plants, and demonstration plants where the purpose is to demonstrate the viability of processes toward the goal of commercialization are not considered to be included, unless designated operating contracts in accordance with FAR 17.602.

917.605 Award, renewal, and extension.

(b) The decision to extend or compete management and operating contracts requires advance Headquarters' approval. The Head of the Contracting Activity will submit a memorandum that recommends either extending or not extending a management and operating contract. This memorandum of recommended action, together with attachments supporting it, will be submitted at least 18 months prior to expiration of the contract. The attachments shall include the following information:

(1) A full and complete justification of the recommendation that is made; i.e., either to obtain competition or to extend the contract without obtaining competition. This justification must address the policy stated in FAR 17.605.

(2) A statement of the present contractor's overall performance since award of the contract, or if previously extended, since Headquarters' last authorized extension of the contract. This should be supported by a detailed summary of the most recent appraisal of the contractor's performance.

(i) The technical appraisal shall include data which indicates the contractor's success or failure in meeting established program goals and objectives during the appraisal period. It is recognized that in some cases, the contracting office will not have the technical staffing necessary to perform an appraisal of the scientific and technical work under the contracts they are administering, as in the case with the contracts for the operation of DOE's national laboratories. When this is the situation, the contracting office shall obtain the necessary technical appraisal information from the appropriate Headquarters' program division(s) for incorporation into the overall management appraisal.

(ii) The cost appraisal shall include data that indicates the contractor's success or failure in controlling both direct and indirect costs.

(iii) Where the contract is a cost-plus-award-fee (CPAF) or similar arrangement, include a discussion of award fee experience since the date that the contract was last extended, showing the base fee, award fee pool, award fee appraisals, and award fee earned.

(iv) A separate appraisal shall be made of the contractor's performance in assuring consideration of environmental, safety, health, energy conservation and security in operating the facility and development of products.

(3) The justification for use of the contract type contemplated, including discussion of consideration given to use of the CPAF type contract.

(4) Summary description of scope of work and brief listing of some of the important projects which have been performed under this contract. A list of any important projects planned for assignment in the future should be included as well as the current institutional planning documents if applicable or other documents that indicate the area of work to be performed during the contract period.

(5) The actual cost expenditures and fee or management allowance over the past contract period and expected costs in the future.

(6) While a copy of the proposed contract document should not be submitted with the recommendation, Headquarters should be advised of the following:

(i) Any special or unique features (with brief supporting rationale) in the existing contract expected to be continued in either the extension of the existing contract or in the replacement contract. This shall include any provisions which deviate from standard clauses.

(ii) An outline of the principal issues to be negotiated if the contract is extended, with arguments pro and con, and with a recommended position. This should include the identification of any anticipated problem areas for which Headquarters guidance is needed and should also include a justification for any clauses which deviate from standard clauses and continued use of deviations granted in the past.

(d) If Headquarters makes the decision to extend the existing contract without obtaining competition, the contracting officer will be authorized by the Head of the Agency to negotiate an extension to the contract. The contracting officer shall submit the negotiated contract to Headquarters for the approval of the Procurement Executive prior to execution. The proposed contract document shall be accompanied by the following:

(1) A complete justification as required above;

(2) A summary of the major clauses of the proposed contract with particular attention to indemnity, patents, and conduct of work (including clauses concerning control over work and termination). Any deviations from current FAR and DEAR policies or standard contract clauses should be identified with the reasons therefore;

(3) A listing of any significant changes from the existing contract.

Subpart 917.70—Cost Participation

917.7000 Scope of subpart.

(a) This subpart sets forth the DOE policy on cost participation by organizations performing research, development, and demonstration projects under DOE prime contracts. This subpart does not cover efforts and projects performed for DOE by other Federal agencies.

(b) Cost participation is a generic term denoting any situation where the Government does not fully reimburse the performer for all allowable costs necessary to accomplish the project or effort under the contract. The term encompasses cost sharing, cost matching, cost limitation (direct or indirect), participation in kind, and similar concepts.

917.7001 Policy.

(a) When DOE supports performer research, development, and demonstration efforts, where the principal purpose is ultimate commercialization and utilization of the technologies by the private sector, and when there are reasonable expectations that the performer will receive present or future economic benefits beyond the instant contract as a result of performance of the effort, it is DOE policy to obtain cost participation. Full funding may be provided for early phases of development programs when the technological problems are still great.

(b) In making the determination to obtain cost participation, and evaluating present and future economic benefits to the performer, DOE will consider the technical feasibility, projected economic viability, societal and political acceptability of commercial application, as well as possible effects of other DOE-supported projects in competing technologies.

(c) The propriety, manner, and amount of cost participation must be decided case-by-case.

(d) Cost participation is required for demonstration projects unless exempted by the Under Secretary. Demonstration projects, pursuant to this subpart, include demonstrations by technological advances and field demonstrations of new methods and procedures, and demonstrations of prototype commercial applications for the exploration, development, production, transportation, conversion, and utilization of energy resources.

917.7002 Application.

(a) The DOE cost participation policy set forth in 917.7001 applies to all prime contracts to the extent stated therein.

(b) Cost participation is not contemplated in contracts for the operation of Government-owned or leased, contractor-operated facilities or continuing cost-reimbursement type contracts for mission-oriented, large-scale research programs performed, using equipment or facilities which are either partially or wholly Government-owned.

(c) Potential benefits to a performer is less likely where basic research is involved and therefore cost participation, if any, is expected to be less than in circumstances where a product is being developed. As projects or proposed efforts reach stages approaching commercial viability, cost participation should be based on the overall project risk.

(d) Except for demonstration projects, the requirement for a cost participation contract in accordance with 917.7001 may be waived by the cognizant Program Assistant Secretary where it is determined that payment of the full allowable cost of the contractual effort is in the best interests of the Government.

(e) The performer's cost participation may be provided by other companies or associations with which it has contractual arrangements to perform the project. The fact that a project is jointly funded, e.g., where DOE and an industry association fund a third party performer, does not preclude cost participation by the performer.

917.7003 Amount of cost participation.

(a) Cost participation may be in various forms or combinations, which includes but is not limited to cash outlays, real property, or interest therein, needed for the project, personal property or services, cost matching, foregone fee, or other in-kind participation. Cost participation may include the value of contributions of other non-Federal sources, provided the contributions were not previously obtained free of charge from Federal sources. The value of any noncash contribution shall be established by

DOE after consultation with the performer. Cost participation may be accomplished by a contribution to either direct or indirect costs provided such costs are otherwise allowable in accordance with the cost principles of the contract. Allowable costs which are absorbed by the performer as its share of cost participation may not be charged directly or indirectly to the Federal Government under other contracts, agreements, or grants.

(b) Organizations should contribute a reasonable amount of the total project cost covered under the contract. The ratio of cost participation should correlate to the apparent advantages available to performers and the proximity of implementing commercialization. In setting the levels of cost participation by the performer, the contracting officer, in consultation with the program office, should consider such factors as:

(1) The availability of the technology to the performer's competitors;

(2) The risks involved in achieving commercial success;

(3) The length of time before the project is likely to be commmercially successful;

(4) Improvements in the performer's future commercial competitive position;

(5) Disposition of property at project's end;

(6) Whether the potential benefits will be lessened if the performer lacks production or other capabilities with which to capitalize the results of the project. However, if the results of the project are transferable to commercial organizations with production capabilities, and the performing organization would obtain patent of other property rights which could be sold or licensed, this should be considered; and

(7) Whether the performing organization lacks adequate non-Federal sources of funds from which to make cost participation.

(c) The manner of cost participation and how it is to be accomplished shall be set forth in the contract.

(d) The handling of any return from sale of products from the project shall be set forth in the contract.

(e) The solicitation document shall state whether any cost participation is required and may set forth a target level of cost participation. Though technical considerations are normally most important the degree of cost participation will be considered when cost to the Government is to be a major factor in a selection decision.

(f) Unsolicited proposals will be considered on a case-by-case basis by the program office, in consultation with contracting officer, as to the appropriateness of cost participation. If cost participation is considered to be appropriate, guidance for determining an appropriate level may be included in the procurement authorization package. The extent and type of cost participation is subject to negotiation, however.

(g) The extent to which a performing organization contributes to the cost of a project will be taken into consideration in the allocation of patent rights under DOE's waiver policy.

(h) Fee or profit will not be paid the performer under a cost participation contract. Foregone fee or profit will be considered in establishing the degree of cost participation.

(i) Where cost participation is appropriate, fee or profit will not be paid to any member of the proposing team having a substantial and direct interest in the project. Competitive subcontracts placed with the prior written consent of the contracting officer and subcontracts for routine supplies and services are not covered by this prohibition.

917.7004 Disposition of property and equipment furnished or acquired.

Disposition instructions for any property and equipment furnished or acquired using Federal funds during performance shall be set forth in the contract.

917.7005 Records.

Contracts which provide for cost participation shall require the contractor to maintain records adequate to reflect the nature and extent of their cost contribution as well as those costs charged to DOE. Such records shall be subject to audit by DOE.

917.7006 Payments under contract with third party cost contributions.

Arrangements between DOE and non-Government organizations for jointly sharing the cost of projects performed by third party contractors shall provide that each party to the cost sharing agreement shall pay its share of program costs directly to the performing contractor. Any alternative arrangement must be approved in advance by the Controller or designee.

917.7007 In-kind contributions.

(a) In-kind contributions represent noncash contributions provided by the performing contractor or a non-Federal third party who is participating with DOE in a co-sponsored project or contract. In-kind contributions may be in the form of personal property (equipment and supplies), real property (land and buildings) or services which are directly beneficial, specifically identifiable and necessary to performance of the project or program.

(b) In-kind contributions proposed to the DOE as part of a performer's cost participation must meet all of the following criteria before acceptance:

(1) Be verifiable from the performer's books and records, if performer donated;

(2) Not be included as contributions for any other Federal program;

(3) Be necessary to effective and efficient accomplishment of project objectives;

(4) Provide for types of charges that would otherwise be allowable under applicable Federal cost principles appropriate to the contractor's organization; and

(5) Not be paid for by the Federal Government under any contract, agreement or grant, unless specifically authorized by legislation.

(c) In-kind contributions accepted from a performer will be valued as set forth below provided the established values do not otherwise exceed fair market values.

(1) Where the Government receives title to donated land, buildings, equipment or supplies and the property is not fully consumed during performance of the co-sponsored project, the property's in-kind value should be established based on the performer's booked cost (i.e., acquisition cost less depreciation, if any) at the time of donation. In the event the booked costs reflect totally unrealistic values when compared to current market conditions, another appropriate value may be established if supported by an independent appraisal of the fair market value of the donated property or property in similar condition and circumstance.

(2) The value of any services or the use of personal or real property donated by a performer should be established, when necessary to do so, in accordance with generally accepted accounting policies and the appropriate Federal cost principles applicable to the performer's organization.

(d) Values established for in-kind contributions accepted from a non-Federal third party should be reasonable and shall not exceed the fair market value of the item at the time of donation. Specific requirements for selected in-kind items involving third party donors are as follows:

(1) *Donated Employee Services.* Employee services donated by a non-Federal third party shall be valued at the employee's regular rate of pay (exclusive of fringe benefits and indirect costs) provided the donated services require use of the same skills for which

the employee is normally paid. Otherwise, the rate of pay, for valuation purposes, shall be consistent with the rates paid for similar work in the labor market in which the performer competes for such skills.

(2) *Volunteer Services.* Rates used to value volunteered personal services of professional, clerical, or other individuals should be consistent with those regular rates paid by the performer for similar work and be established in accordance with the procedures specified in subparagraph (1) above.

(3) *Property.* Values for personal or real property, or the use thereof, donated by a non-Federal third party shall be established, dependent upon the donor's intended disposition of the property upon project completion, as follows:

(i) When title is donated at no cost to the Government or the property will be fully consumed during project performance, a reasonable value not in excess of the fair market value of the donated property, or comparable property in similar condition, shall be established provided the fair market value of land or buildings is established by an independent appraisal.

(ii) When title is retained by the donor or acquired by the performer, reasonable usage values not in excess of the fair rental value of the donated property or comparable property shall be established provided the fair rental value of donated space is established by an independent appraisal.

Subpart 917.71—Special Research Contracts With Educational Institutions

917.7100 Scope of subpart.

This subpart sets forth policies and procedures applicable to the negotiation and administration of Headquarters-designated special research contracts for basic research with educational or other nonprofit institutions. These policies and procedures should also be followed for Headquarters-designated contracts for applied research with educational institutions and for educational and training activities with educational or other nonprofit institutions. The policy of reimbursing only DOE's share of actual costs up to a ceiling should be reflected in all contracts with educational institutions. The procedures in this subpart regarding acceptance of unsolicited proposals from educational institutions and use of the special research contracts may be used only when the annual DOE support does not exceed $1,000,000. If the annual DOE support exceeds $1,000,000, or a determination is made under the provisions of Pub. L. 95–224 that a grant or cooperative agreement is to be used as the instrument for providing support regardless of the dollar amount, then a special research contract may not be used. If the annual DOE support exceeds $1,000,000, and a contract is determined to be the instrument to provide such support, an appropriate type contract will be used in accordance with FAR 16, with clauses as prescribed in 952 and FAR 52 and the coverage of 917.7108.

917.7101 Definitions.

"Headquarters-designated contract" means a special research contract which results from an authorization to a field office from a Headquarters office to enter into or continue such a contract on the basis of an approved research proposal.

"Contractor" means the educational or nonprofit research organization which enters into a contract with DOE for the performance of specified research.

"Research proposal" means a request by or an unsolicited proposal as defined in FAR 15.501 from an institution for support of a research project, together with a detailed description of the project and its relationship to DOE's program, and detailed information as to background and experience of principal investigators, facilities, and environment of the institution, and cost and cost-sharing arrangements, if any.

917.7102 General.

The DOE, by statute, is permitted to participate in research programs that are related to atomic and other forms of energy.

917.7103 Research program objectives.

(a) Under sections 31 and 31a of the Atomic Energy Act of 1954, as amended, DOE is directed to exercise its powers in such manner as to ensure the continued conduct of research and training activities and to assist in the acquisition of an ever-expanding fund of theoretical and practical knowledge in the following fields:

(1) Nuclear processes;

(2) The theory and production of atomic energy, including processes, material, and devices related to such production;

(3) Utilization of special nuclear material and radioactive material for medical, biological, agricultural, health, or military purposes;

(4) Utilization of special nuclear materials, radioactive material, and processes entailed in the utilization or production of atomic energy or such material for all other purposes, including industrial and commercial uses, the generation of usable energy and the demonstration of advances in the commercial or industrial application of atomic energy;

(5) The protection of health and the promotion of safety during research and production activities; and

(6) the preservation and enhancement of a viable environment by devleoping more efficient methods to meet the nation's energy needs.

917.7104 Other objectives.

(a) Headquarters-designated special research contracts are entered into by negotiation under the authority of section 31c of the Atomic Energy Act of 1954 and section 302(c)(5) of the Federal Property and Administrative Services Act of 1949. In planning, negotiating, and administering such contracts, the objectives are to:

(1) Assure a continuing flow of new knowledge in fields related to the responsibilities of DOE;

(2) Respect the traditions of the contracting institution and encourage the quest for new knowledge without restrictions or scientific initiative, to the extent compatible with the laws and the protection of the public interest;

(3) Provide reasonable levels of support which will increase the national capability in energy fields and enable the contracting institution to strengthen its research programs in areas of interest to DOE; and

(4) Maintain effective contact with the scientific community so that:

(i) Scientists and students will be encouraged to expand their interests in fields of importance to DOE;

(ii) The scientific strength of the country can be brought to bear more effectively on DOE problems;

(iii) The DOE will be continuously aware of developments of value to its activities in the academic communities; and

(iv) An adequate supply of suitably trained scientists will be available for employment to meet energy program needs.

(b) The contractor is responsible for conducting the research and is expected to carry out the project or projects in a manner consistent with the agreed-upon objectives and requirements. These include the obligation to comply with applicable laws and regulations. The contractor is generally expected to follow its normal business practices and to use its existing accounting system.

917.7105 Unsolicited research proposals.

Unsolicited proposals for DOE assistance may be initiated by scientists

interested in doing research. Prior to submitting proposals, the interested scientists, at his or her initiative may discuss the project informally with DOE.

Following such discussions, the proposal should be submitted in accordance with FAR Subpart 15.5 and 915.506 of this Chapter. If the DOE desires to solicit proposals, the procedures in 917.73 or other existing solicitation procedures will be used.

917.7106 Selection, preparation, and award.

917.7106-1 General.

In order to maintain a comprehensive and well-integrated research program, evaluation of research proposals and selection of educational institutions to conduct scientific research is centralized in Headquarters program office. However, field offices may be assigned responsibility for handling the final arrangements and nontechnical administration of such contracts.

917.7106-2 Responsibilities.

(a) The program office interested in particular research is responsible for evaluating the technical aspects of the proposals. The program office must determine that the proposal has sufficient technical merits and program value in comparison to other available proposals to justify providing support. This includes judgments as to the merit of the proposed research objectives, the probability of achieving the objective(s), the capabilities of the researchers, and how the proposals will specifically promote the objectives in 917.7103 and 917.7104. The program office also reviews the proposer's requested cost and other estimates to determine the reasonableness, the propriety, and the advisability of proceeding with the project. Specifically, Senior Program Officials or their designees at Headquarters are responsible for:

(1) Selecting and approving research proposals and determining the amount to be funded;

(2) Documenting the rationale for funding in accordance with (a) above;

(3) assuring that the statement of work is clear and complete;

(4) Providing a copy of the documents prepared in (a)(2) and (3) to the field office;

(5) Reviewing the items in the proposal budget or itemized account of the proposed work, and, if necessary, requesting the assistance of the appropriate field office;

(6) Determining the ownership of property;

(7) Reviewing and following the technical progress of the work;

(8) Providing contractors with the technical guidance and direction as may be required to meet broad program objectives; and

(9) Keeping the field offices fully informed of technical correspondence and discussions with contractors that may have contractual or non-technical administrative implications.

(b) Field offices are responsible for the consummation of contracts with the institution in accordance with directives from the program office, and for administering and making payments under such contracts. Specifically, field offices are responsible for:

(1) Performing any necessary cost or price analysis, obtaining audit service when needed, and negotiation of budget and contract terms;

(2) Finalizing and executing the contract (where necessary, obtaining further instructions from the program office);

(3) Administering the contract in accordance with its terms and conditions and making payments thereunder; and

(4) Providing technical and administrative assistance requested by program officials.

917.7106-3 Review of research proposals.

(a) If, in the judgment of the program office, an appraisal from representatives of the scientific community is required, reviewers may be selected on the basis of their familiarity with either the field of research or the competence of the investigator. See also 924.70.

(b) Occasionally, the program office may find it necessary to obtain additional information from the research institution or to visit the site. In some cases, the comments, assistance, or participation of staff members of the appropriate field office will be requested.

(c) At the time it reviews a research proposal, the sponsoring program office shall review the prospective contractor's budget or itemized account of the proposed work and activities and the materials, equipment, and facilities involved, for the purpose of reaching mutual understanding of the estimated cost of the research and the other major aspects of the contemplated contract. Questions about the cost elements that required further investigation may be referred to the appropriate field office when the contract is authorized.

(d) When reviews are conducted by representatives who are not Government employees, the policies for avoidance of organizational conflicts of interest in 909.5 shall be followed.

917.7106-4 Compensation for personal services of professional staff.

Compensation for personal services of professional staff must be in accordance with Office of Management and Budget Circular A-21, revised. The certification required by Appendix C of 917.7113 fulfills the certification requirement of section K of OMB Circular A-21 for the special research contract.

917.7106-5 Notice of selection or rejection.

The program office shall notify the proposer of the decision to fund or reject the proposal. In the event of a decision to fund, this notification shall advise: (a) that the proposal has been selected for funding subject to completion of a satisfactory contract; (b) which field office will negotiate and execute the contract; and (c) that DOE assumes no obligation until a contract has been executed. A copy of the notice of acceptance or rejection shall be sent to the field office concerned. The notice shall indicate the basis for rejection and shall constitute DOE's record of action for the files. If the proposal is accepted, a justification shall be prepared in accordance with 917.7106-2.

917.7106-6 Selection of field office.

(a) When the program office has determined that a proposal shall be funded, a field office shall be requested to make the final arrangements with the institution concerned. Usually the field office geographically nearest to the research institution will be selected, but occasionally other factors such as existing contractual relationships and location of the research project will make the selection of some other field office desirable.

(b) Traineeship agreements under the nuclear science and engineering traineeship program are exempt from the policy in (a) and shall continue to be assigned to the Oak Ridge Operations Office. Research contracts with foreign educational institutions shall be assigned to the Chicago Operations Office.

(c) Any transfers of assignments between field offices will be accomplished when the particular contract is next renewed or otherwise modified.

917.7106-7 Information to be furnished to field office.

The sponsoring program office shall provide the Contracting Activity with an authorizing directive early enough (generally 60 days) to permit timely completion of the contract award before the work is scheduled to start. The following shall be furnished:

(a) A copy of the detailed proposal and any modifications;

(b) Copies of correspondence with the research institution that are pertinent to the completion of the negotiation or that have some specific significance as to the preliminary review of arrangements made with the institution; and

(c) An authorizing directive which:

(1) Authorizes the execution of a special research of contract for a specified term, with DOE support limited to a specified amount or a specified percentage of costs up to a specified support ceiling;

(2) Summarizes the background of the proposal and any pertinent discussion not reflected in the papers attached to the memorandum;

(3) Indicates the extent to which the scope of the work proposed has been approved;

(4) Indicates the principal investigator and other necessary details;

(5) Determines the availability of legal authority to transfer title to property and indicates the total estimated cost of the research and other major aspects of the contract, by reference to the proposal or otherwise;

(6) Indicates whether title to property to be acquired under the contract is to be vested in DOE or the contractor;

(7) Indicates whether restricted data or other classified information is likely to be used or developed in the course of the work and such classification and security determination as may be appropriate;

(8) Indicates directions for special reports, if any;

(9) Gives such additional information as may assist the field office in negotiating the contract; and

(10) Designates the appropriate organizational unit and individual in the program office that will have technical cognizance over the work under the contract.

917.7106-8 Changes in scope and level.

After a contract has been authorized by the program office but prior to execution, the field office shall not approve any significant change in technical scope, funding, specified result, performance, principal investigator, or other major aspects of the work without prior approval of the program office.

917.7106-9 Notification of contract execution.

Promptly after execution of a contract, the program office shall be notified of such action.

917.7107 Contract content.

917.7107-1 General.

A standard outline (format) for a special research contract for research performed in facilities owned and controlled by the contractor (as distinguished from Government-owned or Government-controlled facilities), is set forth in 917.7113. This document is intended to provide a vehicle by which research tasks can be accomplished with a minimum of administrative effort. It is, therefore, important that such contracts be written so as to assure the complete understanding of the parties as to the job to be performed and the financial and administrative details connected therewith. Of special consideration is the nature of research contracting as contrasted to the acquisition of supplies and activities of a production nature. Wide latitude in the conduct of research by the institutions is generally desirable and the standard contract forms are designed to permit such latitude in the establishment of the rights and obligations of the parties.

917.7107-2 Financial requirements.

(a) The special research contract outlined in 917.7113, is generally used for basic research with educational institutions when the annual DOE support under the contract does not exceed $1,000,000. It provides that DOE's monetary obligations will be a specified amount, which is referred to as the support ceiling, or a lower adjusted amount (referred to as the cumulative support cost) if actual costs chargeable to DOE during the total period of the contract are less than expected. The ceiling on DOE's monetary support shall be determined and established as a support ceiling at the outset of the initial contract period.

(1) The total contract period of performance should be established based upon the estimated period of performance necessary to accomplish the research effort. If available funding is less than that needed to fully fund the effort, the available funding will be provided as the cumulative Government cost as defined at Article A–III(b) of 917.7113 with the remainder of the funding subject to the availability of funds.

(2) In such circumstances the standard Special Research Contract format provided at 917.7113 shall be revised at Article II, The Period for Performance, to indicate the period of time for which the available funding is estimated to suffice and at Article A–III to show the additional funding to be provided subject to the availability of funds.

(b) If the parties agree to extend the contract for an additional period or periods of performance, the ceiling on the DOE's funding (Government ceiling) shall be increased to reflect any increased support by reason of the extended period or periods. The costs chargeable to the DOE (Government cost) will be reported for each pertinent period of the contract specified in Appendix A (generally an annual period) in accordance with paragraphs (b), (c), and (d) of this section, and the Government cost determined for each such period will be accumulated for all periods of performance, as will the Government ceiling.

(1) The monetary obligation to the contractor will not exceed the cumulative Government cost or the accumulated Government ceiling, whichever is less.

(2) Upon termination, or expiration of the total period of performance, the contractor must refund to DOE, or make such other disposition as the contracting officer may direct, any funds advanced in excess of the cumulative Government cost incurred under the contract. Payment shall be made in consideration of the contractor's performance of research activities described in the contract and in accordance with the provisions of the contract.

(3) The contractor shall have the right to discontinue performance of research under the contract, upon written notice to the contracting officer, at any time when or after the total costs chargeable to DOE equal or exceed the cumulative Government cost or the Government ceiling whichever is less.

(4) Certain deviations in performance and other actions require the contracting officer's approval as stated in 917.7113. Among other approval requirements, the contractor must obtain the contracting officer's approval to incur costs for items set forth in Article A–II(a), during the pertinent period stated in Appendix A, in excess of 110 percent of the total estimated cost specified in Article A–III for the specific period. In those cases in which there is to be proportionate sharing of costs, the percent of the cost to be borne by DOE will be set forth in Article A–III of the agreement (see paragraph (d) of this section).

(c) The contractor shall be required to furnish a certified statement (within three months after the expiration of the pertinent contract period set forth in 917.7113, Appendix A and at the termination of or expiration of the contract), signed by an authorized official, showing the total cost, Government cost, and contractor's contribution, if any, for the prior

contract period. The format for this report is found in 917.7113, Appendix C.

(d)(1) It is expected that in many cases the contractor will propose to contribute to the cost of the research work. Such contribution shall be set forth in Appendix A of the contract, either as items under (b) or (c) of Article A–II which will be contributed solely by the contractor without charge to DOE, or as a proportionate cost-sharing agreement in Article A–III which will provide that the contractor will charge DOE only a specified percentage of the actual cost incurred from items under (a) of Article A–II.

(2) Proposed contractor contributions should ordinarily be listed under (b)(1) of Article A–II when: (i) The contribution is that of the principal investigator or other senior personnel who are likely to be involved in the research work to the same extent whether their cost is included in or excluded from proportionate cost sharing; (ii) the proposed contribution to the work is being paid for by a third party; e.g., personnel or equipment, the cost of which is being reimbursed under another contract or grant from public or private sources; and (iii) the proposed contribution does not involve any cash expenditure by the contractor.

(3) Only those items, the cost of which is to be charged to DOE or proportionately shared by the parties, should be listed under Article A–II(a). Proportionate sharing of the cost of items under Article A–II(a) should be provided for only when the contractor agrees to pay a specified percentage of the cost of all such items, and when such sharing is expected to be of financial benefit to DOE.

(4) In those cases in which there is to be proportionate cost-sharing, the contractor should generally be encouraged to continue the same sharing ratio througout the life of the contract so as to provide for ease of administration and to avoid difficulties in determining proper charges to DOE. It should be understood that the DOE will pay only the specified percentage of the actual cost of items under Article A–II(a) incurred during the pertinent period specified in Appendix A, up to a maximum of 110 percent of the estimated Government cost set forth in Article A–III for the pertinent period unless otherwise specifically approved by DOE and subject to the Government ceiling set forth in Article III.

(e)(1) If the contractor proposes to contribute the cost of the principal investigator(s) on the project and requests that the contribution be excluded from A–II(b), the contributed time or effort should be shown in A–II(d). The contractor shall not be required to maintain records regarding the amount of effort contributed by the principal investigator, and the contractor shall not be required to certify, in accordance with Appendix C of the contract, the amount of effort contributed by the principal investigator.

(2) The principal investigator may be included in Article A–II(a) for purposes of obtaining reimbursement of costs during the summer months, and excluded from Article A–II(a) for academic year if the contractor proposes to contribute the costs for that period. The contract generally will not require the contractor's commitment that any particular amount of time or effort by the principal investigator(s) or other personnel will be devoted to the work.

(3) In the event a proposed contractor contribution is included in Article A–II(b)(1), the contract should reflect the nature and extent of the contractor's intent to contribute the item, and the contractor shall maintain records adequate to permit DOE to determine the extent of the contribution. The contractor must certify, in accordance with Appendix C of the contract, the extent to which the item or items under Article A–II(b)(1) have been contributed.

(4) Government-owned property to be procured, fabricated, or furnished under Article IV or Article B–IX of the contract and other Government-furnished equipment, supplies, materials, or services should be excluded from Article A–II(a) and listed under Article A–II(b)(2).

(f) When the special research contract outlined at 917.7113 is used for nonprofit organizations other than educational institutions:

(1) Article B–XXIX, Determination of Support Cost, should be revised to provide that the nonprofit cost principles (Subpart 931.7) will be used in determining actual cost, or

(2) Revised at the direction of the cognizant Headquarters office to provide for a lump-sum payment to the contractor in consideration for its performance of particular research at a specified level of effort.

(g) The special research contract outlined in 917.7113 may also be used to fund research at educational institutions in foreign countries; when so used:

(1) The outline of 917.7113 may be revised at the discretion of the cognizant Headquarters or field office, to provide for a lump-sum payment to the foreign institution in consideration of its performance of particular research at a specified level of effort.

(2) Approval requirements shall be limited to those consistent with the nature of the support to the foreign institution.

(3) All such contracts with foreign institutions shall provide that any unused funds available to the foreign institutions at the end of the contract shall be used in a renewal period, returned to the DOE, or otherwise disposed of, in accordance with instructions from the contracting officer.

917.7108 Personal property.

917.7108–1 Transfer of title to equipment to nonprofit educational or research institutions.

(a) In accordance with Pub. L. 95–224, DOE has discretionary authority, where it is deemed to be in furtherance of the objectives of DOE to vest in nonprofit institutions of higher education or nonprofit organizations whose primary purpose is the conduct of scientific research, without further obligation to the Government or on such other terms and conditions as may be appropriate, title to equipment purchased or fabricated with contract funds.

(b) It is deemed to be in the furtherance of the objectives of DOE, pursuant to Pub. L. 95–224, to vest in those educational and nonprofit institutions title to equipment purchased or fabricated with contract funds for research. This will promote the progress of scientific research, reduce the amount of expense and unnecessary labor due to the necessity for maintaining records, transporting, or storing such property which is often unsuitable for any other use. Contracting officers (coordinating with program officials) shall impose such terms or conditions as they determine to be appropriate in individual cases.

(c) The vesting of title to equipment, fabricated or purchased for work to support a SRC shall be as follows:

(1) Contracts with nonprofit institutions of higher education or nonprofit organizations whose primary purpose is the conduct of scientific research, shall provide that title to equipment having an acquisition cost of less than $1,000 and purchased or fabricated with contract funds available for the conduct of basic and applied research rest in the contractor at acquisition, provided prior approval of the purchase is obtained from the contracting officer. This prior approval may be in the form of an approved budget which calls out the equipment to be acquired, either on a line-item basis or for clearly defined classes of items, or by other means, as long as the contracting officer can determine that the proposed acquisition is essential to the performance of the contract. Title to

such equipment shall vest in the contractor upon acquisition or as soon thereafter as feasible.

(2) Contracts with those institutions cited in (1) above shall provide that title to equipment having an acquisition cost of $1,000 or more, and purchased with contract funds available for the conduct of basic and applied research, shall vest in the institution upon acquisition or as soon thereafter as feasible without further obligation to the Government, unless it is determined not to be in furtherance of the objectives of DOE and is provided for in the contract. The contract may reserve the right of the Government to transfer title of equipment costing $1,000 or more per unit to the Government or to a third party named by the Government, at any time prior to final payment under the contract.

(d) When title to equipment is vested in the institution as provided in this subsection, the institution shall not be reimbursed for any depreciation, amortization, or use charges with respect to such equipment under any Government contract, cooperative agreement, grant or any subcontract under a Government contract.

(e) The determination to vest title in the institution under this subsection will be provided by the cognizant program office on the procurement request, or other appropriate document.

(f) In addition to the authority referred to in paragraph (a) of this subsection, the Atomic Energy Act of 1954, as amended, authorized DOE to vest title to items of equipment and other personal property in a contractor when the transfer serves a nuclear programmatic purpose. When applicable programmatic determination to transfer title to the institution will be provided by the cognizant program office and made a part of the official contract file.

917.7108–2 Acquisition of excess Government personal property.

(a) The utilization of certain items of excess Government personal property by educational institutions is encouraged in the interest of conserving funds otherwise designated for similar items of property in existing research contracts or agreements with such institutions. Excess Government personal property includes all types of equipment and materials, used or new, which are owned by the Federal Government and are no longer needed by the holding Federal agency, but have additional useful life.

(b) Consistent with GSA regulations, excess personal property may be furnished to a contractor (with or without transfer of title) upon authorization by DOE, provided a determination is made that acquisition will result in a reduction in the cost to the Government of the contract. This procedure will not normally be used for the acquisition of general purpose equipment (e.g., desks, typewriters, air conditioners).

(c) Contractors shall be advised they may obtain information concerning the availability of certain kinds of equipment or materials by requesting the contracting officer to include them on the GSA mailing list for excess property catalogs. When an item of equipment or material is selected, the contractor should reserve it by notifying the cognizant GSA office and confirming the reservation in writing. Availability is usually on a first-come, first-serve basis, but GSA will give preference in a competing situation to those agencies which do not vest title to property in the contractor. The contractor should then submit a Standard Form 122, Transfer Order Excess Personal Property, to the cognizant DOE office, accompanied by a written justification of need, including the estimated cost of acquisition (e.g., packing, shipping, installation, rehabilitation, etc.), signed by the principal investigator and an authorized administration official. The written justification shall contain a statement as to whether or not the contractor desires title to the property under the authority of the Atomic Energy Act and 917.7108–1(g). If the acquisition is approved, the DOE office shall forward the SF–122 to the appropriate GSA office with a notation as to whether or not DOE intends to vest title to the property in the contractor. A copy of the approved SF–122 with the notation regarding the vesting of title shall be returned to the contractor. When the property is received, the contractor shall forward to the DOE office a receipted copy of the SF–122 which lists the items of property.

(d) In those instances where the contractor's acquisition of title has been approved by DOE, title to the property shall pass to the contractor when the receipted SF–122 is received by the DOE office, pursuant to Article B–IX(b), Property Items, of 917.7113. Contract funds may be used to pay for necessary costs of packing, transportation, installation, rehabilitation, and maintenance, if required.

(e) In those instances where the contractor did not desire title or where the cognizant DOE office has determined that title to the excess property should remain in the Government, the property will be handled as Government property in accordance with Article B–IX of 917.7113.

917.7108–3 Management of Government-owned equipment.

When title to equipment is retained by the Government, the institution shall be required to establish and maintain a program for the utilization, maintenance, repair, protection, preservation, and reporting of Government property in accordance with sound business practice and the provisions of FAR Subpart 45.5 and 945.5 of this Chapter.

917.7108–4 Reports.

Excess property acquired from other Government agencies or from GSA and provided to institutions under the authority of 917.7108–2, above, will be included in the report required by FPMR 41 CFR 101–43.4701(c).

917.7109 Reporting requirements.

917.7109–1 Purpose of reports.

Research reports from contractors are necessary to show the progress achieved under projects receiving DOE funding. In many instances, the research reports are of value in making information available to scientists working on closely allied problems.

917.7109–2 Notice of Energy R&D Project.

Immediately after a special research contract is negotiated, a Notice of Energy R&D Project, DOE Form 538, which summarizes the purpose and scope of the project should be prepared by the contractor and sent to the contracting officer, the program manager, and the technical information officer. Annual updates are required.

917.7109–3 Progress reports.

Progress reports are required which should briefly describe the scope of investigations undertaken and the significant results obtained. They should also explain any significant differences between the actual level of activity (expressed in the various categories of labor-months, facilities acquired, travel performed, etc.) and that contemplated in the contract.

917.7109–4 Technical reports.

Technical reports, reprints, and articles prepared for publication during the period covered by the contract shall be required to be listed with bibliographic references. Reprints of all such material not previously submitted to the DOE shall be required to be appended and material contained in them need not be duplicated in the report.

917.7109–5 Special reports.

Special reports or additional progress, status, or topical reports shall be

requested as required by program officials or submitted as deemed necessary by the contractor. For example, brief status reports shall be requested when developments are of immediate interest or when a significant point in the investigation has been reached. The value relative to the costs incurred in providing special reports must be considered when requesting any additional reports.

917.7109–6 Final report.

A final report summarizing the entire investigation shall be required from the contractor upon expiration of each contract. Satisfactory completion of a contract will be contingent upon the receipt of this report. The final report should follow the outline agreed upon for progress reports, or when a project has extended over a long period of time, the final report may refer to previously submitted technical reports for details and may be a synopsis of the entire project. Manuscripts prepared for publication should be appended.

917.7109–7 Summary and distribution of reports.

(a) A table summarizing the various types of reports, time for submission, number of copies and distribution is set forth below. The distribution and schedule of reports shall be as prescribed in this table, unless the authorizing program office specifies otherwise. Frequently, an annual progress report and a 200-word summary are sufficient for fundamental research, but additional reporting may be required in many cases. All reports shall be prepared by the contractor and submitted to the appropriate field office for distribution. The field office shall transmit these reports with a cover memorandum indicating: (1) The other DOE offices receiving the documents; (2) the name of the contractor; and (3) the contract number. Each copy of the documents shall bear the contract number.

DISTRIBUTION AND SCHEDULE OF DOCUMENTS

Type	When due	Number of copies for			
		Field office	HQ program office	TIC/Oak Ridge	HQ patents DOC
1. Summary: 200 words on scope and purpose (S.I.E. Form)	At start of initial contract and period	1	3	1	
2. Renewal proposal	Not later than 4 months nor earlier than 6 months before contract expires.	2	4		
3. Annual progress reports	With renewal proposal, but bound separately	2	4	2	
4. Other progress reports, brief topical reports, etc. (Desired when significant results developed or when work has direct programmatic impact).	As deemed necessary by investigator or as specifically requested by appropriate Hq. office.	2	4	2	
5. Conference papers	Same as 4 above	2	4	2	
6. Final report	Three months after completion of the work	2	2	2	1

(b) The DOE contracting officer shall inform the contractor which types of documents are to be transmitted to TIC. For each document so identified, the contractor shall send an additional copy to the contracting officer for transmittal to TIC, accompanied by one copy of DOE Form 427.

(c) The research effort shall be prefaced by an informative abstract of no more than 200 words.

(d) A listing of technical reports, articles, and reprints and the appendage of reports not previously submitted are required.

917.7110 Dissemination of results.

917.7110–1 Prompt dissemination.

Prompt dissemination of research results to the scientific community is encouraged. Publication in open literature is recognized as the normal and most desirable means for reporting the findings of unclassified fundamental research. Although DOE reserves the right to utilize, and have others utilize, to the extent it deems appropriate, the reports resulting from research contracts, DOE will attempt, to the maximum extent practicable and consistent with the Government's best interest, to permit the institutions and the authors to effect their own publication in established technical journals.

917.7110–2 Publication.

(a) Contractors should be urged to publish results through normal publication channels. As a further inducement, page charges or other printing assessments for publishing articles in recognized scientific journals, or any additional costs incurred in obtaining a limited supply of reprints of articles, shall be considered an appropriate budget item under contracts receiving DOE support where:

(1) The document reports work funded by the Government;

(2) The charges are levied impartially on all research papers published by the journal, whether by non-Government or by Government authors;

(3) Payment of such charges is in no sense a condition for acceptance of manuscripts by the journal;

(4) The journals involved are not operated for profit; and

(5) The author does not receive an emolument for the research paper.

(b) A credit line shall be included in any such publication to indicate that the research has been funded, in whole or in part, by DOE. A patent check shall be made in advance of release to the public of any material prepared for publication.

(c) The contractor or principal investigator may publish contract data as approved by DOE in accordance with the provisions of the Patent Rights clause.

917.7111 Extension of contracts.

917.7111–1 Renewal proposals.

(a) Where additional time, beyond the current expiration date, is required to continue or complete the work under a special research contract, the contractor shall be requested to submit six copies of its renewal proposal to the contracting officer not later than four months nor earlier than six months before the date of expiration of the contract. If a renewal proposal has not been received four months prior to the contract expiration date, the contracting officer shall determine if a renewal proposal is to be submitted and take necessary action for contract close-out or processing the renewal proposal as appropriate.

(b) The renewal proposal shall outline and justify a program and budget for the succeeding year, showing in detail the estimated cost of the project, together with an indication of the items for which the contractor is requesting reimbursement or proportionate cost-sharing, the percentage of any such costs to be shared by the contractor, and

any items to be contributed solely by the contractor. It should include the same type of information as that required for initial proposals, or reference this information to the extent contained in earlier proposals. Any contemplated change in program or scope for the ensuing period should be justified and explained clearly, and the cost estimates and other items should be based upon past experience. Any deviation from the contract which has not received DOE approval should be explained in detail.

(c) The renewal proposal should include a financial statement of the work under the current contract including:

(1) Total project costs for the current period to date, indicating the amount chargeable to DOE;

(2) An estimate of the total costs to be incurred during the remainder of the current contract period, indicating the amount chargeable to DOE;

(3) The anticipated difference, if any, between the accumulated support cost at the end of the current contract period and the cumulative Government ceiling; and

(4) A footnote to show the estimated amount of outstanding commitments for property at the end of the current contract period.

917.7111-2 Evaluation of requests for renewals.

(a) Requests for renewals are required to be evaluated by the appropriate program office in the light of:

(1) Progress reports submitted by the contractor;

(2) Research results published in scientific media;

(3) Field visits to the research site by technical personnel;

(4) Contractor's performance and progress;

(5) Continued relevance to DOE's mission;

(6) Scientific and technical merit of the research and a comparison of the relative importance of the project in relation to other research proposals, proposed and ongoing; and

(7) Availability of funds.

(b) Requests for renewals generally follow the same process of review and evaluation of technical aspects, funding, and preparation, and execution of the contract, and administration as a new project, although less use would normally be made of outside consultants.

(c) Contracts authorized by program offices shall not be extended for a new term or on an interim basis or modified in scope without specific prior authorization from the appropriate program office except as provided at 917.7111-3(c).

917.7111-3 Authorization to renew.

(a) When a determination has been made to extend a special research contract, the sponsoring program office is required to provide the contracting officer with notification 60 days in advance of expiration to permit an orderly completion of the extension before the expiration date. The authorizing directive generally should include the same type of information provided in the authorization of a new contract, including pertinent information concerning any changes in scope of work, level of funding, scheduled dates for completion of certain phases of work, target dates for submission of report, etc. The directive will describe the results of the prior funding period and what is expected to be accomplished in the new funding period.

(b) An authorization to renew a special research contract shall state the estimated total cost of items to be included under Article A-II(a) of Appendix A for the renewal period, the percentage of such costs to be reimbursed by DOE, and the amount of new funds authorized to increase the Government ceiling.

(c) The field office that has administrative jurisdiction of an existing contract may extend the term of an existing contract without authorization from the cognizant program office, provided that:

(1) Any such extension does not provide for an increase in DOE's monetary obligation under the contract;

(2) The scope of work is not revised by such extension;

(3) Such extension is necessary to permit completion of the scope of work authorized by Headquarters, including preparation of required reports; and

(4) Any such extension will not be for a period in excess of 90 days.

917.7112 Administration.

917.7112-1 Responsibilities of program offices.

(a) Technical representatives of program offices will make, to the extent practicable, periodic site visits. A written summary of the results of all visits will be prepared and filed promptly. Copies of such reports shall be forwarded to the contracting officer whenever they contain information of administrative interest or other information pertinent to the assigned responsibilities of the Contracting Activity. These visits are for the purpose of:

(1) Determining that the research is being performed in accordance with the contract;

(2) Ascertaining that schedules are being met to ensure timely submission of interim and final reports;

(3) Determining whether the project has adequate facilities, equipment, and scientific, technical, and other personnel for the specified research;

(4) Ascertaining that any equipment requested for purchase is not reasonably available within the institution;

(5) Assisting the principal investigator to clarify specific technical aspects as work progresses;

(6) Exploring future budget requirements, but without making any commitments as to future funding level; and

(7) Obtaining information regarding the status of work for administrative and technical purposes of the program sponsor.

(b) Program offices will provide guidance to the contracting offices in connection with:

(1) Any contractor requests for approval of proposed deviations or other actions requiring DOE approval which are brought to their attention by Contracting Activity, or which have been brought to their attention through site visits, progress reports, or other agreements or contacts with the contractor;

(2) Increasing the obligational authority under any special research contracts;

(3) Whether or not required contractor reports are satisfactory; and

(4) The renewal or close-out of contracts. Instructions should be provided at least four weeks prior to the expiration date of a contract.

917.7112-2 Responsibilities of field offices.

Field offices are responsible for the following:

(a) Assisting Headquarters program offices, as requested, in carrying out the functions set forth in 917.7112-1;

(b) Performing the necessary administrative functions required by the terms of the contract, and making payments in accordance with the contract;

(c) Bringing to the attention of the appropriate Headquarters offices:

(1) Any contractor requests for approval which are required by the contract;

(2) The upcoming expiration date of a contract whenever required instructions on renewal or close-out have not been received on a timely basis;

(3) Any request by a contractor to revise an established stipulated salary support amount, and any notification by a contractor that is reducing the charges under the stipulated salary support procedure (see 917.7106–4(c)); and

(d) Determining whether to use Pub. L. 95–224 or the Atomic Energy Act of 1954, as amended, as the authority for vesting title to personal property in the contractor when authorized to do so pursuant at 917.7106–7(c)(6). Pub. L. 95–224 shall be used to the maximum extent consistent with the authority contained therein.

917.7112–3 Payments under special research contracts.

(a) Payments will be made to contractors under a special research contract in accordance with its provisions (see Article B–XI of 917.7113). The letter-of-credit procedures, as provided for in Treasury Fiscal Requirements Manual, Part 6, Chapter 2000, shall be used to the maximum extent feasible when the total of DOE contracts and agreements with advance financing to an institution provides for a continuing annual level of support of $120,000 or more. When the total DOE contracts and agreements with advance financing provide for a continuing annual level of support of less than $120,000, DOE shall make advance payments covering the first 90 percent of the amount of the new funds as set forth in Article A–III(b) of the contract. The contracting officer may revise Article B–XI of 917.7113, regarding the timing and amounts of advance payments, in accordance with the following provisions.

(1) The advance payments may be made at times and in amounts determined appropriate provided that no single payment will exceed 45 percent of the new funds as set forth in Article A–III(b) of the contract for the pertinent period except on the basis of a request from the contractor evidencing that a specified amount is required in connection with expenditures or commitments made under the contract.

(2) The timing and amounts of payments should be determined on the basis of limiting the amount of advances to the extent feasible, consistent with effective and efficient administration and performance of the research, for the purpose of slowing the rate of cash withdrawals from the Treasury and thereby decreasing the financing costs to the Federal Government.

(3) In determining the timing and amounts of payments, consideration should be given to funds already available to the contractor, the expected expenditures under the contract, any information from the contractor regarding the need for funds, and the administrative cost of additional payments.

(b) If the contract is to be extended for an additional period of performance with additional funding, there may be paid at the time of execution of the extension, the amount withheld from the expiring period which, when added to the payments already made, does not exceed the new funds set forth in Article A–III(b) for the expiring period. The final payment under both of the procedures referred to in paragraph (a) of this section shall be made on the basis of determinations by the contracting officer that: (1) The required reports are satisfactory; (2) the research was performed in accordance with the provisions of the contract; (3) an additional payment is required to reimburse for all costs chargeable to DOE; and (4) an appropriate patent clearance has been obtained. If necessary in making these determinations, the contracting officer should obtain advice from technical personnel. It is expected that the annual progress and final reports and the contractor's certified cost statements will provide an adequate basis for making the required determinations. If the determinations cannot be made on the basis of the reports, visits to and other contacts with the research project during the contract period, and the contractor's certified statements, and the contracting officer determines that the contractor has not satisfied the contractual undertakings, appropriate steps shall be taken to protect the Government's interest.

917.7112–4 Approval of deviations in performance and other specified actions.

(a) Contractors should be advised to inform the contracting officer as soon as possible of contemplated deviations and other proposed actions which require DOE approval. Specific deviations and approval actions include the following:

(1) A change of the principal investigator, co-investigator, or other key people as might be named in the contract, or continuation of the research work for any period in excess of three months without direction by an approved principal investigator. The principal investigator may increase or decrease the amount of effort which he devotes to the project without obtaining the contracting officer's approval; however, a representative of the institution shall consult with the appropriate Headquarters program representative if the principal investigator plans to, or becomes aware that he will, devote substantially less effort to the work than anticipated in Article A–I. The purpose of such consultation will be to determine what effect, if any, the anticipated change will have on the research work and what modification to the contract, if any, may be appropriate.

(2) A change in the phenomenon or phenomena under study (i.e., broad category of the research under the contract) requires the specific written approval of the contracting officer; ordinarily such changes, if approved by the contracting officer, will be accomplished through a new contract or modification. The contractor may change the specific objectives in the research work described in the contract, provided it gives the contracting officer prompt notification of such changes; and the contractor may continue to follow the new objectives while DOE determines whether it wishes to continue the program under the changed approach. Significant changes in methods or procedures employed in performing the research should be reported in the first technical progress report issued subsequent to the changes.

(3) Acquisition of an item of equipment not itemized in the contract, the cost of which is $1,000 of more. Approval is not required if the equipment is merely a different model of an item listed in the contract. If plant and capital equipment funds are provided for the acquisition of equipment, with title to be vested in the Government, the total cost of such equipment shall not exceed the amount provided for such equipment unless prior approval has been obtained.

(4) Purchase of any general-purpose equipment, such as office equipment or furniture, air conditioning, etc., not specifically provided for in 917.7113, Appendix A of the contract will require prior approval.

(5) Incurring costs for items set forth in Article A–II(a), during the pertinent contract period stated in 917.7113, in Appendix A, in excess of 110 percent of the total estimated cost specified in Article A–III. Charges to DOE for any such costs incurred with approval of the contracting officer shall also be subject to the limitations of Article III.

(6) Any proposed foreign travel (defined as any travel outside of Canada and the United States and its territories and possessions) if requires prior approval.

(7) Expenditures for domestic travel if such expenditures exceed the amount shown in Article–II(a) for such travel by $500 or by 25 percent, whichever is greater, requires prior approval.

(8) Acquisition of excess personal property.

(9) Such other items as, in the judgment of the program office or the contracting officer, in specific cases need to be separately identified in the contract. (When plant and capital equipment funds are provided for the acquisition of Government property, the program offices shall require that such funds be used only for acquiring the equipment designated in the contract, unless prior approval has been obtained.)

(b) The contracting officer will present (in any manner considered appropriate) all such requests for approval to the cognizant program office for consideration, and will issue such authorizations and modifications under the contract as are necessary and appropriate.

(c) Contractors should be required to provide such statements of the project's financial and program status as are believed necessary for considering requests for approval.

917.7112-5 Auditing.

(a) As a part of the management of the research program accomplished through special research contracts, auditing of participating institutions shall be initiated by the contracting officers administering the contracts. The prupose of this audit program is to corroborate that the participating institutions are properly using the funds and personal property provided by the contracts, and to identify any changes needed in the arrangement or in related administrative requirements in order to further the effectiveness of the contracts in accomplishing their intended programmatic research purposes. In addition to these general objectives, the principal specific objectives of the audits of special research contracts should determine that: (1) The amounts as submitted in the contractor's certified cost statement are accurate and were incurred in connection with the work; (2) satisfactory documentary evidence is available in support of the costs incurred; (3) DOE approval was obtained where required; and (4) the proportion of total cost charged to DOE is in accordance with the percentage stipulated in the contract.

(b) The review of special research contracts should be made on a selective basis with the selected sample including all special research contracts where the contracting officer requested that an audit be performed pursuant to the provisions of 917.7112–3(b).

(c) In the event of termination prior to the expiration date of a special research contract, unless the costs incurred by the contractor are relatively small or can be otherwise adequately corroborated, an audit should be made to determine the nature of the costs and other relevant data for use in arriving at a termination settlement.

(d) While audit is not a prerequisite to payment under a contract, the contracting officer, before authorizing final payment, should consider the necessity for an audit to determine whether the charges to the contract are proper. If any such audits result in findings which may be of value to program offices in their determinations regarding selection and renewal of research projects, such findings should be made available to them.

917.7112-6 Security.

As a general rule, investigators should not need access to classified information in the conduct of basic research funded by DOE. The contractor should be advised when, in the judgment of the principal investigator, information is developed which should be classified, the DOE field office must be notified immediately. When, in the opinion of the cognizant program office, the work moves into a classified area, prompt steps shall be taken to notify the contractor and appropriate field office.

917.7113 Format for Special Research Contracts (SRC) with educational institutions/or other nonprofit institutions.

Contract No. ———————————

This contract is effective as of the ——, 19—, between the United States of America (hereinafter referred to as the "Government"), acting throught the U.S. Department of Energy (hereinafter referred to as the "DOE"), and ——— (hereinafter referred to as the "Contractor").

Recitals

DOE wishes to have the Contractor perform certain research. This contract states the terms and conditions under which the Contractor agrees to perform the work.

This contract is authorized by the Department of Energy Organization Act of 1977 and other applicable law.

Agreement

Now therefore, the parties hereto agree as follows:

Article I—The Research To Be Performed

(a) The Contractor shall furnish personnel, facilities, equipment, materials, supplies, and services, except such as are furnished by the Government, necessary for the performance of the research provided for in Appendix A and shall perform the research and report thereon pursuant to the provisions of this contract. It is understood that Appendix A, a guide to the performance of this contract, may be deviated from by the Contractor subject to the specific requirements of this contract.

(b) This work shall be conducted under the direction of or such other members of the Contractor's staff as may be mutually satisfactory to the parties.

Note A.—The description of the research in Appendix A may be omitted and Appendix A appropriately modified to incorporated, by pertinent references to the proposal or other documents, the type of data necessary to describe the research as called for by Appendix A; and where there is no cost sharing, other features may be referenced in lieu of insertion in Appendix A. In such cases, the referenced material will be retained as part of the permanent contract file.

Article II—The Period for Performance

The period of performance under this contract shall commence on ——19—, and expire on ——19—. Performance may be extended for additional periods by the mutual written agreement of the parties. It is presently expected that this contract will be extended by mutual agreement until —— 19—.*

*This sentence is optional and may be omitted.

Article III—Consideration

(a) In full consideration of the Contractor's performance hereunder, DOE shall furnish the equipment, supplies, materials, and services, if any, listed in Article A–11(b)(2) and pay the Contractor the sum of ——, hereinafter called the Government "Ceiling" which sum shall be subject to adjustments as hereinafter provided.

(b) Payments to the Contractor shall equal the "cumulative Government cost" of performance of this contract, as the term "cumulative Government cost" is defined in Article B–XXIX*; provided however, and notwithstanding any other provisions of this contract, that the Government's monetary liability under this contract shall not exceed the Government ceiling or an amount equal to the cumulative Government costs, whichever is less. The Contractor shall be obligated to perform under this contract throughout the agreed-upon period of performance, and to bear all costs which DOE has not agreed to pay; provided however, that the Contractor shall have the right to cease to perform the research provided for in this contract, upon written notice to DOE to that effect, at any time, when or after the cumulative Government cost equals or exceeds the Government ceiling.

(c) The Government ceiling specified in (a) above may be increased unilaterally by DOE by written notice to the Contractor and may be increased or decreased by written agreement of the parties (whether or not by formal modification to this contract). In the event that the stated period of performance is extended, the Government ceiling will be revised to reflect any increased DOE funding for the extended period or periods.

(d) Upon termination or expiration of the total period of performance, the Contractor shall promptly refund to DOE (or make such disposition as DOE may in writing direct) any sums paid by DOE to the Contractor under this contract, through direct payment or

under letter or credit, in excess of the cumulative Government cost incurred in performance under the contract.

*The term cumulative Government costs refers to the cost of items under A–II(a) of Appendix A, for the initial contract period plus any extension period that may be properly chargeable to DOE. If proportionate cost sharing is involved, the cost is DOE's share of such costs, and does not include the cost of items excluded from Article A–II(a), such as items to be contributed solely by the Contractor or property to be furnished by the Government. Charges to DOE will be reported after the conclusion of each contract period set forth in Appendix A (generally an annual period); in addition to the limitations on charges to DOE provided for by this Article III, charges to DOE for a specified contract period may not exceed the 110 percent limitation mentioned above as well as to the provisions of this Article III.

Article IV—Government Property

The following items of property acquired or fabricated by the Contractor are hereby listed as "Government Property;" (List all property and equipment, title to which is to remain in the Government. Insert the word "none" if title to all of the property is to be vested in the Contractor. If title to property acquired of fabricated by the Contractor is to remain in the Government, add appropriate provisions for payment for such property from plant and equipment funds. Such funds should be in addition to, and not a part of, the "Government Ceiling" funds provided under Article III).

Article V—Appendices

Appendix A—Performance guide, Appendix B—General Provisions, and Appendix C—Statement of Costs, are hereby attached to and made a part of this contract.*

In witness whereof, the parties have executed this contract.

United States of America

Name ———
Title ———
Contract No. ———

Appendix A—Performance Guide

Contractor ———
Contract No. ———
For the contract period ——— through ———

Article A–I. Research to be performed by the Contractor. (Insert description of research activity and state the appropriate percentage of time or effort which the principal investigator(s) expects to devote to the work.)

Article A–II. Ways and means of performance. The listing under (a), (b), and (c) below should be in a form to permit determination of which items of costs are to be chargeable to DOE or proportionately shared, and which items are to be contributed solely by the Contractor or solely by DOE. The listing should also permit application of the approval requirements of the contract. Excessive detail in listing should be avoided.

(a) Items for which funding will be provided as indicated in A–III below. Do not include in this paragraph (a) any items which are to be contributed solely by the Contractor.

(1) Salaries and wages. State total dollar amount. If any stipulated salary amounts for professional staff members are established in accordance with FAR 31.3 or 31.7 the stipulated amounts, along with any limitations or requirements on the use of such stipulated amounts should be provided for in the contract.

(2) Equipment to be purchased or fabricated by the Contractor. List equipment to be purchased or fabricated by the Contractor and for which title is to remain in the Contractor and state the total dollar amount budgeted for such equipment. Such equipment may be set forth in general classifications as specifically as possible, if it is not feasible to list them individually. However, any individual piece of equipment, the estimated cost of which is over $1,000 will be separately identified. Except where the contract may otherwise specifically provide, equipment for the pupose of this paragraph A–II shall mean an item of personal property having a useful life expectancy in excess of 1 year and an acquisition cost in excess of $500. Failure to identify equipment may result in disallowance of its cost if subsequently pruchased.

(3) Travel. (Show amounts for both foreign and domestic. If none, state none).

Domestic ———
Foreign ———

(4) Other direct costs.

(5) Indirect costs based on applicable rates or predetermined rate of — percent if with a educational institution for FY year(s) ———. Show base or bases of costs to which rate apply.

(b) Items, if any, significant to the performance of this contract, but excluded from computation of Government costs and from consideration in proportioning costs. (See 917.7107–1(c)).

(1) Items to be contributed by the Contractor. In accordance with Article B–II(c), if a proposed Contractor contribution is included in this paragraph (b)(1), the Contractor shall maintain records adequate to permit DOE to determine the extent of the contribution. If the time or effort of the principal investigator(s) is to be contributed by the Contractor and excluded from A–II(a) and A–II(b), the contributed time or effort should be listed under A–II(d).

(2) Items to be contributed by the Government.

(c) Time or effort of principal investigator(s) contributed by Contractor but excluded from computation of Government cost and from consideration in proportioning costs. Where covered under A–II(a) or A–II(b) above, state: "None." See 917.7107–1(e).

Article A–III. The total estimated cost of items under A–II(a) above for the contract period stated in this Appendix A is $———. DOE will pay — percent of the actual costs of these items incurred during the contract period stated in this Appendix A, subject to the provisions of Article III and Article B–XXIX of Appendix B. The estimated Government cost for the contract period stated in this Appendix A is $———.

The estimated Government cost is funded as follows:

(a) Estimated unexpended balance from the prior period(s) $———.

(b) New funds for the current period $———.

The new funds being added in A–III(b) constitute the basis for advance payments provided under Article B–XI.

(c) Subject to their availability, additional funds anticipated for the contract in the amount of $———.

Note.—Do not include this provision in fully funded SRCs.

Appendix B—General Provisions

Article B–I—Definitions

(a) The terms "DOE" means the U.S. Department of Energy or any duly authorized representative thereof, including the contracting officer except for the purpose of deciding an appeal under the article entitled "Disputes."

(b) The term "contracting officer" means an official designated to enter into or administer contracts and make related determinations and findings.

(c) Except as otherwise provided in this contract, the term "subcontracts" includes purchase orders under this contract.

*Article B–II—Inspection, Reports, Records, and Accounts**

(a) DOE shall have the right to inspect, in such manner and at all reasonable times as it deems appropriate, all activities of the Contractor arising in the course of its undertakings under this contract.

(b) The Contractor shall make progress and other reports in such manner and at such time as specified under this contract, as DOE may reasonably require from time to time.

(c) The Contractor agrees to keep records and books of account, in accordance with generally accepted accounting principles and practices, and consistent with the requirements of OMB Circular A–21, and FAR 31.3 or 31.7 as constituted on the effective commencement date of the contract period, covering its costs and expenditures for items included under Article A–II(a) of Appendix A and which are furtherance of the research work under this contract. In the event a contractor contribution is listed in Article A–II(b), the Contractor shall maintain records adequate to permit DOE to determine the extent of the contribution. If professional staff members are included under Article A–II(b), the Contractor shall maintain records on such personnel in accordance with the payroll distribution procedure of section J.6 of OMB Circular A–21.

(d) DOE shall at all reasonable times be afforded access to the premises and to these books and records and to related correspondence receipts, vouchers, memoranda, and other data of the Contractor; and the Contractor shall preserve such books and papers, without additional compensation therefor, in accordance with the retention requirements referenced in Article B–XVIII, Examination of Records.

*If the contract is with a nonprofit organization rather than an educational institution, this article should be revised to provide that the cost principles at FAR 31 as

may be modified by 931 depending on the nature of the contractors organization, will be used in determining actual cost.

Article B–III—[Reserved]

Article B–IV—Disclosure of Information

This clause should be used in place of the clauses entitled "Security," 952.204–1, and "Classification" 952.204–2, in SRCs with educational institutions for off-site research that are not likely to produce Restricted Data or other classified information.

Disclosure of Information

(a) It is mutually expected that the activities under this contract will not involve Restricted Data or other classified information or material. It is understood, however, that if in the opinion of either party, this expectation changes prior to the expiration or termination of all activities under this contract, said party shall notify the other party accordingly in writing without delay. In any event, the Contractor shall classify, safeguard, and otherwise act with respect to all Restricted Data and other classified information and material, in accordance with applicable law and the requirements of DOE, and shall promptly inform DOE in writing if and when Restricted Data or other classified information and material becomes involved. If and when Restricted Data or other classified information or material becomes involved, the Contractor shall have the right to terminate performance of the work under this contract and in such event the provisions of this contract regarding termination for the convenience of the Government shall apply.

(b) The Contractor shall not permit any individual to have access to Restricted Data, or other classified information, except in accordance with the Atomic Energy Act of 1954, as amended, and DOE regulations or directives.

(c) The term "Restricted Data" as used in this article means all data concerning the design, manufacture or utilization of atomic weapons, the production of special nuclear material or the use of special nuclear material in the production of energy, but shall not include data declassified or removed from the Restricted Data category pursuant to section 142 of the Atomic Energy Act of 1954, as amended.

Article B–V—Responsibility for the Work

(a) The Contractor is solely responsible for the conduct of the work.

(b) In instances where the carrying out of the work involves a DOE license, the provisions of the pertinent license shall prevail over any inconsistent provisions of this contract.

Article B–VI—[Reserved]

Article B–VII—Rights in Technical Data (Short Form)

Insert the clause in 952.227–7700.

Article B–VIII—Patent Rights—Small Business Firms or Nonprofit Organizations

Insert the clause in 952.227–7100.

Article B–IX—Property Items

(a) Except as otherwise provided in this paragraph (a) and paragraph (b) of this Article B–IX, title to all material, supplies, and equipment purchased or otherwise acquired by the Contractor in the performance of its research activities shall be and remain in the Contractor. Said materials, supplies, and equipment shall be used for the benefit of research under this contract and any extensions or successor contractors hereto; and provided there is no interference with said research, shall be made available for use by investigators working on any Federal research contract at the same location. Subject to these priorities, materials, supplies, and equipment may be used as the Contractor wishes. Except as otherwise agreed in writing, title to any items of property listed as "Government property" shall pass directly to the Government; such property shall be subject to paragraphs (b), (c), (d), (e), and (f) of this Article B–IX.

(b) Subject to the mutual agreements of DOE and Contractor, the Government may furnish the Contractor items of equipment, materials, supplies or facilites for use by the Contractor in performance of the work, title to these items shall remain in the Government unless otherwise agreed in writing. Such items of property and the items of property listed elsewhere in this contract as Government property, are hereinafter referred to as "Government property." Title to Government property shall not be affected by the incorporation or attachment thereof to any property not owned by the Government or shall any such property, or any part thereof, be or become a fixture or lose its identity as property by reason of affixation to any realty.

(c) To the extent practicable, the Contractor shall cause all items of Government property to be suitably marked with an identifying mark or symbol indicating that the items are the property of the Government. The Contractor shall maintain, at all times and in a manner satisfactory to DOE, records showing the use and disposition of Government property. Such records shall be subject to DOE inspection at all reasonable times and DOE shall at all reasonable time have access to the premises wherein any items of Government property are located. Unless otherwise authorized in writing by DOE, the Contractor shall use Government property only for the purposes of this contract, provided, however, that the Contractor is hereby authorized to use items of equipment constituting Government property for other Federal research contracts to the extent such use: (1) Does not interfere with its work under this contract; (2) is not prohibited by provisions of the other Federal agreements; and (3) is promptly reported by the Contractor to contracting officer.

(d) The Contractor shall promptly notify DOE of any loss or destruction of or damage to Government property. It is understood that the Contractor shall not be liable for any such loss, destruction, or damage, unless same results from willful misconduct or lack of good faith on the part of any corporate officer of the Contractor, or of one or more of the contract's representatives having supervision or direction of all or substantially all of the activities under this contract. If the Contractor is liable for such loss, destruction, or damage, it shall promptly account therefor to the satisfaction of DOE; if the Contractor is not liable therefor, and is indemnified, reimbursed, or otherwise compensation for such loss, destruction, or damage, it shall promptly account therefor to the satisfaction of DOE.

(e) With the written approval of DOE, the Contractor may sell, transfer, or otherwise dispose of items of Government property to such parties and upon such terms as so approved, or itself acquire title to items of Government property upon such terms as may mutually be agreed upon in writing by the Contractor and DOE. The proceeds of any such disposition, and any agreed price of any such Contractor acquisition, shall be paid by the Contractor to the Government, or credited on account of DOE, payments to be made under this contract as DOE may direct. Subject to the other provisions of this contract, the Contractor shall deliver Government property to DOE upon request (suitably packed and shipped at the Government's expense).

(f) The Contractor shall utilize for the benefit of the work under this contract such items of property available to the Contractor by reason of its activities under other Federal research agreements as are appropriate for utilization under this Contract pursuant to the provisions of the pertinent Federal agreement.

Article B–X—Termination for Convenience of the Government

Insert the requirements of FAR 49.

Article B–XI—Payments

(a) DOE shall make payments to the Contractor with respect to the amount of consideration prescribed in Article III of this contract as follows:

(1) A maximum of an additional 45 percent of the new funds as set forth in Article A–III(b) of this contract following execution of this contract (and following the effectuation of each extended period) upon receipt of a request or requests in writing from the Contractor evidencing that the requested amount is currently needed in connection with planned expenditure or commitments for contract performance.

(2) A maximum of an additional 45 percent of the new funds as set forth in Article A–III(b) of this contract upon receipt of requests from the Contractor evidencing that the amount requested is then required in connection with the work under the contract.

Note.—Subparagraphs (1) and (2) of this paragraph (a) may be revised, as deemed appropriate by the contracting officer, in accordance with 917.71.

(3) If, following submission of an annual progress report, the contract is to be extended for an additional period of performance, and additional payment may be made at the time of execution of the extension which, when added to the payments already made under (1) and (2) above for the expiring period, will not exceed the new funds set forth in Article A–III(b) for the expiring period. A concluding payment

for the pertinent period, if appropriate, may be made following submission of a certified statement showing Government cost and evidencing the Contractor's performance under this contract.

(4) If the contract is not to be extended, the final payment of the consideration provided for in Article III shall be made following submission by the Contractor of a final report required by Article B–XXI, in form and content satisfactory to DOE, and submission of a certified statement showing Government cost and evidencing the Contractor's performance and compliance with the patent provisions.

(b) The payments made pursuant to paragraph (a) above shall not prejudice or otherwise affect adversely any of the Government's rights under the contract. For purposes of settlement in the event of termination prusant to article B–X hereof, these payments shall not be construed as evidentiary, and any excess payment in the light of Article B–X shall be promptly returned to DOE.

(c) DOE, at its option, may invoke the following with respect to any amount of consideration remaining to be paid at any given time:

(1) DOE shall issue a letter of credit as provided for by Treasury Fiscal Requirements Manual, Part 6 Chapter 2000 under which payments to the Contractor with respect to the amount of consideration provided for in Article III will be made. The Contractor agrees that the first ninety (90) percent of the new funds as set forth in Article A–III(b) will be under the letter of credit and will be subject to the submission by the Contractor of a Payment Voucher on Letter of Credit (TUS 5401), in accordance with procedures based upon Treasury Fiscal Requirements Manual, Part 6 Chapter 2000 which are agreed to by the parties. Following submission by the Contractor of a final report provided for in Article B–XXI, in form and content satisfactory to DOE, and submission of a certified statement showing the total expenditures and evidencing the Contractor's performance, and upon submission by the Contractor to DOE of such invoices or vouchers as are satisfactory to DOE, DOE shall pay the Contractor the concluding payment of the consideration provided for in Article III: or said concluding payment will be included under the letter or credit and will be subject to submission by the Contractor of a payment voucher on letter of credit, in accordance with the procedures described above. If, following submission of an annual report, the contract is extended for an additional period of performance, an additional payment may similarly be made at the time of execution of the extension which, when added to the payments already made for the expiring period, will not exceed the new funds as set forth in Article A–III(b) for the expiring period. A concluding payment for the pertinent period, if appropriate, may be made following submission of a certified statement showing Government cost for the peritent period and evidencing the Contractor's performance.

(2) DOE reserves the right to increase, decrease, or cancel the amount covered by the letter of credit, provided that such action is required because of a change in the amount of consideration provided for in Article III or is taken pursuant to paragraph (c)(1) of this article. The issuance and use of a lettter of credit and receipt of funds pursuant thereto shall not prejudice or otherwise adversely affect any of the Government's rights under the agreement.

Article B–XII—Equal Opportunity

Insert the clause from FAR 52.222–26.

Article B–XIII—Convict Labor

Insert the clause from FAR 52.222–3.

Article B–XIV—Contract Work Hours and Safety Standards Act—Overtime Compensation—General

Insert the clause from FAR 52.222–4 with appropriate insertions.

Article B–XV—Disputes

Insert the clause in FAR 52.223–1.

Article B–XVI—Officials Not To Benefit

Insert the clause in FAR 52.203–1.

Article B–XVII—Convenant Against Contingent Fees

Insert the clause in FAR 52.203–5.

Article B–XVIII—Examination of Records

Insert the clause from FAR 52.215–1. The Examination of Records clause in FAR 52.215.1 may be omitted from foreign contracts in accordance with procedures in FAR 25.9.

Article XIX—[Reserved]

Article B–XX—Assignment: Subcontracting

Neither this contract nor any interest therein nor claim thereunder shall be assigned or transferred by the Contractor, except as expressly authorized in writing by the contracting officer. The Contractor shall not subcontract any research or development work under this contract, except as expressly authorized in writing by the contracting officer.

Article B–XXI—Reports and Renewal Proposals

The Contractor shall furnish six (6) copies of the following reports to the appropriate field office.

(a) *Progress report.* The progress report shall briefly describe the scope of investigations undertaken and the significant results obtained. It shall also indicate compliance with the contract requirements and any failures to comply. The report shall indicate the approximate percentage of time or effect which the principal investigator(s) has devoted to the project since the beginning of the current term of the contract and indicate the amount of effort which is expected to be devoted during the remainder of the current term. Technical reports, preprints, and articles prepared for publication shall be listed with bibliographical references. Reprints of all such material not previously submitted shall be appended and material contained therein need not be duplicated in the report. Progress reports shall be submitted approximately 4 months in advance of the expiration of the current contract term and shall give the Contractor's best estimate of the probable events and occurences in regard to the remainder of the current term. Except as DOE may otherwise request, no further progress report will be required for any contract year unless there has been a significant change in scientific results or compliance between the lastest progress report by the contractor and its actual experience which shall be reported promptly.

(b) *Final report.* Upon termination or expiration of the total period of performance, the Contractor shall submit, promptly, a summary of its activities for the entire period, including a list of publications issued during the entire period and copies of any reprints not previously submitted, as well as a comprehensive evaluation of progress in the area of research funded by the contract.

(c) *Renewal proposals.* A renewal proposal, if any, shall be submitted along with the technical progress reports, and each of the two documents shall be separately bound. Renewal proposals are submitted to the DOE contracting officer.

Article B–XXII—Foreign travel

Foreign travel shall be subject to the prior approval of the contracting officer for each separate trip, regardless of whether funds for such travel are contained in an approved budget. Foreign travel is defined as any travel outside of Canada and the United States and its territories and possessions.

Article B–XXIII—[Reserved]

Article B–XXIV—Utilization of Labor Surplus Areas Concerns

Insert the clause in FAR 52.220–3 under the conditions prescribed therein.

Article B–XXV—Utilization of Small Business Concerns and Small Disadvantaged Business Concerns

Insert the clause in FAR 52.219–8.

Article B–XXVI—Utilization of Women-Owned Small Business

Insert the clause in FAR 52.219–13.

Article B–XXVII—Sensitive Foreign Nations Controls

Insert the clause at 952.204–71 if the contract involves research in nuclear technology and it is appropriate. The contracting officer should confirm its inclusion with the local security office.

Article B–XXVIII—Affirmative Action for Special Disabled and Viet Nam Era Veterans

Insert the clause in FAR 52.222–35.

Article B–XXIX—Determination of Government Costs

"(a) The term "Government cost" as used in this contract means DOE's share"* of the sum of costs incurred by the Contractor for items included under Article A–11(a) of Appendix A furtherance of the work hereunder, incurred in accordance with the provisions of this contract, and which are reported to DOE in accordance with (b) below. The term "cumulative Government costs" as used in this contract means the total of the Government costs incurred during

the initial contract period plus any extension periods.

(b) Within 3 months after the end of each contract period set forth in Appendix A, and within 3 months after the termination or expiration of the total period of performance, the Contractor shall furnish a certified statement, executed by an official of the Contractor showing the Contractor's cost and evidencing its performance under the contract, during the contract term just completed. The statement shall show all cost incurred during the pertinent contract term set forth in Appendix A for items under Article A–II(a) of Appendix A, including the Contractor's share, if any, of such costs, and show the extent of the Contractor's contribution of items under Article A–II(b)(1) of Appendix A. Costs included in the certified statement may include the following: expenditures of cash, the cost of material and supplies transferred from store's inventory, and the amount due the Contractor for indirect costs in accordance with the rate and factor shown in Appendix A of the contract for the pertinent period. The costs for the pertinent period shall be consistent with the principles of OMB Circular A–21 as constituted as of the effective commencement date of said period. The certified statement shall be in the form set forth in Appendix C.

(c) The certified statement should be in agreement with the institution's financial record and shall reflect only expenditures actually made during the period covered, including transfers from inventory. It shall not include commitments as a part of such expenditures for goods or services on order but not received or those received but not paid for, unless the Contractor is operating under an established and consistently applied system of accrual accounting. If this is the case, the certified statement shall be so footnoted. A combination of accrual and cash accounting for cost accumulation and reporting purposes shall not be used. The renewal proposal budget should be footnoted to show the estimated amount of outstanding commitments for property at the end of the current period. The certified statement contains a space in which office should be inserted the actual amount of outstanding commitments for property at the end of the period covered by the statement. This commitment amount is for information only and is not a part of the expenditure calculation. The Contractor understands that DOE expects to rely on this certified statement for determining the Government cost for the period. With respect to any period in which proportionate cost sharing is applicable, the support costs for the pertinent period will be determined by applying the percentage figure included in Article A–III for the pertinent period to the certified cost of items included under Article A–II(a) incurred during the pertinent period. All charges to DOE shall be subject to the approval requirements of this contract. The Contractor is expected to maintain auditable records as contemplated by Article B–II(c) to substantiate the costs incurred for items under Article A–II(a) and to show the extent of the Contractor's contribution of the items listed under Article A–II(b)(1).

*If the contract is with a nonprofit organization other than an educational institution or a research foundation established by an educational institution, this article should be revised to provide that the commercial cost principles (FAR 31.2) will be used in determining actual cost.

**In those cases in which there is no proportionate sharing of costs, DOE's "share" will be 100 percent. With respect to any period in which proportionate cost sharing is applicable to Article A–III, it is understood that Government cost for that specified period will equal the stipulated percent of the sum of costs incurred by the Contractor during the stated period for items under A–II(a) of Appendix A, not shown in Appendix A of the contract for the pertinent period. The costs for the pertinent period shall be consistent with the principles of OMB Circular A–21 and FAR 31.3 or FAR 31.7 as constituted on the effective commencement date of said period. The certified statement shall be in the form set forth in Appendix C.

Article B–XXX—Additional Approvals

In addition to such approvals as are specifically required by other provisions of this contract, the Contractor shall obtain DOE's approval for:

(a) A change of the principal investigator, co-investigator, or other key people as might be named in this contract or continuation of the research work for any one period in excess of 3 months without direction by an approved principal investigator. The principal investigator may increase or decrease the amount of effort which he devotes to the project without obtaining DOE approval; however, a representative of the institution shall consult with the appropriate DOE Headquarters program representative if the principal investigator plans to, or becomes aware that he will devote substantially less effort to the work than anticipated in Article A–1. The purpose of such consultation will be to determine what effect, if any, the anticipated change will have on the research work and what modification to the contract, if any, may be appropriate.

(b) No change in the phenomenon or phenomena under study, i.e., broad category of the research under the contract, shall be made without the specific written approval of the contracting officer. Ordinarily, such changes, if approved by the contracting officer, will be accomplished through a new contract or mutually agreed to modification. The Contractor may change the specific objectives in the research work described in the contract, provided it gives the contracting officer prompt notification of such changes, and the Contractor may continue to follow the new objectives while DOE determines whether it wishes to continue the program under the changed approach. Significant changes in methods or procedures employed in performing the research should be reported in the first technical program report issued subsequent to the changes.

(c) Prior approval is required. Acquisition of an item of equipment not itemized in Appendix A, the cost of which is $1,000 or more. Approval is not required if the equipment is merely a different model of an item listed in Appendix A. (If plant and capital equipment funds are provided for the acquisition of equipment with title to be vested in the Government, the total cost of such equipment shall not exceed the amount provided for such equipment unless prior DOE approval has been obtained.)

(d) Prior approval is required. Purchase any general-purpose equipment, such as office furniture, air conditioning, automatic data processing equipment, etc., not specifically provided for in Appendix A.

(e) Incurring costs for items set forth in Article A–II(a), during the pertinent contract period stated in Appendix A, in excess of 110 percent of the total estimated cost specified in Article A–III. Charges to DOE for any such costs incurred with the approval of DOE shall also be subject to the limitations of Article A–III.

(f) Any proposed foreign travel (see Article B–XXII).

(g) Prior approval is required. Expenditures for domestic travel if such expenditures exceed the amount shown in Article A–II(a) for such travel by $500 or by 25 percent, whichever is greater.

(h) Acquisition of excess personal property.

Article B–XXXI—[Reserved]

Article B–XXXII—Clean Air and Water

Insert the clause in FAR 52.223–2 under the conditions set forth therein.

Article B–XXXIII—Affirmative Action for Handicapped workers

Insert the clause set forth in FAR 52.222–36 under the conditions set forth in the section.

Article B–XXXIV—Security

Insert the clause in 952.204–1 under the conditions set forth therein.

Article B–XXXV—Classification

Insert the clause in 952.204–70 under the conditions set forth therein.

Article B–XXXVI—Preference for U.S. Flag Air Carriers

Insert the clause in FAR 52.247–63 under the conditions set forth in FAR 47.4.

Article B–XXXVII—Preservation of Individual Occupational Radiation Exposure Records

Insert the clause set forth in 952.223–75 where appropriate.

APPENDIX C.—STATEMENT OF COST

1. Name and address of Contractor .....
2. Contract number .....
3. Beginning and ending date of pertinent contract period .....
4. Costs incurred during the pertinent contract period (List only those costs which are to be reimbursed by DOE or proportionately shared by the parties in accordance with Article A–II(a) and Article A–III.)

Cost categories*	Amount
a. Salaries and wages	$_____
b. Equipment	$_____
(List separately the cost of each piece the equipment separately listed in Appendix A to the agreement or for which separate approval was obtained from DOE.)	
c. Travel	$_____
(Show amounts for both foreign and domestic. If none, state none.)	
Foreign	$_____
Domestic	$_____
d. Other direct costs	$_____
e. Total direct expenditures	$_____
f. Indirect charges	$_____

APPENDIX C.—STATEMENT OF COST—Continued

(Indicate percent and expenditures to which percent is applied.)

5. Total costs for items under Article A–II(a) for pertinent period ..... $_____
6. Government costs for the pertinent period set forth in Appendix A, as defined in Article B-XXIX, chargeable to DOE for the pertinent period (percent of total costs using percent shown in Article A–III of Appendix A) for pertinent period of ..... $_____
7. Cumulative Government cost (Government cost under this statement plus Government costs for previous periods ..... $_____
8. Accumulated Government ceiling in Article III ..... $_____
9. The difference between lines 7 and 8 ..... $_____
10. Provide information regarding contributions by the Contractor of items in Article A–II(b) of Appendix A during pertinent period. State the extent of the Contractor's actual contribution, the measure of such contributions should be in the same terms as the Contractor's commitment under Article A–II(b), e.g., time, dollar, etc ... $_____
11. Actual outstanding commitments for property at the end of the period covered by this statement ..... $_____

I hereby certify that this report is true and correct to the best of my knowledge and belief and that the costs listed herein were incurred in connection with the performance of the research provided for under this contract and in accordance with the terms and conditions set forth therein

.....
(Name and Title of an Authorized Representative)

.....
(Signature) (Date)

*The listing of categories should be consistent with the itemization in Appendix A.

Supart 917.72—Program Opportunity Notices for Commercial Demonstrations

917.7200 Scope of subpart.

(a) This subpart establishes procedures for the submission, evaluation, and selection for award or support of proposals offered in response to program opportunity notices (PONs) issued by DOE to accelerate the demonstration of the technical feasibility and commercial application of all potentially beneficial non-nuclear energy sources and utilization technologies.

(b) As a result of a PON, a contract, grant or cooperative agreement may be entered into. If the intended relationship is expected to be a contract this regulation shall be followed. If the intended relationship is expected to be a financial assistance instrument the DOE Assistance Regulations (DOE–AR) shall be followed. Specifically, DOE-AR 600.233 (10 CFR Part 600.233) will apply if the intended relationship is expected to be a cooperative agreement. In any event, any public notice, solicitation, or request for applications or proposals should indicate whether the intended relationship will be one of acquisition or assistance and state that acquisition regulation will govern if an acquisition contract is entered into and that the assistance regulation will govern if a financial assistance instrument is utilized.

(c) This subpart applies to demonstrations performed by individuals, educational institutions, other commercial or industrial organizations, or other private entities, or by public entities, including State and local governments, but not other Federal agencies. For purposes of this subpart, commercial demonstration projects include demonstrating technological advances and field demonstrations of new methods and procedures, and demonstration of prototype commercial applications for the exploration, development, production, transportation, conversion, and utilization of non-nuclear energy resources.

917.7201 Policy.

917.7201–1 General.

(a) It is DOE's intent to encourage the submission of proposals to accelerate the demonstration of the technical, operational, economic, and commercial feasibility and environmental acceptability of particular energy technologies, systems, subsystems, and components. Program opportunity notices will be used to provide information concerning scientific and technological areas encompassed by DOE's programs. DOE shall, from time to time, issue program opportunity notices for proposals for demonstrations of various forms of non-nuclear energy and technology utilization.

(b) Synopsis of the notice shall be published in the Commerce Business Daily prior to release. In addition, the notice shall be circulated directly to potentially interested individuals, private and public entities (excluding Federal agencies) and associations thereof to the maximum extent feasible. Special attention in this regard should be given to small business concerns, small disadvantaged concerns, and women-owned small business concerns to insure that they are given every opportunity to participate in such acquisitions. Consideration should be given to distributing the notice to all eligible entities which, during the preceding two years, have expressed an interest in participating in, or entering into arrangements for, commercial demonstration in the particular energy field.

917.7201–2 Determination to use and approval of content.

(a) *Determination to use.* (1) Before the PON is selected as the appropriate solicitation procedure the Head of the Contracting Activity expected to issue the notice will be consulted to assure that the PON is the appropriate solicitation method. A written program determination shall be made to show that the conditions in 917.7201–3 exist to support the conclusion that the use of the PON procedure is both necessary and appropriate. The determination must not be merely conclusive but shall be supported by specific facts and explanations.

(2) The Senior Program Official or designee may approve the determination.

(3) The approved determination shall be included in the PON file.

(b) *Approval of content.* (1) When the dollar amounts are less than Source Evaluation Board (SEB) level, a PON may be originated at whatever level is consistent with the program objectives established by the Senior Program Official. When a source evaluation board is not required, notices may be approved by the Senior Program Official or designee after prior concurrence by Counsel.

(2) When an SEB is required, notices shall be reviewed and approved by the SEB after prior concurrence by Counsel, and the Senior Program Official or designee.

(3) All PONs shall be issued by the cognizant Head of the Contracting Activity or designee.

917.7201–3 Federal support criteria.

In determining the appropriateness of DOE involvement through the PON mechanism in any particular area of demonstration activity, consideration shall be given to the extent to which the proposed undertaking meets Federal support criteria including, but not limited to, the following:

(a) The urgency of public need for the potential results of the research, development, or demonstration effort is high, and it is unlikely that similar results would be achieved in a timely manner in the absence of Federal assistance;

(b) The potential opportunities for non-Federal interests to recapture the investment in the undertaking through the normal commercial utilization of proprietary knowledge appear inadequate to encourage timely results;

(c) The extent of the problems treated and the objectives, sought by the undertaking are national or widespread in their significance;

(d) The opportunities to induce non-Federal support of the undertaking through regulatory actions, end-use controls, tax and price incentives, public educations, or other alternatives to direct Federal financial assistance are limited;

(e) The degree of risk of loss of investment inherent in the research is high, and the availability of risk capital to the non-Federal entities which might otherwise engage in the field of the research is inadequate for the timely development of the technology;

(f) The research, development, and application objectives anticipated by the activities or facilities proposed, support national interests or objectives;

(g) The economic, environmental, and societal significance which a successful demonstration may have for the national fuels and energy system; and

(h) The availability of non-Federal participants to construct and operate the facilities or perform the activities associated with the proposal and to contribute to the financing of the proposal.

917.7201-4 Information to be included in program opportunity notices.

Each program opportunity notice shall include:

(a) The goal of the intended demonstration effort;

(b) A time schedule for submission of, and action on, proposals;

(c) Evaluation criteria, including an indication, when determined practicable to do so, of the approximate cost and time duration contemplated for individual projects resulting from the notice;

(d) Program policy factors.

(e) A statement that additional information, consistent with the overall concepts and approaches developed in the proposal, may be required regarding the statement of work and the proposed budget (e.g., a notice that a detailed cost breakdown may be required from the proposers being considered);

(f) Such other information, terms, or conditions that shall apply to the particular program opportunity notices;

(g) A place and manner of submission; and

(h) A late proposal provision (see FAR 15.412).

917.7201-5 Information to be provided in proposals offered pursuant to program opportunity notices.

(a) Name and address of the entity(ies) submitting the proposals;

(b) Date of preparation of submission;

(c) Type of entity(ies) (public, including State and local governments, and private, including profit and nonprofit organizations and educational institutions);

(d) Representations and certifications as specified in the notice; and

(e) Concise title and abstract of the proposed demonstration project for which assistance or participation is being sought.

(f) An outline and discussion of the proposed demonstration which shall, if applicable and to the extent possible, specifically address and reference the evaluation criteria and include:

(1) Specification of the technology;

(2) Proposed statement of work to be performed;

(3) Description of prior operation experience with the technology;

(4) Preliminary design of the demonstration plan;

(5) Time tables containing proposed construction or fabrication and installation and operation plans;

(6) Budget-type estimates of construction or fabrication and operation costs;

(7) Description and proof of title to land for proposed site, natural resources, electricity and water supply, and logistical information related to access to raw materials to construct and operate the plant and dispose of salable products from the plant;

(8) Assessment of the environmental impact of the proposed plant and plans for disposal of wastes resulting from the operation of the plant;

(9) Plans for continued use of the technology if the demonstration is successful;

(10) Plans for continued use of the plant if the demonstration is successful;

(11) Plans for dismantling of the plant if the demonstration is unsuccessful or otherwise abandoned;

(12) Form and amount of assistance or participation being sought;

(13) Form and amount of funding, or other contribution to be provided by the proposer, including proposed disposition of revenues generated; and,

(14) The extent to which the proposed expenditures would constitute permanent (nonseverable) improvement to property now owned by the Government; and proposed plans for the disposal (through acquisition by the offeror or otherwise) of any such improvements.

The information called for under this section relates primarily to a demonstration project involving the construction and operation of a "plant." In instances where the proposed project concerns a demonstration that does not involve a plant (for example, the demonstration of a process, apparatus, or device), the program opportunity notice shall state what additional information is to be submitted with the proposal;

(g) Names of key personnel to be involved, brief biographical information, including relevant experience;

(h) A current financial statement;

(i) The period for which proposal is valid;

(j) Names and telephone numbers of proposer's primary business and technical personnel whom DOE may content during evaluation or negotiation;

(k) Each proposal containing technical data or proprietary or business confidential information, which the proposer intends to be used by DOE for evaluation purposes only, should be marked on the cover sheet with the legend prescribed in 927.402–3(d); and

(l) Signature and title of official of the proposing organization authorized to contractually obligate such organization

917.7202-1 Forms of assistance and participation.

(a) In providing for demonstration, DOE may utilize various forms of Federal assistance and participation. These include but are not limited to:

(1) Contracts;

(2) Grants;

(3) Loans;

(4) Incentives, including financial awards, to individual inventors;

(5) Joint Federal-industry demonstration corporation;

(6) Federal purchase(s) or guaranteed price of the products of the demonstration project; and

(7) Cooperative agreements.

917.7202-2 Cost participation.

The provisions of DOE's cost participation policies contained in 917.70 shall apply, as applicable, to proposals hereunder.

917.7203-2 Method and criteria for evaluation and selection.

(a) *General policy.* (1) Information contained in proposals offered in response to PONs shall be handled in accordance with the policies and procedures set forth in 927.402–3(d) pertaining to the marking and handling of proprietary data.

(2) Late proposals, modifications of proposals, and withdrawals of proposals shall be handled in accordance with FAR 15.412.

(b) *Selection.* (1) When the aggregate of expected award values, plus costs shared by the performer and/or other parties, together with later phases of the same project, is expected to meet the SEB dollar threshold, comprehensive evaluation shall be conducted by a specially constituted board which shall follow procedures and documentation requirements of the SEB Handbook modified as appropriate to conform to the solicitation process as set forth herein.

(2) When the aggregate of expected award values, plus costs shared by the performer and/or other parties, together with the later phases of the same project

is not expected to meet the SEB dollar threshold, proposals submitted in response to a PON will be evaluated by a panel which shall be appointed by the cognizant program office. The panel should utilize any of the procedures and documentation requirements of the SEB Handbook (as modified as appropriate to conform to the solicitation process as set forth herein) whenever necessary to ensure the impartial, equitable and thorough evaluation of each proposal. The panel will be composed of program office and other personnel, including representatives of Procurement, Counsel, and, as deemed appropriate by the appointing official, supplemented by Personnel from other Government agencies. The representative of Counsel will be an ex-officio (nonvoting) member of the panel. Personnel from DOE management or operating contractors may be used as advisors to the panel when their services are necessary and available as long as the approvals and procedures in 927.70 and 915.613(f) are followed.

(c) *Evaluation criteria.* The evaluation criteria shall be specified in the notice along with a narrative description of their relative importance. The criteria below, to the extent applicable, as well as any additional criteria stated in the program opportunity notice, shall be considered:

(1) The overall technical feasibility of the proposed effort;

(2) The contribution which the proposed effort is expected to make to DOE in carrying out its program responsibilities, including, but not limited to, solving energy extraction and storage, transportation, conversion, waste utilization, and conservation problems;

(3) The capabilities, related experience, facilities, instrumentation, or techniques which the proposer possesses and offers, and which are considered to be integral factors for achieving the objective(s) of the proposal;

(4) The qualifications, capabilities, experience, and availability of the proposed key personnel;

(5) The ability of the proposer to furnish necessary financial support;

(6) Project and financial plans for management of the activities including the adequacy of proposed arrangements among all participants;

(7) Plans for involvement of the small business community;

(8) Cost realism and probable cost to the government.

(d) *Program policy factors.* Program policy factors are those factors which, while not appropriate indicators of a proposal's individual merit (i.e., technical excellence, proposer's ability, cost, etc.), are relevant and essential to the process of choosing which of the proposals received will, taken together, best achieve the program objectives. All such factors shall be predetermined and specified in the notice so as to notify proposers that factors which are essentially beyond their control will affect the selection process. The following are examples of possible program policy factors:

(1) It is desirable, because of the nature of the energy source, the type of projects envisioned, or limitations of past efforts, to select for award or support a group of demonstration projects with a broad or specific geographic distribution;

(2) It is desirable to select for award or support (for reasons that must be stated) projects from diverse types and sizes of proposing organizations;

(3) It is desirable to select for award or support a group of projects which represents a diversity of methods, approaches, applications, or kinds of work; and

(4) It is desirable, due to the nature of certain projects or proposing organizations, to select for award or support duplicative or complementary efforts or projects.

(e) *Selection official.* The selection official will be as provided in 915.

(f) *Preliminary review.* (1) Prior to making a comprehensive evaluation of a proposal, the SEB, or the receiving office when an SEB is not required, shall determine that it:

(i) Contains sufficient technical, cost, and other required information to enable comprehensive evaluation; and

(ii) Has been signed by a responsible official of the proposing organization or a person authorized to obligate such organization.

(2) If the proposal does not meet these requirements, a comprehensive evaluation shall not be made. In such a case, a prompt reply shall be sent to the proposer, indicating the reason(s) for its not being selected for award or support under the PON.

(g) *Comprehensive evaluation.* The basic task in the evaluation and selection of proposals for award or support is to assess their relative merit in order to determine which of them offers the greatest likelihood for achievement of the program objectives stated in the notice, considering technical quality, ability of the proposer, estimated cost, and other relevant factors. Proposals which survive preliminary review shall be evaluated by an SEB or a panel, as applicable, in accordance with the criteria stated in the notice. The Source Selection Official will select proposals for support or award from the findings established by the SEB or panel, as applicable. In this latter process, the selection official will take into account the relevant program policy factors in order to determine the mix of proposed projects which will best further specific program goals. All findings and selections are to be documented, signed, and maintained to provide an adequate record of the proceedings.

917.7204 Award or support.

While only those proposals which further the needs of the program as specified in the notice will be considered for award or support, DOE may accept for award or support all, none, or any number or part of the proposals submitted.

917.7205 Unsolicited proposals for commercial demonstrations.

See 915.503.

§ 917.7206 Optional two-step method.

Where a large number of proposals are anticipated, proposals may be limited to technical considerations with cost proposals subsequently requested from those proposers whose technical proposals are evaluated as technically acceptable.

Subpart 917.73—Program Research and Development Announcements

§ 917.7300 Scope of subpart.

(a) This subpart establishes procedures for the submission, evaluation, and selection for award or support of proposals offered in response to specific program research and development announcements (PRDAs) issued by DOE to conduct research, development, and related activities in the energy field.

(b) As a result of a PRDA, a contract, grant or cooperative agreement may be executed. If the intended relationship is expected to be a contract this regulation shall be followed. If the intended relationship is expected to be a financial assistance instrument the DOE Assistance Regulations (DOE–AR) shall be followed. Specifically, DOE–AR 600.234 (10 CFR 600.234) will apply if the intended relationship is expected to be a cooperative agreement. In any event, any public notice, solicitation, or request for applications or proposals should indicate whether the intended relationship will be one of acquisition or assistance and state that the DEAR will govern if a contract is entered into and that the DOE–AR will govern if a financial assistance instrument is utilized.

(c) This subpart applies to efforts by the DOE to conduct, or participate in joint or cooperative projects for research, development, and related activities with individuals, private entities (including educational institutions, nonprofit organizations, and commercial industrial organizations), or public entities (including State and local governments, but not Federal agencies), provided, however, that the conditions set forth in 917.7301–1(c) exist.

§ 917.7301 Policy and prerequisites.

§ 917.7301–1 General.

(a) PRDAs shall be used to provide potential proposers with information concerning DOE's interest in entering into arrangements for research, development, and related projects in specified areas of interest. It is DOE 's intent to solicit the submission of ideas which will serve as a basis for research, development, and related activities in the energy field. It is DOE's desire to encourage the involvement of small business concerns, small disadvantage business concerns, and women-owned small business concerns in research and development undertaken pursuant to PRDAs.

(b) The PRDA should not replace existing acquisition procedures where a requirement can be sufficiently defined for solicitation under standard advertised or negotiated acquisition procedures. Similarly, it should not inhibit or curtail the submission of unsolicited proposals. However, a proposal which is submitted as though it were unsolicited but is in fact germane to an existing PRDA shall be treated as though submitted in response to the announcement or returned without action to the proposer, at the proposer's option. Further, the PRDA is not to be used in a competitive situation where it is appropriate to negotiate a study contract to obtain analysis and recommendations to be incorporated in the subsequent request for proposals.

(c) The PRDA is to be used only where:

(1) Research and development is required within broadly defined areas of interest to support program goals but it is difficult, if not impossible, to describe in any reasonable degree of detail the nature of the work contemplated because of:

(i) The multiplicity of possible approaches, within the current state of the art, available for solving the problems;

(ii) The desirability of involving a broad spectrum of organizations in seeking out solutions to the problems, posed;

(iii) The expectation that many individual proposers will have unique qualifications or specialized capabilities which will enable them to perform portions of the research or development program (without necessarily possessing the qualifications to perform the entire program) so that the overall support may be broken into segments which cannot be ascertained in advance; and

(iv) The desirability of fostering new and creative solutions;

(2) Consistent with (c)(1) above, it is anticipated that choices will have to be made among dissimilar concepts, ideas, or approaches; and

(3) It is determined that a broad range of organizations exist that would be capable of contributing towards the overall research and development goals identified in (c)(1) above.

(d) The PRDA shall be synopsized in the Commerce Business Daily prior to release. The announcement shall also be circulated directly to interested individuals, private and public entities (excluding Federal agencies), and associations thereof to the maximum extent feasible.

§ 917.7301–2 Determination to use and approval of content.

(a) *Determination of use.* (1) Before the PRDA is selected as the appropriate solicitation procedure, the Head of the Contracting Activity expected to issue the announcement shall consult with requiring program office to assure that the PRDA is the appropriate solicitation method. A written program determination shall be made to show that the conditions in 917.7301–1(c) exist to support the conclusion that use of the PRDA procedure is both necessary and appropriate. The determination must not be merely conclusory but shall be supported by specific facts and explanations.

(2) [Reserved]

(3) The approved determination shall be included in the PRDA file.

(b) *Approval and content.* (1) A PRDA may be originated at whatever level is consistent with the program objectives established by the Senior Program Official.

(2) The PRDA content must be approved by the Senior Program Official or designee after prior concurrence by Counsel, and the Procurement Director of the office assigned to issue the PRDA.

(3) All PRDAs will be issued by the Head of the Contracting Activity or designee.

§ 917.7301–3 Information to be included.

Each PRDA shall include:

(a) A summary of the area(s) of program interest, expanded as appropriate, to include problems and objectives;

(b) A time schedule for submission of, and action on, proposals;

(c) Information to be provided in the proposals;

(d) Evaluation criteria;

(e) Program policy factors;

(f) Other information, terms and conditions which shall apply to the particular PRDA;

(g) Place for, and manner of, submission;

(h) A unique number for identification purposes;

(i) A statement notifying potential proposers that an announcement does not commit DOE to pay any proposal preparation costs and that DOE reserves the right to select for award or support any, all, or none of the proposals received in response to an announcement, and

(j) A late proposal provision (see FAR 15.412).

§ 917.7301–4 Information to be provided in proposals.

(a) All proposals should be specific, concise, and require inclusion, as appropriate, the following information:

(1) Name and address of the entity(ies) submitting the proposal;

(2) Date of proposal submission;

(3) Identification of the PRDA (by number and title) to which the proposal responds;

(4) Type of entity(ies) submitting the proposal, whether public (including State and local governments), or private (including profit and nonprofit organizations and educational institutions);

(5) Concise title and abstract of the proposed project or effort;

(6) An outline and narrative of the proposed effort which shall specifically address and reference the evaluation criteria and, to the extent possible, include:

(i) Objectives of the proposed effort;

(ii) Detailed plan of approach (procedures, concepts, limitations, timetables of key milestones, and expected accomplishments or research results);

(iii) Internal management controls applicable to conduct of the work;

(iv) Scope and methods of management support;

(v) Details concerning previous or ongoing work performed in the category(ies) of research proposed, or in related fields;

(vi) Form and amount of funding, or other contribution, if any, to be provided by the proposer;

(vii) Location where the work will be performed;

(viii) Cost schedule detailing estimated costs for manpower and other resources (SF 1411 with supporting data as described at FAR 15.804–6); and

(ix) Projected date of completion of the proposed effort;

(7) Resumes of key personnel to be involved which include a description of relevant experience and associated dates;

(8) A current financial statement;

(9) Period for which the proposal is valid (if other than that stipulated in the announcment);

(10) Names and telephone numbers of proposer's primary business and technical personnel whom DOE may contact during evaluation; and

(11) Signature and title of an official of the proposing organization(s) authorized to obligate such organization(s).

(b) Proposer should be advised that if a proposal will contain proprietary data or privileged business information which the proposer intends to be used by the DOE for evaluation purposes only shall be marked on the cover sheet with the notice prescribed in 927.402–3(d).

(c) Representations, certifications and acknowledgements required by law or regulation shall also be submitted as specified in the announcement.

917.7302 Cost participation.

The provision of DOE's cost participation policy in 917.70 shall apply, as applicable, to proposals submitted in response to PRDA's.

917.7303 Method and criteria for evaluation and selection.

(a) *General policy.* (1) Information contained in proposals offered in response to PRDAs shall be handled in accordance with the policies and procedures set forth in 927.402–3(d) pertaining to the marking and handling of proprietary data and privileged business information.

(2) Late proposals, modifications of proposals, and withdrawals of proposals shall be handled in accordance with FAR 15.412.

(b) *Selection panel.* A panel appointed by the cognizant program office will evaluate proposals submitted in response to a PRDA. The panel will be composed of program office and other personnel, including representatives from Procurement, Counsel, and, as deemed appropriate by the appointing official, supplemented by personnel from other Government agencies. The representative of Counsel will be an ex-office (nonvoting) member of the panel. Personnel fro.n prime management or operating contractors may be used as advisors to the panel when their services are necessary and available as long as the approvals and procedures in 927.70 are followed.

(c) *Evaluation criteria.* The evaluation criteria shall be specified in the announcement along with a narrative description of their relative importance. The following items are illustrative of the elements which may be considered as evaluation criteria:

(1) Overall technical feasibility of the proposed effort;

(2) Adequacy and relevance of the proposed research plan, including validity tests as related to the proposed goals;

(3) The capabilities, related experience, facilities, instrumentation, or techniques which the proposer possesses and offers, and which are considered to be integral factors for achieving the objective(s) of the proposal:

(4) The qualifications, capabilities, experience, and availability of the proposed key personnel;

(5) The ability of the proposer to furnish necessary financial support;

(6) Project and financial plans for management of the activities including the adequacy of proposed arrangements among all participants.

(7) Plans for involvement of the small business community.

(8) Cost realism and probable cost to the government.

(d) *Program policy factors.* Program policy factors are those factors which, while not appropriate indicators of a proposal's individual merit (i.e., technical excellence, proposer's ability, cost, etc.) are relevant and essential to the process of choosing which of the proposals received will, taken together, best achieve the program objectives. All such factors shall be predetermined and specified in the announcement so as to notify proposers that factors which are essentially beyond their control will affect the selection process. The following are examples of possible program policy factors:

(1) It is desirable, because of the nature of the energy source, the type of projects envisioned, or limitations of past efforts, to select for award or support a group of projects with a broad or specific geographic distribution;

(2) It is desirable to select for award or support (for reasons which must be stated) projects for diverse types and sizes of proposing organizations;

(3) It is desirable to select for award or support a group of projects which represent a diversity of methods, approaches, applications, or kinds of work; and

(4) It is desirable, due to the nature of certain projects or proposing organizations, to select for award or support duplicative or complementary efforts or projects.

(e) *Selection official.* The selection official will be as provided in 915.612.

(f) *Preliminary review.* (1) Prior to making a comprehensive evaluation of a proposal, the selection panel shall determine that it:

(i) Contains sufficient technical, cost, and other required information to enable comprehensive evaluation; and

(ii) Has been signed by a responsible official of the proposing organization or a person authorized to obligate such organization.

(2) If the proposal does not meet these requirements, a comprehensive evaluation shall not be made. In such case, a prompt reply shall be sent to the proposer, indicating the reason(s) for its not being selected for award or support under the PRDA.

(g) *Comprehensive evaluation.* The basic task in the evaluation and selection proposals for award or support is to assess their relative merit in order to determine which of them offer the greatest likelihood for achievement of the program objectives stated in the announcement, considering technical quality, ability of the proposer, estimated cost, and other relevant factors. Proposals which survive preliminary review shall be evaluated by the panel in accordance with the criteria stated in the announcement. The Source Selection Official will select proposals for support or award from the findings established by the panel. The selection official will take into account the relevant program policy factors in order to determine the mix of proposed projects which will best further specific program goals. All findings and selections are to be documented, signed, and maintained to provide an adequate record of the proceedings.

917.7304 Award or support.

While only those proposals which best further the needs of the program as specified in the announcement will be considered for award or support, DOE may accept for award or support, all, none, or any number part of the proposals submitted.

Subpart 917.74—Acquisition, Use, and Disposal of Real Estate

917.7400 Scope of subpart.

This subpart addresses DOE policies and procedures to be applied in DOE cost-type contracts which include authorization to acquire, use, and

dispose of real estate or interest therein for the performance of a contract or contracts; and, DOE assumes liability for, or otherwise will pay, or may be expected to pay, for the acquired real estate as a reimbursable contract cost.

917.7401 General.

Ordinarily Government agencies are not directly concerned with the real estate management procedures for fixed price or cost-type contractors. However, special circumstances and situations arise under cost-type contracts when, in the performance of their contract or subcontract, the performer shall be required, or otherwise find it necessary, to acquire real estate or interests therein by:

(a) Purchase, on DOE's behalf or in its own name, with title eventually vesting in the Government.

(b) Lease, and DOE assumes liability for, or otherwise will pay for the obligation under the lease.

(c) Acquisition of temporary interest through easement, license or permit, and DOE funds the cost of the temporary interest.

917.7402 Policy.

It is the policy of the Department of Energy that when the real estate acquisitions described in 917.7401 are made, the following policies and procedures shall be applied to such acquisitions:

(a) Real estate acquisitions shall be mission essential; effectively, economically, and efficiently managed and utilized; and disposed of promptly, when not needed;

(b) Acquisitions shall be justified, with documentation which describes the need for the acquisitions, general requirements, cost, acquisition method to be used, site investigation reports, site recommended for selection, and property appraisal reports; and

(c) Acquisition by lease, in addition to the requirements in paragraphs (a) and (b) of this section:

(1) Shall not exceed a one-year term if funded by one-year appropriations.

(2) May exceed a one-year term, when the lease is for special purpose space funded by no-year appropriations and approved by the Department.

(3) Shall contain an appropriate cancellation clause which limits the Government's obligation to no more than the amount of rent to the earliest concellation date plus a reasonable cancellation payment.

(4) Shall be consistent with Government laws and regulations applicable to real estate management.

917.7403 Application.

(a) The Officer of Project and Facilities Management is the Headquarters contact point for Departmental policies and procedures governing the acquisition, use, and disposal of the Department's real estate or interests therein. Real estate interests include purchases, leases, easements, permits and licenses.

(b) It is the contracting officer's responsiblilty to coordinate with the Office of Project and Facilities Management when contractor real estate acquisitions meet the criteria set forth in 917.7401 in order to assure that appropriate procedures are followed by the contractor.

(c) The clause at 952.217–70 will be included in contracts or modifications where contractors acquisitions are expected to meet the criteria specified in this subpart.

917.7404 Competition.

(a) Contracting officers shall make certain that solicitation documents:

(1) Require proposals to specify additional facilities and equipment which must be acquired for contract performance, the estimated cost of individual items, and whether acquisition of such property will be financed by the prospective contractor or whether the Government will be requested to provide the required items.

(b) Explain whether it is the Government's intention to provide property, when it is known prior to solicitation that contract performance will require additional facilities or equipment.

(c) Require prospective contractors to:

(i) List items (including dollar value) of Government-owned property in the offerors possession which is proposed to be used in performance of the prospective contract;

(ii) Identify the contract or other instrument under which the property is accountable; and

(iii) Present written permission to use such property in the performance of the prospective DOE contract from the Government contracting officer having cognizance of the property.

(d) Include a statement that the user will assume all costs related to making the property available for use (e.g., transportation, installation, rehabilitation, modification, etc.) unless the Government is to assume such costs.

(e) Include a statement which explains the consideration to be given Government property during evaluation of bids and proposals. This is insure that all prospective bidders and offerors understand that Government property will be an important consideration in evaluating their bids and proposals.

Subpart 917.75—Multiple Awards-Phased Acquisitions

917.7500 Scope of subpart.

Some projects lend themselves to the use of multiple phase, parallel contracts. The basic decision in regard to the use of multiple awards for phased acquisitions will be made by the program office based on technical, schedule, and cost considerations. In the first phase, more than one contractor may undertake a design effort. For the second and succeeding phases, one or more contractors may then be selected from the preceding phase's participants. Since there is an important selection decision to be made at the end of any phase, explicit evaluation and selection procedures will be made known to the contractors prior to competitive selection for succeeding phases.

917.7501 RFP provisions.

Where multiple awards for phased acquisitions are contemplated, requests for proposals (RFPs) for the initial phase shall include:

(a) Notice that the initial negotiated contract will be for Phase I only; however, the Government reserves the right to require a proposal(s) for additional phases of the project as defined in the provisions of the RFP.

(b) If appropriate, notice that competition on subsequent phases will be restricted to the Phase I contractor(s).

(c) Evaluation and qualification criteria should not ordinarily be restricted to Phase I consideration only, but rather should be designed to assure that selected offerors have the requisite technical, management and financial capacity to compete for and perform all phases.

(d) A requirement that each contractor submit a proposal to perform subsequent phases. Instructions for proposal submission and the evaluation criteria to be used in the selection of contractor(s) for subsequent phases will be provided to the Phase I contractors, by letter, as early as possible and at least 90 days prior to the date for submission of proposals.

(e) A requirement of each Phase I, or subsequent phase, contractor to submit a comprehensive report covering actual and projected accomplishments under the present phase. This information will be used in addition to the proposal and the Government's assessment of contractor performance in the evaluation and selection process for subsequent phases. The report shall, as

a minimum address the technical, schedule, and cost aspects of the phase of work now under contract.

917.7502 Evaluation.

(a) The contracting officer or other source selection official as appropriate, shall establish an evaluation team sufficiently in advance of the Phase II proposal due date. The evaluation team shall consist of a chairman from the program office and representatives of procurement and other DOE programmatic or functional areas as appropriate. Counsel will be included as a non-voting advisory member of the evaluation team as deemed appropriate.

(b) The evaluation team will develop the evaluation criteria and proposal instructions to be furnished to the contractors. The purpose of the evaluation is to select that or those offerors which best satisfies the DOE requirements for successful completion of the project. The evaluation shall consider such factors as technical, price, programmatic and other requirements. The evaluation process shall be accomplished in an impartial, equitable, comprehensive, and timely fashion to assure the selection of one or more organizations, which offer the best possibility for successful performance, cost and other factors considered. It is contemplated that the initial phase of multiphase parallel contracts awarded under these procedures will be performed in the same timeframe so that a single competitive evaluation and selection can be accomplished at one point in time. Accordingly, the contracts should contain provisions permitting the Government to synchronize contractor Phase I performances through acceleration or deceleration, as is appropriate, to achieve simultaneous completion of the Phase I activities by all firms under consideration. A thorough and detailed evaluation shall be completed so as to provide the basis on which the best selection can be made.

PART 919—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

Subpart 919.2—Policies

Sec.
919.201 General policy.

Subpart 919.5—Set-Asides for Small Business

919.501 General.
919.502–2 Total set-asides.
919.503 Setting aside a class of acquisitions.

Subpart 919.7—Subcontracting With Small Business and Small Disadvantaged Business Concerns

919.705–5 Awards involving subcontracting plans.
919.705–6 Postaward responsibilities of the contracting officer.
919.708 Solicitation provisions and contract clauses.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 919.2—Policies

919.201 General policy.

(c) The Director, Office of Small and Disadvantaged Business Utilization (OSDBU), Headquarters, is responsible for the administration of the DOE small and small disadvantaged business programs. This includes responsibility for developing, implementing, executing, and managing these programs, providing advice on these programs, and representing DOE before other Government agencies on matters primarily affecting small and small disadvantaged businesses. Heads of Contracting Activities (HCAs) shall appoint a small business/small disadvantaged business (SB/DB) specialist.

Subpart 919.5—Set-Asides for Small Business

919.501 General.

(c) The Department has established a comprehensive review and screening process for acquisitions over the small purchase threshold. The review is intended to enhance the prospect of participation by small business, small disadvantaged business, and women-owned small business concerns.

919.502–2 Total set-asides.

In considering set-asides in the area of architect engineer contracts, contracting personnel must first consider the special procedures required by the Brooks Act, Pub. L. 92–582 pertaining to this type acquisition.

919.503 Setting aside a class of acquisitions.

By agreement with SBA, the DOE has established a class set-aside for construction acquisitions not exceeding $3 million, including new construction and repair and alteration of structures. Lists of other class set-asides shall be maintained by all DOE contracting offices. These lists shall be updated at least annually.

Subpart 919.7—Subcontracting With Small Business and Small Disadvantaged Business Concerns

919.705–5 Awards involving subcontracting plan.

(b) When the exigencies of the situation prevent obtaining a subcontracting plan prior to the award of a letter contract, the plan shall be obtained prior to definitization.

919.705–6 Postaward responsibilities of the contracting officer.

A copy of the notification to the SBA of awards of contracts, amendments or modifications that contain subcontracting plans, as required by FAR 19.705–6(a), shall be provided to the OSDBU.

919.708 Solicitation provisions and contract clauses.

(b) When using the clause at FAR 52.219–9, Small Business and Small Disadvantaged Business Subcontracting Plan, it shall be modified as specified at 952.219–9. The effect of this modification is to relieve DOE contractors and subcontractors from the burden of submitting the SF295 quarterly report since DOE is able to extract this information from the SF294 report. However, in order to do this, DOE must obtain the SF294 on a quarterly basis rather than semiannually. The modification also requires DOE contractors and subcontractors to indicate, at the "Remarks" section of the form, the number and dollar value of awards to labor surplus area concerns if required by the terms of the contract. Upon receipt of these reports, contracting officers shall input the information to the DOE Subcontracting Data System.

(c) Advance approval of the Procurement Executive, or designee, is required prior to including any small and small disavantaged business concerns incentive subcontracting provision in any solicitation or of this clause in any contract.

PART 920—LABOR SURPLUS AREA CONCERNS

Subpart 920.1—General

Sec.
920.102 General policy.
920.106 Records and reports.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

VOL 49 ISS 61 MR 28 1984

Subpart 920.1—General

920.102 General policy.

Acquisitions shall be reviewed for potential labor surplus area set-aside consideration in accordance with 919.501(c).

920.106 Records and reports.

Records and reports shall be as required by "A Guide to Preparation of DOE Quarterly Procurement and Financial Assistance Reports."

PART 922—APPLICATION OF LABOR LAWS TO GOVERNMENT ACQUISITION

Subpart 922.1—Basic Labor Policies

Sec.
922.103 Overtime.
922.103–4 Approvals.

Subpart 922.4—Labor Standards for Contracts Involving Construction

922.470 Applicability.
922.471 Decisions and other guides in difficult areas.
922.472 Wage determinations.
922.473 Administration and enforcement.

Subpart 922.6—Walsh-Healey Public Contracts Act

922.608–3 Protests against eligibility.
922.608–4 Award pending final determination.
922.608–5 Award.
922.608–6 Postaward.

Subpart 922.8—Equal Employment Opportunity

922.800 Scope of subpart.
922.802 General.
922.803 Responsibilities.
922.804 Affirmative action programs.
922.804–1 Nonconstruction.
922.804–2 Construction.
922.805 Procedures.
922.807 Exemptions.

Subpart 922.70—Special Concerns Affecting Construction Laborers and Mechanics

922.7000 Scope of subpart.
922.7001 Responsibilities.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 922.1—Basic Labor Policies

922.103 Overtime.

922.103–4 Approvals.

(d) *Approvals.* (1) Where the cost to the Government may be affected, approval of hours of work in excess of the normal workweek is justified only in those instances and for those employees where it can be shown that overtime would provide needed and demonstrable impetus to the accomplishment of DOE objectives and that all other means of meeting these objectives have been considered and found inadequate or not feasible. Accordingly, Heads of Contracting Activities shall:

(i) Establish controls to prevent excess casual overtime and to assure that such overtime work is in the best interest of the Government. By casual overtime is meant (A) work in excess of the normal workweek (or in excess of an authorized extended workweek) which cannot be regularly scheduled in advance, or (B) regularly scheduled work in excess of the normal workweek for a period of four consecutive weeks or less; and

(ii) Establish controls to assure that any use of any extended workweek schedule is in the best interest of the Government. Extended workweek means a workweek regularly scheduled and established in excess of the normal workweek for a period in excess of four consecutive weeks.

Subpart 922.4—Labor Standards for Contracts Involving Construction

922.470 Applicability.

(a) Although the statutes required to be followed per FAR 22.400 direction do not contain definitions, the Secretary of Labor's regulations in 29 CFR 5.2 include definitions, of "contract," "building," "work," "construction," "prosecution," "completion," "repair," "public building," and "public work." In general, contracts are classifiable as being covered by the statutes when performance by the contractor consists substantially of the erection or assembly of new plants (including laboratory or other buildings or works), or the alteration and/or repair including painting and decorating, of new and existing plants. The fact that certain contracts may be entered into without regard to general statutory requirements as to advertising for bids or proposals, or upon a cost-reimbursement basis or otherwise, is not determinative in the classification of such contracts, activities, construction projects, or other work or services performed thereunder.

(b) Contracts for servicing or maintenance work are not ordinarily subject to the requirements of this subpart. Maintenance includes the routine, recurring type of work necessary to keep a facility in such condition that it may be continuously used at an established capacity and efficiency for its purpose. However, if such maintenance or service contracts call for substantial and segregable task for construction, alteration or repair, the labor standards provision for construction contracts will be applicable to those items. All contracts in excess of $2,000 for painting of public buildings or public works, whether performed in connection with the original construction or as regular maintenance, are subject to the labor standards provisions for construction contracts.

(c) The requirements that must be followed as a result of FAR 22.4 and other parts of FAR 22 in respect to the Davis-Bacon and Copeland Acts do not apply to the following:

(1) Contracts, regardless of their nature, not in excess of $2,000 (Does not apply to the Copeland Act). However, no item of work, the cost of which is estimated to be in excess of $2,000, shall be artificially divided into portions less than $2,000 for the purpose of avoiding the applicability of the Davis-Bacon Act.

(2) Contracts for furnishing supplies and equipment, including installation, where the installation requires only an incidental amount of work (as defined in paragraph (c) of this section) that would otherwise be considered construction, alteration and/or repair of a public building or public works.

(3) Contracts for servicing or maintenance work in an existing plant, including installation or movement of machinery or other equipment, and plant rearrangement, which involve only an incidental amount of work (as defined in paragraph (e) of this section) that would otherwise be considered construction, alteration and/or repair.

(4) Contracts for operational or maintenance activities (e.g., production, research and development, or community services, as distinguished from contracts for construction). In general, these are contracts where performance by the contractor consists primarily of the utilization of existing facilities and the services of personnel to produce materials, conduct research and development, or provide community-type services, and of the use of or maintenance of plant. However, the classification of a contract as a contract for operational or maintenance activities does not necessarily mean that all work and activities at the contract location are not covered, since it may be necessary to separate out work which should be classified as covered. As used in connection with "operational activities," the term "produce" means to manufacture, make, or refine special nuclear or other material; to separate material from other substances in which it is contained; or to make new material. The "materials" includes supplies, articles, or equipment; the term "research and development" means the same as defined in 909.5703(b).

UMI

(5) Contracts to be performed outside the United States and the District of Columbia. (Does not apply to the Copeland Act.)

(6) Contracts for demolition, except when performed as a phase of a covered construction project or when subsequent construction activity at the site being cleared is contemplated.

(7) Contracts with a State or subdivision thereof.

(8) Contracts with railroads for construction services to the extent that the services are performed by railroad employees covered by the Railway Labor Act.

(d) It should be noted, however, that the requirements of FAR Subpart 22.4 do apply to work performed by laborers and mechanics employed by a construction contractor or subcontractor at the site of the work under a contract for the construction, alteration and/or repair, including painting and decorating of public buildings or public works, which is otherwise subject to these Acts whether or not such work would be covered if it were a separate contract.

(e) As used in paragraph (c) (2) and (3) of this section, "an incidental amount of work" is defined to mean work directly related to the installation, movement or rearrangement of equipment or machinery, relatively small in amount, and which does not include changes in a facility affecting its architectural or structural strength, stability, safety, size, or function as a public work.

922.471 Decisions and other guides in difficult areas.

The following are examples of applications of the Davis-Bacon Act to particular situations.

(a) *Land-based prototypes.* (1) The Department of Labor has held that the construction of a full-scale operating prototype of a reactor and all necessary nuclear power components, systems, and propulsion equipment for a submarine is covered.

(2) The Department of Labor has held that assembling and fitting the components of nuclear steam propulsion units in a prototype ship situation into the hull sections, including installation of the pressure vessels, turbo-generator sets, heat exchangers, control wiring, etc., is covered.

(3) A later decision involving the prototype situation in (a)(2) above indicates that the earlier rulings should not be construed as intended to cover all equipment assemblies irrespective of the status of construction and other pertinent factors.

(b) *Paving.* The construction of roads, including grading, and their repair—where such repair includes work in roadbeds before resurfacing, building up shoulders, forming ditches, culverts and bridges, and on the actual resurfacing of roads—is covered. However recurring-type maintenance work, such as patching surfaces, filling chuck holes, patching shoulders, and resurfacing railroad crossings is non-covered. Similarly, patch and maintenance work on a parking lot, the replacement of bumper stops, and the repainting of parking dividers is non-covered.

(c) *Stationary boilers.* The construction, alteration and/or repairs, including installation and rebuilding, of stationary boilers costing in excess of $2,000 for labor and materials is covered. Inspection may reveal a need for replacement of pieces of insulation, individual tubes, or other defective parts. Such minor maintenance, necessary to keep the boiler in safe operating condition, is non-covered.

(d) *Start-up of operating activity after fire or other catastrophe.* Rebuilding of a plant following a catastrophe, such as replacement of structural members, roof trusses, walls, roof, utility services, and process piping is covered. However, where process equipment can be restarted and/or operational activities resumed prior to such rebuilding, the actual work of start-up. including preliminary activity, e.g., cleaning, drying, checking, adjustment, temporary services, and temporary weather protection of equipment, essential to such resumption of operational activity, is non-covered.

(e) *Rehabilitation of facilities.* By contrast with emergency services needed to restore or maintain functional usefulness, as above described, rehabilitiation (e.g., painting, change-out, rearrangement and installation of equipment, replacement or repair of damaged parts of a structure or of building services or equipment) of a facility is covered. In such rehabilitation, the startup of equipment by operating employees is non-covered.

(f) *Painting.* Although painting and decorating are specifically mentioned in the Davis-Bacon Act, painting which is closely integrated within operation and maintenance activities and such repainting as color coding of process lines and service piping (including valves and directional arrows), is non-covered. Likewise, application of various materials for localizing contamination, painting of machine tools to identify degree of contamination, and preventive maintenance such as repainting of machine tools, equipment and plant structures are non-covered when performed with a stable work force employed by the operating contractor.

(g) *Installation, rearrangement of adjustment of equipment.* (1) *During construction.* In the construction of a new facility—whether it is a production plant, a laboratory, or supporting facilities, such as shops and warehouses—an integral part of a construction project is the installation of equipment (including mechanical equipment, building services, instruments, etc.) which permits the facility to be utilized for the purpose intended. Normally, the initial installation, arrangement, adjustment, balancing, calibration, and checking of such equipment is a logical part of the construction contract(s) for completion of the facility and, whether or not included within the scope of such contract(s), is covered.

(2) *Plant start-up.* At the time of the turnover of a DOE facility from construction to operating activities, if the facility is turned over a section at a time, some problems of coverage may arise. Usually, it is essential that final checkout of a plant prior to the start-up of plant operations be performed by personnel of the operating organization and, as such, is not covered. The important thing is to work out a practical plan that will assure: (i) Safe and effective start-up of the facility, (ii) the fulfillment of obligations under applicable statutes, and (iii) uninterruption of continuing construction at the facility.

(3) *Equipment and equipment assemblies.* Although the current construction status of a public building or public work is not the controlling factor as to coverage of supply-installation type contracts, it is a factor to be considered in judging the applicability of the Davis-Bacon Act. The Department of Labor has ruled (Walsh-Healey Rulings and Interpretations No. 3, section 6(b)) that while contracts in excess of $10,000 for equipment, including erection or installation, are subject to the Walsh-Healey Act, they may be also covered under the Davis-Bacon Act where more than an incidental amount (see 922.403–71(c)) of work is involved. Examples given in this ruling include furnishing and installation of mechanical equipment such as elevators or of generators requiring prepared foundations or housing. The Department has indicated that a contract for furnishing the initial installation of piping, wiring, gas exhaust fans, plumbing, sheet metal work, and related activities to install kitchen baking equipment was comparable to the basic plumbing, wiring, and heating contracts and was covered. While such a situation

involves an initial installation, alteration or rearrangement of existing facilities involving such work to accommodate new or different equipment is also covered. Conversely, it follows that where the test of more than an incidental amount of construction is not met, and where the installation, rearrangement or adjustment of equipment is not a logical part of any current related construction project, it is non-covered.

(4) *Telephone and utility systems.* Contracts involving the installation of telephone systems or utilities are not covered when the work is performed by employees of the telephone or utility company supplying the services, and the material and equipment installed are owned by the telephone or utility company. Such installation is considered to be an extension of the utility's services. However, a contract for a telephone central system to be installed by the manufacturer and owned by the United States has been held to be covered. In addition, relocation of utility lines to accommodate construction of a public work is covered.

922.472 Wage determinations.

(a) The Heads of Contracting Activities are responsible for submitting to the Wage and Hours Division, Employment Standards Administration, Department of Labor, Washington, D.C. 20210, all DOE requests for wage determinations, or individual determinations, or extensions or modifications thereto. Requests for such determinations shall be made on Standard Form 308, at least 30 calendar days before they are required for use in advertising for bids or requests for proposals.

(b) In general, the Davis-Bacon Act rates applicable to a contract at the time it is awarded continue in effect during its term regardless of whether it is a fixed-price or cost-reimbursement contract. However it should be noted that:

(1) The minimum wage rates that will be paid to laborers and/or mechanics engaged on jobs which are programmed on a fiscal year or shorter basis are those predetermined by the Secretary of Labor to be prevailing as of the date the program is approved by DOE for performance by the contractor. However, in the event of a substantial addition to the scope of a contract containing a "general or area wage determination," the current "general or area wage determination," including modifications thereto, shall be made applicable to the additional work. It the contract contains a "project area or installation (54A) determination," or an individual determination, and substantial addition to the scope of the contract is made during the fiscal year or shorter basis but more than 120 days from the date of the determination, a new determination is required for the substantial addition. Programmed work will be performed by the contractor under continuing contracts for minor or miscellaneous construction, alteration and/or repair, including painting and decorating.

(2) The minimum wage rates that will be paid to laborers and/or mechanics engaged on subcontracts let by an operating contractor will be those in the wage determination decision of the Secretary of Labor which has been issued in conformance with 29 CFR 1.7.

(c) The **Federal Register** prints general or area wage determinations as they are issued by the Secretary of Labor or designee.

922.473 Administration and enforcement.

(a) The statutes and regulations alluded to in FAR 22.400 impose direct responsibilities for administration and enforcement upon DOE. Therefore, Heads of Contracting Activities and others, consistent with their assignments of responsibilities and delegations of authority, shall assure that DOE contract activities are carried out consistent with these laws and regulations.

(b) Heads of Contracting Activities shall submit (to the Office of Contractor Industrial Relations) reports, recommendations, and requests for ruling and interpretations resulting from following the requirements of FAR 22.400 and 922.400.

Subpart 922.6—Walsh—Healey Public Contracts Act

922.608-3 Protests against eligibility.

When an eligibility determination made by the contracting officer is challenged, this protest shall be handled in accordance with procedures for agency protests against award, except the matter shall be submitted to the Department of Labor for final determination. However, if the eligibility determination challenged pertains to a small business, the protest shall be forwarded to the Small Business Administration for determination.

922.608-4 Award pending final determination.

(a) Award, as contemplated by FAR 22.608-4, may be made only with the approval of the Head of the Contracting Activity.

922.608-5 Award.

The notice required by FAR 22.608-5(b) is to be sent to the appropriate Department of Labor Regional Office in which the contractors place of business is located. Regional Office locations are specified at FAR 22.609.

922.608-6 Postaward.

(c) Any postaward actions of the type discussed at FAR 22.608-6 should be coordinated in advance with the Office of Industrial Relations, Headquarters.

Subpart 922.8—Equal Employment Opportunity

922.800 Scope of subpart.

This subpart implements FAR 22.800. It applies to all DOE contracts and subcontracts.

922.802 General.

922.803 Responsibilities.

(a) The Director, Office of Federal Contract Compliance Programs of the Department of Labor has been delegated authority and responsibility for carrying out the requirements of Executive Order 11246, as amended. In conjunction with the delegation, contracting officers shall be familiar with existing and any updated provisions of 41 CFR Ch. 60, and assist the Department of Labor in its compliance responsibilities. DOE contracting officers will include the applicable Equal Employment Opportunity (EEO)) and Affirmative Action Program (AAP) requirements in their solicitations and obtain the applicable reports of compliance from the Office of Federal Contract Compliance Programs (OFCCP) (when required) prior to awarding of contracts. The provisions of 41 CFR Ch. 60, are applicable to all DOE contracts.

(d) The OFCCP requires that requests for pre-award clearances be directed to the OFCCP Regional Office in which the contractor's facility is (to be) located. If OFCCP finds the contractor in compliance, the contracting officer will be notified. Findings of non-compliance can be communicated to the contracting officer by the OFCCP or Headquarters Director or his designee. The appropriate Regional Office will provide the apporpriate contact point in cases of non-compliance. The Director, Office of Industrial Relations (DOE HQ), when requested, will provide assistance to contracting officers resolving non-compliance issues by providing assistance in obtaining a final decision from the OFCCP.

922.804 Affirmative action programs.

922.804-1 Nonconstruction.

In the event a prospective contractor or subcontractor is entering into its first contract containing the Equal Opportunity clause, the contracting officer shall determine that the prospective contractor understands and appears able to conform to the requirements of the EEO clause.

922.804-2 Construction.

(a) Construction contracts, including cost-sharing contracts, are subject to OFCCP orders applicable in particular areas.

(1) When a proposed nonexempt construction contract is within a geographic area where construction is subject to the provisons of Federal EEO Bid Conditions, Part I or Part II, the solicitation shall contain those bid conditions. The contracting officer shall include in such solicitation a provision that "the offeror shall adhere to the affirmative action plan (bid conditions) set forth in this solicitation."

(2) Lists of areas for which OFCCP has designated specific affirmative action requirements are available through the Procurement Executive. Contracting officers should assure that this list and copies of pertinent orders are made available to all concerned DOE offices and to DOE contractors and construction subcontractors for work to be performed in the specified geographical areas.

(b) *Other nonexempt construction contracts.* (1) When a proposed nonexempt construction contract is not in a "plan area" and is in the amount of $10,000 or more, offerors must agree to comply with the Equal Employment Opportunity clause.

(2) When proposed nonexempt contracts of $1,000,000 or over are not in plan areas and have not been designated as high impact, offerors also must submit to the contracting officer details regarding specific affirmative action steps to be taken by the offeror in connection with all work under the contract. Such details shall include estimates of the percentage of minority group persons expected to be employed in each craft involved in the performance of the contract work. All solicitations for construction contracts shall reference the affirmative action requirements and the offeror's obligation to make good faith efforts to employ women in craft positions.

(3) Pursuant to the OFCCP order dated August 30, 1976, agencies shall develop "Special Bid Conditions" for use on high impact projects in non-plan areas. These special bid conditions will include mandatory goals and timetables for the utilization of minorities. The Procurement Executive using the criteria issued by OFCCP will determine those projects that are "high impact." The contracting officer is responsible for compliance with policies and procedures contained in the OFCCP "Construction Compliance Program Operations Manual." Language for inclusion in solicitations or contracts contained in the manual may be modified, provided all of the requirements are retained. The contracting officer shall develop the goals and timetables and shall confer with the appropriate OFCCP regional office. The Office of Industrial Relations will provide assistance as necessary, when requested. Special bid conditions will be submitted by the contracting officer to the appropriate OFCCP regional office for approval unless otherwise directed by the Procurement Executive. When special bid conditions are applicable, adequate presolicitation lead time should be allowed for submission of the special bid conditions to OFCCP national and regional offices.

(c) An attempt to limit in any major respect the equal opportunity requirements included in an invitation for bids or request for proposals for a construction contract shall constitute grounds for a determination that the offeror does not qualify as a responsible offeror and for rejection of the bid or proposal.

922.805 Procedures.

(b) *Furnishing Posters.* The contracting officer may obtain posters from the Government Printing Office.

922.807 Exemptions.

(c) Contracting officer requests for exemption from EO 11246 should be directed to the Procurement Executive for submission to the Director, OFCCP.

Subpart 922.70—Special Considerations Affecting Construction Laborers and Mechanics

922.7000 Scope of subpart.

This subpart discusses DOE responsibilities and actions regarding DOE construction programs.

922.7001 Responsibilities.

(a) *General.* (1) As collective bargaining arrangements exist generally throughout the construction industry, the wages, hours and working conditions followed for construction laborers and mechanics normally will result from collective bargaining between management and labor. It is important that practices contributing to harmonious labor-management relations prevail throughout the DOE program. All participants in the DOE program, including employees and their unions, have a special and continuing obligation to do their part in accomplishing a stable, efficient construction operation under adequate and reasonable conditions.

(2) In some areas, DOE construction is a minor part of local construction activity, while in other areas DOE construction may, at times, overshadow local construction. Normally, there will be a number of contractors and subcontractors, both cost-type and fixed price, engaged simultaneously on a single large DOE project. It is important that adequate coordination exist among all such contractors in order that similar conditions are provided for all construction employees, in a given classification, at a particular location.

(3) The problem of establishing appropriate conditions for the large projects is complicated by the essential requirements that initial conditions be clearly identified and fixed prior to recruitment of work force. This factor involves applicability of all pertinent Federal statutes, including the Davis-Bacon Act and the Labor Management Relations Act of 1947, as amended (29 U.S.C. 141 et seq.).

(b) *Steps preliminary to the staffing of new cost-reimbursement projects.* Preliminary to the actual recruitment of workers, it is important that sufficient data be accumulated by the field office concerned to reflect area practices accurately. These data should cover in detail the pattern of bargaining in the area; the proportion of the work force employed by employer parties to collective bargaining agreements in relation to the total construction work force; the terms of local area agreements; the extent of conformance with such agreements and any accepted interpretations of them; and a description of practices which may have developed outside of the local agreements. These data will furnish the basis for decision contemplated in (c) and (d) below. Where the data indicate local agreements are adequate for the contemplated work, there may still be areas that need to be filled by additional understandings to attain the desired stability of conditions. The data obtained in the initial survey will also be used in connection with the original Davis-Bacon predetermination.

(c) *Role of project contractor management in collective bargaining.* The DOE expects contractor management engaged in the negotiation and/or administration of collective bargaining agreements to assume

responsibility for assuring conditions which are consistent with the judicious expenditure of public funds, attracting and retaining the skills needed, and giving due consideration to the community's interests and established standards. To meet these responsibilities, it is important that the collective bargaining role to be played by project contractor management be clearly determined in the light of project requirements and local conditions.

(1) In an area where DOE construction does not overshadow total local construction activity, and the majority of construction is performed by members of local contractor associations, the DOE expects that basic conditions for labor on its projects will be negotiated between the local contractor associations and local unions and generally adhered to on construction work in the area. In such situations, DOE contractors will provide for clear identification and application of these local agreements to the DOE work. In such applications, the conditions to be followed will be those which obtain in actual practice in the area covered by the agreement and are consistent with applicable laws, rather than those appearing from a literal interpretation of the language of the agreement. Conditions not covered by local agreements may be provided for as necessary to meet project goals.

(2) In some areas, local agreements may be nonexistent, or inadequate, or the employer parties may not be representative of the employers of the bulk of the labor force in the area. In such event, DOE contractors are expected to carry their share of the responsibility for negotiations and to negotiate directly or in cooperation with others to establish appropriate conditions.

(3) In an area where DOE construction work is of such magnitude as to overshadow local construction, it may be desirable for DOE contractors to negotiate special project conditions (on either a craft or a multi-craft basis) as the best way to meet their obligations to the DOE. Such agreements usually involve the establishment of new bargaining units and are therefore dependent upon the voluntary cooperation of the building trades unions. Normally both the Building Trades Department (AFL–CIO) and the Senior Official, Office of Industrial Relations, should be consulted in respect to any proposed course of action.

(d) *Role of DOE in construction labor relations.* The DOE's role in construction labor relations is one of overall cognizance consistent with DOE's ultimate responsibilities. The scope of the construction program, the complexity of the problems which may arise, and the need for coordination among contractors at the same site are factors which affect the degree of influence exercised by DOE in carrying out the following responsibilities:

(1) To assure that careful advance survey and analysis is made of each contract situation and that the role of the contractor management is in accordance with the considerations in (c) above;

(2) To establish effective machinery for coordination among project contractor management;

(3) With respect to DOE contracts carried out under area practices, to assure that conditions proposed are actually prevalent in the area or have other substantial foundation and that, to the extent consistent with the terms of fixed-price contracts, practices established by fixed-price contractors are not of a character that will destabilize other DOE work;

(4) With respect to DOE contracts carried out under project agreement, both union and management, to take into account all relevant factors pertaining to any conditions peculiar to the project, duration of project, tenure of employment, housing and travel accommodations, length of regular work week, uniformity of shift, special subsidies, etc.;

(5) To encourage contractor officials and representatives of employees to establish similar conditions among all construction employers for each class or classification of employees at a particular location;

(6) To encourage contractor officials and representatives of employees to provide clear identification and application of practices under local agreements, or to make and maintain project agreements on DOE construction projects; and

(7) To encourage contractor officials and representatives of employees to establish reliable working contact between the DOE project contractors and any unions that are cooperating in staffing the job.

(e) *Initial wage rates.* The wage rates initially established under both cost-reimbursement and fixed price contracts will not be less than, and will normally conform to, those determined by the Secretary of Labor pursuant to the requirements of the Davis-Bacon Act. On cost-reimbursement work, the total compensation on the DOE project will be comparable with the total compensation allowed similar workers in an appropriate area of comparison. Where the DOE project is applying the practices under local agreements, the area of comparison normally will be the geographic area within the jurisdiction of each local union cooperating in staffing the project. In this situation, the application of local pratices and agreements will usually be carried out on an item-by-item basis. Where a project agreement has been agreed on as the foundation for project conditions, the area of comparison for each craft should be large enough to provide a sound base which will result in realistic wage rates. In the development of a project agreement, the Office of Industrial Relations should be consulted.

(f) *Adjustments in compensation.* Subject to limitations imposed by applicable labor laws, changes in established wage rates and working conditions under cost-reimbursement contracts may be effected as follows:

(1) Adjustments in wage rates and other job conditions established in project collective bargaining agreements may be effected by the renegotiation or modification of the agreements at appropriate times and by the reopening of existing agreements as provided therein. The Office of Industrial Relations should be consulted as appropriate criteria to follow in review of such reopenings.

(2) In situations where DOE contractors working under cost-reimbursement type contracts apply local established job conditions included in applicable bargaining agreements, adjustments in wages and job conditions may coincide with changes within the locality. Wage rates may be adusted to bring rates into conformity with new rates which are verified as established in the area at the time of their acceptance for DOE work.

(g) *National Joint Board for the Settlement of Jurisdictional Disputes in the Building and Construction Industry.* Construction contractors and representatives of employees are encouraged to settle craft jurisdiction disputes, in accordance with the procedural rules and regulations of the National Joint Board.

(h) *Responsibility of the Office of Industrial Relations.* The Office of Industrial Relations, Headquarters, is responsible for coordinating all activities arising under this subpart, and for maintaining liaison with the Department of Labor, the Building Trades Department (AFL–CIO), and other construction labor and employer organizations.

PART 923—ENVIRONMENT, CONSERVATION, AND OCCUPATIONAL SAFETY

Subpart 923.70—Environmental, Conservation, and Occupational Safety Programs

Sec.
923.7001 Nuclear safety.
923.7002 Contract clauses.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 923.70—Environmental, Conservation, and Occupational Safety Programs

923.7001 Nuclear safety.

(a) The DOE regulates the nuclear safety of its major facilities under its own statutory authority derived from the Atomic Energy Act and other legislation. The DOE also regulates, under certain specific conditions, the use by its contractors of radioactive materials and ionizing radiation producting machines.

923.7002 Contract clauses.

(a) A decision to include or not include environmental, safety and health clauses in DOE contracts shall be made by the contracting officer in consultation with appropriate environmental, safety and health program management personnel.

(b) When work is to be performed at a facility where the DOE will exercise its statutory authority to enforce occupational safety and health standards applicable to the working conditions of the contractor and subcontractor employees at such facility, the clause at 952.223–71 shall be used in such contract or subcontract if conditions (a) (1) through (3), are satisfied:

(1) DOE work is segregated from the contractor's or subcontractor's other work;

(2) The operation is of sufficient size to support its own safety and health services; and

(3) The facility is government-owned, or leased by or for the account of the government.

(c) In facilities not meeting the requirements of 923.7002(b) above and which are a production or utilization facility where there is use or possession of source, special nuclear, or byproduct materials, DOE policy is not to enforce radiological safety and health standards pursuant to the contract or subcontract but rather to rely upon Nuclear Regulatory Commission (NRC) licensing requirements (including agreements with states under section 274 of the Atomic Energy Act). Pursuant to this policy, neither the clause found at 952.223–71 nor 952.223–72 is to be incorporated in the contracts or subcontracts for work at such facilities. Notwithstanding this general policy with respect to facilities not meeting the requirements of paragraph (b) above, the Secretary or his designee may determine in special cases, that DOE needs to enforce radiological safety and health standards pursuant to the contract or subcontract (see paragraph (d) below). When such a determination is made, the clause found at 952.223–72 shall be included in the contract or subcontract.

(d) In facilities not meeting the requirements of either 923.7002(b) or 923.7002(c) above and where there is a machine capable of producing ionizing radiation, it is DOE policy not to regulate such activity where it is adequately regulated by a state or other Federal agency. In such cases, neither clause 952.223–71 nor 952.223–72 shall be incorporated in the contract. Where the contracting officer, with appropriate environmental, safety and health advice determines that no state or other Federal agency exists to adequately regulate the operation and/or use of such machines, the clause found at 952.223–72 shall be included in the contract. The Deputy Assistant Secretary for Environment, Safety and Health shall be consulted to determine if a non-agreement (NRC) state or a facility located in a non-agreement state has been reviewed by any other DOE office to establish that the state agency has the essential authority and resources for enforcing the radiation protection standards. This is to assure reasonable consistency in the assessment of radiation protection in non-agreement states and subsequent use of 952.223–72.

(e) In a situation where the contractor or subcontractor is performing DOE work at more than one location, inclusion of either, or both, 952.223–71 and 952.223–72 may be appropriate. In such cases, the contract or subcontract must include language to specify the extent of applicability of each clause used. For example, with a parenthetical: (Applicable only to work performed at a contractor site which has 952.223–71 or 952.223–72 clause in its contract or subcontract).

PART 924—PROTECTION OF PRIVACY AND FREEDOM OF INFORMATION

Subpart 924.1—Protection of Individual Privacy

Sec.
924.103 Procedures.

Subpart 924.2—Freedom of Information Act

924.202 Policy.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 924.1—Protection of Individual Privacy

924.103 Procedures.

(b)(2) See 10 CFR Part 1008, Records maintained on Individuals (Privacy Act), for the DOE regulations relating to the maintenance or disclosure of information from systems of records on individuals. In addition, see DOE order 1800.1, Privacy Act, for internal DOE procedures to be followed in the establishment and maintenance of systems of records.

Subpart 924.2—Freedom of Information Act

924.202 Policy.

(b) See 10 CFR Part 1004, Freedom of Information for the DOE regulations relating to the availability of DOE records to the public.

PART 925—FOREIGN ACQUISITION

Subpart 925.1—Buy American Act—Supplies

Sec.
925.102 Policy.
925.105 Evaluating offers.
925.108 Excepted articles, materials, and supplies.

Subpart 925.2—Buy American Act—Construction Materials

925.202 Policy.
925.204 Violations.

Subpart 925.5—Payment in Local Foreign Currency

925.501 Policy.

Subpart 925.9—Omission of the Examination of Records Clause

925.903 Conditions for omission.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy of 1954, as amended (42 U.S.C. 2168).

Subpart 925.1—Buy American Act—Supplies

925.102 Policy

(a)(4) Contracting officers may make the determination required by FAR 25.102(a)(4), provided such determination is facutally supported in writing. If the contract is estimated to exceed $1 million, the Head of the Contracting Activity shall approve the determination.

925.105 Evaluating offers.

(c) Proposed awards shall be submitted (in triplicate) through the Procurement Executive, to the Head of the Agency for decisions required by FAR 25.105(c).

925.108 Excepted articles, materials, and supplies.

(b) Suggestions for changes and additions to the FAR 25.108(d) list, with appropriate justifications, shall be submitted to the Procurement Executive.

Subpart 925.2—Buy American Act—Construction Materials

925.202 Policy.

(b) Contracting officers may make the determination required by FAR 25.202(a)(3). If the cost of the materials is expected to exceed $100,000, the Head of the Contracting Activity shall approve the determination.

925.204 Violations.

(d) Contracting officers shall make a complete written report (in triplicate) to the Secretary through the Procurement Executive of each violation of the Buy American Act—Construction Materials clause at 52.225–5.

Subpart 925.5—Payment in Local Foreign Currency

925.501 Policy.

(b) The contracting officer, prior to award of a contract requiring payment to be made in a foreign currency, should ensure that sufficient DOE funds will be available to purchase the foreign currency needed for making such payments.

(c) The contracting officer, when required by applicable financial regulations or directives, may obligate funds in excess of the current contract price, or contract with a financial organization dealing in foreign exchange for the future delivery of the required foreign currency. The official contract file should be appropriately documented to reflect the amount of funds reserved or other actions to be taken in the event additional U.S. dollars are required to make such payments because of an increase in the value of the foreign currency.

Subpart 925.9—Omission of the Examination of Records Clause

925.903 Conditions for omission.

Any proposed determinations and any reports mentioned at FAR 25.903 shall be forwarded to the Procurement Review Office, Headquarters.

PART 927—PATENTS, DATA, AND COPYRIGHTS

Subpart 927.3—Patent Rights Under Government Contracts

Sec.
927.300 General.

Subpart 927.4—Technical Data and Copyrights

927.400 Scope of subpart.
927.401 Definitions.
927.402 Acquisition and use of technical data.
927.402–1 General.
927.402–2 Policy.
927.402–3 Procedures (supply, research, development, or demonstration contracts).
927.403 Negotiations and deviations.

Subpart 927.70—Disclosure of Proposal Information

927.7000 Disclosure outside Government.
927.7001 Proposal information.
927.7002 Treatment of proposal information.
927.7003 Handling notice.
927.7004 Identification of proprietary data in proposals.
927.7004–1 Solicited proposals.
927.7004–2 Solicitations.
927.7004–3 Unsolicited proposals.
927.7005 Required notice of right to request patent waiver.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy of 1954, as amended (42 U.S.C. 2168).

Subpart 927.3—Patent Rights Under Government Contracts

927.300 General.

(a) The provisions of 41 CFR 9–9.1 shall continue in effect; provided, however, that the provisions of 41 CFR 9–9.107–1 through 9–9.107–6 and 9–9.109–6 shall apply only to contracts with other than small business firms and domestic nonprofit organizations which do not fall within the provisions of 35 U.S.C. 202(a) (i), (ii), or (iii). The following sentences shall be substituted for the first sentence of paragraph (j)(2) of the Patent Rights (Long Form) clause of 41 CFR 9–9.107–5(a) and paragraph (e)(2) of the Patent Rights (Short Form) clause of 41 CFR 9–9.107–6:

The contractor will include the clause at 952.227–71 "Patent Rights—Small Business Firms or Nonprofit Organizations" of the Department of Energy Acquisition Regulation 48 CFR Part 952 suitably modified to identify the parties, in all subcontracts regardless of tier, for experimental, developmental, demonstration or research work to be performed by a small business firm or domestic nonprofit organization. In all other subcontracts, regardless of tier, for experimental, developmental, demonstration, or research work, the contractor will include the Patent Rights clause of 41 CFR 9–9.107–5(a) or 41 9–9.107–6 as appropriate, modified to identify the parties.

(b) The clause at 952.227–71 shall be used in contracts with small business firms and nonprofit organizations in accordance with OMB Circular A–124 and Chapter 18 of Title 35 of the United States Code.

Subpart 927.4—Technical Data and Copyrights

927.400 Scope of subpart.

This subpart sets forth DOE's policy, procedures, and instructions for contract clauses with respect to the acquisition and use of technical data and copyrights in contracts or subcontracts entered into, with or for the benefit of the Government.

927.401 Definitions.

"Technical data" means for the purpose of this subpart, recorded information, regardless of form or characteristic, of a scientific or technical nature. It may, for example, document research, experimental, developmental, demonstration, or engineering work or be usable or used to define a design or process or to procure, produce, support, maintain, or operate material. The data may be graphic or pictorial delineations in media such as drawings or photographs, text in specifications or related performance or design type documents, or computer software (including computer programs, computer software data bases, and computer software documentation). Examples of technical data include research and engineering data, engineering drawings and associated lists, specifications, standards, process sheets, manuals, technical reports, catalog item identification, and related information. Technical data, as used in this subpart, do not include financial reports, cost analyses, and other information incidental to contract administration.

"Proprietary data" means for the purpose of this subpart, technical data which embody trade secrets developed at private expense, such as design procedures or techniques, chemical composition of materials, or manufacturing methods, processes, or treatments, including minor modifications thereof, provided that such data:

(1) Are not generally known or available from other sources without obligation concerning their confidentiality;

(2) Have not been made available by the owner to others without obligation concerning their confidentiality; and

(3) Are not already available to the Government without obligation concerning their confidentiality.

"Contract data" means for the purpose of this subpart, technical data first produced in the performance of the contract, technical data which are specified to be delivered under the contract, technical data that may be called for under the Additional Technical Data Requirements clause of the contract, if any, or technical data actually delivered in connection with the contract.

"Unlimited rights" means for the purpose of this subpart, rights to use, duplicate or disclose technical data, in whole or in part, in any manner and for any purpose whatsoever, and to permit others to do so.

927.402 Acquisition and use of technical data.

927.402-1 General.

(a) The provisions herein pertain to research, development, demonstration and supply contracts. Special considerations for contracts for the operation, design, or construction of Government-owned facilities are covered by Subpart 970.27. Under DOE's broad charter to perform research, development, and demonstration work, in both nuclear and nonnuclear fields, and to meet the objectives stated in 927.402-2, DOE has extensive needs for technical data. The satisfaction of these needs and the achievement of DOE's objectives through a sound data policy are found in the balancing of the needs and equities of the Government, its contractors, and the general public.

(b) It is important to keep a clear distinction between contract requirements for the delivery of technical data on the one hand, and rights in technical data on the other. The legal rights which the Government acquires in technical data in DOE contracts [other than "facilities" contracts) are set forth in the Rights in Technical Data [long form) clause of 952.227-75. However, this clause does not obtain for the Government the delivery of any data whatsoever. Rather, known requirements for the technical data to be delivered by the contractor shall be set forth as part of the contract (e.g. in the statement of work). The Additional Technical Data Requirements clause at 952.227-73 may be used along with the clause at 952.227-75 to enable the contracting officer to require the contractor to furnish additional technical data, the requirement for which was not known at the time of contracting. There is, however, a built-in limitation on the kind of technical data which a contractor may be required to deliver under either the contract statement of work or the Additional Technical Data Requirements clause. This limitation is found in the withholding provision of paragraph (e) of the Rights in Technical Data (long form) clause of 952.227-75 which provides that the contractor need not furnish "proprietary data." It is specifically intended that the contractor may withhold "proprietary data" even though a requirement for technical data specified in the statement of work or called for pursuant to the Additional Technical Data Requirements clause would seemingly require the furnishing of proprietary data. This withholding of proprietary data is the primary means by which the contractor may protect its proprietary position.

(c) There are, however, two situations where the Government, or its representative, may need to have limited access to a contractor's proprietary data.

(1) First, paragraph (f) of the Rights in Technical Data (long form) clause gives the contracting officer's representatives the limited right to inspect at the contractor's facility the contractor's proprietary data which were withheld from delivery under paragraph (e) of the clause for the purpose of verifying that such data were properly withheld or to evaluate work performance. In carrying out the inspection, normally the contracting officer's representative is a DOE employee although he may be an employee of a DOE contractor acting under an agreement to treat in confidence the proprietary data to be inspected. However, where the contractor whose data are to be inspected demonstrates that there would be a possible conflict of interest if the inspection were made by such a contractor employee, the contracting officer's representative may be limited to a DOE employee. Paragraph (f) has a built-in exclusion from these inspection rights for "specific items of proprietary data" when they are so specified in the contract schedule. Such exclusions limit even DOE's minimum rights of evaluating contract work performance and verifying that technical data withheld by the contractor is proprietary in fact. Such exclusions should be sparingly used, and only in situations where program personnel stipulate to the fact that DOE has no need for access to the specified items to be excluded from paragraph (f), i.e., that the nondisclosure and nonaccessibility will not adversely affect the DOE program involved. It should also be noted that paragraph (f) permits exclusion of "specific items" of proprietary data and, accordingly, should not be used to exclude classes of technical data or all technical data pertaining to specific items or processes or classes of items or processes.

(2) The second situation, where the Government may have limited access to a contractor's proprietary data, is provided in optional paragraph (g) of the Rights in Technical Data (long form) clause at 952.227-75 Alternate I. When used, optional paragraph (g) provides the Government the right to require the contractor to furnish with limited rights the proprietary data previously withheld under paragraph (e). In this situation, the limited rights in proprietary data and the Government's obligation for limited use and disclosure of such data as set forth in the Rights in Technical Data (long form) clause provides the means by which the contractor protects its proprietary position. Paragraph (g) will be used only where it is determined by DOE that for programmatic reasons there is a need for the delivery of proprietary data to the Government. Where proprietary data is to be delivered under paragraph (g) and subparagraph (a) or (b) of the limited rights legend is to be applied to the data, the contractor may, if he can show the possibility of a conflict of interest regarding disclosure of such data to other contractors, limit or modify subparagraphs (a) or (b) as set forth in 927.402-3(e)(2), to exclude or include certain contractors.

(d) The contractor licensing provisions of optional paragraph (h) at 952.227-75 Alternate II of the Rights in Technical Data (long form) clause enable DOE to require limited licenses in proprietary contract data to be granted to the Government and responsible parties in certain circumstances. Such a license may parallel or supplement the license obtained in background patents under the provisions of paragraph (k) of the Patent Rights clause of 41 CFR 9-9.107-5(a). Paragraph (h) is normally to be included in contracts for research, development or demonstration where it is deemed by DOE that the limited license afforded therein is necessary to ensure widespread commercial use or practical utilization of a subject of the contract. As explained in 927.402-3(e)(3), paragraph (h) provides that upon request by DOE, the contractor will grant to the Government and responsible third parties a license in proprietary data only where such data in the form of results obtained by its use, i.e., essential equipment, articles, products, and the like which were the subject of the contract, are not otherwise available, or cannot be made

available in a reasonable time as set forth in paragraph (h).

(e)(1) It is the responsibility of prime contractors and higher tier subcontractors, in meeting their obligations with respect to contract data, to obtain from their subcontractors the rights in, access to, and delivery of such data on behalf of the Government. Accordingly, subject to the policy set forth in these regulations, and subject to the approval of the contracting officer where required, selection of appropriate technical data provisions for subcontracts is the responsibility of the prime contractor or higher-tier subcontractor. In many but not all instances, inclusion in a subcontract of the Rights in Technical Data (long form) clause of 952.227–75 will suffice to obtain for the benefit of the Government the rights in and, if appropriate, access to technical data. Access by DOE to technical data, i.e., the inspection rights afforded in paragraph (f) of the Rights in Technical Data (long form) clause at 952.227–75 normally should be obtained only in first-tier subcontracts having as a purpose the conduct of research, development, or demonstration work or the furnishing of supplies for which there are substantial technical data requirements as reflected in the prime contract. If a subcontractor refuses to accept technical data provisions affording rights in and access to technical data on behalf of the Government, the contractor shall so inform the Contracting Officer in writing and not proceed with the subcontract without written authorization of the Contracting Officer. In prime contracts (or higher-tier subcontracts) which contain the Additional Technical Data Requirements clause, it is the further responsibility of the contractor (or higher-tier subcontractor) to determine whether inclusion of such clause in a subcontract is required to satisfy technical data requirements of the prime contract (or higher-tier subcontract).

(2) As is the case for DOE in its determination of technical data requirements, the Additional Technical Data at 952.227–73 Requirements clause should not be used at any subcontracting tier where the technical data requirements are fully known, and normally the clause will be used only in subcontracts having as a purpose the conduct of research, development, or demonstration. Prime contractors and higher-tier subcontractors shall not use their power to award subcontracts as economic leverage to inequitably acquire rights in the subcontractor's proprietary data for their private use, and they shall not acquire rights on behalf of the Government to proprietary data for standard commercial items unless required by the prime contract.

(f) Related to the acquisition and use of technical data are the contractor's rights in contract data as well as technical data furnished to the contractor by DOE or its contractors. These rights are set forth in paragraph (b)(2) of each Rights in Technical Data clause and provide that the contractor may, subject to patent, security and other provisions of the contract, use for its private purposes contract data it first produces in the performance of the contract, provided that the contractor has met its data requirements (e.g., delivery of data in form of progress or status reports specified to be delivered) as of the date of the private use of such data. It is not necessary that a final report be submitted in order to privately use data if all required progress and interim reports and other technical data then due have been delivered. Paragraph (b)(2) further provides that technical or other data received by the contractor in the performance of the contract must be held in confidence by the contractor in accordance with restrictions accompanying the data.

(g) An additional clause described further at 927.402–3(f), the text of which is found at 952.227–76 entitled Rights in Data—Special Works, is to be used in place of or in addition to the Rights in Technical Data (long form) clause in contracts where a purpose of the contract is the production of copyrightable material, a substantial portion of which is to be first produced in the performance of the contract, such as motion pictures, television recordings, books, histories, etc. Where, during contract negotiations, it may be determined to purchase, i.e., "specifically acquire," unlimited rights in technical data, or to lease or obtain a license therein, or to obtain rights in existing data, an appropriate clause therefor should be obtained from patent counsel. In situations where technical data including computer software are to be leased or licensed, the terms of any agreement restricting the Government's rights will be included in the contract as either a special clause or an agreement annexed thereto. Another clause, the Rights in Technical Data (short form) clause further described at 927.402–3(g), the text of which is found at 952.227–77, is provided for use in research contracts with educational institutions and consultants. Such contracts may, for example, include those for conducting symposia, training, or education, or other contracts not involving possible use of proprietary data.

(h) In contracts involving access to certain categories of DOE-owned restricted data, as set forth in 10 CFR Part 725. DOE has reserved the right to receive reasonable compensation for the use of its inventions and discoveries, including its related data and technology. Accordingly, in contracts where access to such restricted data is to be provided to contractors, the following parenthetical phrase shall be inserted after "contract data" in paragraph (b)(2)(ii) of the clause at 952.227–75, after "technical data" in paragraph (b)(2) of the clause at 952.227–77, or after "technical data" in paragraph (b)(2)(ii) of the clause at 952.227–78 as appropriate: "(except Restricted Data in category C–24, 10 CFR Part 725, in which DOE has reserved the right to receive reasonable compensation for the use of its inventions and discoveries, including related data and technology)." In addition, there are other types of contract situations (e.g., no cost contracts for studies or evaluation) wherein the contractor is given access to restricted data. In such contract situations, limitations on the use of such data may be appropriate.

927.402–2 Policy.

The technical data policy is directed toward achieving the following objectives:

(a) Making the benefits of the energy research, development and demonstration programs of DOE widely available to the public in the shortest practicable time;

(b) Promoting the commercial utilization of the technology developed under DOE programs;

(c) Encouraging participation by private persons in DOE energy research, development, and demonstration programs; and

(d) Fostering competition and preventing undue market concentration or the creation or maintenance of other situations inconsistent with the antitrust laws.

927.402–3 Procedures (supply, research, development, or demonstration contracts).

(a) *Known requirements for technical data.* Technical data requirements are determined in relation to the intended use of the data which in turn depends upon the intended use of the contract end item. In many contracts for research, the end item may often be a technical report or series of such reports, while in contracts beyond research, the subject of the contract may be a feasibility model, an engineering or advance development model, or a

prototype. The extent to which required technical data may be needed often depends on the level of maturity of design and perfection of the end item, and for a demonstration plant or prototype, may include data pertaining to performance, operational and environmental testing, repair, maintenance, operation, quality assurance, detailed design, logistics, training, etc. Known technical data requirements shall be programmatically ascertained prior to contracting and shall be included in requests for proposals or disclosed during contract negotiations for incorporation as data requirements in the contract statement of work.

(b) *Additional requirements for technical data.* In contracts for research, development, or demonstration, it is not normally possible or appropriate for the Government to ascertain all actual needs for technical data in advance of contracting. Accordingly, the Additional Technical Data Requirements clause at 952.227–73, shall normally be used in such contracts (and, if appropriate, in subcontracts) to enable the ordering of technical data as the actual need and requirement therefor becomes known during the course of the contract. If all technical data requirements are known in advance of contracting and are set forth in the contract statement of work, this clause need not be used. The Additional Technical Data Requirements clause should not normally be used in supply contracts because the required technical data therefor are ordinarily known in advance and thus are specified in the contract statement of work or specification. When the Additional Technical Data Requirements clause is used, the Rights in Technical Data-Long Form clause at 952.227–75 shall also be used.

(c) *Clause text.* The text of the Additional Technical Data Requirements clause is found at 952.227–73.

(d) *Proposals.* (1) The policy and procedures for treatment of proposal information are set forth in FAR 15.413 for solicited proposals, in FAR 15.509 for unsolicited proposals, and 927.70.

(2) Solicited proposals are to be handled in accordance with the procedures of FAR 15.413–2. Evaluation of such proposals outside the Government is authorized in accordance with the procedures of FAR 15.413–2(f) and paragraph (d)(4) below. In order to assure that solicited proposals are properly handled, the handling notice of FAR 15.413–2(e) shall be affixed to a cover sheet attached to each proposal upon receipt by DOE. Use of the notice neither alters any obligation of the Government, nor diminishes any rights in the Government to use or disclose the information.

(3) Unsolicited proposals are to be handled in accordance with FAR 15.509. Outside evaluations of such proposals are authorized in accordance with the procedures of 925.7000.

(4) It is DOE policy to have proposals evaluated by the most competent persons available in Government. In addition, DOE may meet its evaluation needs by having proposals reviewed by evaluators and contractor organizations operating or managing government-owned facilities. Where it is determined to evaluate a proposal outside the Government, such as by consultants, grantees and contractors including those who operate or manage Government-owned facilities, the agreement of 927.7000 or an equivalent arrangement for the treatment of the proposal shall be obtained from the outside evaluator before DOE furnishes a copy of the proposal to such person. In addition, care should be taken that the required handling notice is affixed to a cover sheet attached to the proposal before it is disclosed to the evaluator.

(5) Should a contract be awarded based on a proposal, it is DOE policy, in consideration of the award, to obtain unlimited rights for the Government in the technical data contained in the proposal unless the prospective contractor marks those portions of the technical information which it asserts as "proprietary data", or specifies those portions of such technical data which are not directly related to or will not be utilized in the work to be funded under the contract. "Proprietary data" is defined in 927.401(b). A proposer who receives a contract award shall mark the data identified as proprietary by specifying the appropriate page numbers to be inserted in the Rights to Proposal Data clause of 952.227–82, which clause shall be inserted in the contract. Subject to the concurrence of the contracting officer, information unrelated to the contract may be deleted from the proposal by the contractor. The responsibility, however, of identifying technical data as proprietary or deleting it as unrelated, rests with the prospective contractor.

(e) *Rights in technical data.* (1) The Rights in Technical Data (long form) clause set forth at 952.227–75 shall be used in all contracts having as a purpose the conduct of research, development, or demonstration, or in contracts for supplies, or in any other contract where technical data are expected to be first produced under the contract, where technical data are specified to be delivered in the contract, or where the contract contains the Additional Technical Data Requirements clause. Accordingly, all such contracts shall contain the Rights in Technical Data (long form) clause at 927.227–75, except as noted in 970.2702 and 927.492–3 (f) and (g) and except contracts for standard commercial off-the-shelf supplies where technical data such as operating or repair manuals are routinely furnished with the supplies.

(2) *Optional paragraph-Limited Rights in Proprietary Data.* In research, development, or demonstration contracts, and supply contracts where it is determined that delivery of proprietary data is necessary with limited rights in the Government, the Rights in Technical Data (long form) clause at 952.227–75 shall be supplemented by the additional paragraph (g) set forth at Alternate I to the clause. It should be noted that this paragraph does not entitle the contractor to place a limited rights legend on any technical data furnished to the Government under paragraph (g) unless the contracting officer requests in writing delivery of identified technical data previously withheld under paragraph (e) of the Rights in Technical Data clause. Paragraph (g) provides that proprietary data may be specified in the contract as being excluded from the delivery requirements of paragraph (e). Alternatively, the limited rights legend specified in Alternate I may be made applicable to only those classes of proprietary data determined as being necessary for delivery with limited rights. In addition, when furnishing proprietary data with the limited rights legend, subparagraphs (a), (b) and (c) thereunder may be modified as follows. When proprietary data is to be furnished only for evaluation, subparagraph (a) of the limited rights legend shall be used, and subparagraphs (b) and (c), if otherwise inapplicable, may be deleted. When there is a programmatic requirements that proprietary data be disclosed to other DOE contractors only for information or use in connection with work performed under their contracts, subparagraph (b) of the limited rights legend shall be used, and subparagraphs (a) and (c) may be deleted if otherwise inapplicable. In either of the foregoing examples, the contractor may, if it can show the possibility of a conflict of interest because of disclosure of such data to certain contractors or evaluators, exclude such contractors or evaluators from subparagraphs (a) or (b). If the data is required solely for emergency repair or overhaul, subparagraph (c) of

the limited rights legend shall be retained, and subparagraphs (a) and (b) may be deleted, unless otherwise applicable. In the event it is determined that all of the subparagraphs (a), (b) and (c) of the limited rights legend are to be deleted, the word "none" shall be inserted in the legend after the colon(:).

(3) *Optional paragraph-Contractor Licensing.* In many contracting situations the achievement of DOE's objectives would be frustrated if the Government, at the time of contracting, did not obtain on behalf of responsible third parties and itself limited license rights in and to proprietary contract data. Where, for example, the contractor is required to license background patents, consideration should be given to securing co-extensive license rights to the Government and responsible third parties at reasonable royalties, and under appropriate restrictions, for contract data which are proprietary data in order to practice the technology which is a subject of the contract. When such a license right is deemed necessary, the Rights in Technical Data (long form) clause at 952.227–75 should be supplemented by the addition of paragraph (h) at 952.227–75 Alternate II. Paragraph (h) will normally be sufficient to cover proprietary contract data for items and processes that were used in the contract and are necessary in order to insure widespread commercial use of a subject of the contract. The expression "subject of the contract" is intended to limit the licensing required in paragraph (h) below to the fields of technology specifically contemplated in the contract effort and may be replaced by a more specific statement of the fields of technology intended to be covered in the manner described in 41 CFR 9–9.107–5(b)(9) pertaining to "Background Patents." Where, however, proprietary contract data cover the main purpose or basic technology of the research, development, or demonstration effort of the contract, rather than subcomponents, products or processes which are ancillary to the contract effort, the limitations set forth in subparagraphs (h) (1)–(4) should be modified or deleted. Paragraph (h) further provides that technical data may be specified in the contract as being excluded from or not subject to the licensing requirements thereof. This exclusion can be implemented by limiting the applicability of the provisions of paragraph (h) to only those classes or categories of proprietary data determined as being essential for licensing. Although contractor licensing may be required under paragraph (h), the final resolution of questions regarding the scope of such licenses, the terms thereof, including provions for confidentiality and reasonable royalties, is then left to the negotiation of the parties with resolution of the issues being made, if necessary, by a court of competent jurisdiction.

(f) *Rights in Data—Special Works.* (1) The clause set forth in 952.227–76 shall be used in all contracts where the principal purpose or a task of the contract is the production of copyrightable works, even through such works may incorporate uncopyrighted material or material previously copyrighted by the contractor or others. Such contracts include those:

(i) Primarily for production of motion picture or television recordings or scripts, musical compositions or arrangements, sound tracks or recordings, translations, adaptations, and the like;

(ii) For books, compilations, surveys, histories, or technology information pamphlets;

(iii) For works pertaining to management studies, support services, training, career guidance, or similar functions of DOE; and

(iv) For works pertaining to guidance or instruction of DOE officials or employees in the discharge of official duties.

(2) The Rights in Data—Special Works clause at 952.227–76 should be modified with the assistance of Patent Counsel where the contract calls for the editing, translation, addition, or other modification of the subject matter of an existing work.

(g) *Rights in Technical Data (short form).* The clause set forth in 952.227–77 may be used in contracts for basic research including grants, special research contracts with educational institutions, contracts with consultants, contracts for symposia, or for the conduct of training and educational programs, and in other contracts of a similar nature. This clause shall not be used in any contract where proprietary information of the contractor may be utilized in the performance of work under the contract; in such instances the Additional Technical Date Requirements clause of 952.227–73 and the Rights in Technical Data (long form) clause of 952.227–75 shall be used. The short form clause of this section shall not be used in situations involving long-term consultancy arrangements for work in DOE programs providing opportunities for specialized work experience at DOE-owned facilities for scientific, engineering, and other employees of private firms and institutions engaged in civilian applications of atomic energy.

927.403 Negotiations and deviations.

Contracting officers shall contact the Patent Counsel assisting their contracting activity, or the Assistant General Counsel for Patents, for assistance to the contracting officer in selecting, negotiating, or approving appropriate data and copyright clauses in accordance with the procedures as set forth in 927.402 and 970.27. In particular, advice of Patent Counsel should be obtained regarding the appropriateness or modification of optional paragraphs (g) and (h) of the Rights in Technical Data (long form) clause, the exclusion of specific items of proprietary data from paragraph (f) in said clause, and the exclusion of the Additional Technical Data Requirements clause of 952.227–73.

Subpart 927.70—Disclosure of Proposal Information

927.7000 Disclosure outside Government.

(a) It is DOE policy to have proposals evaluated by the most competent persons available in the Goverment. In addition, DOE may meet its evaluation needs by having proposals reviewed by evaluators and contractor organizations operating or managing government-owned facilities. Outside evaluations may be made provided the requirements in (b) and (c) below are met. A decision to employ outside evaluators shall take into consideration requirements for avoidance of organizational conflicts of interest set forth in 909.5 and the competitive relationship, if any, between the proposer and the outside evaluator.

(b) Decisions to evaluate proposals outside the government shall be made only by the Source Selection Official with the concurrence of the Procurement Executive, Headquarters, for all source evaluation board acquisitions, or by the Senior Program Offical or designee with the concurrence of the HCA or his designee for other acquisitions. If the proposal under consideration expressly indicates that only Government evaluation is authorized and evaluation outside the Government is neverthless desired, the proposer shall be advised that DOE may be unable to give full consideration to the proposal unless the proposer consents in writing to having the proposal evaluated outside the Government.

(c) Where it is determined to evaluate a proposal outside the Government, such as by consultants, grantees or contractors including those who grant or manage Government-owned facilities

the following agreement or an equivalent arrangement for the treatment of the proposal shall be obtained from the outside evaluator before DOE furnishes a copy of the proposal to such person. In addition, care should be taken that the handling notice required by 927.7003 is affixed to a cover sheet attached to the proposal before it is disclosed to the evaluator.

Agreement

Conditions for Evaluating Proposal

Whenever DOE furnishes a proposal for evaluation, I the recipient agree to use the information contained in the proposal only for DOE evaluation purposes and to treat the information obtained in confidence. This requirement does not apply to information obtained from any source, including the proposer, without restriction. Any notice or restriction placed on the proposal by either DOE or the originator of the proposal shall be conspicuously affixed to any reproduction or abstract thereof and its provisions strictly complied with. Upon completion of the evaluation, it is agreed all copies of the proposal and abstracts, if any, shall be returned to the DOE office which initially furnished the proposal for evaluation. Unless authorized by the conracting officer, it is agreed the recipient shall not contact the originator of the proposal concerning any aspect of its contents.

Recipient: _____

Date: _____

927.7001 Proposal information.

Information contained in proposals will be used only for evaluation purposes except to the extent such information is generally available to the public, is already the property of the Government, or the Government already has unrestricted use rights, or is or has been made available to the Government from any source, including the proposer or offeror, without restriction. The term "proposal," as used in this section, includes responses to program opportunity notices (PONs), program research and development announcements (PRDAs) and solicitations of a similar nature, in addition to requests for proposals (RFPs) and unsolicited proposals. As a practical matter, DOE cannot assume any responsibility for disclosure or use of any such information unless it is identified by the proposer or offeror in accordance with this section. Unless a solicitation specifies otherwise, DOE will not refuse to consider a solicited proposal or an unsolicited proposal merely because the proposal is restrictively marked.

927.7002 Treatment of proposal information.

(a) A proposal may include technical data and other data, including trade secrets and/or privileged or confidential commercial or financial information which the offeror does not want disclosed to the public or used by the Government for any purpose other than proposal evaluation. To protect such data the offeror should specifically identify each page including each line or paragraph thereof containing the data to be protected and mark the cover sheet of the proposal with the notice set forth at FAR 52.215–12, as prescribed at FAR 15.407(c)(8) for solicited proposals or FAR 15.509 for unsolicited proposals. Solicitation documents shall include instructions to proposers to mark their proposals in the prescribed manner.

(b) A reference to that notice on a proposal cover sheet shall be placed on each page to which the notice applies. Data, or abstracts of data, marked with that notice will be retained in confidence and used by the DOE or its designated representative(s) including Government contractors and consultants, as set forth in paragraph (c) below solely for the purpose of evaluating the proposal. The data so marked will not otherwise be disclosed or used without the proposer's prior written permission except to the extent provided in any resulting contract, or to the extent required by law. Offerors should be made aware of the provisions of paragraph (c) below if they desire to modify the notice at FAR 52.215–12 or otherwise seek to limit the evaluation to the Government only. The restriction contained in the notice does not limit the Government's right to use or disclose any data contained in the proposal if it is obtainable from any source, including the offeror, without restriction. Although it is the policy of the DOE to treat all proposals as confidential, the Government assumes no liability for disclosure or use of unmarked data and may use or disclose such data for any purpose. See FAR 15.1001(b) regarding disclosure to other offerors.

(c) Should a contract be awarded based on a proposal, it is DOE policy, in consideration of the award, to obtain unlimited rights for the Government in the technical data contained in the proposal unless the prospective contractor marks those portions of the technical information which he asserts "proprietary data," or specifies those portions of such technical data which are not directly related to or will not be utilized in the work to be funded under the contract. "Proprietary data" is defined in 927.401. An offeror who receives a contract award shall mark the data identified as proprietary by specifying the appropriate page numbers to be inserted in the Rights to Proposal Data clause of 952.227–82, which clause shall be inserted in the contract. Subject to the concurrence of the contracting officer, information unrelated to the contract may be deleted from the proposal by the contractor. The responsibility, however, of identifying technical data as proprietary or deleting it as unrelated, rests with the prospective contractor.

(d) The clause at 952.227–82 shall be included in any contract which resulted from a proposal that was the basis of negotiation and award of the contract. This clause is intended to apply only to technical data and not to other data such as privileged or confidential commercial or financial information.

927.7003 Handling notice.

In order that proposals may be handled in confidence consistent with the policies set forth in this section and pursuant to 927.402–3(d)(2), the notice at FAR 15.413–2(e) for solicited proposals and FAR 15.509(d) for unsolicited proposals shall be affixed to a cover sheet attached to each proposal upon receipt by DOE. Use of the notice neither alters any obligation of the Government, nor diminishes any rights in the Government to use or disclose data or information.

927.7004 Identification of proprietary data in proposals.

927.7004–1 Solicited proposals.

Even though the statement of work contained in a solicitation sets forth the known requirements for technical data, i.e., technical data which will be specified to be delivered, there is no assurance that the contractor will deliver all of this data because paragraph (e) of the Rights in Technical Data (long form) clause at 952.227–75 permits the contractor to withhold proprietary data from delivery. In order to ascertain the technical data the proposer intends to withhold as proprietary data, and as an aid in determining whether to include the provision for limited rights in proprietary data set forth in optional paragraph (g) of the Rights in Technical Data (long form) clause, the provision set forth in 952.227–83 shall be included in the solicitation. This provision explains that solicitations will include DOE's known requirements for technical data, and that the proposer must submit a list identifying to the best of its knowledge which of this data will be withheld as proprietary data, or state that no technical data will be withheld. The submission of such a list does not constitute a stipulation or determination by the Government that the data identified therein are in fact proprietary.

In addition, the provision to be included in the solicitation refers to the Additional Technical Data Requirements clause at 952.227-73, as being included in the proposed contract where, due to programmatic considerations, it is contemplated that all of the requirements for technical data will not be known at the time of contracting. When a proposer specifically identifies the proprietary data to be withheld, the contracting officer shall determine as advised by the appropriate program manager, whether:

(a) the Government needs limited rights in the proprietary data, in which case the optional paragraph (g) will be included in the Rights in Technical Data (long form) clause;

(b) the Government needs to require the contractor to license proprietary data to the Government and responsible third parties, in which case optional paragraph (h) will be included in the Rights in Technical Data (long form) clause; and

(c) the Government needs unlimited rights in the proprietary data, in which case negotiations may be held to purchase or obtain a suitable license to the proprietary data.

927.7004-2 Solicitations.

The provision at 952.227-83 shall normally be included in solicitations which may result in contracts calling for research, development, or demonstration work or solicitations for supplies in which delivery of required technical data is contemplated.

927.7004-3 Unsolicited proposals.

The contracting officer, during contract negotiations, shall identify technical data which will be required to be furnished under the contract. The proposer shall be required to submit a list identifying, to the best of his knowledge, which of this data will be withheld as proprietary under paragraph (e) of the Rights in Technical Data (long form) clause, or to state that no technical data will be withheld. The contracting officer shall then make the determinations, in the same manner as set forth in 927.7004-1 for solicited proposals, pertaining to the proprietary data identified to be withheld.

927.7005 Required notice of right to request patent waiver.

Offerors are to be provided with notice of the right to request, in advance of or within 30 days after the effective date of contracting, a waiver of all or any part of the rights of the United States with respect to subject inventions. In no event will the fact that an offeror has requested such a waiver be a consideration in the evaluation of his offer or the determination of his acceptability. Accordingly, the notice at 952.227-84 shall be given to all prospective contractors and shall be inserted in all solicitations which may result in contracts calling for research, development, or demonstration work.

PART 928—BONDS AND INSURANCE

Subpart 928.1—Bonds

Sec.
928.101-1 Policy on use.
928.101-70 Review of bid bonds for construction.
928.102-70 Review of performance and payment bonds for construction.
928.103-2 Performance bonds.
928.103-3 Payment bonds.
928.103-70 Review of performance and payment bonds for other than construction.
928.170 Fidelity bonds.

Subpart 928.2—Sureties

928.202-1 Corporate sureties.
928.202-70 Partnerships as sureties.
928.202-71 Substitution or replacement of a surety.

Subpart 928.3—Insurance

928.301 Policy.
928.370 Service-type insurance policies.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95-91 (42 U.S.C. 7254); and section 148 of the Atomic Energy of 1954, as amended (42 U.S.C. 2168).

Subpart 928.1—Bonds

928.101-1 Policy on use.

(a) In addition to the restriction on use of bid guarantees in FAR 28.101-1(a), a bid guarantee may be required only for fixed price or unit price contracts entered into as a result of formal advertising. They may not be required for negotiated contracts.

928.101-70 Review of bid bonds for construction.

Prior to award of a contract, the contracting officer shall obtain a review from Counsel of the bid bond furnished with the successful bid as to legal form and sufficiency and as to acceptability of the surety. Prior to award of a subcontract, the contracting officer shall review the bid bond furnished with the successful bid as to legal form and sufficiency and as to acceptability of the surety and adequacy of the bond.

928.102-70 Review of performance and payment bonds for construction.

Prior to the award of a contract for construction the contracting officer shall obtain review of performance and payment bonds as to legal form and sufficiency, acceptability of the surety, and adequacy of the bond. A performance or payment bond, other than an annual bond, shall not antedate the contract to which it pertains.

928.103-2 Performance bonds.

Situations in addition to those listed in FAR 28.103-2, which may warrant requiring a performance bond for other than construction contracts are:

(a) Where doubt exists as to the financial or technical ability of all possible suppliers;

(b) Where the contractor's talent is overly concentrated in a few key personnel whose illness or departure could seriously impair the contractor's ability to perform the proposed work;

(c) Where other commitments of the contractor might delay performance;

(d) Where performance of the proposed work might disrupt other operations of the contractor and impair its overall efficiency; and

(e) Where the item being manufactured is a component for another article and is required by a particular date in order to avoid delay in delivery of the end product.

928.103-3 Payment bonds.

(a) A determination that is in the best interest of the Government to require payment bonds in connection with other than construction contracts may be made by the contracting officer on individual acquisitions. Such approval is subject to the approval of the Head of the Contracting Activity. In the case of either advertised or negotiated acquisitions, whenever the contracting officer has reason to believe that work under a proposed contract might be delayed because of the concern of subcontractors or suppliers over the credit standing of a potential prime contractor, the contracting officer should consider requiring a payment bond.

928.103-70 Review of performance and payment bonds for other than construction.

Prior to the award of a contract for other than construction the contracting officer shall obtain review of performance and payment bonds as to legal form and sufficiency, acceptability of the surety, and adequacy of the bond. A performance or payment bond, other than an annual bond, shall not antedate the contract to which it pertains.

928.170 Fidelity bonds.

Fidelity bonds shall not be required in connection with fixed-price contracts. They may be required, however, in connection with cost-reimbursement contracts for supplies, or construction, where it is determined that a fidelity bond is necessary for the protection of the Government or the contractor, or

when it is considered desirable to obtain the investigative and claim services of the surety company.

Subpart 928.2—Sureties

928.202–1 Corporate sureties.

Each corporate surety, may, by setting forth the limit of its liability in the bond as a definite and specified sum, limit such liability. The co-sureties must, however, bind themselves "jointly and severally" for the purpose of allowing a joint action or actions against any or all of them.

928.202–70 Partnerships as sureties.

A partnership or other unincorporated association, as such, shall not be accepted as a surety. The individual members of the partnership or association may, of course, qualify as sureties, provided they meet the requirements set forth in FAR 28.202–2. Individual members of a partnership or association shall not, however, be acceptable as sureties on bonds under which the partnership or association, or any co–partner or member thereof, is the principal obligor.

928.202–71 Substitution or replacement of a surety.

In case of financial inadequacy, failure, or other disqualifying cause on the part of a surety under a bond, the contracting officer shall require the substitution of a new surety satisfactory to the contracting officer.

Subpart 928.3—Insurance

928.301 Policy.

The DOE policies and procedures for indemnification of DOE contractors are set forth in FAR Part 50 and 950.

928.370 Service-type insurance policies.

(a) Service-type insurance policies are cost-reimbursement type contracts or subcontracts in which the insurer provides claim and loss adjustment services on a cost reimbursement basis, which satisfies state and Federal insurance requirements.

(b) Service-type insurance policies may be used with contracting officer approval, when one or more of the following conditions are present:

(1) Pure risk commercial insurance is not available or, if available, cost is not considered reasonable;

(2) Inherent risks in the contract are new and a part of the process of commercialization;

(3) The service-type insurance is needed to implement jointly funded projects; or

(4) The service-type insurance arrangement is considered in the Government's best interest.

PART 931—CONTRACT COST PRINCIPLES AND PROCEDURES

Subpart 931.1—Applicability

Sec.
931.102 Fixed-price contracts.

Subpart 931.2—Contracts With Commercial Organizations

931.205–18 Independent research and development and bid and proposal costs.
931.205–32 Precontract costs.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy of 1954, as amended (42 U.S.C. 2168).

Subpart 931.1—Applicability

931.102 Fixed-price contracts.

The intent of the first sentence of FAR 31.102 is that applicable subparts of FAR Part 31 shall be used by the Government in (a) pricing fixed-price prime contracts and modifications, (b) evaluating the reasonableness of a prime contractor's (or prospective prime contractor's) proposed subcontract (or subcontract modification) prices, and (c) determining the allowability of contractor payments to subcontractors in accordance with the provisions of FAR 31.204(b).

Subpart 931.2—Contracts With Commercial Organizations

931.205–18 Independent research and development and bid and proposal costs.

(c)(3) In determining the amount of cost recoverable under DOE contracts the maximum total amount of annual IR&D costs recoverable under all DOE contracts with a business unit or segment shall not exceed (i) those contracts' allocable share of the business unit's (or segment's) total allocable IR&D amounts (as established in accordance with paragraphs FAR 31.205–18(c)(1) and (2)), or (ii) the total cost of the business unit's (or segment's) annual IR&D activities determined to have potential benefit or relationship to the DOE program, whichever is less. The maximum total amount of B&P cost which is recoverable under DOE contracts with a business unit (or segment) shall be those contracts' share of the allocable B&P expense computed in accordance with FAR 31.205–18(c)(1) and (2).

(4) For purposes of 931.205–18(c)(3), the term "DOE program" encompasses the DOE total mission and its objectives. However, IR&D costs that exceed the benefit threshold at one business unit or segment of a business organization cannot be used to offset IR&D costs that are less than the benefit threshold of another segment or business unit.

931.205–32 Precontract costs.

(a) To the extent practical, known expenditures of precontract costs under DOE contracts should be governed by establishing advance understandings as contemplated by FAR 31.109. Contracts that include authorized precontract costs shall include the "Date of Incurrence of Cost" clause specified at 952.321–70.

(b) The following limitations apply to establishment of advance understandings relative to precontract costs:

(1) Precontract cost authorizations shall not be used to cover a period in excess of 15 days, unless a longer period is approved by the HCA based upon a written finding that such an allowance is reasonable, and shall not be extended or renewed. A copy of the findings shall be forwarded to the Procurement Executive at the time of approval. If prolonged coverage is necessary, a letter contract shall be issued.

(2) All precontract cost authorizations shall be reviewed and approved at a management level above the contracting officer.

(3) Retroactive precontract cost authorization and the predating of contractual agreements shall not be used.

(4) Precontract cost authorizations shall not authorize the delivery or furnishing of any goods or services from a contractor until after the contract is executed.

PART 932—CONTRACT FINANCING

Subpart 932.1—General

Sec.
932.102 Description of contract financing methods.
932.111 Contract clauses.

Subpart 932.3—Loan Guarantees for Defense Production

932.304–2 Certificate of eligibility.

Subpart 932.4—Advance Payments

932.402 General.
932.407 Interest.

Subpart 932.5—Progress Payments Based on Costs

932.501–2 Unusual progress payments.

Subpart 932.6—Contract Debts

932.605 Responsibilities and cooperation among Government officials.

Subpart 932.7—Contract Funding

932.703–1 General.

Subpart 932.8—Assignment of Claims

932.802 Conditions.

932.803 Policies.
932.805 Procedure.

Subpart 932.70—DOE Loan Guarantee Authority

932.7000 Scope of subpart.
932.7001 Definitions.
932.7002 Authority.
932.7003 Policies.
932.7004 Procedures.
932.7004–1 Guaranteed loans for civilian programs.
932.7004–2 Criteria.
932.7004–3 Eligibility.

Subpart 932.71—Contract Payments

932.7100 Scope of subpart.
932.7101 Definitions.
932.7102 General.
932.7103 Exemptions.
932.7104 Procedures.
932.7105 Payment due dates.
932.7106 Inspection periods.
932.7107 Contract clauses.
932.7107–1 DOE payment clauses.
932.7107–2 Modified FAR clauses.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 932.1—General

932.102 Description of contract financing methods.

(e)(2) Progress payments based on a percentage or stage of completion are authorized for use as a payment method under DOE contracts or subcontracts for construction, alteration or repair, and shipbuilding and conversion. For all other contracts, progress payment provisions shall be based on costs, as provided in FAR Subpart 32.5, and Subpart 932.5 of this chapter, except that progress payments based on a percentage or stage of completion may be authorized by the Head of the Contracting Activity when a determination is made that progress payments based on costs cannot be practically employed and that there are adequate safeguards provided for the administration of progress payments based on a percentage or stage of completion.

932.111 Contract clauses.

Payment due dates shall be established in accordance with the provisions set forth in Subpart 932.71, Contract Payments.

Subpart 932.3—Loan Guarantees for Defense Production

932.304–2 Certificate of eligibility.

(h) Guaranteed loan applications shall be authorized and transmitted to the Federal Reserve Bank only by the Secretary or designee specified for that purpose.

Subpart 932.4—Advance Payments

932.402 General.

(e)(1) The Head of the Contracting Activity or designee shall have the responsibility and authority for making findings and determinations, and for approval of contract terms concerning advance payments.

(2) Before authorizing any advance payment arrangements, the approving official shall obtain the advice, and other inputs of the servicing finance office.

932.407 Interest.

(d)(4) Advance payments may be made without interest under cost-reimbursement contracts for construction or engineering services.

Subpart 932.5—Progress Payments Based on Costs

932.501–2 Unusual progress payments.

(a)(3) The Head of the Contracting Activity shall forward all requests which are considered favorable, with supporting information, to the Procurement Executive, who, after coordination with the Controller, will approve or deny the request.

(d) Requests for unusual progress payments will not be considered as a handicap or adverse factor in the award of a contract; provided the bid or proposal is not conditioned on approval of such request.

Subpart 932.6—Contract Debts

932.605 Responsibilities and cooperation among Government officials.

(b) The DOE contracting officer has primary responsibility for determining the amount of contract debt and notifying the cognizant finance office of such debt due the Government. The servicing DOE finance office making payments under the contract has primary responsibility for debt collection.

Subpart 932.7—Contract Funding

932.703–1 General.

(a) The contracting officer shall, prior to contract award and obligation of funds, ensure sufficient funds are available to cover the maximum amount of Government liability being created under a fully funded contract; e.g., the ceiling price under a fixed-price incentive or redeterminable contract.

(b) For incrementally funded contracts the contracting officer shall limit the Government's liability to available funds and only require a contractor to provide;

(1) The property or services for which funds are available under a fixed price arrangement; or

(2) The intended increment of work and a proportionate amount of fee under a cost-reimbursement contract.

Subpart 932.8—Assignment of Claims

932.802 Conditions.

(d)(1) This paragraph covers all unpaid amounts payable under the contract except that partial assignments may be permitted when primarily for the benefit of the Government.

932.803 Policies.

(d) In the case of prime contracts, when it has been determined that the financing of contracts will be facilitated in the interest of DOE programs, it is the policy of DOE that such contracts provide, or be amended without consideration (see Assignment of Claims Act of 1940) to provide, in conformance with FAR 32.804, that payments to be made to an assignee shall not be subject to reduction or setoff. In the case of subcontracts, when loans are made for the purpose of financing performance of subcontracts under DOE prime contracts, financing institutions or the Government as guarantor in those instances in which such loans are guaranteed should not be required to incur risks of loss by reason of possible diversion of assigned subcontracts proceeds for payment of other claims of the prime contractor against the borrower, otherwise unrelated to the assigned subcontracts. The Head of the Contracting Activity shall require the adoption of these policies and practices by DOE prime contractors with respect to DOE subcontract work. The Head of the Contracting Activity should inform the Controller of each DOE contractor who is unwilling to adopt policies consistent with this paragraph and the reasons given in support of the contractor's position.

932.805 Procedure.

(f) For classified contracts, the assignee should ordinarily be furnished, upon request, with the following information, as applicable, in lieu of a copy of the contract:

(1) Name and address of the DOE prime contractor;

(2) Prime contract number and date;

(3) Name, address, and phone number of responsible official in the

(i) DOE office receiving the material or service; and

(ii) DOE finance office making payments;

(4) Subcontract number or purchase order number;

(5) Date of the subcontract or purchase order;

(6) Date on which prime contract, subcontract, or purchase order is to be completed;

(7) Total amount of the subcontract or purchase order;

(8) Dollar amount remaining to be delivered on prime contract, subcontract, or purchase order; and

(9) A statement as to the assignability of the prime contract, subcontract, or purchase order.

Subpart 932.70—DOE Loan Guarantee Authority

932.7000 Scope of subpart.

This subpart prescribes policies and procedures for guarantees of loans made by a private financial institution to borrowers performing DOE contracts relating to DOE programs for which guaranteed loans are authorized by legislation.

932.7001 Definitions.

(a) The terms "borrower," "Federal Reserve Board," and "guaranteed loan" have the same meaning set forth in FAR 32.301.

(b) "Guaranteeing Agency" as used in this subpart, means the Department of Energy when authorized to guarantee loans through the Federal Reserve Banks.

932.7002 Authority.

Guaranteed loan applications shall be authorized and transmitted to the Federal Reserve Board only by the Secretary, or designee specified for that purpose, and only when made pursuant to enabling legislation or other authority; e.g., by executive order or regulation.

932.7003 Policies.

The following policies governing the exercise of its loan guarantee authority have been established by DOE:

(a) The use of the loan guarantee authority is not restricted to contracts or subcontracts of any particular type or of class. Each case is to be evaluated on its own merits and under the particular circumstances applicable thereto.

(b) The fact that a contract has been awarded as a result of competitive bidding should not, of itself, render the loan ineligible for guarantee by DOE if the contractor is financially responsible and its need for working capital is the result of the impact of a defense program or any other DOE program for which guaranteed loans are authorized.

(c) The guarantee authority should, in general, not be used in connection with loans to contractors required to furnish performance bonds, except in those cases in which the time likely to be required for the surety or DOE to take over in the event of default will result in delays which cannot be tolerated by the particular program concerned. When performance bonds have been furnished, the surety shall be required to subordinate its rights in favor of the guaranteed loan.

(d) The criterion that the materials or services to be provided cannot readily be acquired from alternative sources does not require the finding that the materials or services are absolutely unobtainable elsewhere. The criterion should be so applied as to permit guarantees of loans when, although the materials or services can be obtained elsewhere, such factors as the urgency of supply schedules, technical capacity of the contractor, comparative prices, and time and expense involved in reissuing the contract, including termination payment, establish that it is to the Government's advantage not to resort to alternative sources merely because the contractor or subcontractor may require a guaranteed loan.

(e) If it is known at the time the contract is to be awarded that the low offeror who is technically qualified and competent to furnish the required materials and services will require a guaranteed loan, the contracting officer should obtain appropriate advice and in reaching a decision should consider at least the following:

(1) The savings to be realized by awarding the contract to the low offeror;

(2) The risk to the Government in guaranteeing a loan; and

(3) The likelihood, if award is made to the second low offeror, of that offeror's applying for a guaranteed loan at a later date.

Extreme care should be exercised in rejecting a low bid or proposal simply because the low offeror requires a guaranteed loan.

(f) The amount of the loan should bear reasonable relationship to such factors as the value and terms of the contract, the probable investment required to be made by the contractor in payrolls and inventories, the frequency with which contract payments are to be made, and the borrower's current working capital position.

(g) Borrowings for working capital purposes under guaranteed loans shall be limited to the amount necessary to perform the contract for which the loan is sought. In order that the contractor will also use its own funds in the performance of the contracts, amounts outstanding under the loan or line-of-credit shall be limited to an amount not to exceed 90 percent of the borrower's investment in its contracts, regardless of the total amount of the loan or line of credit authorized. The borrower's investment includes all items for which the borrower would be entitled to payment on performance or termination of contracts, but does not include any items for which no work has been done nor expenditures made.

(h) Unless there are exceptional circumstances, the loan should mature not later than 30 days after the estimated date of final payment under the contract.

932.7004 Procedures.

932.7004–1 Guaranteed loans for civilian programs.

The procedures for authorizing a guaranteed loan under legislation other than section 301 of the Defense Production Act of 1950 (50 U.S.C. App. 2091) shall be essentially the same as those set forth in FAR 32.304, Procedures, FAR 32.305, Loan Guarantees for Terminated Contracts, and FAR 32.306 Loan Guarantee for Subcontacts; except that any contrary provisions required by enabling legislation authorizing the loan shall govern.

932.7004–2 Criteria.

(a) The materials or services to be furnished by the contractor are necessary to the Government interest.

(b) The materials or services cannot as a practical matter be obtained from alternate sources without delay or impeding the Government's interest, except that no small business concern shall be held ineligible for the issuance of such guarantee by reason of alternative sources of supply.

(c) The contractor has demonstrated its inability to obtain the necessary financing in conventional credit channels without the guarantee.

(d) There is reasonable assurance that the loan can be repayed.

(e) The contractor is competent to perform the contract.

932.7004–3 Eligibility.

The applicant's eligibility for a guaranteed loan will be based on:

(a) Contracting officer determinations and findings regarding items (a), (b) and (e) in 932.7004–2 as incorporated in a Certificate of Eligibility (FAR 32.304–2); and

(b) The Controller's determination for items (c) and (d) in 932.7004–2 based on information contained in the application, the Federal Reserve Bank's report, and information furnished by the contracting activity concerned.

Subpart 932.71—Contract Payments

932.7100 Scope of subpart.

This subpart prescribes policies and procedures on (a) the inclusion of payment terms in DOE contracts and purchase orders (b) the requirements of the Prompt Payment Act (31 U.S.C. 3901 et seq.,) Office of Management and Budget (OMB) Circular No. A–125, Prompt Payment, and (c) invoice requirements and matters concerning payments to contractors.

932.7101 Definitions.

"Business Concern" means any person or organization engaged in a profession, trade, or business; and nonprofit entities (including State and local governments, but excluding Federal entities) operating as contractors.

"Contract" means any enforceable agreement, including rental and lease agreements and purchase orders, between an agency and a business concern for the acquisition of property or services.

"Designated payment office" means the place named in the contract for the forwarding of invoices for payment, or in certain instances for approval.

"Due date" means the date on which Federal payment should be made. Determination of such dates is discussed in 932.7105.

"Discount date" means the date by which, if payment is made, a specified discount can be taken.

"Payment date" means the date on which a check for payment is dated or an electronic funds transfer payment is made.

"Proper invoice" means a bill or written request for payment prepared and submitted by a contractor in accordance with contract specified terms and conditions.

"Receipt of invoice" means the date a proper invoice is actually received in the designated payment office; or, the date on which the DOE accepts the property or service; whichever is the later.

932.7102 General.

(a) It is the policy of the Department of Energy to include payment terms in its contracts and to make payments due thereunder on the due dates determined in accordance with such terms. Adherence to this policy will avoid interest penalities for overdue payments, establish better business relationships with suppliers, and increase competition for Government contracts.

(b) In accordance with guidelines set forth in Chapter 8000, Cash Management, section 8040.20, Timeliness of Disbursements, of the Treasury Fiscal Requirements Manual (TFRM), it is also the policy of the Government to defer payment until as close as administratively possible to the due date for payment or, if appropriate, the discount date. Discounts for early payments shall not be taken, however, unless such discounts are determined to be economical in accordance with section 8040.30 of the TFRM. These practices will tend to maximize cash balances available to the Treasury, reduce the need for borrowing, and thus contribute to lowering the public debt.

(c) When not established contractually, it is the DOE policy that the payment due date for invoices, bills, statements, or any other documents including progress and final payments (hereinafter referred to as "invoices") shall be the thirtieth (30th) calendar day after date of invoice receipt, as defined in this subpart, unless a different date is required by law or regulations.

(d) Notice of an apparent error, defect, or impropriety in an invoice shall be given to a business concern within 15 days of invoice receipt (3 days for meat or meat food products and 5 days for perishable agricultural commodities). When provided by telephone, the notice shall be suitably documented.

(e) The contracting officer and other responsible officials shall ensure that receipt and acceptance of goods and services are executed as promptly as possible. Receiving reports shall be forwarded in time to be received by the designated payment office by the fifth business day after acceptance, unless other arrangements are made. Designated payment offices shall stamp receiving reports and invoices with the date received in those offices.

(f) DOE Payment Offices are required to schedule contractual payments to occur on or as near as administratively possible to established payment due dates. Payments made by Treasury checks will be mailed or transmitted on or about the same day for which the check is dated.

(g) When the DOE accepts property or services from a business concern, but does not make payment for each such complete delivered item of property or service by the required payment date, an interest penalty shall be paid to such business concern unless such payment is made within 15 days after the due date (3 days for meat or meat products and 5 days for perishable agricultural commodities) or is exempted pursuant to 932.7103 below.

(h) If a business concern offers the DOE a discount from the amount otherwise due under a contract for property or services in exchange for payment within a specified period of time, payment will be made in an amount equal to the discounted price only if payment is made within such specified period of time. Violation of this provision shall result in payment of an interest penalty on any amount which remains unpaid and on which the Department fails to correct the underpayment within 15 days of the expiration of the discount period (3 days for meat and meat food products, and 5 days for perishable agricultural commodities).

(i) To ensure prompt payment of amounts due, all DOE contracts shall incorporate appropriate payment provisions enabling the Government, at its option, to determine at the time of payment the method of payment to be used (e.g., check, electronic funds transfer).

932.7103 Exemptions.

The interest penalty provisions of this subpart are not applicable to the following types of contract payments.

(a) Advance payments, progress payments or other payments made for financing purposes before receipt of complete delivered items of property or service.

(b) Payments under cost-reimbursement contracts or similar payments under other types of contracts providing for cost-reimbursements; e.g., a Time-and-Materials or Labor-Hour Contract, a Personal Services Contract.

(c) Payments for utilities (gas, water, electricity, etc.) where the contract includes provisions for late payment charges established by tariffs or State regulatory commissions.

(d) Payments under informal contracts for the purchase of utilities under a tariff when such tariff provides for late payment charges.

(e) Late payments, if any, made under a contract awarded prior to October 1, 1982; unless such contract contains a specific interest penalty clause.

932.7104 Procedures.

(a) In all DOE contract and purchase order solicitations and awards, the contracting officer shall:

(1) Establish specific payment terms, payment due dates, stated inspection periods, invoice requirements, notification of defective invoice requirements and interest penalty provisions as set forth in this subpart; and

(2) Ensure awards specify the name (where practicable), title, phone number, office name and complete mailing address, of officials of:

(i) The business concern to be notified when the Government receives a defective or improper invoice, and

(ii) The Government office where the invoices or vouchers are to be sent by the contractor.

932.7105 Payment due dates.

(a) The contracting officer shall provide for contract payment due dates that are equitable and give proper consideration to prevailing industry practices for the same or similar products or services and the financial condition of the prospective contractor. To the extent feasible and appropriate, payment cycles should be established to minimize or avoid entirely the necessity for the making of advance payments or progress payments.

(b) Contract specified payment due dates, shall generally be predicated on a payment cycle of thirty (30) calendar days after invoices receipt, as defined herein, in order to permit DOE officials to routinely receive, review, approve, and otherwise administratively process invoices for payment of cost reimbursement vouchers or invoices for complete delivered products or services. However, payment due dates based on different payment cycles may be established for a contract, or class of contracts, as appropriate or required by law, regulation, the contractor's financial condition or the payment procedures and practices of the awarding office.

(c) Payment cycles of less than thirty (30) calendar days may be appropriate when:

(1) An award is made to a small business concern.

(2) Advance payments or progress payments are authorized to finance contract work or such financing payments can be curtailed by making payments sooner for completed work.

(d) When authorized, separate payment due dates shall be established for progress payments. The absence of a contract specified due date may preclude progress payments from being made on other than a thirty (30) day payment cycle.

(e) Advance payments, when provided, shall be timed to coincide with the contractor's financial need for such payments in accordance with applicable Treasury Department requirements.

(f) In connection with the acquisition of meat and meat food products, as defined in section 2(a)(3) of the Packers and Stockyards Act of 1921 (7 U.S.C. 182(3)), the Prompt Payment Act requires payment to be made not later than 7 days after the date of delivery. Similarly, for perishable agricultural commodities, as defined in section 1(4) of the Perishable Agricultural Commodities Act of 1930 (7 U.S.C. 499a(4)), the required time for payment is 10 calendar days after delivery.

(g) When contract payment due dates other than those established by local policy are to be incorporated, or are requested by the contractor, the contracting officer shall first obtain concurrence from cognizant finance and program officials.

932.7106 Inspection periods.

(a) In order to ensure timely payments when contract payment due dates are partially or wholly based on a specified number of days after Government acceptance of complete delivered property or services, the contract shall specifiy an agreed to maximum period for Government inspection and acceptance.

(b) For purposes of determining such payment due dates, a delivered item shall be deemed constructively accepted on the last day of the contract specified inspection period if actual acceptability has not yet been determined.

(c) For purposes of determining payment due dates for purchase orders, constructive acceptance shall be deemed to occur on the date of receipt at the specified delivery point unless the contracting officer specifically requires otherwise in the purchase order.

(d) Failure by the Government to accept or reject delivered items within specified time period may result in the payment of interest penalties. However, such failure shall not be considered a breach of contract terms.

(e) Contract specified inspection periods shall be predicated on the estimated number of calendar days required to determine the acceptability of the delivered item(s) after the date of receipt at the contract specified delivery point.

(f) When more than a ten (10) calendar day inspection period is contractually established, approvals of contracting and program officials should be included with the contract file.

932.7107 Contract clauses.

932.7107-1 DOE payment clauses.

(a) The contracting officer shall insert—

(1) The basic clause at 952.232–70, Payment Due Dates, Invoice Requirements and Penalties, in solicitations and awards containing the clause at FAR 52.232–1, Payment (applicable to fixed-price supply contracts, fixed-price service contracts, and contracts for nonregulated communication services), FAR 52.232–2, Payment under Fixed-Price Research and Development Contracts, or FAR 52.232–4, Payment under Transportation Contracts and Transportation-Related Services Contracts;

(2) Alternate I of the basic clause at 952.232–70 in solicitations and awards containing the clause at FAR 52.232–3, Payment under Personal Services Contracts, or FAR 52.232–7, Payments under Time-and-Materials and Labor-Hours Contracts, when such contracts provide for cost-reimbursements;

(3) Alternate II of the basic clause at 952.232–70 in solicitations and awards containing the clause at FAR 52.232–5, Payments under Fixed-Price Construction Contracts, or FAR 52.232–10, Payments under Fixed-Price Architect-Engineer Contracts;

(4) Alternate III of the basic clause at 952.232–70, or a clause substantially the same as alternate III, in solicitations and awards containing the clause at FAR 52.232–6, Payments under Communication Service Contracts with Common Carriers, in order to establish appropriate due dates and to provide for late payment charges established by tariffs or state regulatory commissions; or

(5) Alternate IV of the basic clause at 952.232–70 in fixed-price solicitations and awards providing for the acquisition of meat and meat products or perishable agriculture commodities to ensure compliance with Prompt Payment Act requirements.

(b) The contracting officer shall insert the clause at 952.232–71, Payment Due Dates and Invoice Requirements, in all cost-reimbursement contract solicitations and awards containing the clause at FAR 52.216–7, Allowable Cost and Payment, as modified at 952.216–7; or, FAR 52.216–13 Allowable Cost and Payment-Facilities.

(c) Fixed-price purchase orders shall incorporate the prompt payment clauses at 952.232–72.

(d) The contracting officer shall insert the clause at 952.232–73, Payment Methods, in all DOE contract solicitations and awards in order to provide proper notice and require contractor acceptance of electronic funds transfers for any required contract payments not to be made under a letter-of-credit advance payment arrangement.

932.7107-2 Modified FAR clauses.

(a) For consistency with the applicable clauses prescribed in 932.7107–1 above, the payment clauses prescribed in FAR 32.111 shall be modified as provided below:

(1) Revise the payment clauses at FAR 52.232–1 through FAR 52.232–6, as

prescribed in FAR 32.111(a)(1) through FAR 32.111(a)(6), to indicate payments will be made "after" rather than "upon" invoice receipt or acceptance.

(2) Revise the clause cited at FAR 52.232–7, as prescribed in FAR 32.111(b), to indicate payments will be made "after" rather then "upon" invoice receipt or acceptance.

(3) Modify the clause at FAR 52.232–8, Discounts For Prompt Payment, as prescribed in FAR 32.111(c)(1), to reflect the term "proper" in lieu of "correct" and the last sentence to read as follows—For the purpose of computing the discount earned, payment shall be considered to have been made on the date either a government check was dated or an electronic funds transfer payment was made.

(4) Revise the clause at FAR 52.232–10, Payments Under Architect-Engineer Contracts, as prescribed at FAR 32.111(d)(1), to indicate payments shall be made "after" rather than "upon" invoice receipt or acceptance.

PART 933—DISPUTES AND APPEALS

933.011 Contracting officer's decision.

(a) In addition to the information specified in FAR 33.011, the contracting officer's decision shall include the contracting officer's written findings of fact.

(b) The contracting officer shall also furnish the contractor a copy of the rules established by the DOE Board of Contract Appeals.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

PART 935—RESEARCH AND DEVELOPMENT CONTRACTING

Sec.
935.007 Solicitations.
935.010 Scientific and technical reports.
935.014 Government property and title.
935.015 Contracts for research with educational institutions and nonprofit organizations.
935.070 Contract clauses.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

935.007 Solicitations.

See Subpart 917.72 for the conditions under which Program Research and Development Announcements may be used, and the procedures for their use.

935.010 Scientific and technical reports.

(c) All research and development contracts which have as a requirement the submission of a scientific or technical report shall include a provision which requires the contractor to submit a copy of the final, edited report to the following address: U.S. Department of Energy Technical Information Center, P.O. Box 62, Oak Ridge, TN 37830.

(d) Contractors shall be required to submit with the report a completed DOE Form RA–426, "DOE and Major Contractor Recommendations for Announcement and Distribution of Documents," except when the contract is with an educational institution, in which case the contractor shall be required to submit with the report a completed DOE Form RA–427, "University Contractor, Grantee and Cooperative Agreement Recommendations for Announcement and Distribution of Documents."

935.014 Government property and title.

(b) As authorized by FAR 35.014(b), DOE has established a threshold of $1,000 with respect to consideration of vesting title to property to the contractor in contracts with nonprofit and educational institutions as contemplated by FAR 35.014(b)(1) and 35.014(b)(2).

935.015 Contracts for research with educational institutions and nonprofit organizations.

See Subpart 917.71 for the conditions and procedures under which Special Research Contracts may be used and the procedures for their use.

935.070 Contract clauses.

Insert the clause at 952.235–70, Key Personnel, in Research and Development contracts under which performance is largely dependent on the expertise of specific key personnel. To prevent administrative burden, the list should be as limited as possible.

PART 936—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

Subpart 936.2—Special Aspects of Contracting for Construction

Sec.
936.202 Specifications.

Subpart 936.6—Architect-Engineer Services

936.601 Policy.
936.602–2 Evalution boards.
936.602–3 Evaluation board functions.
936.602–4 Selection authority.
936.602–70 DOE selection criteria.
936.603 Collecting data on and appraising firm's qualifications.
936.605 Government cost estimate for architect-engineer work.
936.606 Negotiations.
936.609–3 Work oversight in architect-engineer contracts.

Subpart 936.7—Standard Forms for Contracting Architect-Engineer Services and Dismantling, Demolition or Removal of Improvements

936.702 Forms for use in contracting for architect-engineer services.

Subpart 936.70—Rental of Construction Equipment

936.7000 Scope of subpart.
936.7001 General policy.
936.7002 Rental of contractor-owned equipment.
936.7002–1 Rental agreements.
936.7002–2 Rental period.
936.7002–3 Rental rates.
936.7002–4 Application of rates.
936.7002–5 Insurance.
936.7002–6 Rental limitation.
936.7002–7 Record of negotiation.
936.7002–8 Responsibility for repair and replacement.
936.7002–9 Equipment condition and inspection.
936.7003 Rental of third-party-owned equipment.
936.7003–1 Rental agreement.
936.7003–2 Rental rates.
936.7003–3 Insurance.
936.7003–4 Option to purchase equipment.

Subpart 936.71—Inspection and Acceptance

936.7100 Scope of subpart.
936.7101 Construction contracts.

Subpart 936.72—Acquisition of Special Equipment

936.7200 Scope of subpart.
936.7201 Definition.
936.7202 Description of acquisition services.

Subpart 936.73—Outline for Equipment Rental Agreement

936.7300 Scope of subpart.
936.7301 Outline of agreement for rental of contractor-owned construction equipment.
936.7302 Outline of agreement for rental of third-party owned construction equipment.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy of 1954, as amended (42 U.S.C. 2168).

Subpart 936.2—Special Aspects of Contracting for Construction

936.202 Specifications.

(a) Construction specifications shall allow the use of concrete which contains fly ash as an optional or alternate material in accordance with 910.004 unless a determination is made that its use is technically unacceptable.

(b) The list of excepted supplies appearing at FAR 25.108 shall be noted in the specifications.

(c) To support all invitations for bids, plans and specifications will be available on request to all prospective bidders, including general contractors, subcontractors, and material and

equipment suppliers. Where the cost of reproduction is $10 or more, the charge shall be a minimum of $10 and subject to a maximum of $500, depending upon the size of the project and the number of drawings and the volume of specifications involved. Where the cost of reproduction is less than $10, the contracting officer has authority to make distribution at cost of reproduction, or free of charge, as a particular situation dictates.

(d) No refund for the return of plans and specifications will be made except when the invitation is canceled. Under such circumstances, refund of payments will be made upon return of the plans and specifications in good condition to the issuing office.

(e) Plans and specifications will be issued without charge to such organizations as The Associated General Contractors of America, American Road Builders' Association, Dodge Reports, Blue Reports, Brown's Letters, Inc., builders and contractors exchanges in the locality in which the project is to be constructed, and others that maintain public plan display rooms.

(f) Payments received for plans and specifications shall be handled in accordance with the regulations prescribed by the General Accounting Office in sections 3020–10 and 3030 of Title 7 of GAO Manual for Guidance of Federal Agencies.

(g) If the contracting officer desires to have the architect-engineer or construction manager handle the furnishing of plans and specifications and payments therefor, the invitations for bids should so state, and the architect-engineer or construction management contract shall provide the manner in which the receipts are to be handled, generally as a credit to the contract.

(h) No charge will be made to original receivers of plans and specifications for revised sheets of drawings and revised pages of specifications which are issued by amendments to invitations.

(i) Plans and specifications may be issued in complete sets only, or in complete sets and parts of sets, as the Head of the Contracting Activity determines to be best. If less than complete sets of plans and specifications are issued, the distribution should be based on an applicant's request for specific pages and drawing sheets.

(j) When a non-refundable fee is to be charged, a provision substantially the same as 952.236–72 shall be included in the solicitation.

Subpart 936.6—Architect-Engineer Services

936.601 Policy.

To ensure the broadest publicity concerning DOE's interest in obtaining architect-engineer services, a notice of intention to contract for architect-engineer services shall be prepared and published for each acquisition of architect-engineer services, in accordance with the requirements of FAR 5.205(c) and 5.207. The submissions requested and received as part of the architect-engineer selection process differ in substance from proposals received for other types of acquisition. Consequently, the policies and procedures contained in FAR 15.412, and 915.412 concerning the consideration of the late responses are not applicable to proposals submitted under the provisions of this Subpart 936.6.

936.602–2 Evaluation boards.

(a) Architect-engineer evaluation boards shall be used for the selection of professional architect-engineer services when the estimated cost of the contract is $500,000 or more. Except as provided by this subpart, the use of architect-engineer evaluation boards shall be governed by the general policies and procedures contained in FAR 36.603 and the policies concerning the selection of such contractors by board process contained in internal DOE Directives. These policies and procedures are also applicable to the selection of architect-engineers for awards of less than $500,000. However, less formal procedures and practices may be followed, depending upon the circumstances in each particular selection, at the discretion of the selecting official. The Source Selection Office, as designated in 915.612, shall establish an architect-engineer evaluation board and select the contractor.

936.602–3 Evaluation board functions.

(a)(1) Firms indicate their general interest in providing services by annual submittal of Standard Form 254; and indicate specific interest in providing services for a particular project, in response to the public announcement, by submittal of Standard Form 255 (and Standard Form 254 if not previously submitted). Supplemental information may be solicited as a means of initiating the discussion phase of the architect-engineer selection process. This may be particularly appropriate for the larger or more complex projects where sufficient qualification and performance data are not available from the Standard Forms 254 and 255, and additional information beyond that already furnished is needed to apply the selection criteria and evaluate and rank the firms. Firms should not be requested to furnish the same information previously submitted on Standard Forms 254 and 255, nor should they be requested to submit preliminary designs, plans and drawings, except in appropriate circumstances involving design competitions.

(2) After the notice of intention of contract for architect-engineer services has been published and the date for submission of the standard forms has passed, the evaluation board and/or the selecting official shall review and evaluate the Standard Form 254 and the Standard Form 255, where applicable, submitted in response to the public announcement. Consideration should be given to requesting submission of a Standard Form 255, by qualified firms which fail to respond to the public announcement to assure adequate competition. Based on this evaluation, no less than three firms shall be selected for the purpose of holding discussions. It is not necessary to hold discussions with any firm that fails to submit a Standard Form 255, where required.

(c)(1) Normally, only those firms which are compatible with the size and complexity of the job requirements should be considered for discussions; that is, for a small, relatively simple job, firms whose resources and qualifications are far in excess of the job requirements should not be considered unless no satisfactory response is received from any other compatible highly qualified firm, and where size and simplicity of the project permit, consideration should be limited to the geographic area of the project.

(2) Every opportunity and encouragement shall be given to small business, small disadvantaged businesses and women-owned small business concerns firms. Toward this end, groups that propose to form a joint venture or engage the services of small consulting firms for portions of the effort shall be given full consideration by the evaluation board and the selection official of their combined qualifications

(3) After three or more firms have been selected in accordance with 936.602–70, discussions shall be held with these firms regarding anticipated concepts and the relative utility of alternative methods of approach for furnishing the required services. These discussions may be used to obtain additional qualification, performance, and management data, and other information needed to properly apply

the evaluation criteria and evaluate the firms under consideration.

(4) Requests for supplemental information shall not request firms to submit price proposals. Such requests can be used only to obtain information that will enable DOE to select the best qualified contractor. When a request for supplemental information is made, some wording should be included to identify it with the discussion phase of the selection process similar to the following: "As a result of our evaluation of material on file with this office and the SFs 254 and/or 255 submitted in response to Public announcement ——, we have selected your firm for further consideration for selection and award of a contract to perform the architect-engineer services which are described below. The principal purpose of this request is to obtain additional specific qualification and performance data concerning your firm."

(5) The term "discussions" includes telephone conversations, exchange of correspondence, or interviews. The term "interview" as used in FAR 5.207(d), Note 63, means "discussions" as defined above.

(d) When the evalnation board completes its functions, it shall prepare a report, including its recommendations, and submit it along with the solicitation, selection criteria, weights, and other information and documents, as may be requested, to the Source Selection Official through the Procurement Executive, or designee, when the Source Selection Official is in Headquarters. The Procurement Executive, or designee, shall arrange for appropriate Headquarters review of the report and prepare an action memorandum to the Source Selection Official for consideration in making the selection.

(e) The evaluation board's duties will ordinarily include preparation of the public announcement (936.601) and development of evaluation criteria, based on architect-engineer services requirements established by the appropriate DOE program and staff organization; development of evaluation criteria weighting; review and evaluation of Standard Forms 254 and 255; review and evaluation of information from other sources, such as appraisals of performance on previous contracts awarded to the architect-engineer firm; development of additional information requirements and conduct of discussions with firms selection for further consideration; determination of ranking of the firms evaluated; preparation of the evaluation board report and presentation of the board's findings, or recommendations, to the selecting official.

(f) The public announcement (see 936.601) covering the requirement for architect-engineer services, criteria and relative weightings, as developed by the evaluation board, shall be submitted to the Procurement Executive or designee, for appropriate review and comment prior to issuance of the announcement, where it is a Headquarters' selection or requires Headquarters' review and approval of the contract action. Commerce Business Daily announcements shall be prepared in accordance with FAR Subpart 5.2.

936.602-4 Selection authority.

(b) Upon completion of discussions and evaluation of the firms that were selected for discussions, the board shall recommend to the selecting official, in order of preference, based upon the criteria in 936.602-70 and any special criteria included in the public announcement, no less than three firms deemed to be the most highly qualified to provide the services required. The Standard Form 255 submitted by firms with which written or oral discussions were held should be retained in selection file; all other Standard Forms 254 may be discarded 90 days after award. The selecting official shall then select the firm determined to be most highly qualified. Should the firm selected be other than that ranked highest in qualifications by the evaluation board, the selecting official shall provide complete documentation of his decision which shall become part of the contract file.

936.602-70 DOE selection criteria.

Contracting officers or architect-engineer evaluation boards shall apply the evaluation criteria contained in this subsection, as appropriate, and any special criteria developed for individual selections. When special and additional criteria are to be used, they shall be set forth in the public announcement required by 936.601, and a written justification for their use shall be placed in the DOE file maintained for the project.

(a) *General qualifications, including:*

(1) Reputation and standing of the firm and its principal members;

(2) Experience and technical competence of the firm in comparable work;

(3) Past record in performing work for DOE, other Government agencies, and private industry, including projects or contracts implemented with no overruns; performance from the standpoint of cost including cost overruns (last 5 years); the nature, extent, and effectiveness of contractor's cost reduction program; quality of work; and ability to meet schedules including schedule overruns (last 5 years) (where applicable);

(4) the volume of past and present workloads;

(5) Interest of company management in the project and expected participation and contribution of top officials;

(6) Adequacy of central or branch office facilities for the proposed work, including facilities for any special services that may be required;

(7) Geographic location of the home office and familiarity with the locality in which the project is located:

(b) *Personnel and organizations.*

(1) Specific experience and qualifications of personnel proposed for assignment to the project, including, as required for various phases of the work:

(i) Technical skills and abilities in planning, organizing, executing, and controlling;

(ii) Abilities in overall project coordination and management; and

(iii) Experience in working together as a team;

(2) Proposed project organization, delegations of responsibility, and assignments of authority;

(3) Availability of additional competent, regular employees for support of the project, and the depth and size of the organization so that any necessary expansion or acceleration could be handled adequately;

(4) Experience and qualifications of proposed consultants and subcontractors; and

(5) Ability to assign adequate qualified personnel from the proposed organization (firms own organization, joint-venture organizations, consulting firms etc.) including key personnel and a competent supervising representative.

(c) Additional (or special) criteria developed for the specific project shall be considered and evaluated as may be appropriate.

936.603 Collecting of data on and appraising firms' qualifications.

(a) *Establishing offices.* DOE offices that regularly acquire architect-engineer services shall collect and maintain current qualifications and performance data files on architect-engineer firms, including information on their past experience on various types of construction projects. Normally, Standard Form 254, Architect-Engineer and Related Services Questionnaire, shall be used for this purpose. Information from other sources, such as appraisals of performance of previous projects awarded to the firm, may also be included in the files.

936.605 Government cost estimate for architect-engineer work.

(a) Prior to the initiation of negotiations, an independent Government estimate of the cost of the required architect-engineer services will be prepared based on a detailed analysis of the costs expected to be generated by the work. Consideration shall be given to the estimated value of the services to be rendered, and to the scope, complexity, and nature of the project. The independent Government estimate shall be revised as required during negotiations to reflect changes in or clarification of the scope of the work to be performed by the architect-engineer. On construction projects, a fee estimate based on the application of percentage factors to project cost estimates of the various segments of the work involved may be developed for comparison purposes, but such a cost estimate shall not be used as a substitute for the independent Government estimate.

(b) The Government estimate shall include the following information:

(1) A sufficiently detailed description and cost estimate of the work to permit an evaluation of services to be performed by the various participants and the degree of complexity of its principal components. When A–E contracts are fixed price, the information as to the work should be in more detail and on a firmer basis, particularly as to estimated costs, than for a CPFF contract. The estimated cost of the component items (including the cost of material and equipment furnished by DOE) and their descriptions, insofar as available, should be included as follows:

(i) Major buildings and other structures for which complete designs and specifications are to be prepared by the architect-engineer, including number and cost of each type, with as much information as is available (within security requirements) as to the functional requirements for such structures;

(ii) Major utilities, including classifications and costs, in as much detail as practicable;

(iii) Special equipment to be procured by a DOE operating contractor, construction contractor, or architect-engineer, or furnished by DOE;

(iv) Special equipment to be designated by the architect-engineer; and

(v) Special equipment to be installed by the construction contractor.

(2) A statement should be provided indicating total estimated cost of the work exclusive of the construction contractor's fee, and to the extent available, identifying labor, material, and indirect costs, and any amount included for contingencies; estimated cost of architect-engineer services; and the estimated time of completion of design or construction work with an explanation of the basis for establishing the completion schedules.

(c) A written statement should be prepared which gives the extent to which the services of the architect-engineer include any of the services set forth below.

(1) Conceptual Design—Provide preliminary studies to develop a project scope that satisfies a program need, statutory requirements; validate feasibility and attainable performance levels; identify and quantify risks: develop a reliable budget estimate and a realistic performance schedule; develop project criteria and design parameters for all engineering disciplines, identify applicable codes and standards, quality assurance requirements, environmental studies, materials of construction, space allowances, energy conservation features, health, safety, safeguards, and security requirements and any other features or requirements necessary to describe the project.

(2) Title I—Provide the necessary topographical and other field surveys, test boring, and other subsurface investigation; prepare preliminary studies, sketches, layout plans, and outline specifications; and prepare reports including estimates of cost of the proposed project and of all structures, utilities, and appurtenances thereto.

(3) Title II—Provide complete design of the work including preparation of all required preliminary and final working drawings, specifications, estimates, and contract documents; and assist in securing, analyzing, and evaluating bids or proposasl for construction; and consult with DOE on all questions arising in connection with the services performed by the architect-engineer.

(4) Title III—Provide complete architect-engineer supervision and inspection of construction under the direction of a responsible representative, check shop drawings, and furnish drawings to show construction has actually been accomplished.

(5) Process design-Process design normally requires the preparation of flow diagrams showing each operating step to perform the process; material and heat balances where required; determination of the nature, capacity and design characteristics of production equipment; the general design of connecting flow lines to handle the calculated rates of product and by-product flow; and schematic layouts.

(6) Procurement of materials and equipment (describe fully) if specified for accomplishment in conjunction with Title I, II, and III services and approved by the Procurement Executive.

(7) Other special services (describe fully) if specified for accomplishment in conjunction with Title I, II, and III services and approved by the Procurement Executive.

936.606 Negotiations.

(a) A fixed-price contract for architect-engineer services should be used wherever it is practicable to compile, in advance of the preparation of plans and specifications, adequate information specifically describing the character and extent of services required. When there is insufficient scope information available to permit contracting for complete services (Title I, II, and III) on a fixed-price basis, and when it may be to the advantage of the Government to do so, appropriate consideration should be given to contracting only for a study contract or for the preliminary engineering (Title I), on either a reimbursable or fixed-price basis, in order to permit entering into a fixed-price contract for the remaining portion of architect-engineer service (Title II and III), based upon information developed in the first phase.

(b) The contracting officer shall request the selected architect-engineer firm to submit its price proposal with supporting cost or pricing data in accordance with FAR 15.804. Revisions of the price and supporting cost or pricing data may be made as required during negotiations to reflect changes in or clarification of the scope of work to be performed by the architect-engineer or findings derived from preaward audits conducted pursuant to FAR 15.805–5.

(f) The contracting officer shall negotiate a price considered fair and reasonable based on a comparative study of the independent Government estimate and the architect-engineer's proposal. Significant differences between elements of the two figures and between the overall figures shall be discussed and the contracting officer shall ascertain the reasons therefor. Under the authority of section 602(d)(13) and (20) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 474) as amended, contracts for architect-engineer services for former AEC functions and those of BPA now being performed by DOE shall not be limited to the six percentum fee restriction in section 304 of the Act, 41 U.S.C. 245(b).

(g) Promptly at the conclusion of each negotiation, a memorandum setting forth the principal elements of the negotiation shall be prepared in accordance with the requirements of FAR 15.808, for use by the reviewing authorities and for inclusion in the contract file. The memorandum shall contain sufficient detail to reflect the significant considerations controlling the establishment of the price and other terms of the contract.

936.609–3 Work oversight in architect-engineer contracts.

In addition to the clause at FAR 52.236–24, the contracting officer shall insert the clause at 952.236–71 in architect-engineer contracts.

Subpart 936.7—Standard Forms for Contracting Architect-Engineer Services and Dismantling, Demolition or Removal of Improvements

936.702 Forms for use in contracting for architect-engineer services.

(a) The contracting officer shall also include the additional terms at 952.236–70 in Standard Form 252 item 6.

Subpart 936.70—Rental of Construction Equipment

936.7000 Scope of subpart.

This subpart sets forth general policy and instructions which shall be applied to rental of construction equipment for use by DOE contractors with cost-reimbursement type contracts.

936.7001 General policy.

(a) It is the policy of the DOE to use presently owned DOE construction equipment to the fullest extent. Careful investigation shall be made of the equipment available, not only at the field office concerned, but at other field offices, to determine whether such equipment can be economically utilized on the job. The Procurement Executive or designee, can assist in the investigation of excess equipment available in other offices.

(b) It is the policy of the DOE to rent construction equipment, where available, rather than purchase it, unless in the case of third-party-owned equipment, the contracting activity determines that accrued rentals on a particular item of equipment will approximate the cost of ownership of it except, however, that individual items of construction equipment having an original cost of less than $1,000 ordinarily should be purchased and not rented. Where it is clearly to the advantage of the Government, items having a cost of less than $1,000 may be rented with the approval of the Head of the Contracting Activity. Whenever it is practical, cost and other factors considered, Contractor-owned equipment shall be rented in preference to renting third-party-owned equipment.

(c) It is the policy of the DOE to pay rental for construction equipment at rates not higher than those prevailing in the locality, except under unusual circumstances, and at as low a rate as is consistent with securing modern equipment in good operating condition. Costs of repair, job interruption due to poor equipment, transportation and in-transit rental may well offset any apparent savings in rental rates. Rental paid shall be subject to any Government price ceiling regulations that may be in effect.

936.7002 Rental of contractor-owned equipment.

936.7002–1 Rental agreements.

The terms and conditions governing rental by DOE of construction equipment from a cost-type construction contractor are set forth in 936.7301. Outline of agreement for rental of contractor-owned construction equipment. This form of agreement is designed for use as an appendix to a DOE cost-type construction contract. It may be modified for rental of equipment under other contractual arrangements and it may be modified for use as a separate contract or as an attachment to a subcontract. Some of the aspects of this agreement to which particular attention should be given are set forth in 936.7002–2 through 936.7002–9.

936.7002–2 Rental period.

The base rental period shall extend from the time the equipment is accepted at the job site until the contractor is notified in writing by DOE's representative that the equipment is no longer required. Subject to applicable limitations covered in the rental agreement form, the contractor shall be paid rental during the in-transit time and during the time required for equipment repair or replacement prior to return to the contractor.

936.7002–3 Rental rates.

(a) Rates for rental of contractor-owned equipment shall be fair and equitable. The rental rates contemplate that the DOE will pay incoming and outgoing transportations costs and rental during in-transit time for both inbound and outbound transportation of equipment; however, terms more favorable to DOE may be negotiated where appropriate. The rental rates to be paid for the use of contractor-owned equipment under normal conditions should not exceed 65 percent of the rates quoted in the latest edition of the Associated Equipment Distributor's (A.E.D.) "Compilation of Average Rental Rates for Construction Equipment." However, Heads of Contracting Activities may approved rates in excess of 65 percent of the current A.E.D. schedule when local conditions require higher rates. When it becomes necessary as a general practice to exceed 65 percent of the current A.E.D. schedule, Heads of the Contracting Activities shall be advised.

(b) For items of equipment that are not covered by the A.E.D. schedule, use the latest edition of "Contractors' Equipment Ownership Expense" document published by the Associated General Contractors of America, Inc., and information on prevailing local rates for developing rates that would be consistent with the 35 percent reduction of the A.E.D. rates (i.e., taking into consideration the expenses paid by the Government under the rental agreement).

936.7002–4 Application of rates.

(a) Rental rates shall be based upon one shift of 8 hours per day, 40 hours per week, or 176 hours per month of a 30-consecutive-day period.

(b) The monthly rental rate and its pro-rata share shall apply to all rental periods of 1 month or more. The weekly rate and its pro-rata shall apply to all rental periods of 1 week or more up to 1 month. The daily rate and its pro-rata shall apply to all rental periods up to 1 week.

(c) Inasmuch as there are certain elements of cost to an equipment owner which do not change even though the equipment is used on more than one shift per day, it is believed equitable to pay a lower rental rate during a second and third shift than would be paid during a single shift. Therefore, the rental agreement form provides for payments for overtime at a rate equal to one-half the rate for the first shift.

936.7002–5 Insurance.

(a) Generally, rental rates should include the cost of insurance or self-insurance covering loss of or damage to the equipment during rental periods. The rental agreement for contractor-owned equipment is so worded.

(b) However, if the contracting officer determines that it is not practical to include the cost of such insurance in the rental rates, paragraphs 3(d) and 7(a) shall be amended as indicated in the applicable notes following these paragraphs in 936.7301.

936.7002-6 Rental limitation.

The rental agreement form provides that when the total amount of rental paid to the contractor for any one unit of equipment equals 75 percent of the mutually agreed value of that unit, as set forth in the initial inspection report, the equipment is to remain available for the work under the construction contract as long as it will be required without any further rental payments to the contractor. The rental ceiling of 75 percent of the agreed-upon value of the equipment applies to all rental paid, including rental paid during in-transit time to and from the site of the work and down time from any operating repairs or restoring of the equipment after it is no longer needed at the site. The purpose of the provision is to prevent the Government from paying rental in excess of the contractor's investment, and is included in lieu of an "option to purchase" clause. Once a particular piece of equipment has been released, the contractor will be required to return it to the job under the original rental period.

936.7002-7 Record of negotiation.

A record of negotiation shall set forth the information used to determine the reasonableness of the rental rates, including a breakdown of the contractor's equipment ownership expense, similar to that itemized in the Associated General Contractors of America's document, "Contractors' Equipment Ownership Expense."

936.7002-8 Responsibility for repair and replacement.

The rental agreement describes the responsibilities of the parties with respect to maintenance and repair necessary to the operation of the rented equipment, or replacement of such equipment. The DOE's responsibility includes repairs resulting from normal wear and tear, provided they were necessary in order to continue the equipment in service. However, when the equipment is no longer required on the job, the extent of the DOE's obligation is only to return the equipment to the contractor in as good operating condition as when received, less wear and tear.

936.7002-9 Equipment condition and inspection.

(a) Construction equipment shall be given a rigid and detailed inspection by representatives of the DOE and, at the contractor's option, by representatives of the contractor, before its shipment and acceptance or use on the job. Equipment shall be inspected under actual workloads insofar as practicable. In cases where it is not practical to inspect equipment prior to its shipment to the job site, the contractor should be informed of the extent of inspection and the expected condition of his equipment in t event the equipment does not meet required standards. The transportation, rental, or any other expenses shall be paid by DOE unless, at contractor's expense, the equipment is repaired to acceptable standards in a reasonable length of time. A similar inspection shall be made immediately prior to scheduled return shipment of an item of equipment.

(b) A detailed inspection report shall be signed by each representative inspecting. The initial inspection report shall be used at the time of release as a basis of determining the repairs necessary to place the equipment in as good operating conditions as when accepted less normal wear and tear. After necessary repairs are completed, a final inspection report shall be completed by a representative of the DOE and, at his option, the contractor.

(c) If initial detailed inspection discloses that the condition of the equipment is doubtful, arrangements should be made with the contractor for a trial period of operation to prove the equipment, with provisions that if equipment is found unacceptable in the trial period, no rental, transportation, or other expenses will be due the contractor. Repairs to equipment which fails in service due to defects not reasonably ascertainable on initial inspection shall be at the contractor's expense.

936.7003 Rental of third-party-owned equipment

936.7003-1 Rental agreement.

The terms and conditions governing rental of construction equipment from a third party which does not operate the equipment are in accordance with 936.7002-2, 936.7002-4, 936.7002-8, and 936.7002-9, and the following subsections of this part, and are set forth in 936.7302, Outline of agreement for rental of third-party-owned construction equipment. Heads of Contracting Activities shall assure that these terms and conditions are used by DOE cost-reimbursement construction contractors and that similar terms and conditions are used by other DOE cost-reimbursement contractors or subcontractors in renting construction equipment from a third party. These terms and conditions may be suitably modified to provide for rental of equipment with operators. Some of the aspects of this agreement to which particular attention should be given are set forth in the next three subparts.

936.7003-2 Rental rates.

Third-party equipment shall be rented on the basis of competitive bids, rental rates, transportation costs, and other factors being considered. The rental specifications shall be based on the circumstances of a particular case, including the length of rental period, the availability of equipment in certain localities, and the work requirements.

936.7003-3 Insurance.

The provisions of 936.7002-5(a) also apply to the rental of construction equipment from a third party. However, if the contracting officer determines that the rental rates are not to include the cost of insurance or self-insurance covering loss of or damage to the equipment, the rental agreement shall reflect this condition.

936.7003-4 Option to purchase equipment.

When accrued rentals on a particular item of equipment will likely approximate the appraised value of equipment and a decision has been made not to purchase in accordance with 936.7001(b), consideration shall be given to including in the rental agreement, an option to purchase the equipment.

Subpart 936.71—Inspection and Acceptance

936.7100 Scope of subpart.

This subpart implements and supplements FAR Part 36 by prescribing the policies and requirements for inspection and acceptance under construction contracts.

936.7101 Construction contracts.

(a) Inspection services may be performed by the architect-engineer responsible for the design. Inspection services may not be procured from a construction contractor with respect to its own work.

(b) When one contractor is to inspect the work of another, the inspection contractor will be given written instructions defining its responsibilities and stating that it is not authorized to modify the terms and conditions of the contract, to direct additional work, to waive any requirements of the contract, or to settle any claim or dispute. Copies of the instructions will be given to the contractor who is to be inspected, with a request to acknowledge receipt on a copy to be returned to the contracting officer. In this manner, both contractors are on express notice of the authority and limitations of the authority of the inspecting contractor.

Subpart 936.72—Acquisition of Special Equipment

936.7200 Scope of subpart.

Contracts for acquisition services only are rarely used. Acquisition of special equipment is generally contracted for in conjunction with CPFF contracts for construction, operating, or architect-engineer services. In special situations, acquisition of other equipment and construction materials is also contracted for in conjunction with CPFF contracts for operating or architect-engineer services. The description of acquisition services in paragraph (936.7202) below is applicable to all of these cases.

936.7201 Definition.

Special equipment is equipment for which the purchase price is of such a magnitude compared to the cost of installation as to improperly reflect the amount of technical direction and management effort required of the contractor. Generally, special equipment is considered to be a capital-asset-type of equipment (typically, equipment costing more than $1,000 and having a service life of more than two years) for which the cost of installation and handling (including unloading, hauling and warehousing) is 5 percent or less, of the purchase price of the equipment. However, the determination of specific items of equipment in this category requires application of judgment and careful study of the circumstances involved for each project. This category of equipment would generally include items such as:

(a) Major items of prefabricated process or research equipment.

(b) Major items of preassembled equipment such as packaged boilers, generators, machine tools, and larger electrical equipment. In some cases it would also include special apparatus or devices such as reactor vessels and reactor charging machines.

936.7202 Description of acquisition services.

(a) Acquisition as herein considered is an activity involving judgment, knowledge, and experience relating to the manufacture, use, or application of the article or process to be purchased. It may include the development or location of sources of supply, and generally includes preparation of bidding documents, solicitation of proposals, analysis of proposals received (including, where necessary, technical and sometimes complicated evaluation of performance characteristics of the equipment of different manufacturers), inspection at manufacturer's plant as distinguished from inspection supplied under Title III services of an architect-engineer contract, and evaluation of production capacities to meet required delivery. Acquisition includes necessary coordination with participating contractors and DOE for especially designed equipment, general and specific expediting, and special assistance to the manufacturers in helping to locate scarce materials and machine tools and in supporting allocation for critical materials where this is a necessary function. Acquisition normally includes inspection and receiving upon delivery at the site (this may be a joint activity where the contracting agent is not the constructor) and payment. All on-site physical activities after delivery, including unloading, warehousing, hauling, and installation are considered a construction activity and not acquisition.

(b) Coordination, timing, and technical know-how are important factors to be considered in the selection of a contracting agent. The advantages and disadvantages of placing full responsibility in one contractor for construction and acquisition, or split responsibility where the acquisition is placed under a contract with architect-engineer or operating contractor, should be evaluated in the light of the above factors.

Subpart 936.73—Outline for Equipment Rental Agreement

936.7300 Scope of subpart.

This subpart contains agreement formats which are suggested for use where DOE rents construction equipment from a prime cost-type construction contractor, or third-party-owned equipment. The outline for rental from the prime contractor is designed for use as an appendix to the prime cost-type construction contract. The format for use with third parties is an agreement within itself.

936.7301 Outline of agreement for rental of contractor-owned construction equipment.

Attached to and made a part of Contract No. ———.

Contractor: ————.

The following provisions shall govern the use and rental of the Contractor's construction plant and equipment (hereinafter called the "equipment") under the contract:

1. *Equipment rented.* The Contractor agrees to furnish for his own use in the performance of the contract the equipment itemized in Schedule 1 (attached to and made part of this agreement). Each item of the equipment shall be clearly marked with the identification number assigned to it on Schedule 1. the Contractor and DOE may from time to time amend Schedule 1 by deleting items or adding items.

2. *Payments.* As provided in the clause of the contract entitled "Allowable Cost and Payment," the allowable costs of the performance of the contract shall include:

(a) Rental. Rental of equipment, for rental periods determined in accordance with paragraph 4 and at the rates set forth in Schedule 1 applied in accordance with paragraph 3.

(b) Transportation. Transportation of equipment in accordance with paragraph 5.

(c) Repair. Maintenance, repair, and replacement of equipment to the extent provided in paragraphs 6 and 7.

Payment shall be made in accordance with procedures set forth in the clause of the contract entitled "Allowable Cost and Payment."

3. *Application of rates.* The rates set forth in Schedule 1 shall be applied in accordance with the following rules:

(a) Basis of rates. The rates are based upon one shift of 8 hours per day, 40 hours per week, or 176 hours per month (of 30 consecutive days).

(b) Apportionment of rates. The monthly rate and its pro-rata share shall apply to all rental periods of 1 month or more. The weekly rate and its pro-rata share shall apply to all rental periods of 1 week or more up to one month. The daily rate and its pro-rata share shall apply to all rental periods up to 1 week.

(c) Overtime. If the equipment is rented by the day, the rate for overtime is one-sixteenth ($\frac{1}{16}$) of the daily rate for each hour of use in any day in excess of 8 hours; if it is rented by the week, the rate for overtime is one-eightieth ($\frac{1}{80}$) of the weekly rate for each hour of use in any week in excess of 40 hours; and if it is rented by the month, the overtime rate is one-three hundred and fifty-second ($\frac{1}{352}$) of the monthly rate for each hour of use in excess of 176 hours in any one 30 consecutive day period.

(d) Insurance. Rental rates include the cost of insurance or self-insurance covering loss of or damage to the equipment during rental periods, as indicated in Schedule 1 and copy of policy attached. The Contractor agrees to maintain this insurance coverage for loss of or damage to the equipment during the entire term of this agreement. The Contractor shall waive any right of action against the government to the extent that loss is recovered from insurance applicable to loss, damage or destruction of leased equipment.

Note.—*When rental rates do not include the cost of insurance or self-insurance, substitute the following text for paragraph (d):*

"Rental rates do not include any factor representing the cost of insurance or self-insurance covering loss of or damage to the equipment during rental periods."

4. *Rental period.* The rental period for which rental is payable for an item of equipment shall consist of a base period, beginning upon the date stipulated in a written notice from the contracting officer to the Contractor that DOE has accepted the item of equipment at the job site, and ending upon the date stipulated in a written notice

from the contracting officer to the Contractor that use of the item of equipment is terminated, subject to the following additions, deductions, and conditions:

(a) In-transit time. There shall be added to the base period:

(1) The actual in-transit time of inbound transportation from one point of shipment to the job site, not exceeding the time required for such transportation by commercial carrier via the most expeditious routing available, of any item of equipment subsequently accepted by DOE and

(2) The actual in-transit time of outbound return transportation from the job site, to the original point of inbound shipment, or other destination at equal or less distance from the job site, not exceeding the time required for such transportation by commercial carrier via the most expeditious routing available, of any item of equipment whose use has been terminated by DOE.

(b) Delay due to repairs.

(1) The time required for repair of equipment shall be deducted from the base period if such repair is necessitated by willful misconduct or lack of good faith on the part of the Contractor's managerial personnel, or made necessary by defects not reasonably ascertainable on initial inspection by DOE.

(2) If an item of equipment has been accepted by DOE, the subsequent withdrawal by the Contractor of such item from the work for necessary repairs (due to causes other than those mentioned in the preceding paragraph) shall not interrupt the running of the base period unless the contracting officer finds that the Contractor has not exercised due diligence in effecting the repairs or in returning the item to use, and in such event the time which the contracting officer finds to have been excessive shall be deducted from the base period.

(c) Time for repairs on termination. In the event DOE, in accordance with paragraph 6(c), elects to effect repair or replacement of an item of equipment prior to scheduled return shipment, the time required for such repair or replacement shall be added to the base period.

(d) Trial period. If initial inspection by DOE discloses that the condition of an item of equipment is doubtful, it will not be accepted by DOE without a trial period of operation to prove such item, upon terms and conditions agreed upon by the Contractor and DOE. If the equipment is found unacceptable in the trial period, no rental, transportation, or other expenses will be due the Contractor.

(e) Rental limitation. When the aggregate of rental paid for an item of equipment equals 75 percent of its appraised value, as agreed upon by the Contractor and the contracting officer at or prior to the time of acceptance by DOE and set forth in the initial inspection report, the rental period shall cease as to such item for purposes of rental payment. Such item shall thereafter remain available for use under the contract without further rental payments but otherwise in accordance with the terms and conditions of this agreement, until the contractor receives written notice from the contracting officer that use of the item is terminated. The limitation of rental to 75 percent of the agreed value shall apply to the total of all rental due under this paragraph 4. A failure to agree as to the value of an item of equipment shall be deemed to be a dispute within the meaning of the article of the contract entitled "disputes."

5. *Transportation.* Inbound transportation of equipment, f.o.b. cars from the original point of shipment to the job site, and outbound return transportation of shipment f.o.b. cars to the original point of shipment or to another destination selected by the Contractor at equal or less distance from the job site, shall be at the expense of the Government, subject to the following conditions:

(a) Limitation on return transportation. The Government shall not bear any expense for outbound return transportation in excess of the amount paid for inbound transportation to the job site, except additional amounts representing or equivalent to increase in freight rates applicable to the route to the original point of shipment.

(b) Limitation on long distance transportation. Transportation over a distance in excess of 500 miles shall be subject to the approval of the contracting officer.

(c) Transportation by other than common carrier. The expense borne by the Government hereunder for transportation by a method other than common carrier shall be the actual expense of such transportation as shown by evidence satisfactory to the contracting officer.

(d) Loading and unloading. Only such costs of loading and unloading equipment as are incurred at the job site shall be borne by the Government.

(e) Equipment not in required condition. The Government shall not bear the expense of transportation of any item of equipment which arrives at the job in a condition which does not fulfill the requirements of paragraph 6(a) and which is not placed in the condition required under paragraph 6(a) by the Contractor at the Contractor's expense within a reasonable time.

6. *Condition of equipment.* The following conditions apply.

(a) Condition on delivery. The equipment shall, on delivery at the job site, be in good operating condition to render efficient, economical, and continuous service, and shall be equipped with necessary and required safety devices according to ICC regulations and other applicable Federal and State laws. Each item of the equipment shall have been registered by the Contractor at the Contractor's own expense with all Federal, State, and local authorities requiring registration, and registration plates or other evidence of registration shall be displayed in accordance with the requirements of the registering authority. The cost of subsequent registration shall also be borne by the Contractor. If any item of equipment on arrival at the job site is not placed in the condition required by this paragraph within a reasonable time, the contracting officer may reject the item and require its removal from the job site, and in that event, the Government shall not be liable for rental, transportation, or any other expense in connection with such item.

(b) Condition on the job. Equipment accepted by DOE shall be maintained by the Contractor in the condition required for its operation until use of the equipment is terminated by the contracting officer. Maintenance and repair required to keep accepted equipment in such condition during such time and replacement (at the agreed value set forth in the initial inspection report, less depreciation) of accepted equipment lost or destroyed during such time, shall be at the expense of the Government unless such maintenance, repair, or replacement is made necessary by loss or damage covered by any policy of insurance (or self-insurance), or caused by willful misconduct or lack of good faith on the part of the Contractor's managerial personnel, or is made necessary by defects not reasonably ascertainable on initial inspection of DOE.

(c) Condition on termination. Upon termination by DOE of the use of any item of equipment, the item shall be returned by DOE to the Contractor at the job site in as good condition as when received by DOE (as shown by the initial inspection report) less normal wear and tear, except for any loss or damage which is due to willful misconduct or lack of good faith on the part of the Contractor's mangerial personnel, or defects not reasonably ascertainable on initial inspection by DOE, or which is covered by any policy of insurance (or self-insurance). If the inspection report to be made immediately prior to the scheduled return shipment of an item of equipment discloses the necessity for repairs or replacement the cost of which is the responsibility of the Government under this paragraph, DOE may at its election either (A) effect such repairs or replacements or (B) allow the Contractor the agreed estimated reasonable cost of such repairs (or the agreed value set forth in the initial inspection report, less depreciation, if replacement is required), and a sum in lieu of rental for the time estimated by the contracting officer to be necessary for such repairs. Failure to agree as to the estimated reasonable cost of affecting such repairs or replacement under (C) above, shall be deemed to be a dispute within the meaning of the article of the contract entitled "Disputes."

(d) Inspection. For the purpose of establishing the condition of the equipment, each item of equipment shall be inspected, tested and inventoried by representatives of DOE and at the Contractor's option, together with representatives of the Contractor, prior to its acceptance by DOE and also immediately prior to scheduled return shipment. The results of such inspections and tests, and the inventories compiled, shall be incorporated in reports submitted to the contractor and to the contracting officer. For any item of equipment which the Contractor has failed to inspect, test, and inventory, or has failed to report as provided herein, the Contractor agrees that the report submitted hereunder by a representative of DOE shall be conclusive evidence of the condition as of the date of inspection.

(e) Excessive repairs. The contracting officer may deduct from payments otherwise due the Contractor, any amounts previously allowed the Contractor under this agreement for repairs made at the Government's expense which the contracting officer finds to

have been in excess of the requirements of this agreement.

7. Protection of equipment—steps to be taken in event of loss. The following apply.

(a) The Contractor shall take all reasonable and necessary precautions to safeguard and protect the equipment. Any loss of or damage to the equipment is not reimbursable to the extent that such loss or damage is required to be covered by insurance under paragraph 3(d) of this agreement.

Note.—*When paragraph 3(d) of the agreement provides that rental rates do not include any factor representing the cost of insurance or self-insurance covering loss of or damage to the equipment during rental periods, the following paragraph (a) shall be used*

(a) The Contractor shall take all reasonable and necessary pre-cautions to safeguard and protect the equipment. Any loss or damage to the equipment will be at the Contractor's risk to the extent that such loss or damage is covered by any policy of insurance (or self-insurance).

(b) Upon the happening of any loss or damage which is at the risk of the Government under this agreement, the Contractor shall immediately notify the contracting officer of the occasion and extent thereof, shall at the contracting officer's request effect an assignment and subrogation in favor of the Government of all the Contractor's rights and claims (except those against the Government) arising out of any such loss or damage, shall, if required by the contracting officer, authorize representatives of the Government to settle or prosecute to final judgment any such claims, and shall furnish to the Government on request all reasonable assistance in obtaining recovery.

8. Liquidation of indebtednes. The Contractor warrants full and complete title and right to possession of all the equipment, subject only to those liens, encumbrances or claims to title or possession securing the indebtedness detailed on Schedule 1, Part 2. The Contractor agrees to apply such portion of the rental payment hereunder as may be necessary for the prompt discharge of such indebtedness. If at any time any person holding a lien, encumbrance, or claim against any item of equipment shall submit to DOE evidence that the Contractor is not discharging the indebtedness secured thereby in accordance with the terms under which the indebtedness is payable or dischargeable, DOE shall have the right upon three day's written notice to the Contractor to impound such part of the unpaid rental hereunder, as DOE in its sole discretion deems necessary, until the rights of the Contractor and any such person are determined and all just and proper claims of such persons are satisfied, provided, that nothing contained in this paragraph shall be construed to pay to such person any sum not required to be paid by the terms under which the indebtedness was incurred or to pay any sum prior to the time it becomes due.

9. Taxes. Unless otherwise directed by the contracting officer, the Contractor shall at the Contractor's own expense pay and discharge any and all taxes levied upon any item of the equipment.

Schedule 1

Part 1—Items and Rental Rates

Item No.———

———

Item description (equipment No.; type of equipment; serial No.; manufacturer; year of model; original point of shipment; etc.) ———

———

Description of any insurance coverage for loss or damage to equipment ———

———

Item Rental Rates ———

———

Attach certified copy of insurance policy.

(Continue, if necessary, on reverse side or on separate sheets.)

Part 2—Liens, Encumbrances and Claims

The following is a complete and correct statement of the amount of any and all indebtedness secured by liens or other encumbrances of any nature, legal or equitable, which are held by any person, firm or corporation against the equipment, items Nos. 1 through ———.

(Contractor) ————.

By ————.

(Title) ————.

Item No.———

———

Name and address of present creditor ———

———

Present unpaid balance ———

———

Amounts and date of future payments ———

———

(Continue, if necessary, on the reverse side or on separate sheets.)

936.7302 Outline of agreement for rental of third-party-owned construction equipment.

This agreement, made and entered into this ——— day of ———, 19——, by and between ——— ——— ("hereinafter called the lessor") and ————) (hereinafter called the "lessee") Witnesseth:

Whereas, the lessee has entered into a contract, dated ———, (hereinafter called the "construction contract"), with the United States of America (hereinafter called the "Government"), represented by the U.S. Department of Energy hereinafter called "DOE"), for the performance of certain construction work in connection with the construction at ———; and

Whereas, the lessor is the owner of certain construction plant and equipment (hereinafter called the "equipment"), listed on the attached Schedule 1 attached to and made a part of this agreement; and

Whereas, the lessee desires to rent the equipment for use in performing the construction contract.

Now, therefore, in consideration of the mutual covenants and conditions herein set forth, it is agreed as follows:

Article I—Equipment rented. The lessor agrees to furnish for use by the lessee in the performance of the construction contract the equipment itemized in Schedule 1 at time specified as follows:

(Each item of equipment shall be clearly marked with the identification number assigned to it on Schedule 1. The lessor and the lessee may from time to time amend Schedule 1 by deleting or adding items.)

Article II—Payments. Payments shall be made by the lessee to the lessor at monthly intervals on invoices rendered by the lessor for:

(a) *Rental.* Rental of equipment, for rental periods determined in accordance with the article entitled "Rental Period" and at the rates set forth in Schedule 1 applied in accordance with the article entitled "Application of Rates."

(b) *Transportation.* Transportation of equipment in accordance with the article entitled "Transportation."

(c) *Repair.* Maintenance, repair, and replacement of equipment to the extent provided in the articles entitled "Conditions of Equipment" and "Protection of Equipment—Steps to be Taken in Event of Loss."

Article III—Application of rates. The rates set forth in Schedule 1 shall be applied in accordance with the following rules:

(a) *Basis of rates.* Rates are based upon one shift of 8 hours per day, 40 hours per week, or 176 hours per month (30 consecutive days).

(b) *Apportionment of rates.* The monthly rate and its pro-rata share shall apply to all rental periods of 1 month or more. The weekly rate and its pro-rata share shall apply to all rental periods of 1 week or more up to 1 month. The daily rate and its pro-rata share shall apply to all rental periods up to 1 week.

(c) *Overtime.* If the equipment is rented by the day, the rate for overtime is one-sixteenth ($\frac{1}{16}$) of the daily rate for each hour of use in any day in excess of 8 hours; if it is rented by the week, the rate for overtime is one-eightieth ($\frac{1}{80}$) of the weekly rate for each hour of use in any week in excess of 40 hours; and if it is rented by the month, the overtime rate is one-three hundredth and fifty-second ($\frac{1}{352}$) of the monthly rate for hour of use in excess of 176 hours in any one 30-consecutive-day period.

(d) *Insurance.* Rental rates include the cost of insurance or self-insurance covering loss of or damage to the equipment during rental periods as indicated in Schedule 1 and copy of policy attached. The lessor agrees to maintain this insurance coverage for loss or damage to the equipment during the entire term of this agreement. The lessor shall waive any right of action against the contractor or the United States Government for loss, damage or destruction of the leased equipment to the extent that the lessor recover from insurance applicable to loss, damage or destruction of the leased equipment.

Note.—*When rates do not include the cost of insurance or self-insurance, substitute the following text for paragraph (d) Insurance:*

"Rental rates do not include any factor representing the cost of insurance or self-insurance covering loss of or damage to the equipment during rental periods."

Article IV—Rental period. The rental period for which rental is payable for an item of equipment shall consist of a base period, beginning upon the date stipulated in a written notice from the lessee to the lessor that the lessee has accepted the item of equipment at the job site, and ending upon date stipulated in a written notice from the lessee to the lessor that use of the item of equipment is terminated, subject to the following additions, deductions, and conditions.

(a) *In-transit time.* There shall be added to the base period:

(1) The actual in-transit time of inbound transportation from the point of shipment to the job site, not exceeding the time required for such transportation by commercial carrier via the most expeditious routing available, of any item of equipment subsequently accepted by the lessee.

(2) The actual in-transit time of outbound return transportation from the job site to the original point of inbound shipment, or other destination at equal or less distance from the job site, not exceeding the time required for such transportation by commerical carrier via the most expeditious routing available, of any item of equipment whose use has been terminated by the lessee.

(b) *Trial period.* If initial inspection by the lessee discloses that the condition of an item of equipment is doubtful, it will not be accepted by the lessee without a trial period of operation to prove such item upon terms and conditions agreed upon by the lessor and the lessee and approved by DOE. If the equipment is found unacceptable in the trial period, no rental, transportation, or other expenses will be due the lessor.

(c) *Delay due to repairs.*

(1) The time required for repair of equipment shall be deducted from the base period if such repair is necessitated by willful misconduct or lack of good faith on part the of the lessor, of an individual, or the partners or corporate officers of the lessor, or a supervising representative of the lessor, or made necessary by defects not reasonably ascertainable on initial inspection by the lessee.

(2) If arrangements are made for the lessor to repair an item of equipment, the withdrawal of such item from work for necessary repairs (due to causes other than those mentioned in the preceding paragraph) subsequent to acceptance of the item by the lessee shall not interrupt the running of the base period, unless the lessee or DOE finds that due diligence in effecting the repairs or in returning the item to use has not been exercised. In the latter event, the time found to have been excessive shall be deducted from the base period.

(d) *Time for repairs on termination.* In the event the lessee, in accordance with the article entitled "Condition of Equipment," elects to effect repair or replacement of an item of equipment prior to scheduled return shipment of the item, the time required for such repair or replacement shall be added to the base period.

Article V—Transportation. Inbound transportation of equipment to the job site, f.o.b. cars and return to the original point of shipment or to another destination selected by the lessor at equal or less distance from the job site, shall be at the expense of the lessee, subject to the following conditions:

(a) *Limitation on return transportation.* The lessee shall not bear any expense for outbound return transportation in excess of the amount paid for inbound transportation to the job site, except additional amounts approved by DOE representing or equivalent to increase in freight rates applicable to the route to the original point of shipment.

(b) *Limitation on long distance transportation.* Transportation over a distance in excess of 500 miles shall be subject to the approval of the lessee and DOE.

(c) *Transportation by other than common carrier.* The expense borne by the lessee hereunder for transportation by a method other than common carrier shall be the actual expense of such transportation as shown by evidence satisfactory to the lessee and DOE, but shall in no case exceed the amount which would be paid for such transportation by a suitable and available common carrier, unless otherwise authorized by the lessee and DOE.

(d) *Loading and unloading.* Only such costs of loading and unloading equipment as are incurred at the job site shall be borne by the lessee.

(e) *Equipment not in required condition.* The lessee shall not bear the expense of transportation of any item of equipment which arrives at the job site in a condition which does not fulfill the requirements of the article entitled "Condition of equipment" and which is not placed in the condition required under that article by the lessee at the lessor's expense within a reasonable time.

Article VI—Condition of equipment.

(a) *Condition on delivery.* The equipment shall, on delivery at the job site, be in good operating condition to render efficient, economical, and continuous service and shall be equipped with necessary and required safety devices according to ICC regulations and other applicable Federal and state laws. Each item of the equipment shall have been registered by the lessor at the lessor's own expense with all Federal, State, and local authorities requiring registration, and registration plates or other evidence of registration shall be displayed in accordance with the requirements of the registering authority. The cost of subsequent registration shall also be borne by the lessor. If any item of equipment on arrival at the job site is not in the condition required by this paragraph, its use on the work shall not be permitted unless and until it is placed in the condition required by this paragraph at the lessor's expense and within a reasonable time. If any such item is not placed in the condition required by this paragraph within a reasonable time, the lessee may reject the item and require its removal from the job site, and in that event, the lessee shall not be liable for rental, transportation, or any other expense in connection with such item.

(b) *Condition on the job.* Maintenance and repair necessary to keep accepted equipment in the condition required for its operation until use of the equipment is terminated by the lessee, and replacement (at the value agreed upon by the lessor and the lessee with the approval of DOE at or prior to the time of acceptance by the lessee and set forth in the initial inspection report, less depreciation) of accepted equipment, lost or destroyed during such time, shall be at the expense of the lessee. Except, however, such maintenance, repair, or replacement will not be at the expense of the lessee if it is made necessary by loss or damage covered by any policy of insurance (or self-insurance), or caused by willful misconduct or lack of good faith on the part of the lessor, of an individual, or the partners or corporate officers of the lessor, of a supervising representative of the lessor, or is made necessary by defect not reasonably ascertainable on initial inspection by the lessee.

(c) *Condition on termination.* Upon termination by the lessee of the use of any item of equipment, the item shall be returned by the lessee to the lessor at the job site in as good conditions as when received by the lessee (as shown by the initial inspection report), less normal wear and tear, except for any loss or damage which is due to willful misconduct or lack of good faith on the part of the lessor, of an individual, or the partners or corporate officers of the lessor or a supervising representative of the lessor, or defects not reasonably ascertainable on initial inspection by the lessee, or which is covered by any policy of insurance (or self-insurance). If the inspection report is to be made immediately prior to the scheduled return shipment of an item of equipment discloses the necessity for repairs or replacements, the cost of which is the responsibility of the lessee under this paragraph, the lessee may, at its election, either (1) effect such repairs or replacements, or (2) with the approval of DOE, allow the lessor the agreed estimated reasonable cost of such repairs (or the agreed value less depreciation, if replacement is required), and a sum in lieu of rental for the time estimated by the lessee to be necessary for such repairs

(d) *Inspection.* For the purpose of establishing the condition, the equipment shall be inspected, tested, and inventoried by representatives of the lessee and, at the lessor's option, together with representatives of the lessor (and of DOE, if DOE so elects), prior to its acceptance by the lessee and immediately prior to scheduled return shipment. The results of such inspections and tests, and the inventories compiled, shall be incorporated in reports submitted to the lessor and to the lessee (and to DOE if DOE so requires). For any item of equipment which the lessor has failed to inspect, test, and inventory, or has failed to report as provided herein, the lessor agrees that the report submitted hereunder by a representative of the lessee shall be conclusive evidence of the condition as the date of inspection.

(e) *Excessive repairs.* DOE may require the lessee to deduct from payments otherwise due the lessor any amounts previously allowed the lessor under this agreement for repairs made at the lessee's expense which DOE finds to have been in excess of the requirements of this agreement.

Article VII—Protection of equipment—Steps to be taken in event of loss.

(a) The lessee shall take all reasonable and necessary precautions to safeguard and protect the equipment. Any loss of or damage to the equipment will be at the lessor's risk to the extent that such loss or damage is required to be covered by insurance under Article III(d) of this agreement.

Note.—When Article III(d) of the agreement provides that rental rates do not include any factor representing the cost of insurance or self-insurance covering loss of or damage to the equipment during rental periods, the following paragraph (a) shall be used:

"(a) The lessee shall take all reasonable and necessary precautions to safeguard and protect the equipment. Any loss of or damage to the equipment will be at the lessor's risk to the extent that such loss or damage is covered by any policy of insurance (or self-insurance)."

(b) Upon the happening of any loss or damage which is at the risk of the lessee under this agreement, the lessee shall immediately notify the lessor of the occasion and extent thereof, and the lessor shall thereupon, at the lessee's request, effect an assignment and subrogation in favor of the lessee or the Government of all the lessor's rights and claims (except those against the lessee or the Government) arising out of any such loss or damage, shall, if required by the lessee or the Government, authorize representatives of the lessee or the Government to settle or prosecute to final judgment any such claims, and shall furnish to the lessee or the Government on request all reasonable assistance in obtaining recovery.

Article VII—Liquidation of indebtedness. The lessor warrants full and complete title and right to possession of all the equipment, subject only to those liens, encumbrances or claims to title or possession securing the indebtedness detail on Schedule 1, Part 2. The lessor agrees to apply such portion of the rental payable hereunder as may be necessary for the prompt discharge of such indebtedness. If at any time, any person holding a lien, encumbrance, or claim against any item of the equipment shall submit to the lessee evidence that the lessor is not discharging the indebtedness secured thereby in accordance with the terms under which the indebtedness is payable or dischargeable, the lessee shall have the right upon three day's written notice to the lessor to impound such part of the unpaid rental hereunder as the lessee, with the approval of DOE, deems necessary until the rights of the lessor and any such person are determined and all just and proper claims of such person are satisfied, provided that nothing contained in this paragraph shall be construed to require the lessor to pay to such person any sum not required to be paid by the terms under which the indebtedness was incurred or to pay any sum prior to the time it becomes due.

Article IX—Taxes. Unless otherwise directed by DOE, the lessor shall at the lessor's own expense pay and discharge any and all taxes levied upon any item of equipment.

Article X—Definition. As used herein the term "DOE" means the U.S. Department of Energy or any duly authorized representative thereof, including the contracting officer under the construction contract.

In witness, thereof, the lessor and the lessee have executed this agreement as of the day and year above written.

PART 937—SERVICE CONTRACTING

Subpart 937.2—Consulting Services

937.205 Management controls.

(b) DOE contracting personnel should familiarize themselves with the pertinent DOE Directives coverage before any acquisition involving consulting services is undertaken and shall comply with the appropriate DOE Directives. See DOE Orders 3304.1 and 4200.3.

(7) In accordance with FAR 37.205(b)(7), purchase requests for consulting services initiated in the fourth quarter of the fiscal year, must be approved at the second management level above that of the initiator or such equivalent level as the Head of Contracting Activity may designate.

(Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy of 1954, as amended (42 U.S.C. 2168)).

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy of 1954, as amended (42 U.S.C. 2168).

942.000 Scope of part.

This part discusses the requirements for and the management of activities that occur after the award of a contract.

942.001 General.

(a) Those government actions taken subsequent to award of a contract to monitor the performance of the contractor and the contractor's adherence to the terms and conditions thereof through completion of the contract are commonly referred to as contract management and administration. The specific actions included in this process are as generally defined in FAR 42.302. This post-award management is essential to ensure the purpose of the contract is achieved and is in accordance with the terms and conditions of the contractual instrument. Contract management is broad and involves the expertise of many specialists including technical (programmatic) legal, financial, administrative, acquisition, and others.

(b) Post-award contract management functions are executed by the various specialists assigned the responsibility and procedural guidance as to how to perform the required functions. Generally, acquisition personnel in the person of a contracting officer, act as the overall business manager for administering and maintaining the integrity of the contract. Such responsibility ensures that only a contracting officer modifies a contract, payments are prompt and represent reimbursements or payments for only allowable cost, funds are obligated in a timely manner, and contracts are officially closed.

942.002 DOE policy and responsibilities.

(a) It is the policy of the Department of Energy that the performance of its contractors be monitored to assure compliance with the terms and conditions of the contract instrument and products are received on time, at a reasonable cost which meet technical requirements and specifications.

(b) The responsibility for ensuring effective post-award management of DOE contractual programs involves many elements of the Department. The various procedures and policies that implement and support project and contract management systems are promulgated in various DOE Orders.

942.003 Organizational structure.

(a) The Department of Defense has initiated a formal system of independent organizations responsible for performance of post-award management functions. A field structure of Contract Administration Offices (CAO) responsible for contract management and administration of contracts for major defense contractors has been established. DOD agencies (Army, Navy, Air Force) have organized plant residencies of contract management specialists for specific DOD contractors and their various business units. The Defense Logistics Agency performs contract management functions both at onsite residencies of contractors not assigned to a service and on a mobile basis from centrally located management areas for other defense contractors. A complete listing of the DOD's contract administration service components is contained in the Defense Directory cited in FAR 42.102.

(b) Civilian agencies for the most part have not established formal, organizationally independent CAO's responsible for performance of contract management functions. The post-award contract management and administration functions performed by civilian agencies are performed by contracting, program and other staff (accounting, legal, etc.) personnel and specialists located in the contracting offices and/or Operational units in a less formal manner than the DOD. Sometimes such services may be acquired from a cognization Defense CAO, when dealing with a defense contractor.

(c) The DOE has no field or resident contract administration offices. Contract management of DOE contracts is performed by the contracting office or is obtained from a Department of Defense (DOD) Contract Administration Office (CAO) if the contract warrants requesting contract administration services from such an activity. There is no specific DOE rule or policy on requesting and assigning DOE contracts for DOD administration services. It is a matter of judgment of the contracting office. To the extent any functions cited in FAR 42.302 are required for proper post-award management of the contract, assignment to a DOD CAO or the requesting of certain supporting services (FAR 42.201) from the CAO should be considered if it is (1) beyond capability of the DOE office (2) cost effective (3) eliminates duplication of effort, and (4) would provide for consistent treatment of the contractor.

Subpart 942.1—Interagency Contract Administration and Audit Services

942.101 Policy.

(a) The Department of Energy has entered into cross-servicing contract management arrangements with:

(1) The Defense Logistic Agency

(2) The Air Force Contract Management Division

(3) The Office of Naval Research

(b) The above arrangements are established and maintained by the Business and Financial Policy Branch, Office of Policy, Procurement and Assistance Management Directorate, Headquarters. Questions concerning these agreements should be directed to that organization.

(c) The Department of Energy Inspector General has established a memorandum of understanding with the Defense Contract Audit Agency and the Office of Audit of the Department of Health and Human Services for providing audit support service (942.70) to the DOE in support of its procurement mission. Procedures for acquiring these services are discussed in 942.70.

Subpart 942.2—Assignment of Contract Administration

942.202 Assignment of contract administration.

(d)(5) Contracts assigned for administration support shall be entered and reported in the Procurement and Assistance Data System.

Subpart 942.7—Indirect Cost Rates

942.704 Billing rates.

(b) When the contracting officer or auditor responsible for establishing billing rates, in accordance with FAR 42.704, has not established such rates or such rates are not current for the performance periods (contractor FY) under contract, the DOE contracting officer responsible for administration of the contract shall establish an appropriate rate(s) for billing purposes. If the contractor holds more than one DOE contract covering that period of performance, the DOE office with the largest unliquidated obligations as of the beginning of that performance period shall take the lead in establishing the required billing rate for use on DOE contracts. Once appropriate billing rates are established by the responsible contracting officer designated by FAR 42.704, such rates shall be adopted by the contracting officer and all billings and payments shall be retroactively

revised to reflect the agreed upon rate(s).

942.705–1 Contracting officer determination procedure.

(a)(3) The Department of Energy shall use the contracting officer determination procedure for all business units for which it shall be required to negotiate final indirect cost rates. A listing of such business units is maintained by the Business and Financial Policy Branch, Office of Policy, Procurement and Assistance Management Directorate, Headquarters, and published as a separate publication in the DOE Order system.

(b)(1) The Department of Energy shall not require or direct contractors to submit their final indirect cost rate proposals reflecting actual cost experience during the covered period to the auditor. The DOE negotiating official shall request all needed audit service in accordance with the procedures in 942.70, Audit Services.

942.705–3 Educational institutions.

(a)(2) The negotiated rates established for the institutions cited in OMB circular No. A–88 are centrally maintained by the Business and Financial Policy Branch, Office of Policy, Procurement and Assistance Management Directorate, Headquarters.

942.705–4 State and local governments.

A list of cognizant agencies for State/local government organizations is maintained by the Office of Management and Budget (OMB) which is periodically published in the Federal Register. The responsible agencies are notified of such assignments. A listing of the cognizant agencies and the current negotiated rates for State/local government activities is maintained by the Business and Financial Policy Branch, Office of Policy, Procurement and Assistance Management Directorate, Headquarters.

942.705–5 Nonprofit organizations other than educational and state and local governments.

OMB Circular A–122 establishes the rules for assigning cognizant agencies for the negotiation and approval of indirect cost rates. The Federal agency with the largest dollar value of awards (contracts plus federal financial assistance dollars) will be designated as the cognizant agency. DOE is not currently assigned cognizance over any such nonprofit organizations. There is no published listing of assigned agencies. The Business and Financial Policy Branch, Office of Policy, Procurement and Assistance Directorate, Headquarters, does maintain a DOE central file of rates established by the cognizant agency.

942.708 Quick closeout procedures.

(a) Contracting officers shall use the quick-closeout procedure to finalize indirect expenses under any DOE contract when it appears appropriate to establish such expenses by means other than the formal negotiation procedures of FAR Subpart 42.7 and use of this procedure is agreeable to the contractor. The quick-closeout procedure is considered to include the establishment, of either indirect cost rates established for the closeout of a contract(s) or lump-sum indirect expenses dollars that shall be agreed to as chargeable to the contract. Such lump-sum amounts are appropriate for all categories of contractors—commercial, State/local governments, educational, and nonprofit organizations.

The contracting officer shall apply the quick-closeout procedure in closing DOE contracts in lieu of using the rates established in accordance with FAR 42.705, when:

(1) See FAR 42.708(a)(1)

(2) The amounts of indirect expense to be reimbursed by a single DOE contract will not exceed $250,000 per contractor fiscal year or the indirect expense amount reimbursed by all DOE contracts using the quick-closeout procedure will not exceed $1,000,000 per contractor fiscal year.

(3) Amounts of and the allowability of claimed or proposed indirect expenses will be readily determinable based on a review of the contractor's indirect cost experience (reviews may be made by the contracting officer with or without the assistance of a professional auditor).

(4) The contractor does not have a history of disputes, disallowed cost of any consequence, and there are no known potential cost issues of significance.

(5) There is a low potential (risk) for any significant over payment of indirect expense under the contract.

(6) Administrative cost of obtaining the annual negotiated final rate(s) is known to, or would be expected to, exceed any benefit of the final rates established in accordance with FAR Subpart 42.7.

(d) A decision to request audit assistance in applying the quick-closeout procedure should be decided on a case-by-case basis. The extent of any required services may vary. If possible, closeout rates or lump-sum expenses should be established with limited use of audit especially when acquiring the support service would defeat the quick-closeout approach by lengthening the evaluation and contract closeout process. Audits should not be requested if it is reasonably apparent that the audit would have little effect on the rates or expense finally agreed upon and any overpayments would be relatively insignificant.

Subpart 942.8—Disallowance of Costs

942.803 Disallowing costs after incurrence.

(a) Contracting officer receipt of vouchers. Vouchers and invoices submitted to DOE shall be submitted to the contracting officer or designee for review and approval for payment. If the examination of a voucher or invoice raises a question regarding the allowability of a cost submitted therein, the contracting officer, shall:

(1) Hold informal discussion with the contractor as appropriate.

(2) Issue a notice (letter, memo, etc.) to the contractor advising of cost disallowed or to be disallowed and advising the contractor that it may:

(i) Submit a written claim as to why the cost should be reimbursed—if in disagreement with the disallowance.

(ii) File a claim under the disputes clause, which will be processed in accordance with disputes procedures in the event disagreements cannot be settled.

(3) Process the voucher or invoice for payment and advise the finance office to deduct the disallowed cost when scheduling the voucher for payment.

(c) *Auditor reports and other sources of questioned costs.* (1) From time to time reports are received from professional auditors that may question the allowability of an incurred cost. Such reports are received as the result of auditors, in their independent role under OMB Circular A–73 or their own charters, scheduling and conducting financial or compliance audits of government contracts or as the result of an independent request for auditor service, as discussed in 942.70 Audit Services.

(2) When auditor reports or other notifications question cost or consider them unallowable, the contracting officer shall follow up such reports and resolve all such cost issues promptly by determining, through discussions with the contractor and/or auditor within six months of the audit report date, or date of receipt if a non-Federal audit. One of the following courses of action shall be pursued:

(i) Accept and implement audit recommendations as submitted.

(ii) Accept the principle of the audit recommendation but reject the cost questioned amount.

(iii) Reject audit findings and recommendations.

(3) When implementing the accepted course of action, the contracting officer shall—

(i) Hold discussions with the auditor and contractor as appropriate.

(ii) Issue a notice in writing advising the contractor of the government's intent to disallow the cost questioned, if the contracting officer agrees with the auditor concerning the questioned costs.

(iii) Negotiate a mutual settlement of questioned costs if they are agreed with in principle but there is a difference of opinion as to a proper amount.

(iv) Negotiate a mutual settlement of questioned costs if the auditor recommendations are acceptable to the contracting officer but the contractor does not accept the finding or disallowance.

(v) Issue a final decision of the contracting officer disallowing the questionable cost where differences cannot be resolved, advising of the contractor's right to appeal the decision, and advising the procedure to be followed if it is decided to make such an appeal.

(vi) Initiate immediate recoupment actions for all disallowed cost owed the government by:

(A) Requesting the contractor to provide a credit adjustment (offset) against amounts billed the government on the next or future invoice(s) if such shall be submitted under a contract for which the disallowed cost applies.

(B) Deducting (offset) the disallowed cost from the next or future invoice(s) submitted under the contract; if the contractor provides no adjustment under the contract for which the disallowed cost applies; provided such reduction is deemed appropriate.

(C) Advising the contractor that a refund shall be directly payable to the government in situations where there are insufficient payments owed by the government to effect recovery via (A) or (B) above or an offset is otherwise inappropriate.

(vii) Promptly notify the appropriate finance office of refunds directly payable to the government to ensure proper billing and followup action for collection.

Subpart 942.10—Negotiating Advance Agreements for Independent Research and Development/Bid and Proposal Costs

942.1004 Location of negotiators in a central office.

The central office within the Department of Energy for negotiating independent research and development/bid and proposal (IR&D/B&P) advance agreements, as required in accordance with FAR 42.1004, is established in the Procurement and Assistance Management Directorate, Headquarters. DOE contracting officers should advise offerors, suppliers, potential contractors, and contractors that are required, or expect they will be required, to establish advance agreements for allowability of IR&D/B&P cost and where the DOE is to be the lead negotiating agency in accordance with FAR 42.1003, their IR&D/B&P proposals and/or other correspondence shall be submitted to: Business & Financial Policy Branch, Office of Policy, Procurement and Assistance Management Directorate, Department of Energy, 1000 Independence Avenue SW. Washington, D.C. 20585.

942.1008 Administrative appeals.

The official within the DOE to hear administrative appeals of a contracting officer's decision to reduce payment, as prescribed in FAR 42.1008, is the Procurement Executive.

Subpart 942.14—Traffic and Transportation Management

942.1401 General.

DOE contracting officers or designees will consult and coordinate with the Office of Operations and Traffic, Defense Programs, Headquarters, as required in 41 CFR Part 109–40 and implemented by DOE Order 1540.1.

942.1402 Volume movements within the continental United States.

(a)(2) DOE activities will be reported to the Office of Operations and Traffic, Defense Programs Headquarters.

942.1403–1 U.S. Government bills of lading.

(a) The Office of Operations and Traffic, Defense Programs Headquarters, has responsibility for prescribing DOE's shipping documents.

(c)(1) Any limited authority for the use of commercial forms and procedures to acquire freight or express transportation for small shipments of a recurring nature will be prescribed by the Office of Operations and Traffic, Defense Programs, Headquarters.

942.1403–2 Contractor-prepaid commercial bills of lading.

(a) Use of commercial bills of lading for movement of supplies should be on a limited manner. Shipments of questionable quantity should be discussed with the Office of Operations and Traffic, Defense Programs, Headquarters.

Subpart 942.70—Audit Services

942.7000 Scope of subpart.

This subpart prescribes policies and procedures for requiring and using audit support services in the post-award management of DOE contracts. Such services shall be obtained in accordance with the provisions of FAR Subpart 42.1 and this subpart.

942.7001 Definition.

Auditors are professional accountants who although organizationally independent are viewed as one of several sources of counsel to the contracting officer on accounting and other financial subjects. They are the principal advisors to contracting officers on audit matters and provide the contracting officers with various audit services.

942.7002 General.

Contract management practices require the review of a contractor's contract cost records and controls, billings, and claims to assure their completeness, accuracy, and compliance with contract requirements. Such services are available from and provided by independent government audit activities such as the Defense Contract Audit Agency, the Inspector General, and commercial audit firms. Such services are generally referred to as "Contract Audit." In addition to providing "Contract Audit" services in direct support of the contracting officer and other program officials, departmental audit activities, pursuant to Office of Management and Budget policies set forth in Circular A–73, Audit of Federal Operations and Programs, conduct their own independent economy and efficiency reviews of government contractors and performers. Their purpose is to determine whether the business entity is managing and utilizing its resources economically and efficiently and any causes of inefficiencies or uneconomical practices.

942.7003 Types of services.

An efficient and effective contract management and administration program requires that the contracting officer responsible for post award contract management and administration functions seek the service of the professional auditor in several areas. The primary areas of needed audit support and areas in which auditors have agreed to support the DOE acquisition mission are:

(a) Incurred cost audits (direct & indirect cost)

(1) Vouchers, billings, invoices, claims, and other settlement proposals

(2) Financial records, contract cost records, work-in-process costs, etc.

(b) Overhead rate reviews (establishment and verifications)

(c) Accounting systems reviews

(d) Management control systems reviews

(e) Financial analysis evaluations

(f) Review Cost Accounting Standards (CAS) Disclosure Statements

(g) Cost Accounting Standards compliance

(h) Estimating system reviews

(i) Consultation and advice

942.7003-1 Incurred cost.

(a) Financial audits of a contract's cost records and charges, particularly material and labor cost, shall be requested of the auditors as is considered warranted by the financial condition, integrity, and reliability of the contractor; prior audit experience; adequacy of the accounting system; and unaudited claims, vouchers, invoices, and billings. Audits of such cost should be requested when needed or desirable, but no less frequently than once yearly for any contract where such annual cost exceed $500,000 or $1,000,000 under all DOE contracts. Such audits should cover cost-reimbursement type contracts, including fixed-price contracts with cost-reimbursement portions, letter contracts with reimbursement provisions, time-and-materials contracts, and labor-hour contracts.

(b) Vouchers and invoices provisionally approved and paid may be submitted to the auditor for specific review and verification of the accounting records and for an opinion on the allowability of the cost when situations warrant.

942.7003-2 Indirect expenses (overhead cost).

Auditors look at indirect expenses (overhead cost) on an after-the-fact basis to review the incurred cost and to assist in the negotiation of a final overhead payment rate, when such rates are provided for in the contract. Auditors also assist the contracting officer in the administration of indirect cost by making appropriate recommendations concerning the establishment of before-the-fact overhead rates for billing purposes and/or establishing predetermined overhead rates. Contracting officers should seek the assistance of the auditor as they deem warranted or appropriate or as may be required by FAR 42.700 and 942.7.

942.7003-3 Accounting systems.

Auditors are available to advise the contracting officer on the adequacy of a contractor's accounting system and its suitability for administration of Government contracts. The contracting officer should always obtain such service to assure himself/herself of the contractor's financial competence or credit needs, unless prior experience or other available information shows the contractor to have financial integrity and acceptable accounting and cost control systems.

942.7003-4 Management systems.

Auditors are available to help the contracting activity and the contracting officer in a review, and assessment of a contractor's various management systems and systems of internal control. The objective of the reviews, is to assure cost effective and efficient methods of operations. Reviews should be requested as deemed warranted.

942.7003-5 Financial analysis evaluations.

Auditors are available to assist the contracting officer in a review and evaluation regarding a contractor's financial competence or credit needs. Such service may be helpful in determining the need for advance payments, loans, etc. When the contracting officer is aware of or is otherwise concerned about the financial viability of the contractor, financial reviews by the auditors should be requested as the contracting officer believes the situation warrants.

942.7003-6 CAS disclosure statements.

The audit activity is available and, in accordance with FAR 30, Cost Accounting Standards, is responsible for making recommendations to the contracting officer as to whether the CAS disclosure statement submitted by the contractor as a condition of the contract, adequately describes the actual or proposed cost accounting practices, and is in compliance with the Cost Accounting Standards required under the terms of the contract (required by Pub. L. 91-379, 50 U.S.C. APP 2168, for Defense contracts). The contracting officer shall request the auditor to review all Disclosure Statements submitted by a contractor or potential contractor.

942.7003-7 CAS compliance.

The audit activity also performs audits for contractor compliance with the standards of the Cost Accounting Standards Board, when such Standards are required to be followed under the terms of the contract; and, the audit activity advises whether a contractor or subcontractor has failed to comply with the applicable Standards or to follow consistently its disclosed cost accounting practices and whether the failure has resulted in or may result in any increased cost paid by the government. The auditors also review proposed price changes for contractor changes to disclosed or established cost accounting practices to assure that the changes are fair and reasonable.

942.7003-8 Estimating systems.

Many contractors, particularly where a large portion of the business is government work, have formal cost estimating systems used in the development of program estimates and/or the submittal of price/cost proposals to the Government. Other contractors which perform less Government work often have some type of system, too. Estimating systems are encouraged by the Government, but it should be recognized that systems will vary between contractors, and may vary between plants or divisions of a contractor due to differences in products, size and methods of operation (i.e., production versus research), and other factors. Advantages of estimating systems are that they: (a) Provide a greater degree of confidence in estimates, (b) expedite the negotiation process, (c) reduce the amount of detailed explanations that need be included in each proposal on the estimating procedural rationale used, and (d) reduce need for and scope of reviews by technical, financial and audit personnel. Auditors are available to assist the acquisition organization in reviewing a contractor's estimating systems or processes. The contracting officer shall decide whether an estimating system review should be undertaken as a team effort, including an auditor, or if the auditors can sufficiently perform a system check by themselves. It is not DOE policy to generally request such reviews.

942.7003-9 Consultation and advice.

Auditors are available for general consultation and advice to acquisition and supporting personnel (including counsel) with or without providing an audit.

942.7004 Procedures.

(a) The Department of Energy Inspector General (IG) has established formal cross-servicing arrangements with the Defense Contract Audit Agency (DCAA) and the Health and Human Services Inspector General. Audits are available to contracting officer pursuant to terms of these arrangements.

(b) The following procedures are to be followed by the contracting officer when requesting needed audit services:

(1) Upon award of a contract to an existing DOE or DOD contractor which is being audited by the DCAA, all requests for normal postaward audit services shall be directed to the cognizant DCAA office.

(2) Upon award of a contract to a contractor who is not currently being audited by DCAA, and/or for which the DCAA is not the cognizant audit activity, all requests for postaward audit services shall be directed to the DOE Assistant Inspector General for Audits.

(3) Requests to the DOE Assistant Inspector General for audit services shall be made to the appropriate Regional Office.

(c) In determining if DCAA is currently auditing a contractor or has audited it in the past, the contracting officer should refer to the contractor's pricing proposal or ask the contractor.

(d) In the event a contracting officer considers that an economy and efficiency system review or a program results audit will be beneficial to the Government's interest, the appropriate Regional office of the DOE Assistant Inspector General for Audits should be notified.

(1) Such request should be made to the IG's office even in situations where the DCAA or another audit activity is known to be cognizant for contract audit.

PART 943—CONTRACT MODIFICATIONS

943.170 Extension of contracts resulting from unsolicited proposals.

(a) Where additional time beyond the formal contract period is required to complete or continue the work undertaken as the result of the acceptance of an unsolicited proposal and award of a contract therefor, the Contractor should be instructed to submit six copies of an extension proposal to the contracting office in sufficient time to allow evaluation and possible processing before the date of expiration of the contract. This requirement does not apply to requests for no-cost extensions as may sometimes be needed to complete all details such as a final report of the project.

(b) The extension proposal should outline and justify a program and budget for the succeeding year(s), showing in detail the estimated cost for the additional period(s) requested. It should include the same type of information to the extent as was contained in the initial proposal. Any contemplated change in program or scope for the ensuing period(s) should be justified and explained clearly, and must remain consistent with the original method, approach or idea which was accepted as the basis for award by DOE as a result of the initial unsolicited proposal. This is not, however, intended to preclude a redirection based upon a discovery or breakthrough occurring under the contract to date.

(c) The extension proposal should include a financial profile of the existing contract including:

(1) Total project costs to date, indicating the amount chargeable to DOE;

(2) An estimate of the total costs to be incurred during the remainder of the current period, including a statement of unextended balance.

(d) All requests for extensions of contract work as a result of an unsolicited proposal should be evaluated by the appropriate program office in light of:

(1) Progress reports submitted by the Contractor;

(2) Research results published in scientific media;

(3) Field visits by technical personnel;

(4) Contractor's progress and potential for achieving desired results;

(5) Continued relevance to DOE's mission;

(6) Scientific and technical merit of the research;

(7) Availability of funds;

(8) Likelihood that competition at this stage in the project would hasten achieving the desired results.

(e) Requests for extensions of contract work originating from an unsolicited proposal should generally follow the same process of review and evaluation of technical aspects and funding, preparation and execution of contract, and administration as does a new project.

(f) When an extension request receives a favorable technical evaluation and a determination is made that similar conditions exist relative to those that justified acceptance of the initial unsolicited proposal, a justification for extension of the award shall be processed for review and approval as indicated in 915.506.

(g) As a minimum, extension justification should contain:

(1) A statement of the result of the technical evaluation (915.570–2).

(2) An evaluation of any contemplated change in the contract scope of work for the renewal period and a justification explaining why this change is consistent with the original method, approach or idea which was accepted as the basis for award by the DOE as a result of the initial unsolicited proposal.

(3) An assessment of the current status of the original circumstances and conditions which justified acceptance of the intitial unsolicited proposal identifying any changes that may have developed and providing rationale as to why such change(s) should not preclude renewal.

(h) If, after evaluation, it is decided that an extension period should not be supported on the basis of technical merit or other reasons, such as lack of funding, or changed mission relevance, the project officer should:

(1) Prepare a written statement setting forth the basis for rejection, submit one copy to the responsible program official for approval and transmittal to the proposer and retain one copy in the permanent file.

(2) Promptly notify the contracting officer in order that the current contract may be closed out.

(i) Under certain circumstances it may be in the Government's best interest to continue or complete the work begun under a contract awarded as a result of an unsolicited proposal but which is not appropriate for extension. Continuation or completion of the work shall be accomplished by means of competition, unless non-competitive acquisition can be justified in accordance with FAR 15.507(b).

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended 42 U.S.C. 2168).

PART 944—SUBCONTRACTING POLICIES AND PROCEDURES

Subpart 944.1—General

Sec.

944.101 Definitions.

Subpart 944.2—Consent to Subcontracts

944.202–1 Responsibilities.
944.202–2 Considerations.
944.203 Consent limitations.

Subpart 944.3—Contractors' Purchasing Systems Reviews

944.302 Requirements.
944.304 Surveillance.
944.305 Granting, withholding, or withdrawing approval.
944.305–1 Responsibilities.
944.307 Reports.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 944–1—General

944.101 Definitions.

"DOE cognizant contractors" refers to those contractors over which DOE has been assigned cognizance by the Office of Management and Budget, or those with which DOE has the preponderance of Government business. The term includes pilot and demonstration plant contractors.

"Industrial facilities" means property (other than material, special tooling, and special test equipment) for production, maintenance, research, development, or test, including real property and rights therein, buildings, structures, improvements, and plant equipment.

Subpart 944.2—Consent to Subcontracts

944.202–1 Responsibilities.

(b) The responsible contracting officer shall—

(1) Promptly evaluate the contractor's requests for consent to subcontract;

(2) Obtain assistance in the evaluation from subcontracting, audit, pricing, technical, or other specialists as necessary;

(3) Withhold consent to subcontracts with subcontractors on the DOE consolidated List of Debarred, Suspended, Ineligible, and Voluntarily Excluded Awardees (DOE List) (see 10 CFR 1035.15) or the GSA Consolidated List of Debarred, Suspended, and Ineligible Contractors (GSA List), to the extent that the award falls within the scope of the suspension, proposed debarment, debarment, ineligibility, or voluntary exclusion unless the Procurement Executive determines in writing that there is a compelling reason for such action (see 10 CFR 1035.13 and 1035.13(c)); and

(4) Notify the contractor in writing of consent or the withholding of consent, including any changes or corrections required.

944.202–2 Considerations.

(a)(13) In addition to the considerations in FAR 44.202–2, the contracting officer responsible for consent shall review the request and supporting data and consider whether the proposed subcontractor or any proposed key person(s) is on the DOE List.

944.203 Consent limitations.

(d) For determining profit/fee objectives under negotiated subcontracts, the prime contractor should have considered use of and applied a weighted guidelines or a structured approach that distinguishes different levels of investment if the acquisition would be subject to the weighted guidelines under a prime DOE contract. If the acquisition falls into one of the exceptions to the DOE weighted guidelines applications as cited in 915.970–4, the prime contractor should have applied other techniques to establish profit objectives.

Subpart 944.3—Contractors' Purchasing Systems Reviews

944.302 Requirements.

(a) Heads of Contracting Activities shall consider whether the best interest of DOE would be served by the initiation of a Contractor Purchasing System Review (CPSR) for those contractors whose sales to DOE are expected to exceed $5,000,000 during the next 12 months and for which DOE is the cognizant Government agency for CPSR purposes. In exceptional circumstances, consideration of a CPSR may be warranted for contractors with sales to DOE of less than $5,000,000. When considering the initiation of a CPSR, such a review should not be conducted if the extent of the contractor's subcontracting program does not appear to justify the review.

(b) DOE contracting officers, or designees, will conduct CPSRs of DOE cognizant contractors. Other Federal Agencies/Departments may be requested to conduct CPSRs, as appropriate, for other than DOE cognizant contractors. DOE contracting officers shall normally recognize other Federal Agency/Department approvals of contractors' purchasing systems within the limitation identified by approving officials of such agencies.

(c) Initial, subsequent, and followup review teams should include appropriate representatives from DOE field offices; other Federal Agency participation may be additionally requested as appropriate. Generally, team composition should not consist exclusively of those who have a day-to-day relationship with the contractor regarding subcontract consent or approval.

(d) The Procurement Executive is responsible for the overall conduct of the DOE CPSR program.

944.304 Surveillance.

(b) The surveillance plan required by FAR 44.304(b) shall be approved by the Head of the Contracting Activity.

944.305 Granting, withholding, or withdrawing approval.

944.305–1 Responsibilities.

(a) Team findings and recommendations contained in a CPSR Report shall be approved by the Head of Contracting Activity before the contracting officer makes a determination to continue, grant, withhold, or withdraw approval.

944.307 Reports.

(b) Copies of CPSR reports; notifications granting, continuing, withholding, or withdrawing approval of a contractor's purchasing system; copies of recommendations for improvement of an approved system notifications (or contract modifications) altering the subcontract consent dollar thresholds; and information received from the contractor pursuant to 944.305–3(b) shall be transmitted to the Director, Procurement Management Review Division, Procurement and Assistance Management Directorate, Headquarters.

PART 945—GOVERNMENT PROPERTY

Sec.
945.000 Scope of part.

Subpart 945.1—General

945.101 Definitions.
945.102–70 Reporting of contractor-held property.
945.102–71 Maintenance of records.
945.104–70 Review and correction of contractors' property management systems.

Subpart 945.3—Providing Government Property to Contractors

945.303–1 Policy.
945.304 Providing motor vehicles.

Subpart 945.4—Contractor Use and Rental of Government Property

945.407 Non-Government use of plant equipment.

Subpart 945.5—Management of Government Property in the Possession of Contractors

945.501 Definitions.
945.502–70 Physical protection of property.
945.502–71 Control of sensitive items of property.
945.502–72 Management of precious metals.
945.505–5 Records of plant equipment.
945.505–11 Records of transportation and installation costs of plant equipment.
945.505–14 Reports of Government property.
945.506 Identification.
945.508 Physical inventories.
945.570 Motor vehicle and aircraft managment.
945.570–1 Classification of motor vehicles.
945.570–2 Acquisition of motor vehicles.
945.570–3 Selection of type of motor vehicles.
945.570–4 Identification of motor vehicles.
945.570–5 Utilization of motor vehicles.
945.570–6 Maintenance of motor vehicles.
945.570–7 Disposition of motor vehicles.
945.570–8 Reporting motor vehicle data.
945.570–9 Aircraft.

Subpart 945.6—Reporting, Redistribution, and Disposal of Contractor Inventory

945.601 Definitions.
945.603 Disposal methods.
945.603–70 Plant clearance function.
945.603–71 Disposal of radioactively contaminated personal property.
945.607–2 Recovering precious metals.
945.608–2 Standards screening.
945.608–3 Agency screening.
945.608–4 Limited screening.
945.608–5 Special items screening.
945.610–4 Contractor inventory in foreign countries.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

945.000 Scope of part.

This part and FAR Part 45 are not applicable to the management of property by operating and management contractors. In addition, the policies and procedures contained in FAR Part 45 governing the management, control, reporting, and disposal of special test equipment and special tooling are not followed by the DOE.

Subpart 945.1—General

945.101 Definitions.

"Personal property" as used in this part, means property of any kind or interest therein, except real property, records of the Federal Government, and nuclear and special source materials, atomic weapons, and by-product materials.

"Capital equipment" as used in this part means personal property items having a unit acquisition cost of $1,000 or more and an anticipated service life in excess of one year, regardless of type of funding, and having the potential for maintaining their integrity as capital items; i.e., not expendable due to use.

945.102–70 Reporting of contractor-held property.

Within 30 days after the end of each fiscal year, the Head of the Contracting Activity shall report the following information to the Director, Property and Equipment Management Division, Procurement and Assistance Management Directorate, Headquarters:

(a) Name and address of each contractor with DOE property in their possession, or in the possession of their subcontractors (do not include grantees, cooperative agreements, interagency agreements, or agreements with state or local governments).

(b) Contract number of each DOE contract with Government property.

(c) Date contractor's property management system was approved and by whom (DOE office, Defense Contract Administration Service, or the Office of Naval Research).

(d) Date of most current appraisal of contractor's property management system, who conducted the appraisal, and status of the system (satisfactory or unsatisfactory).

(e) Total dollar value of DOE property as reported on last semiannual asset report (including date of report), for each DOE contract administered by the contracting activity.

945.102–71 Maintenance of records.

The contracting activity shall maintain records of approvals and reviews of contractors' property management systems, the dollar value of DOE property as reported on the most recent semiannual financial report, and records on property administration delegations to other Government agencies.

945.104–70 Review and correction of contractors' property management systems.

DOE offices shall follow the provisions of this section in the review and approval of a contractor's property management system. If contracts are formally delegated to other Government activities for property administration, the DOE will accept their method of approving the contractor's system and document the file accordingly.

(a) *Initial review.* (1) The contracting officer, or his/her representative assigned the responsibility as property administrator, shall review contractors' property systems within six months after the execution of the contract to assure compliance with the Government property clauses of the contract.

(2) Appraisals of complex property management operations may require detailed tests and evaluations on-site over an extended period of time. However, an evaluation of a contractor's operation involving only small dollar amounts of property and simple property control methods can often be accomplished without an on-site visit or extensive testing by the property administrator, by utilizing the Off-Site Contractor's Property Management Self-Evaluation Questionnaire, telephone contacts, or other appropriate methods necessary to assure that the system is adequate.

(3) In those instances where a contractor has contracts with more than one DOE contracting office, the DOE office with the contract(s) having the largest dollar value of property should normally be responsible for making the necessary reviews and appraisals of the contractor's system. Contracting officers should determine if a contractor has multiple DOE contracts by inquiry of the Procurement and Assistance Data System (PADS).

(4) When the contractor's property management system has previously been approved and a new contract requires the expansion of existing, or the establishment of additional controls, the review should normally be limited to the new requirements. If the system is adequate, the property administrator shall record this fact. Notification to the contractor is not required. However, if the property administrator determines that the contractor's property management system does not adequately meet the new contract requirements, the contractor shall be notified in writing of the required changes.

(5) The property administrator shall examine the contractor's procedures to be used to determine the extent to which they meet the criteria for property management required by FAR Subparts 45.5 and 45.6 and Subparts 945.5 and 945.6 of this chapter. Necessary tests will be made of the contractor's system, as appropriate, and, as each functional area is analyzed, the acceptability of the procedures shall be appropriately noted or commented upon and used as the basis for preparation of the record of system evaluation. Worksheets should be maintained by the property administrator.

(6) Upon completion of the property administrator's review, an exist interview will be held with the contractor to discuss any areas of the contractor's property management controls or systems found to be defective, and to recommend corrective actions to be completed before an approval of the system can be granted. Agreement shall be reached as to corrective measures necessary and a reasonable time schedule established for completion of the corrective actions.

(7) Following the exist interview, the property administrator shall prepare a written summary of findings to support approval of the system or the requirements for corrective action to be taken prior to such approval.

(8) The property administrator shall advise the contractor in writing when the contractor's property management system is considered acceptable.

(9) The property administrator shall notify the contractor in writing when its property management system is not acceptable, and request correction of the deficiencies within the agreed upon time schedule.

(10) Appropriate follow-up shall be taken by the property administrator to ensure that corrective actions are taken.

(11) If the contractor does not correct the deficiencies within the time period, the property administrator shall request action by the contracting officer administering the contract. The contracting officer shall notify the contractor in writing including the details specified at FAR 45.104(c). If the contractor also has contracts with other DOE contracting activities, the contracting officer shall notify the Property and Equipment Management Division, Headquarters.

(12) When the contract involves Government property at subcontractor facilities or prime contractor secondary locations, and the controls for the property at such locations have been determined to be adequate, the approval shall be expanded to include the procedures governing Government property at such locations.

(b) *Follow-up reviews.* Every two years after the initial approval of the contractor's system, the property administrator shall reappraise the contractor's property management operations in accordance with the provisions of paragraph (a) above.

Subpart 945.3—Providing Government Property to Contractors

945.303-1 Policy.

The DOE has established specific policies concerning special nuclear material requirements needed under DOE contracts for fabricating end items using special nuclear material, and for conversion or scrap recovery of special nuclear material. These special nuclear material needs means "uranium enriched in the isotope U233, U235 and plutonium other than PU238." The policies to be followed are:

(a) Special nuclear material will be furnished by the DOE for fixed-price contracts and subcontracts, at any tier, which call for the production of special nuclear products, including fabrication and conversion, for Government use. (The contractor or subcontractor must have the appropriate license or licenses to receive the special nuclear material. The Nuclear Regulatory Commission is the licensing agency.)

(b) Contracts and subcontracts for fabrication of end items using special nuclear material generally shall be of the fixed-price type. Cost-type contracts or subcontracts for fabrication shall be used only with the approval of the Head of the Contracting Activity. This approval authority shall not be further delegated.

(c) Contracts and subcontracts for conversion or scrap recovery of special nuclear material shall be of a fixed-price type, except as otherwise approved by the Head of the Contracting Activity.

945.304 Providing motor vehicles.

Additional guidance and information concerning the provision of motor vehicles are found at:

(a) 945.670 Motor vehicle and aircraft management.

(b) 908.11 Leasing of motor vehicles.

(c) 908.7101 Acquisition of motor vehicles.

(d) FAR 51.2 GSA Interagency Motor Pool System.

Subpart 945.4—Contractor Use and Rental of Government Property

945.407 Non-Government use of plant equipment.

The type of plant equipment and dollar threshold for non-Government use of DOE plant equipment will be determined by the Head of the Contracting Activity which awarded the contract. Approval of the Head of the Contracting Activity is required to authorize non-Government use exceeding 25% of operational use.

Subpart 945.5—Management of Government Property in the Possession of Contractors

945.501 Definitions.

"Government-furnished motor vehicles" are DOE-owned vehicles, vehicles leased from the General Services Administration Interagency Motor Pool System (GSA–IMPS), and vehicles leased from commercial sources.

"Precious metals," as used in this subpart, means uncommon and highly valuable metals characterized by their superior resistance to corrosion and oxidation. Included are silver, gold, and the platinum group metals—platinum, palladium, iridium, osmium, rhodium, and ruthenium.

"Sensitive items" as used in this subpart, means those items of property which are susceptible to being appropriated for personal use or which can be readily converted to cash. Examples are firearms, photographic equipment, binoculars, tape recorders, calculators, and power tools.

945.502-70 Physical protection of property.

(a) Controls such as property pass systems, memorandum records, marking of tools, regular or intermittent gate checks and perimeter fencing shall be implemented, recognizing the value of the property to prevent loss, theft, or unauthorized movement of Government property from the premises on which such property is located.

(b) Classified Government property will be handled in accordance with instructions of the contracting officer.

945.502-71 Control of sensitive items of property.

(a) The contractor shall assure that effective procedures and practices are established for the administrative and physical control of sensitive property items before and after issuance. Each contractor shall prepare a list of the types of property considered to be sensitive. This list, together with control procedures, shall be provided to the property administrator for review and approval.

(b) At a minimum, controls on sensitive property shall include property records, and memorandum receipts, bin or tool check systems, or combinations thereof. Procedures shall provide for physical inventories at least once each year, and methods for adjustment for inventory levels due to losses, thefts, and damage. More frequent inventories of sensitive property may be necessary where the value of the property, degree of security achieved, or loss experience indicates greater controls are required in order to protect the Government's interest. Such procedures and practices shall be subject to review and approval by the property administrator.

945.502-72 Management of precious metals.

(a) The contractor shall establish effective procedures and practices for the administrative and physical control of precious metals.

(b) At a minimum, procedures should provide for physical protection from theft or loss from time of receipt by the contractor to disposition.

(c) Responsible individuals will be designated as precious metals custodians. Records will be maintained of metals received, in use, in stock, and which have been issued or disposed of.

(d) Perpetual inventory records shall be maintained for each type of precious metals in terms of location, weight, and value. Metals consumed in use shall be removed from inventory records only after written certification by the custodian and higher level management official that they have been consumed or contaminated beyond recovery. The project consuming the metals shall be identified.

(e) Physical inventories of precious metals shall be taken at least semiannually, and either witnessed by independent observers or audited independently to verify the accuracy of the inventory. The results of the

inventory shall be promptly reported to the property administrator.

(f) All losses shall be promptly investigated and reported to the property administrator.

(g) Excess and termination inventory precious metals shall be reported to the DOE contracting officer for subsequent inclusion in the DOE precious metals pool.

945.505–5 Records of plant equipment.

The requirements of FAR 45.505–5 apply to plant equipment having a unit cost of $1,000 or more. The property record shall include the DOE asset type for reporting purposes.

945.505–11 Records of transportation and installation costs of plant equipment.

The requirements of FAR 45.505–11 apply to plant equipment having a unit cost of $1,000 or more.

945.505–14 Reports of Government property.

(a) The contractor shall prepare a semiannual report, as of February 28 and August 31 of each year, for each contract and subcontract thereunder, for the following property. The reports will be submitted to the property administrator, and are due not later than 45 days after the end of the reporting period.

(i) Capital equipment and real property acquired or disposed of during the period by asset type (see below).

(ii) Government-owned materials held in storage for issue when the balance on hand at the end of the reporting period amounts to $50,000 or more. Only the beginning and ending balance will be shown on the report.

(b) The report of physical inventory of capital equipment (see 945.508(b)) shall be submitted, as a minimum, with the fourth semiannual report after either the last physical inventory report or the inception of the contract.

DOE PLANT AND EQUIPMENT ASSET TYPES

Asset type code No.	Name and definition
401	*Land.* Includes the cost of land owned by the Government and under the control of DOE. The cost of land includes the purchase price, other acquisition costs, and removal costs less salvage realized in disposing of any facilities acquired with the land.
410	*Land Rights.* Includes the costs of rights, interests, and privileges relating to land such as leaseholds, easements, rights-of-way, water and waterpower rights, diversion rights, and submersion rights.
430	*Minerals.* Includes the cost of mineral rights and land containing mineral deposits owned by the Government.

DOE PLANT AND EQUIPMENT ASSET TYPES—Continued

Asset type code No.	Name and definition
440	*Timber.* Includes the cost and appraised value of timber and pulpwood; cost of reforestation program for the purpose of dust and soil erosion control, retention of water tables, etc.; cost of development and improvement of timber stand; and other forestry management costs. Use of this code is limited to the Savannah River Operations Office.
460	*Site Preparation, Grading and Landscaping.* Includes the cost of general clearing, grading and drainage not directly related to the erection of buildings and structures. All landscaping is included.
470	*Roads, Walks, and Paved Areas.* Includes the costs of roads, bridges, streets, walks, paved parking areas and paved open areas between buildings, including any related costs of clearing, grading, base, surfacing, storm sewers or drains, curbs, gutters, culverts, lighting service, and other related facilities.
480	*Fences and Guard Towers.* Includes the cost of security fences, guard towers and lighting service. Fences associated with specific facilities such as ball parks and substations are included with the facilities protected.
490	*Other Improvements to Land.* Includes the cost of improvements not includable under codes 460, 470, or 480, such as airports, playgrounds, tennis courts, and athletic fields.
501	*Buildings.* Includes the cost of buildings and permanently attached appurtenances, such as elevators, fire protection, lighting, plumbing, heating, ventilation, and built-in air-conditioning systems (excluding window or console air-conditioning units that require no duct work or cooling towers) and the cost of piping, conduit, and cable permanently attached to and made a part of the building and that cannot be removed without cutting into the walls, ceilings, or floors. The division between building costs and the costs of utility systems is generally to be at a point nominally 5 feet outside the building wall.
550	*Other Structures.* Includes the cost of such structures as dams, retention basins, reservoirs, swimming pools, pits, platforms, underground oil storage reservoirs, and stacks (when not a part of a building).
610	*Communication Systems.* Includes the cost of telephone, intercommunication and teletype equipment; telephone instruments and protective devices; lines, poles, cables and conduits; and stationary and associated portable radio transmitting and receiving equipment.
615	*Electric Generation, Transmission and Distribution Systems.* Includes the cost of all electric generation equipment; boiler plant equipment primarily used to supply steam to steam-electric generation equipment; transmission and distribution lines, poles, towers, grounding systems, substations, transformers, controls, cables, conduit, services, meters and protective devices; lightning fixtures, wire, poles, standards and related accessories supplying electric lighting service to roads, walks, and fences.
620	*Fire Alarm Systems.* Includes the cost of central office equipment necessary for receiving and transmitting alarms, including control wiring, both cable and open, and other associated overhead and underground equipment.
625	*Gas Production, Transmission and Distribution Systems.* Includes the cost of equipment involved in the production, storage, transmission and distribution of natural and artificial gas, including pipelines, services, and associated regulating and metering equipment of buildings served.
630	*Irrigation Systems.* Includes the cost of canals, ditches, waterways, flumes, pipelines and equipment used for irrigation purposes.
635	*Railroad Systems.* Includes the cost of railways, including bridges, trestles, culverts, crossing signals, clearing and grading, riprap, ties, ballast, rails, insulated joints, switches and accessories.

DOE PLANT AND EQUIPMENT ASSET TYPES—Continued

Asset type code No.	Name and definition
640	*Sewerage Systems.* Includes the cost of sewerage treatment and disposal facilities, including manholes, mains and lateral lines to point of tie-in with buildings served, and any septic tanks.
645	*Steam Generation and Distribution Systems.* Includes the cost of all equipment used for the generation and distribution of steam to the point of tie-in to buildings where such steam is utilized primarily for heating and for furnishing power to rotating equipment, including emergency turbo-generators. The cost of boiler plant equipment used primarily to supply steam to steam-electric generation equipment is included in code 615.
650	*Water Supply, Pumping, Treatment and Distribution Systems.* Includes the cost of wells, pumping and distributing facilities to the point of tie-in with buildings served.
655	*Nuclear Steam and Electric Generation and Transmission Systems.* Includes the cost of nuclear reactors and appurtenant equipment involved primarily and principally in the generation of steam for use in steam-electric generating equipment, fossil-fuel superheaters, electric generation equipment, and electric transmission facilities connecting the nuclear powerplant to the transmission or distribution network. The only reactors to be identified by this code are those which have significant electric generation.
660	*SPR Crude Oil Piping System.* Includes the cost of pipelines and metering devices between the oil transporting vehicle and the oil storage site.
665	*NPR Crude Oil Extraction and Distribution System.* Includes the cost of drilling equipment, piping, pumps, and storage facilities.
710	*Heavy Mobile Equipment.* Includes the cost of heavy mobile equipment (other than motor vehicles) such as concrete mixers, power shovels, cranes, compressors, rollers, road graders, tractors, farm implements, boats, and barges. The cost of trucks is included in code 725.
715	*Hospital and Medical Equipment.* Includes the cost of hospital, clinical, and dental equipment such as hospital beds, dentist chairs, instruments, sterilizers, and other scientific equipment used by dentists and doctors.
720	*Laboratory Equipment.* Includes the cost of laboratory equipment such as microscopes, analytical balancell, electroanalyzers, oscillographs, refractometers, light sources, vibrometers, and other scientific equipment usually associated with laboratories. The cost of furniture and fixtures and shop equipment are included in codes 730 and 755.
725	*Motor Vehicles and Aircraft.* Includes the cost of passenger cars, trucks, buses, jeeps, trailers, and fire trucks.
730	*Office Furniture and Equipment.* Includes the cost of office furniture and equipment such as machines, desks, drafting sets, safes, photographic equipment, copy making equipment, printing equipment and other office equipment regardless of where located. The cost of automatic data processing equipment is included in code 770.
735	*Process Equipment.* Includes the cost of equipment used specifically in product manufacturing and processing, including associated measurement and control instruments.
740	*Railroad Rolling Stock.* Includes the cost of railroad rolling stock such as locomotives and cars.
745	*Reactors and Accelerators.* Includes the cost of reactors, proton synchrotrons, electron synchrotrons, cyclotrons, linear accelerators, Van De Graaff generators, and accessory equipment, including associated measurement and control instruments.
750	*Security and Protection Equipment.* Includes the cost of equipment used for security, police, and fire protection purposes, except that all associated automotive vehicles are included in code 725, and fire alarm systems are included in code 620.

DOE PLANT AND EQUIPMENT ASSET TYPES—Continued

Asset type code No.	Name and definition
755	*Shop Equipment.* Includes the cost of shop equipment such as lathes, drilling machines, rolling mills, hoists, grinders, forges, pipe cutting machines, presses, saws, shapers, and other equipment usually associated with shops, garages and service stations. Similar equipment used in laboratories and other areas for research purposes should also be identified by this code.
760	*Reserve Construction Equipment Pool.* Includes the costs of construction and automotive equipment held for the purpose of maintaining a reserve pool for use in emergencies as part of the DOE mobilization program, or for secondary use in future construction programs.
770	*Automatic Data Processing Equipment.* Includes the cost of all equipment used in automatic data processing, such as (1) punched card and/or tape equipment, whether used alone or in conjunction with electronic computers; (2) electronic computers and all peripheral or auxiliary equipment; (3) data transmission systems employing devices communicating or transmitting data from place to place for processing in an ADP system; (4) all other equipment that is used in automatic data processing in conjunction with punched card equipment or electronic computers, and (5) the initial package of software that is required to make the system operational. Equipment such as flexowriters, IBM typewriters, equipment reading the results of experiments, etc., shall be classified as ADP equipment when used primarily in conjunction with an ADP system. Excludes the cost of equipment such as analog computers, card and/or tape file cabinets, and air-conditioning for the processing room. Also, excludes the cost of automatic data recording or electronic control systems used to furnish operating guidance for control of machine tools, equipment used in process operations, reactors, accelera- [illegible]
790	*Miscellaneous Equipment.* Includes the cost of furniture and fixtures for hotels, dormitories, and apartments; laundry equipment; restaurant, cafeteria, and canteen equipment; and other miscellaneous equipment not includable in other codes.
800	*Improvements to Property of Others.* Includes the cost of improvements made by DOE to land, buildings, structures, building services, and utility systems not owned by DOE. Plants, laboratories, and similar facilities constructed by DOE on land owned by others are not to be classified in this category.
900	*Unclassified Plant and Equipment.* Includes the cost of major construction projects or operative portions thereof that have been physically completed and placed in service for which the unitization and classification of costs into plant and equipment accounts have not been completed. Allocation to production, research, community, and general facilities and to asset types 401 through 800 will require approximation in some instances, particularly at year end when full allocation is required. (Year-end allocations may be reversed in October pending formal and more precise classifications.)

945.506 Identification.

The requirements of FAR 45.506 apply to Government property having a unit cost of $1,000 or more.

945.508 Physical inventories.

The frequency of physical inventories shall be as follows:

(a) Permanently affixed plant (such as buildings, utilities, and fences)—Not less frequently than every 10 years.

(b) Capital equipment—Not less frequently than every two years. (See 945.505–14)

(c) Sensitive items—Not less frequently than every twelve months.

(d) Materials (held under inventory control)—Not less frequently than every twelve months.

(e) Precious metals—Not less frequently than every six months.

945.570 Motor vehicle and aircraft management.

(a) Normally, motor vehicles will not be furnished to fixed price or cost-reimbursable contractors. Further, Government-furnished motor vehicles may be provided to or acquired by contractors only when *all* of the criteria of FAR 45.304 are met and approved in writing by the contracting officer.

(b) Government-owned motor vehicles and aircraft shall be maintained and utilized by contractors in the most practical and economical manner consistent with DOE program requirements, safety consideration, fuel economy, and applicable laws and regulations.

(c) Contractors shall conform fully to the average fuel economy standards established by law and these regulations in the selection of Government-furnished motor vehicles.

945.570–1 Classification of motor vehicles.

Because of differences in controls or limitations on possession and use, Government vehicles are classified as follows:

(a) Passenger vehicles.

(1) Sedans and station wagons (small, subcompact, compact, mid-size, and large).

(2) Ambulances.

(3) Buses.

(b) Trucks.

(1) Light, less than 8,500 GVWR (Gross Vehicle Weight Rating).

(i) 4 x 2

(ii) 4 x 4

(2) Light, 8,500 to 12,499 GVWR.

(i) 4 x 2

(ii) 4 x 4

(3) Medium, 12,500 to 23,999 GVWR.

(4) Heavy, 24,000 GVWR or more.

(c) Special purpose vehicles.

(1) Fire trucks.

(2) Construction vehicles.

(3) Other vehicles equipped for special purposes.

945.570–2 Acquisition of motor vehicles.

(a) The GSA Interagency Motor Pool System (GSA–IMPS) is the first source of supply for providing motor vehicles to contractors; however, contracting officer approval is required for contractors to utilize this service.

(b) Prior approval of GSA must be obtained before—

(1) Fixed-price contractors can use the GSA–IMPS;

(2) DOE-owned motor vehicles can be furnished to any contractor in an area served by a GSA–IMPS; and

(3) A contractor can commercially lease a motor vehicle for more than 60 days.

(c) GSA has the responsibility for acquisition of motor vehicles for Government agencies. All requisitions (GSA Form 1781) shall be processed in accordance with 41 CFR 101–26.501.

(d) Contractors shall submit all motor vehicle requirements to the contracting officer for approval.

(e) The acquisition of sedans and station wagons is limited to small, subcompact, and compact vehicles which meet Government fuel economy standards. The acquisition of light trucks is limited to those vehicles which meet the current fuel economy standards set by Executive Orders 12003 and 12375.

(f) Cost reimbursement contractors may be authorized by the contracting officer to utilize GSA Federal Supply Schedule 751, Motor Vehicle Rental, for short term rentals not to exceed 60 days, and are required to utilize available GSA consolidated leasing programs for long term (60 continuous days or longer) commercial leasing of passenger vehicles and light trucks.

(g) The Property and Equipment Management Division, Headquarters Procurement and Assistance Management Directorate (MA–422), shall certify all requisitions prior to submittal to GSA for the following:

(1) The acquisition of sedans and station wagons.

(2) The lease (60 continuous days or longer) of any passenger automobile.

(3) The acquisition or lease (60 continuous days or longer) of light trucks less than 8,500 GVWR.

(h) Purchase requisitions for other motor vehicles may be submitted directly to GSA when approved by the contracting officer.

(i) Contractors shall thoroughly examine motor vehicles acquired under a GSA contract for defects. Any defect shall be reported promptly to GSA, and repairs shall be made under terms of the warranty.

945.570–3 Selection of type of motor vehicles.

(a) All vehicles acquired for use, whether by purchase, rental, lease, forfeiture or transfer from another

agency, shall be limited to the minimum body size, engine size, maximum fuel efficiency, and only that operational equipment (if any) necessary to fulfill programmatic needs.

(b) The least expensive unit overall should be used, taking into consideration both acquisition and operating costs for units to be purchased, and rental rates for rented or leased units.

(c) Dual purpose vehicles capable of hauling both personnel and light cargo shall be used whenever appropriate to avoid the need for two vehicles when one can serve both purposes. However, truck-type or van vehicles shall not be acquired for passenger use merely to avoid limitations on the number of passenger vehicles which may be acquired.

945.570–4 Identification of motor vehicles.

(a) Except as indicated in 945.570–4(b), DOE-owned and commercially leased (for 60 continuous days or longer) motor vehicles shall have Government license tags and the following identification, which shall be furnished and displayed as specified by the DOE contracting officer.

"For Official Use Only
U.S. Government
Department of Energy"

(b) Security vehicles may be exempted from the above identification requirements by the contracting officer. All other exemptions require approval by the Procurement Executive.

945.570–5 Utilization of motor vehicles.

(a) Government-owned vehicles are to be used for official purposes only. Contracting officers may approve home-to-work or work-to-home transportation on a one-time exceptional basis. Home-to-work or work-to-home transportation on a continuing basis is discouraged; however, if justified, such use requires approval of the Head of the Contracting Activity and a determination that the facts sufficiently justify a conclusion of "official purpose." An authorization to use a motor vehicle for transportation between a domicile and place of employment shall be limited to a period of sixty days. Requests for renewals of authorizations shall be subject to the same justification as original requests, and must also show what attempts were made during the original period to eliminate the necessity for the request. Records, including full justification, of such approvals will be kept on file.

(b) The contractor shall prescribe and issue, subject to approval by the contracting officer, such local written guidelines regarding the use of motor vehicles or aircraft for "official purposes" as may be necessary and appropriate for particular operating situations.

(c) The contractor shall establish written procedures to ensure that all motor vehicle operators are informed concerning:

(1) The statutory requirement that motor vehicles shall be used only for "official purposes";

(2) Personal responsibility for safe driving and operation of motor vehicles, and for compliance with Federal, State, and local laws and regulations, and all accident reporting requirements;

(3) The penalties for unauthorized use of motor vehicles;

(4) Procedures for reporting accidents;

(5) The prohibition against picking up strangers or hitchhikers or transporting family members;

(6) Care and control of credit cards; and

(7) Any other duties and responsibilities assigned to motor vehicle operators with regard to the use, care, operation, and maintenance of motor vehicles.

(d) Individual motor vehicle utilization cannot always be measured or evaluated strictly on the basis of miles operated or against any Department-wide mileage standard as stated in 41 CFR 109–38.5002. Other measures of use will need to be considered. Accordingly, as an aid in achieving maximum feasible utilization, local use objectives which represent practical units of measurement for vehicle utilization and for planning and evaluating future vehicle requirements should be established. Such objectives should generally be initiated by the organization involved and reviewed and adjusted as appropriate, but not less often than annually. The objectives will take into consideration past performance, future requirements, and special operating conditions and should be consistent with the justifications used to obtain vehicle authorizations. Both Department-wide and local objectives should be used in such a manner that their use does not stimulate vehicle use for the purpose of meeting the objectives. The ultimate standard against which vehicle use must be measured is that the minimum number of vehicles will be retained to satisfy program requirements.

(e) Methods and practices for achieving maximum economical utilization of motor vehicles shall include but not be limited to—

(1) The maximum use of equipment pooling arrangements, taxicabs, or other common service arrangements;

(2) The minimum, practicable assignment of equipment to individuals, groups or specific organizational components;

(3) The careful selection of equipment types to permit the maximum appropriate use of multi-purpose equipment;

(4) The rotation of equipment between high and low mileage assignments where practicable to maintain the fleet in the best overall replacement age and mileage balance and operating economy, and

(5) The maintenance of individual equipment use records, such as trip tickets or vehicle logs, showing sufficiently detailed information to evaluate appropriateness of assignment and adequacy of use being made. If one-time use is involved, such as assignments from motor pools, the individual's trip records must, as a minimum, identify the vehicle and show the name of the operator, dates, destination, time of departure and return, and mileage.

945.570–6 Maintenance of motor vehicles.

(a) Contractors shall maintain Government-owned vehicles according to a systematic written procedure and in accordance with manufacturer's specifications and the terms of the warranty and 41 CFR 101–38.10. The requirement for a written procedure may be waived by the contracting officer if the contractor has less than 15 Government-owned vehicles.

(b) Special attention shall be devoted to the warranty on each motor vehicle to ensure that maximum benefits are realized from each warranty. Defective materials and workmanship on vehicles under warranty should be corrected under the terms of the warranty to avoid maintenance and repair of such vehicles at Government expense.

945.570–7 Disposition of motor vehicles.

(a) The contractor shall dispose of DOE-owned motor vehicles as directed by the contracting officer.

(b) DOE-owned motor vehicles may be disposed of as exchange/sale items when directed by the contracting officer; however, a designated DOE official must execute the Title Transfer forms.

945.570–8 Reporting motor vehicle data.

(a) Contractors conducting motor vehicle operations shall forward annually (on or before November 1) to the contracting officer their plan for acquisition of motor vehicles for the next fiscal year for review, approval and submittal to DOE Headquarters. This plan shall conform to the fuel efficiency standards for motor vehicles for the applicable fiscal year, as established by

Executive Orders 12003 and 12375 and as implemented by GSA and current DOE directives. Additional guidance for the preparation of the plan will be issued by the contracting officer, as required.

(b) Contractors operating DOE-owned and/or commercially leased (for 60 continuous days or longer) motor vehicles shall prepare and submit the following annual year-end reports to the contracting officer:

(1) DOE Report of Motor Vehicle Data (passenger vehicles).

(2) DOE Report of Truck Data.

945.570-8 Aircraft.

(a) Purchase of aircraft requires statutory authority. Contracting officers may authorize a lease, rental, hire, or loan of an aircraft if the period is less than 30 days. If longer than 30 days, approval must be obtained from the Procurement Executive.

(b) Aircraft shall be used for official purposes only.

Subpart 945.6—Reporting, Redistribution, and Disposal of Contractor Inventory

945.601 Definitions.

"Personal property" (See 945.101).

945.603 Disposal methods.

945.603-70 Plant clearance function.

If the plant clearance function has not been formally delegated to another Federal agency, the contracting officer shall assume all responsibilities of the plant clearance officer identified in FAR Subpart 45.6.

945.603-71 Disposal of radioactively contaminated personal property.

Special procedures regarding the disposal of radioactively contaminated property may be found at 41 CFR 109-45.50.

945.607-2 Recovering precious metals.

(b) Excess precious metals shall be promptly reported to the contracting officer for review, approval and reporting to the DOE precious metals pool. This includes all precious metals in any form, including shapes, scrap or radioactively contaminated, except for silver. Only high grade nonradioactively contaminated silver should be reported to the precious metals pool. The Oak Ridge Operations Office is responsible for maintaining the DOE pool. Precious metals scrap will be reported to the DOE precious metals pool, operated by NLO, Inc., P.O. Box 39158, Cincinnati, Ohio 45239.

945.608-2 Standard screening.

(b)(1) Prior to reporting excess property to GSA, all reportable property, as identified in Federal Property Management Regulations 41 CFR 101-43.4801, shall be reported to the contracting office. The contracting office shall transmit this information via terminal processing or hard copy to DOE Headquarters for centralized screening in the DOE Reportable Excess Automated Property System (REAPS). Agency screening will begin when the item is first included in the REAPS monthly catalog and will end upon the issuance of the following monthly catalog.

(i) REAPS requires the inclusion of a five character address code which identifies the reporting contractor. The address code will be assigned by DOE Headquarters upon receipt of a completed Address Notification form for the contractor or DOE office reporting the property as excess.

(ii) Excess screening documents and Address Notification forms shall be submitted to the Chief, Property and Supply Branch, REAPS, Office of Policy, Procurement and Assistance Directorate, Headquarters, by the contracting office.

945.608-3 Agency screening.

Items shall be reported to the contracting office and should be screened informally within the contracting office's complex of contractors and with other known users of the property at other DOE locations.

945.608-4 Limited screening.

(a) Prior to reporting to GSA, all nonreportable property, excluding scrap and salvage, shall be reported to the contracting office for a 15 day informal screening within the contracting office's complex of contractors and other appropriate DOE field locations.

945.608-5 Special items screening.

Prior to reporting to GSA, that property in FAR 45.608-5 (a), (b), and (d) shall be reported and screened within DOE in accordance with 945.608-2 and 945.608-3.

(c) *Printing equipment.* All printing equipment excess to requirements shall be reported to the Office of Administrative Services, Headquarters.

945.610-4 Contractor inventory in foreign countries.

Contractor inventory located in foreign countries will be utilized and disposed of in accordance with DOE-PMR 41 CFR 109-43.4, 44.3, and 45.51.

PART 947—TRANSPORTATION

Subpart 947.1—General

Sec.
947.102 Transportation insurance.
947.104-3 Cost-reimbursement contracts.

Subpart 947.5 Ocean Transportation by U.S. Flag Vessels

947.506 Procedures.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95-91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 947.1—General

947.102 Transportation insurance.

(c)(1) If special circumstances dictate the need for the Government to buy insurance coverage, the contracting officer, after coordination with appropriate local transportation personnel shall ascertain that (i) there is no statutory prohibition, and (ii) funds for insurance are available.

947.104-3 Cost-reimbursement contracts.

(d)(1) Include in contracts a statement requiring the contractor to use carriers providing services commensurate with DOE program needs, taking full advantage of special reduced rates where available.

Subpart 947.5—Ocean Transportation by U.S. Flag Vessels

947.506 Procedures.

For contract awards involving foreign suppliers which will necessitate ocean transportation, a copy of the award document is to be furnished to the Maritime Administration at the following address: Inter-Agency Liaison, Division of National Cargo, Office of Market Development, Maritime Administration, 400 7th Street, SW., Washington, D.C. 20590

PART 949—TERMINATION OF CONTRACTS

Subpart 949.1—General Principles

Sec.
949.101 Authorities and responsibilities.
949.106 Fraud or other criminal conduct.
949.108-4 Authorization for subcontract settlements without approval or ratification.
949.108-8 Assignment of rights under subcontracts.
949.111 Review of proposed settlements.
949.112-1 Partial payments.

Subpart 949.2—Additional Principles for Fixed-Price Contracts Terminated for Convenience

949.206-1 Submission of settlement proposals.
949.206-2 Bases for settlement proposals.

Subpart 949.3—Additional Principles for Cost-Reimbursement Contracts Terminated for Convenience

949.303–1 Submission of settlement proposal.

Subpart 949.5—Contract Termination Clauses

949.501 General.
949.505 Other termination clauses.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 949.1—General Principles

949.101 Authorities and responsibilities.

The Procurement Executive shall be notified prior to taking any action to terminate (a) contracts for the operation of Government-owned facilities, (b) any prime contract or subcontract in excess of $10 million, and (c) any contract the termination of which is likely to provoke unusual interest.

949.106 Fraud or other criminal conduct.

Any evidence of fraud or other criminal conduct in connection with the settlement of a contract termination shall be reported in accordance with 909.406.

949.108–4 Authorization for subcontract settlements without approval or ratification.

The power to authorize a contractor to conclude settlements of its terminated subcontracts, when the amount of settlement is more than $10,000, but not more than $25,000, shall be exercised by contracting officers only with the approval of the Head of the Contracting Activity.

949.108–6 Assignment of rights under subcontracts.

The contracting officer's determination under FAR 49.108–6(b) that it is in the best interest of the Government to settle and pay directly a subcontractor's termination claim is subject to the approval of the Head of the Contracting Activity.

949.111 Review of proposed settlements.

(a) Heads of Contracting Activities shall establish settlement review boards for the review of each termination settlement or determination of amount due under the termination clause of a contract or approval or ratification of a subcontract settlement when the action involves $50,000 or more.

(b) Settlement review boards may be established for actions below $50,000 when considered desirable by the Head of the Contracting Activity or when specifically requested by the contracting officer.

(c) Proposed settlement agreements or determinations in excess of contractual authority of Heads of Contracting Activities will be transmitted to the Procurement Executive for review and approval.

(d) Contracting officers shall not conclude proposed settlement or determinations until the approvals required by this subsection have been obtained.

949.112–1 Partial payments.

(d) Protection of the Government's interest in partial payments, by means other than those specified in FAR 49.112–1(d), shall be subject to approval of the Head of the Contracting Activity.

Subpart 949.2—Additional Principles for Fixed-Price Contracts Terminated for Convenience

949.206–1 Submission of settlement proposals.

(c) When the standard forms are not appropriate for a particular contract, the Head of the Contracting Activity may authorize modification thereof. However, the certificate shall be substantially as set forth in the form.

949.206–2 Bases for settlement proposals.

(c) Settlement proposals shall not be submitted on any basis other than the inventory or total cost basis without the prior approval of the Head of the Contracting Activity.

Subpart 949.3—Additional Principles for Cost-Reimbursement Contracts Terminated for Convenience

949.303–1 Submission of settlement proposal.

When necessary, the Head of the Contracting Activity may authorize modification of the form prescribed in FAR 49.602–1. However, the certificate shall be substantially as set forth in the form.

Subpart 949.5—Contract Termination Clauses

949.501 General.

The standard clauses set forth in FAR Subpart 49.5 are applicable as prescribed subject to the following:

(a) Cost principles referenced in the various termination articles shall be in accordance with Part 931.

949.505 Other termination clauses.

(f) The clause at 952.249–70 is suggested for use in cost-plus-fixed-fee Architect-Engineer contracts.

PART 950—EXTRAORDINARY CONTRACTUAL ACTIONS

Subpart 950.1—General

Sec.
950.104 Reports.

Subpart 950.70—Indemnification of DOE Contractors

950.7000 Scope of subpart.
950.7001 Applicability.
950.7002 Definitions.
950.7003 Statutory indemnity.
950.7004 Authority to negotiate statutory indemnity agreements.
950.7005 Substantial nuclear incident.
950.7006 Statutory indemnity contract article.
950.7007 Contractual assurance.
950.7008 "Representation" for use in subcontracts and purchase orders of prime contractor holding statuory indemnity agreement.
950.7009 Fees.
950.7010 Financial protection requirements.
950.7011 General contract authority indemnity.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 950.1—General

950.104 Reports.

The information required by FAR 50.104(b) for all actions taken under the extraordinary emergency authority shall be submitted to the Director, Contract Business Clearance Division, Headquarters no later than 30 days after the date of completion of processing the action. In the event no actions were taken under Pub. L. 85–804 during the preceding calendar year, a negative report should be submitted to the Director, Contract Business Clearance Division, Headquarters no later than January 20 of each year.

Subpart 950.70—Indemnification of DOE Contractors

950.7000 Scope of subpart.

This subpart describes the established policies concerning (a) indemnification of DOE contractors against public liability for a nuclear incident arising out of or in connection with the contract activity, and (b) indemnification of DOE contractors against liability for nonnuclear risks arising out of or in connection with the contract activity.

950.7001 Applicability.

(a) With respect to indemnification against public liability for a nuclear incident, the pertinent policies and procedures set forth in this subpart shall

be applicable in entering into indemnity agreements with:

(1) DOE contractors engaged in the operation of prodcution or utilization facilities; and

(2) DOE contractors whose work entails the risk of public liability for a substantial nuclear incident.

(b) With respect to indemnification against liability for nonnuclear risks, the pertinent policies and procedures set forth in this subpart shall be applicable in entering into indemnity agreements with any DOE contractors.

950.7002 Definitions.

"DOE contractor" means any DOE prime contractor, including any agency of the Federal Government with which DOE has entered into an interagency agreement.

"Construction contractor" means a DOE contractor who is constructing an installation for DOE which, when completed, will be a production or utilization facility.

"Nuclear incident" means:

(1) Any occurrence within the United States causing, within or outside the United States, bodily injury, sickness, disease, or death, or loss of or damage to property, or loss of use of property, arising out of or resulting from the radioactive, toxic, explosive, or other hazardous properties of source, special nuclear, or by-product material; and

(2) Any such occurrence outside the United States, if such occurrence involves a facility or device owned by, and used by or under contract with, the United States.

"Person indemnified" means:

(1) With respect to a nuclear incident occurring within the United States, the person with whom an indemnity agreement is executed and any other person who may be liable for public liability; or

(2) With respect to any nuclear incident occurring outside the United States, the person with whom an indemnity agreement is executed and any other person who may be liable for public liability by reason of activities under any contract with DOE or any project to which indemnification under the provisions of section 170d of the Atomic Energy Act 1954, as amended, has been extended, or under any subcontract, purchase order, or other agreement, of any tier, under any such contract or project.

(3) With respect to a nonnuclear incident the person with whom an indemnity agreement is executed.

"Nuclear reactor" means an apparatus, other than an atomic weapon, designed or used to sustain nuclear fission in a self-supporting chain reaction.

"Production facility" means:

(1) Any nuclear reactor designed or used primarily for the formation of plutonium or uranium 233; or

(2) Any facility designed or used for the separation of the isotopes of uranium or the isotopes of plutonium, except laboratory scale facilities designed or used for experimental or analytical purposes only; or

(3) Any facility designed or used for the processing of irradiated materials containing special nuclear material, except laboratory scale facilities designed or used for experimental or analytical purposes only.

"Public liability" means any legal liability (including liability for loss of, or damage to, or loss or use of property which is located at the site of and used in connection with the contract activity arising out of or resulting from a nuclear incident) except: (1) Claims under State or Federal workmen's compensation acts of employees of persons indemnified, who are employed at the site of and in connection with the activity where the nuclear incident occurs, and (2) claims arising out of an act of war. "Public liability" also includes damage to property of persons indemnified, provided that such property is covered under the terms of any financial protection that may be required, except property which is located at the site of and used in connection with the activity where the nuclear incident occurs.

"Utilization facility" means any nuclear reactor other than one designed or used primarily for the formation of plutonium or U 233.

950.7003 Statutory indemnity.

Section 170d of the Atomic Energy Act of 1954, as amended, authorized DOE "to enter into agreements of indemnification with its contractors for the construction or operation of production or utilization facilities or other activities under contracts for the benefit of the United States involving activities under the risk of public liability for a substantial nuclear incident." Contractors identified in 950.7001(a) are eligible for such statutory indemnity.

950.7004 Authority to negotiate statutory indemnity agreements.

(a) Heads of Contracting Activities are authorized to negotiate statutory indemnity agreements with contractors identified in 950.7001(a)(1).

(b) Pursuant to 950.7005, Heads of Contracting Activities may enter into a statutory indemnity agreement whenever it has been determined that a contractor in 950.7001(a)(2) is engaged in activities involving the risk of public liability for a substantial nuclear incident. Such a determination may be based upon either the risk of liability for the occurrence of a substantial nuclear incident in the course of performance of the contract work, or the risk of liability for a substantial nuclear incident caused by a product delivered to or for the DOE under the contract where such product is expected to be used in connection with a facility or device not covered by a statutory indemnity agreement. If, pursuant to 950.7005, a Head of a Contracting Activity determines that the maximum conceivable damage which could result from a nuclear incident arising in the course of a contractor's activities falls between $1 million and $60 million, they shall submit the proposed indemnification with a recommendation, and all supporting data, to the Head of the Agency, or designee, for appropriate action.

950.7005 Substantial nuclear incident.

(a) With respect to 950.7001(a)(2), and pursuant to the provisions of 950.7004, a Head of a Contracting Activity may be required to determine whether a contractor's activities involve the risk of public liability for a substantial nuclear incident and thus make the contractor eligible to obtain a statutory indemnity agreement from the DOE. The determination by a Head of a Contracting Activity shall be based on the criteria in paragraph (b) below.

(b) If, after a study of the maximum conceivable damage which can result from an incident arising out of or in connection with the contractor's activities, the Head of a Contracting Activity concludes that the maximum conceivable damage per incident to property and persons is $60 million or more, the contractor may be found to be under a risk of public liability for a substantial nuclear incident and the Head of the Contracting Activity is authorized to execute a statutory indemnity agreement under such a contract. If such a study of the maximum conceivable damage indicates a figure of $1 million or less, the contractor should not be considered to have a risk of public liability for a substantial nuclear incident, and therefore, shall not be made a party to a statutory indemnity agreement. If the study indicates that the maximum conceivable damage falls between $1 million and $60 million, the Head of a Contracting Activity will submit the proposed indemnification of such contractor to the Head of the Agency or designee with a

recommendation and all supporting data.

(c) The Head of the Agency or designee may take one of the following actions:

(1) Determine that the contractor is under risk of public liability for a substantial nuclear incident and that the contractor should be extended a statutory indemity agreement; or

(2) Determine that the contractor should not be extended a statutory indemnity.

(d) When statutory indemnity is not extended, the Head of the Agency or designee may authorize the Head of a Contracting Activity to authorize the contractor to purchase nuclear liability insurance or to offer the contractor a general authority indemnity agreement.

950.7006 Statutory indemnity contract article.

The contract clause contained in 952.250–70 shall be incorporated in all contracts in which a statutory indemnity agreement is to be included upon a determination that the contractor is under risk of public liability for the occurrence of a substantial nuclear incident in the course of performance of the contract work. The contract clause contained in 952.250–71 shall be incorporated in all contracts in which a statutory indemnity agreement is to be included upon a determination that the contractor is under risk of public liability only for a substantial nuclear incident caused by a product delivered to or for the DOE, under the contract where such product is expected to be used in connection with a facility or device not covered by a statutory indemnity agreement.

950.7007 Contractual assurance.

Heads of Contracting Activities are authorized to include assurances that the DOE will enter into a statutory indemnity agreement with the contractor who will operate a production or utilization facility on its completion. Such assurances may be authorized in contracts for:

(a) Architect-engineer services in connection with the construction of a production or utilization facility;

(b) Component parts for a production or utilization facility;

(c) Construction at a production or utilization facility, where the work does not entail the risk of a substantial nuclear incidences; or

(d) Equipment or services which would be a part of, or contribute to, or be used in connection with the constuction or operation of a production or utilization facility.

Assurances will be given only to those contractors and suppliers which might be held liable in connection with a substantial nuclear incident occurring after completion of the facility. The clause to be used to provide contractual assurance is found in 952.250–72.

950.7008 "Representation" for use in subcontracts and purchase orders of prime contractor holding statutory indemnity agreement.

(a) A DOE contractor with whom a statutory indemnity agreement has been executed in the form contained in 952.250–70 may include in any of its subcontracts and purchase orders a representation that the work under the prime contract is covered by a statutory indemnity agreement with the DOE, and that this indemnity covers all persons who may be liable for public liability for any nuclear incident arising out of or in connection with the activity under the prime contract. A suggested form of "representation" that may be provided to the contractor follows:

The contractor represents that there is included in its prime contract with DOE an indemnity agreement, entered into by DOE under the authority of Section 170 of the Atomic Energy Act of 1954, as amended by Public Law 85–256 (the "Price-Anderson Act"), a copy of which may be obtained from the contractor (or is attached hereto); that, under said agreement, DOE has agreed to indemnify the contractor and other persons indemnified, including the subcontractor, against claims for public liability (as defined in said Act) arising out of or in connection with the contractual activity; that the indemnity applies to covered nuclear incidents which (1) take place at a "contract location" (which term, as defined in the indemnity agreement, does not include the location of the subcontractor's plant and facilities); or (2) arise out of or in the course of transportation of source, special nuclear or nuclear by-product material to or from a "contract location;" or (3) involve items produced or delivered under the prime contract. The obligation of DOE to indemnify is subject to the conditions stated in the indemnity agreement.

(b) The DOE shall not approve the inclusion, in the subcontracts and purchase orders of an indemnified prime contractor, of any provision whereby the prime contractor indemnifies the subcontractor or supplier against public liability for a nuclear incident because any such liability will be covered by the statutory indemnity agreement of the prime contractor.

950.7009 Fees.

No fee will be charged a DOE contractor for a statutory indemnity agreement.

950.7010 Financial protection requirements.

(a) DOE contractors with whom statutory indemnity agreements under the authority of section 170d of the Atomic Energy Act of 1954, as amended, are executed will not normally be required or permitted to furnish financial protection by purchase of insurance to cover public liability for nuclear incidents, except: (1) That DOE contractors now covered by insurance against such liability, with the approval of the DOE, may continue to carry such insurance; and (2) with the approval of the Office of Industrial Relations, contractors engaged in the operation of DOE facilities may be required or permitted to furnish financial protection in an amount not to exceed $1 million.

(b) If nuclear liability insurance is carried by a contractor who is a Nuclear Regulatory Commission (NRC) licensee, the DOE will pay an equitable portion of the insurance premium under its contract (or would include such an item in the calculation of a fixed price), but normally a statutory indemnity agreement would not be granted under the contract.

950.7011 General contract authority indemnity.

(a) The DOE also has general contract authority to enter into indemnity agreements with its contactors. Under such authority a certain measure of protection is extended to the DOE contractor against risk of liability, but the assumption of liability by DOE will be expressly subject to the availability of appropriated funds. Prior to enactment of section 170 of the Atomic Energy Act 1954, as amended, this authority was exercised in a number of Atomic Energy Commission contracts and this type of indemnification remains in some DOE contracts.

(b) It is the policy of the DOE, subsequent to the enactment of section 170, to restrict indemnity agreements with DOE contractors, with respect to protection against public liability for a nuclear incident, to the statutory indemnity provided under section 170. However, it is recognized that circumstances may exist under which a DOE contractor may be exposed to a risk of public liability for a nuclear occurrence which would not be covered by the statutory indemnity.

(c) While it is normally DOE policy to require its contractors to obtain insurance coverage against public liability for nonnuclear risks, there may be circumstances in which a contractual indemnity may be warranted to protect

a DOE contractor against liability for uninsured nonnuclear risks.

(d) If circumstances as mentioned in paragraph (b) or (c) of this section do arise, it shall be the responsibilty of the Heads of Contracting Activities to submit to the Head of the Agency or designee for review and decision, all pertinent information concerning the need for, or desirability of, providing a general authority indemnity to a DOE contractor.

(e) Where the indemnified risk is nonnuclear, the amount of general authority indemnity extended to a fixed-price contractor should normally have a maximum obligation equivalent to the amount of insurance that the contractor usually carries to cover such risks in its other commerical operations or, if the risk involved is dissimilar to those normally encountered by the contractor, the amount that it otherwise would have reasonably procured to insure this contract risk.

(f) In the event that a DOE contractor has been extended both a statutory indemnity and a general authority indemnity, the general authority indemnity will not apply to the extent that the statutory indemnity applies.

(g) The provisons of this subsection do not restrict or affect the policy of DOE to pay its cost-reimbursement type contractors for the allowable cost of losses and expenses incurred in the performance of the contact work, within the maximum amount of the contract obligation.

PART 951—USE OF GOVERNMENT SOURCES BY CONTRACTORS

Subpart 951.1—Contractor Use of Government Supply Sources

Sec.
951.101 Policy.
951.102 Authorization to use Government supply sources.
951.103 Ordering from Government supply sources.

Subpart 951.2—Contractor Use of Interagency Motor Pool Vehicles

951.201 Policy.

Authority: Section 644 of the Department of Energy Organization Act, Pub L. 95-91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 951.1—Contractor Use of Government Supply Sources

951.101 Policy.

(a) It is DOE policy that contractors performing under cost-reimbursement contracts should meet their requirements from Government sources of supply when these sources are available to them, and if it is economically advantageous or otherwise in the best interest of the Government.

951.102 Authorization to use Government supply sources.

(a) The Head of the Contracting Activity may authorize contractors performing under cost-reimbursement contracts and subcontractors performing under cost-reimbursement contracts, where all higher tier contracts and subcontracts are cost-type, to use Government supply sources in accordance with the requirements and procedures in FAR Part 51, DOE PMR 41 CFR 109-26, and any necessary approval from the agency involved. This authority may be redelegated to the level of contracting officer. Direct acquisition by the DOE, rather than by a contractor under cost-reimbursement contracts, shall be required where deemed necessary by the Head of the Contracting Activity in order to carry out special requirements of appropriation acts or other applicable laws relating to particular items.

(c)(1) The DOE central point of contact for the assignment, correction, or deletion of FEDSTRIP activity address codes is the Property and Equipment Management Division, Office of Policy, Procurement and Assistance Directorate, Headquarters.

(e)(4)(iii) Materials, supplies, and equipment acquired from Government sources of supply under the procedures described herein must be used exclusively in connection with Government work, except as otherwise authorized by the Head of the Contracting Activity.

951.103 Ordering from Government supply sources.

(b) The Procurement Executive shall be informed of instances in which GSA sources of supply are not used because of the quality of the items available from GSA or when a Federal Supply Schedule contractor refuses to honor an order.

Subpart 951.2—Contractor Use of Interagency Motor Pool Vehicles

951.201 Policy.

(a) If it is in the Government's interest, the contracting officer may authorize cost-reimbursement contractors to obtain, for official purposes only, interagency motor pool vehicles and related services, including: (1) Fuel and lubricants, (2) vehicle inspection, maintenance, and repair, (3) vehicle storage, and (4) commercially rented vehicles for short-term use under Federal Supply Schedule Industrial Group 751.

PART 952—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Subpart 952.0—General

Sec.
952.000 Scope of part.
952.001 General policy.

Subpart 952.1—Instructions for Using Provisions and Clauses

952.102-1 Incorporation by reference.

Subpart 952.2—Text of Provisions and Clauses

952.202 Clauses related to definitions.
952.202-1 Definitions.
952.204 Clauses related to administrative matters.
952.204-2 Security requirements.
952.204-70 Classification.
952.204-71 Sensitive foreign nations controls.
952.204-72 Disclosure of information.
952.204-73 Foreign ownership, control, or influence over contractor (Representation).
952.204-74 Foreign ownership, control, or influence over contractor.
952.208 Clauses related to required sources of supply.
952.208-7 Tagging of leased vehicles.
952.208-70 Printing.
952.209 Clauses related to contractor's qualifications.
952.209-70 Organizational conflicts of interest—disclosure or representation.
952.209-71 Organizational conflicts of interest—general.
952.209-72 Organizational conflicts of interest—special clause.
952.212 Clauses related to contract delivery or performance.
952.212-70 Rated or authorized controlled material orders for energy programs.
952.212-71 Priorities, allocations and allotments for energy programs.
952.212-72 [Reserved]
952.212-73 Cost and schedule control systems criteria.
952.214 Clauses related to formal advertising.
952.214-27 Price reduction for defective cost or pricing data—modifications—formal advertising.
952.215 Clauses related to contracting by negotiation.
952.215-18 Order of precedence.
952.215-22 Price reduction for defective cost or pricing data.
952.215-23 Price reduction for defective cost or pricing data—modifications.
952.215-70 Required subcontractor representations and certifications.
952.216 Clauses related to types of contracts.
952.261-7 Allowable cost and payment.
952.216-15 Predetermined indirect cost rates.
952.217 Clauses related to special contracting methods.
952.217-70 Acquisition of real property.
952.219 Clauses related to small business.

952.219–9 Small business and small disadvantaged business subcontracting plan.
952.223 Clauses related to environment, conservation, and occupational safety.
952.223–71 Safety and health (Government-owned or leased facility).
952.223–72 Radiation protection and nuclear criticality.
952.223–73 [Reserved]
952.223–74 Nuclear facility safety applicability.
952.223–75 Preservation of individual occupational radiation exposure records.
952.223–76 [Reserved]
952.224 Clause relating to protection of privacy and freedom of information.
952.224–70 Paperwork Reduction Act.
952.227 Provisions and clauses related to patents, technical data, and copyrights.
952.227–70 [Reserved]
952.227–71 Patent rights—small business firms or nonprofit organizations.
952.227–72 [Reserved]
952.227–73 Additional technical data requirements.
952.227–74 [Reserved]
952.227–75 Rights in technical data—long form.
952.227–76 Rights in data—special works.
952.227–77 Rights in technical data—short form.
952.227–78 Rights in technical data—facility.
952.227–79 Limited rights in proprietary data.
952.227–80 Technical data certification.
952.227–81 Royalty payments certification.
952.227–82 Rights to proposal data.
952.227–83 Identification of proprietary data.
952.227–84 Notice of right to request patent waiver.
952.231–70 Date of incurrence of cost.
952.232 Clauses related to contract financing.
952.232–1 Payments.
952.232–2 Payments under fixed-price research and development contracts.
952.232–3 Payments under personal services contracts.
952.232–4 Payments under transportation contracts and transportation-related services contracts.
952.232–5 Payments under fixed-price construction contracts.
952.232–6 Payments under communication service contracts with common carriers.
952.232–7 Payments under time-and-materials and labor-hour contracts.
952.232–8 Discounts for prompt payment.
952.232–10 Payments under fixed-price architect engineer contracts.
952.232–70 Payment due dates, invoice requirements and penalties.
952.232–71 Payment due dates and invoice requirements.
952.232–72 Fixed-price purchase order payment provisions.
952.232–73 Payment methods.
952.235–70 Key personnel.
952.236 Construction and architect-engineer contracts.
952.236–70 Administrative terms for architect-engineer contracts.
952.236–71 Inspection in architect-engineer contracts.
952.236–72 Nonrefundable fee for plans and specifications.
952.245 Clauses related to Government property.
952.245–2 Government property (fixed-price contracts).
952.245–5 Government property (cost-reimbursement, time and material, or labor-hour contracts).
952.247–70 Foreign travel.
952.249 Clauses related to terminaton.
952.249–70 Termination clause for cost-reimbursement architect-engineer contract.
952.250 Clauses related to indemnification of contractors.
952.250–70 Nuclear hazards indemnity.
952.250–71 Nuclear hazards indemnity—product liability.
952.250–72 Indemnity assurance to architect-engineer or supplier prior to operation of a production or utilization facility.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

Subpart 952.0—General

952.000 Scope of part.

This part implements FAR Part 52 which sets forth contract clauses for use in connection with the acquisition of personal property and nonpersonal services (including construction), and supplements, as well as modifies, FAR Part 52 by prescribing certain modifications to be made to FAR clauses when used in DOE contracts and specifying certain DOE contract clauses to be used in addition to or in place of such FAR clauses.

952.001 General policy.

It is DOE policy to use the prescribed FAR and DOE contract clauses wherever practicable. Uniformity in the use of contract clauses helps to ensure impartial treatment of all contractors, expedites negotiation and contract review, and facilitates contract administration.

Supbart 952.1—Instructions for Using Provisions and Clauses

952.102–1 Incorporation by reference.

(a) Preprinted standard contract clauses (clause sets) and solicitation representations and certifications provisions will be maintained by the Office of Policy for use by DOE contracting activities during the initial Federal Acquisition Regulations System familiarization period. The clause sets contain the FAR and DEAR clauses required for specific contract types. Contracting Activities will be responsible for including necessary additions and alterations in individual contracts to ascertain that the clauses are current and appropriate to the circumstances of the individual contract. The concept of preprinted clause sets is designed to reduce the review burden on both the Contracting Activities and Department's contractors. Use of the preprinted clause sets reduces the review burden for an individual contract award since once the clause sets have been reviewed and understood for a particular contract type, individual contact reviews can be limited to examination of the alterations and additions used in conjunction with the preprinted clause sets. This practice eliminates the confusion and expense of the Department's contractors which would be caused were each contracting activity to pursue its own approach regarding contract clauses.

(b) At a later date, when the FAR and DEAR clause requirements are familiar to both DOE personnel and the Department's contractors, the Department will consider incorporation by reference. Incorporation by reference is the practice of reducing the bulk of contract documents by listing only the title, regulatory citation, and date of a particular clause rather than its full text. The full text of the clause can be obtained by referring to a copy of the Code of Federal Regulations, Title 48, Chapter 1 for FAR clauses or Title 48, Chapter 9 for DEAR clauses.

Subpart 952.2—Text of Provisions and Clauses

952.202 Clauses related to definitions.

952.202–1 Definitions.

(a) The contracting officer shall substitute the following for paragraph (a) of the clause at FAR 52.202–1.

(a) The term "Head of Agency" means the Secretary, Deputy Secretary or Under Secretary of the Department of Energy.

(b) The following shall be added as paragraph (d) except it will be designated paragraph (c) if Alternate I of the clause is used.

(d) The term "DOE" means the Department of Energy.

952.204 Clauses related to administrative matters.

952.204–2 Security requirements.

The following clause shall be included in contracts entered into under section 31 (research assistance) or 41 (ownership and operation of production facilities) of the Atomic Energy Act of 1954, as amended, and in other contracts and subcontracts, which involve or are likely to involve classified information.

Security (April 1984)

(a) Contractor's duty to safeguard all classified information, special nuclear material, and other DOE property. The contractor shall, in accordance with DOE security regulations and requirements, be responsible for safeguarding all classified information, and protecting against sabotage, espionage, loss and theft, the classified documents and material in the contractor's possession in connection with the performance of work under this contract. Except as otherwise expressly provided in this contract, the contractor shall, upon completion or termination of this contract, transmit to DOE any classified matter in the possession of the contractor or any person under the contractor's control in connection with performance of this contract. If retention by the Contractor of any classified matter is required after the completion or termination of the contract and such retention is approved by the contracting officer, the contractor will complete a certificate of possession to be furnished to DOE specifying the classified matter to be retained. The certification shall identify the items and types or categories of matter retained, the conditions governing the retention of the matter, and the period of retention, if known. If the retention is approved by the contracting officer, the security provisions of the contract will continue to be applicable to the matter retained. Special nuclear material will not be retained after the completion or termination of the contract.

(b) *Regulations.* The contractor agrees to conform to all security regulations and requirements of DOE.

(c) *Definition of classified information.* The term "classified information' means Restricted Data, Formerly Restricted Data, or National Security Information.

(d) *Definition of restricted data.* The term "Restricted Data" means all data concerning (1) design, manufacture, or utilization of atomic weapons; (2) the production of special nuclear material; or (3) the use of special nuclear material in the production of energy, but shall not include data declassified or removed from the Restricted Data category pursuant to Section 142 of the Atomic Energy Act of 1954, as amended.

(e) *Definition of formerly restricted data.* The term "Formerly Restricted Data" means all data removed from the Restricted Data category under section 142 d. of the Atomic Energy Act of 1954, as amended.

(f) *Definition of National Security Information.* The term "National Security Information" means any information or material, regardless of its physical form or characteristics, that is owned by, produced for or by, or is under the control of the United States Government, that has been determined pursuant to Executive Order 12356 or prior Orders to require protection against unauthorized disclosure, and which is so designated.

(g) *Definition of Special Nuclear Material (SNM).* SNM means: (1) Plutonium, uranium enriched in the isotope 233 or in the isotope 235, and any other material which pursuant to the provisions of Section 51 of the Atomic Energy Act of 1954, as amended, has been determined to be special nuclear material, but does not include source material; or (2) any material artificially enriched by any of the foregoing, but does not include source material.

(h) *Security clearance of personnel.* The contractor shall not permit any individual to have access to any classified information, except in accordance with the Atomic Energy Act of 1954, as amended, Executive Order 12356, and the DOE's regulations or requirements applicable to the particular level and category of classified information to which access is required.

(i) *Criminal liability.* It is understood that disclosure of any classified information relating to the work or services ordered hereunder to any person not entitled to receive it, or failure to safeguard any classified information that may come to the contractor or any person under the contractor's control in connection with work under this contract, may subject the contractor, its agents, employees, or subcontractors to criminal liability under the laws of the United States. (See the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2100 et seq.; 18 U.S.C. 793 and 794; and Executive Order 12356).

(j) *Subcontracts and purchase orders.* Except as otherwise authorized in writing by the contracting officer, the contractor shall insert provisions similar to the foregoing in all subcontracts and purchase orders under this contract.

952.204-70 Classification.

The following clause shall be included in all contracts which involve classified information:

Classification (Apr. 1984)

In the performance of the work under this contract, the contracter shall ensure that an Authorized Original Classifier or Derivative Classifier shall assign classifications to all documents, material, and equipment originated or generated under the contract in accordance with classification regulations and guidance furnished to the contractor by the DOE. Every subcontract and purchase order issued hereunder involving the origination or generation of classified documents, material, or equipment shall include a provision to the effect that in the performance of such subcontract or purchase order, the subcontractor or supplier shall ensure that an Authorized Original Classifier or Derivative Classifier shall assign classifications to all such documents, materials, and equipment in accordance with classification regulations and guidance furnished to such subcontractor or supplier by the contractor.

952.204-71 Sensitive Foreign nations controls.

In accordance with 904.404(d)(3), the contracting officer shall include the following clause:

Sensitive Foreign Nations Controls (Apr. 1984)

(a) In connection with any activities in the performance of this contract, the contractor agrees to comply with the "Sensitive Foreign Nations Controls" requirements attached to this contract, relating to those countries, which may from time to time, be identified to the contractor by written notice as sensitive foreign nations. The contractor shall have the right to terminate its performance under this contract upon at least 60 days' prior written notice to the contracting officer if the contractor determines that it is unable, without substantially interfering with its polices or without adversely effecting its performance to continue performance of the work under this contract as a result of such notification. If the contractor elects to terminate performance, the provisions of this contract regarding termination for the convenience of the Government shall apply.

(b) The provisions of this clause shall be included in any subcontracts.

952.204-72 Disclosure of information.

This clause may be used in place of the clauses entitled "Security," 952.204-2, and "Classification," 952.204-70, in contracts with educational institutions for research involving nuclear technology which could but is not expected to produce classified information or restricted data:

Disclosure of Information (Apr. 1984)

(a) It is mutually expected that the activities under this contract will not involve classified information. It is understood, however, that if in the opinion of either party, this expectation changes prior to the expiration or terminating of all activities under this contract, said party shall notify the other party accordingly in writing without delay. In any event, the contractor shall classify, safeguard, and otherwise act with respect to all classified information in accordance with applicable law and the requirements of DOE, and shall promptly inform DOE in writing if and when classified information becomes involved, or in the mutual judgment of the parties it appears likely that classified information or material may become involved. The contractor shall have the right to terminate performance of the work under this contract and in such event the provisions of this contract respecting termination for the convenience of the Government shall apply.

(b) The contractor shall not permit any individual to have access to classified information except in accordance with the Atomic Energy Act 1954, as amended, Executive Order 12356, and DOE's regulations or requirements.

(c) The term "Restricted Data" as used in this article means all data concerning the design, manufacture, or utilization of atomic weapons, the production of special nuclear material or the use of special nuclear material in the production of energy, but shall not include data declassified or removed from the Restricted Data category pursuant to section 142 of the Atomic Energy Act of 1954, as amended.

952.204-73 Foreign ownership, control, or influence over contractor (Representation).

As prescribed in 904.7005(a), insert the following provision in all solicitations

for contracts subject to the provisions of 904.70.

Foreign Ownership, Control, or Influence Over Contractor (Apr. 1984)

(a) For purposes of this provision, a foreign interest is defined as any of the following:

(1) A foreign government or foreign government agency;

(2) Any form of business enterprise organized under the laws of any country other than the United States or its possessions;

(3) Any form of business enterprise organized or incorporated under the laws of the U.S., or a State or other jurisdiction within the U.S., which is owned, controlled, or influenced by a foreign government, agency, firm, corporation, or person; or

(4) Any person who is not a U.S. citizen.

(b) Foreign ownership, control, or influence (FOCI) means the situation where the degree of ownership, control, or influence over a contractor by a foreign interest is such that a reasonable basis exists for concluding that compromise of classified information or significant quantity of special nuclear material as defined in 10 CFR Part 710 may result.

(c) If the offeror/bidder has not previously submitted responses to the following questions to DOE as part of the facility security clearance process, then it shall answer the following questions. Answer each question in either the "yes" or "no" column. If the answer is yes, furnish in detail on a separate sheet of paper all the information requested in parentheses. Copies of information which responds to these questions and which was submitted to other Government agencies may be submitted as responses to these questions if the earlier responses are accurate, complete, and current.

Question	Yes	No
1. Does a foreign interest own or have beneficial ownership in 5% of more of your organization's voting securities? (Identify the percentage of any class of shares or other securities issued which are owned by foreign interests, listed by country. If you answer "Yes" and have received from an investor a copy of Schedule 13D and/or Schedule 13G filed by the investors with the Securities and Exchange Commission, you are to attach a copy of Schedule 13D and/or Schedule 13G.)		
2. Does your organization own 10% or more of any foreign interest? (Furnish the name of the foreign interest, address by country, and the percentage owned. Include name and title of officials of your organization who occupy positions with the foreign interest, if any.)		
3. Do any foreign interests have management positions such as directors, officers, or executive personnel in your organization? (Furnish full information concerning the identity of the foreign interest and the position he/she holds in your organization.)		
4. Does any foreign interest control or influence, or is any foreign interest in a position to control or influence the election, appointment, or tenure of any of your directors, officers, or executive personnel? (Identify the foreign interest(s) and furnish full details concerning the control or influence.)		
5. Does your organization have any contracts, binding agreements, understandings, or arrangements with a foreign interest(s) that cumulatively represent 10% or more of your organization's gross income? (Furnish the name of the foreign interest, country, nature of agreement or involvement. Agreements include licensing, sales, patent exchange, trade secrets, agency, cartel, partnership, joint venture, proxy, etc. Give overall percentage by country as related to total income and type of services or products in general terms. If you answer "Yes" and have received from the foreign interest a copy of Schedule 13D and/or Schedule 13G filed by the foreign interest with the Securities and Exchange Commission, you are to attach a copy of Schedule 13D and/or Schedule 13G.)		
6. Is your organization indebted to foreign interests? (Furnish the amount of indebtedness as related to the current assets of the organization and identify the creditor. Include specifics as to the type of indebtedness and what, if any, collateral, including voting stock, has been furnished or pledged. If any debentures are convertible, specifics about the indebtedness, collateral, if any, and what will be received after conversion are to be furnished.)		
7. Does your organization derive any income from Communist countries included in Country Groups P, Q, W, Y, and Z in Supplement No. 1 in 15 CFR Part 370? (Discuss in detail any income derived from Communist countries, including percentage from each such country as related to total income, and the type of services or products involved.)		
8. Is 5% or more of any class of your organization's securities held in "nominee shares," in "street names", or in some other method which does not disclose beneficial owner of equitable title? (Identify each foreign institutional investor holding 5 percent or more of the voting stock. Identification should include the name and address of the investor and percentage of stock held. State whether the investor has attempted to, or has, exerted any management control or influence over the appointment of directors, officers, or other key management personnel, and whether such investors have attempted to influence the policies of the corporation. If you have received from the investor a copy of the Schedule 13D and/or Schedule 13G filed by the investor with the Securities and Exchange Commission, you are to attach a copy of Schedule 13D and/or Schedule 13G.)		
9. Does your organization have interlocking directors with foreign interests? (Include identifying data on all such directors. If they have a security clearance, so state. Also indicate the name and address of all other corporations with which they serve in any capacity.)		
10. Are there any citizens of foreign countries employed by, or who may visit, your offices or facilities in a capacity which may permit them to have access to classified information or a significant quantity of special nuclear material? (Provide complete information by identify the individuals and the country of which they are citizens.)		
11. Does your organization have foreign involvement not otherwise covered in your answers to the above questions? (Describe the foreign involvement in detail, including why the involvement would not be reportable in the preceding questions.)		

Certification

( ) The offeror/bidder certifies that the entries made above are accurate, complete, and current to the best of my knowledge and belief and are made in good faith.

( ) The offeror/bidder certifies that the information requested above has previously been submitted to DOE as required for a facility security clearance and that the information is accurate, complete and current.

Date Certified _____
By _____
Offeror/Bidder _____
Title _____
Address _____
Signature and Date _____

(d) Prior to award of a contract under this solicitation, the DOE must determine that award of the contract to the offeror/bidder will not pose an undue risk to the common defense and security as a result of its access to classified information or a significant quantity of special nuclear material in the performance of the contract. In making the determination, the contracting officer may consider a voting trust or other arrangements proposed by the offeror/bidder to mitigate or avoid FOCI. The contracting officer may require the offeror/bidder to submit such additional information as deemed pertinent to this determination.

(e) The offeror/bidder shall require any subcontractors having access to classified information or a significant quantity of special nuclear material to submit the certifications in (c) above directly to the DOE contracting officer.

(f) Information submitted by the offeror/bidder in response to the questions in (c) above is to be used solely for purposes of evaluating foreign ownership, control, or influence and shall be treated by DOE, to the extent permitted by law, as business or financial information submitted in confidence.

952.204-74 Foreign ownership, control, or influence over contractor.

As prescribed in 904.7005(b), insert the following contract clause in new contracts and contract modifications to existing contracts subject to 904.70.

Foreign Ownership, Control, or Influence Over Contractor (Apr 1984)

(a) For purposes of this clause, a foreign interest is defined as any of the following:

(1) A foreign government or foreign government agency;

(2) Any form of business enterprise organized under the laws of any country other than the United States or its possessions;

(3) Any form of business enterprise organized or incorporated under the laws of the U.S., or a State or other jurisdiction within the U.S., which is owned, controlled, or influenced by a foreign government, agency, firm, corporation or person; or

(4) Any person who is not a U.S. citizen.

(b) Foreign ownership, control, or influence (FOCI) means the situation where the degree of ownership, control, or influence over a

contractor by a foreign interest is such that a reasonable basis exists for concluding that compromise of classified information, special nuclear material as defined in 10 CFR Part 710, may result.

(c) For purposes of this clause, subcontractor means any subcontractor at any tier and the term "contracting officer" shall mean DOE contracting officer. When this clause is included in a subcontract, the term "contractor" shall mean subcontractor and the term "contract" shall mean subcontract.

(d) The contractor shall immediately provide the contracting officer written notice of any changes in the extent and nature of FOCI over the contractor which would affect the answers to the questions presented in DEAR 952.204–73. Further, notice of changes in ownership or control which are required to be reported to the Securities and Exchange Commission, the Federal Trade Commission, or the Department of Justice shall also be furnished concurrently to the contracting officer.

(e) In those cases where a contractor has changes involving FOCI, the DOE must determine whether the changes will pose an undue risk to the common defense and security. In making this determination, the contracting officer shall consider proposals made by the contractor to avoid or mitigate foreign influences.

(f) If the contracting officer at any time determines that the contractor is, or is potentially, subject to FOCI, the contractor shall comply with such instructions as the contracting officer shall provide in writing to safeguard any classified information or significant quantity of special nuclear material.

(g) The contractor agrees to insert terms that conform substantially to the language of this clause including this paragraph (g) in all subcontracts under this contract that will require access to classified information or a significant quantity of special nuclear material. Additionally, the contractor shall require such subcontractors to submit a completed certification required in DEAR 952.204–73 prior to award of a subcontract. Information to be provided by a subcontractor pursuant to this clause may be submitted directly to the contracting officer.

(h) Information submitted by the contractor or any affected subcontractor as required pursuant to this clause shall be treated by DOE to the extent permitted by law, as business or financial information submitted in confidence to be used solely for purposes of evaluating FOCI.

(i) The requirements of this clause are in addition to the requirement that a contractor obtain and retain the security clearances required by the contract. This clause shall not operate as a limitation on DOE's rights, including its rights to terminate this contract.

(j) The contracting officer may terminate this contract for default either if the contractor fails to meet obligations imposed by this clause, e.g., provide the information required by this clause, comply with the contracting officer's instructions about safeguarding classified information, or make this clause applicable to subcontractors, or if, in the contracting officer's judgment, the contractor creates an FOCI situation in order to avoid performance or a termination for default. The contracting officer may terminate this contract for convenience if the contractor becomes subject to FOCI and for reasons other than avoidance of performance of the contract, cannot, or chooses not to, avoid or mitigate the FOCI problem.

952.208 Clauses related to required sources of supply.

952.208–7 Tagging of leased vehicles.

Insert the following clause when leasing commercial vehicles for periods in excess of 60 days.

Tagging of Leased Vehicles (Apr 1984)

(a) DOE intends to use U.S. Government license tags.

(b) While it is the intention that vehicles leased hereunder shall operate on Federal tags, the DOE reserves the right to utilize State tags if necessary to accomplish its mission. Should State tags be required, the contractor shall furnish the DOE the documentation required by the State to acquire such tags.

952.208–70 Printing.

Title 44, United States Code, "Public Printing and Documents," establishes policies regarding public printing and documents within the Federal Government. It provides that public printing will be accomplished by the Government Printing Office, its regional offices or authorized departmental printing plants. It provides a limited exemption for contractors. Requirements exceeding that limitation are to be accomplished utilizing Government resources. To facilitate this, contracting officers shall furnish the necessary forms and instructions to contractors, as called for by DOE Order 1340.1, and include the following clause in all contracts:

Printing (Apr 1984)

The contractor shall not engage in, nor subcontract for, any printing (as that term is defined in Title I of the U.S. Government Printing and Binding Regulations in effect on the effective date of this contract) in connection with the performance of work under this contract. Provided, however, that performance of a requirement under this contract involving the duplication of less than 5,000 copies of a single unit, or no more than 25,000 units in the aggregate of multiple units, will not be deemed to be printing. A unit is defined as one sheet, size 8½ by 11 inches one side only, one color. A requirement is defined as a single publication ducument.

(1) The term "printing" includes the following processes: composition, plate making, pressework, binding, microform publishing, or the end items produced by such processes.

(2) If fulfillment of the contract will necessitate reproduction in excess of the limits set forth above, the contractor shall notify the contracting officer in writing and obtain the contracting officer's approval prior to acquiring on DOE's behalf production, acquisition, and dissemination of printed matter. Such printing must be obtained from the Government Printing Office (GPO), a contract source designated by GPO or a Joint Committee on Printing authorized federal printing plant.

(3) Printing services not obtained in compliance with this guidance will result in the cost of such printing being disallowed.

(4) The Contractor will include in each of his subcontracts hereunder a provision substantially the same as this clause including this paragraph (4).

952.209 Clauses related to contractor's qualifications.

952.209–70 Organizational conflicts of interest—disclosure or representation.

Use the following solicitation provision under the circumstances described at 909.570.

Organizational Conflicts of Interest Disclosure or Representation (Apr 1984)

It is Department of Energy policy to avoid situations which place an offeror in a position where its judgment may be biased because of any past, present, or currently planned interest, financial or otherwise, the offeror may have which relates to the work to be performed pursuant to this solicitation or where the offeror's performance of such work may provide it with an unfair competitive advantage. (As used herein, "offeror" means the proposer or any of its affiliates or proposed consultants or subcontractors of any tier.) Therefore:

(a) The offeror shall provide a statement which describes in a concise manner all relevant facts concerning any past, present or currently planned interest (financial, contractural, organizational, or otherwise) relating to the work to be performed hereunder and bearing on whether the offeror has a possible organizational conflict of interest with respect to (1) being able to render impartial, technically sound, and objective assistance or advice, or (2) being given an unfair competitive advantage. The offeror may also provide relevant facts that show how its organizational structure and/or management systems limit its knowledge of possible organizational conflicts of interest relating to other divisions or sections of the organization and how that structure or system would avoid or mitigate such organizational conflict.

(b) In the absence of any relevant interests referred to above, the offeror shall submit a statement certifying that to its best knowledge and belief no such facts exist relevant to possible organizational conflicts of interest. Proposed consultants and subcontractors are responsible for submitting information and may submit it directly to the contracting officer.

(c) The Department will review the statement submitted and may require additional relevant information from the offeror. All such information, and any other relevant information known to the Department, will be used to determine whether an award to the offeror may create an organizational conflict of interest is found to exist, the Department may (1) impose appropriate conditions which avoid such conflict, (2) disqualify the offeror, or (3) determine that it is otherwise in the best interest of the United States to contract with the offeror by including appropriate conditions mitigating such conflict in the contract awarded.

(d) The refusal to provide the disclosure or representation and any additional information as required shall result in disqualification of the offeror for award. The nondisclosure or misrepresentation of any relevant interest may also result in the disqualification of the offeror for award, or if such nondisclosure or misrepresentation is discovered after award, the resulting contract may be terminated for default. The offeror may also be disqualified from subsequent related Department contracts, and be subject to such other remedial action as may be permitted or provided by law or in the resulting contract. The attention of the offeror in complying with this provision is directed to 18 U.S.C. 1001.

(e) Depending on the nature of the contract activities, the offeror may, because of possible organizational conflicts of interest, propose to exclude specific kinds of work from the statement, unless the solicitation specifically prohibits such exclusion. Any such proposed exclusion by an offeror shall be considered by the Department in the evaluation of proposals, and if the Department considers the proposed excluded work to be an essential or integral part of the required work, the proposal may be rejected as unacceptable.

(f) No award shall be made until the disclosure or representation has been evaluated by the Government. Failure to provide the disclosure or representation will be deemed to be a minor informality (FAR 14.405) and the offeror or contractor shall be required to promptly correct the omission.

952.209-71 Organizational conflicts of interest—general.

Insert the following contract clause under the circumstances described at 909.570.

Organizational Conflicts of Interest—General (Apr 1984)

(a) The contractor warrants that, to the best of his knowledge and belief, and except as otherwise disclosed, there are no relevant facts which could give rise to organizational conflicts of interest, as defined in 909.570 or that the contractor has disclosed all relevant information.

(b) The contractor agrees that, if after award, an organizational conflict of interest with respect to this contract is discovered, an immediate and full disclosure in writing shall be made to the Contracting Officer which shall include a description of the action which the contractor has taken or proposes to take to avoid or mitigate such conflicts. The Department may, however, terminate the contract for its convenience if it deems such termination to be in the best interest of the Government.

(c) In the event that the contractor was aware of an organizational conflict of interest prior to the award of this contract and did not disclose the conflict to the contracting officer, the Government may terminate the contract for default.

(d) The provisions of this clause shall be included in all subcontracts for work to be performed similar to the service provided by the prime contractor, and the terms "contract," "contractor," and "contracting officer" modified appropriately to preserve the Government's rights.

(e) Prior to a contract modification when the statement of work is modified to add new work, the period of performance is significantly increased, or the parties to the contract are changed, the Department will request and the contractor is required to submit either an organizational conflict of interest disclosure or representation or an update of the previously submitted disclosure or representation.

952.209-72 Organizational conflicts of interest—special clause.

Insert the following contract clause under the circumstance described at 909.570.

Organizational Conflicts of Interest—Special Clause (Apr 1984)

(a) *Purpose.* The primary purpose of this clause is to aid in ensuring that the contractor (1) is not biased because of its past, present, or currently planned interests (financial, contractual, organizational, or otherwise) which relate to the work under this contract, and (2) does not obtain any unfair competitive advantage over other parties by virtue of its performance of this contract.

(b) *Scope.* The restrictions described herein shall apply to performance or participation by the contractor and any of its affiliates or their successors in interest (hereinafter collectively referred to as "contractor") in the activities covered by this clause as a prime contractor, subcontractor, cosponsor, joint venturer, consultant, or in any similar capacity.

(1) *Technical consulting and management support services.*

(i) The contractor shall be ineligible to participate in any capacity in Department contracts, subcontracts, or proposals therefor (solicited or unsolicited) which stem directly from the contractor's performance of work under this contract. Furthermore, unless so directed in writing by the contracting officer, the Contractor shall not perform any technical consulting or management support services work under this contract on any of its products or services or the products or services of another firm if the contractor is or has been substantially involved in their development or marketing. Nothing in this subparagraph shall preclude the contractor from competing for follow-on contracts for technical consulting and management support services.

(ii) If the contractor under this contract prepares a complete or essentially complete statement of work or specifications to be used in competitive acquisitions, the contractor shall be ineligible to perform or participate in any capacity in any contractual effort which is based on such statement of work or specifications. The contractor shall not incorporate its products or services in such statement of work or specifications unless so directed in writing by the contracting officer, in which case the restriction in this subparagraph shall not apply.

(iii) Nothing in this paragraph shall preclude the contractor from offering or selling its standard commercial items to the Government.

(2) *Access to and use of information.*

(i) If the contractor, in the performance of this contract, obtains access to information, such as Department plans, policies, reports, studies, financial plans, internal data protected by the Privacy Act of 1974 (Pub. L. 93-579), or data which has not been released or otherwise made available to the public, the contractor agrees that without prior written approval of the contracting officer it shall not: (a) use such information for any private purpose unless the information has been released or otherwise made available to the public; (b) compete for work for the Department based on such information for a period of six (6) months after either the completion of this contract or until such information is released or otherwise made available to the public, whichever is first; (c) submit an unsolicited proposal to the Government which is based on such information until one year after such information is released or otherwise made available to the public; and (d) release such information unless such information has previously been released or otherwise made available to the public by the Department.

(ii) In addition, the contractor agrees that to the extent it receives or is given access to proprietary data, data protected by the Privacy Act of 1974 (Pub. L. 93-579), or other confidential or privileged technical, business, or financial information under this contract, it shall treat such information in accordance with any restrictions imposed on such information.

(iii) The contractor shall have, subject to patent, data, and security provisions of this contract, the right to use technical data it first produces under this requirements of this contract have been met.

(c) *Disclosure after award.* (1) The contractor agrees that if after award it discovers an organizational conflict of interest with respect to this contract, an immediate and full disclosure shall be made in writing to the contracting officer which shall include a description of the action which the contractor has taken or proposes to take to avoid or mitigate such conflicts.

The Department may, however, terminate the contract for convenience if it deems such termination to be in the best interest of the Government.

(2) In the event that the contractor was aware of an organizational conflict of interest prior to the award of this contract and did not disclose the conflict to the contracting officer.

the Department may terminate the contract for default.

(d) *Subcontracts.* (1) The contractor shall include this clause, including this paragraph, in subcontracts of any tier which involve performance or work of the type specified in (b)(1) above or access to information of the type covered in (b)(2) above. The terms "contract", "contractor" and "contracting officer" shall be appropriately modified to preserve the Government's rights.

(2) If a subcontract is to be issued for evaluation services or activities, technical consulting or management support services work as defined at 909.570, the contractor shall obtain for the Department a disclosure statement or representation, in accordance with DOE regulations in effect at the time, from each intended subcontractor or consultant. The contractor shall not enter into any subcontract nor engage any consultant unless the contracting officer shall have first notified the contractor that there is little or no likelihood that an organizational conflict of interest exists or that despite the existence of a conflict of interest the award is in the best interest of the Government.

(e) *Remedies.* For breach of any of the above restrictions or for nondisclosure or misrepresentation of any relevant facts required to be disclosed concerning this contract, the Government may terminate the contract for default, disqualify the contractor for subsequent related contractual efforts and pursue such other remedies as may be permitted by law or this contract.

(f) *Waiver.* Requests for waiver under this clause shall be directed in writing to the contracting officer and shall include a full description of the requested waive and the reasons in support thereof. If it is determined to be in the best interests of the Government, the contracting officer shall grant such a waiver in writing.

(g) *Modifications.* Prior to a contract modification when the statement of work is modified to add new work, the period of performance is significantly increased, or the parties to the contract are changed, the Department will request and the contractor is required to submit either an organizational conflict of interest disclosure or representation or an update of the previously submitted disclosure or representation.

952.212 Clauses related to contract delivery or performance.

952.212-70 Rated or authorized controlled material orders for energy programs.

As prescribed in 912.304(a), insert the following provisions in solicitations that will result in the award of a contract eligible for placement of rated orders or authorized controlled material orders for DOE atomic energy programs:

Rated or Authorized Controlled Material Orders (Atomic Energy) (Apr 1984)

Contracts or purchase orders awarded as a result of this solicitation shall be assigned a/——/ DO-Rating; /——/ DX-rating; or /——/ DMS allotment number in accordance with Defense Priorities System Regulation 1 and Defense Materials System Regulation 1. (*Contracting officer check appropriate box or boxes*).

Alternate I: As prescribed in 912.304(d), insert the following provision in solicitations that may result in a contract eligible for placement or rated orders or authorized controlled material orders for authorized energy programs:

Rated or Authorized Controlled Material Orders (Domestic Energy Supplies) (Apr 1984)

Contracts or purchase orders awarded as a result of this solicitation may be eligible for priorities and allocations support in accordance with 10 CFR 216 and Section 101(c) of the Defense Production Act of 1950, as amended.

952.212-71 Priorities, allocations, and allotments for energy programs.

As prescribed in 912.304(b), insert the following clause in orders and contracts that are placed in support of authorized DOE atomic energy programs:

Priorities, Allocations, and Allotments (Atomic Energy) (Apr 1984)

The Contractor shall follow the provisions of Defense Material System Regulation 1 or Defense Priorities System Regulation 1 (see 15 CFR Parts 330–354) and all other applicable regulations and orders of the DMS/DPS in obtaining controlled materials and other products and materials needed to fill this contract.

Alternate I: Certain contracts may be eligible for priorities and allocations support as described in 912.302 if their purpose is to maximize domestic energy supplies. Eligibility is dependent on an executive decision on a case-by-case basis. Guidance is provided by DOE Publication PR–0042, "Priorities and Allocations Support for Energy: Keeping Energy Programs on Schedule," dated August 1980, as it may from time to time be revised. If the purpose of the contract is to maximize domestic energy resources, include the following clause:

Priorities, Allocations, and Allotments—(Domestic Energy Supplies) (Apr 1984)

(a) This contract may be eligible for priorities and allocations support, as provided for by Section 101(c) of the Defense Production Act of 1950, as amended by the Energy Policy and Conservation Act (Pub. L. 94–163, 42 U.S.C. 6201 *et seq.*) if its purpose is to maximize domestic energy supplies. Eligibility is dependent on an executive decision on a case-by-case basis with the decision being jointly made by the Departments of Commerce and Energy.

(b) DOE Regulations regarding Material Allocation and Priority Performance under Contracts or Orders to Maximize Domestic Energy Supplies can be found at Part 216 of Title 10 of the Code of Federal Regulations (10 CFR Part 216).

(c) Additional guidance is provided by DOE Publication PR–0042, "Priorities and Allocations Support for Energy: Keeping Energy Programs on Schedule," dated August 1980, as it may from time to time be revised. Copies may be obtained by written request to: Department of Energy, Technical Information Center (TIC), Post Office Box 62, Oak Ridge, Tennessee 37830.

952.212-72 [Reserved]

952.212-73 Cost and schedule control systems criteria.

Certain DOE projects are of such significance and magnitude that responsible management calls for enhanced visibility of contractor cost and schedule performance as well as more formalized data to document their progress and to aid in decisions regarding their continuation. Any contract with a total estimated cost in excess of $50 million shall require full implementation of the DOE Cost and Schedule Control Systems Criteria. Selected projects between $2 million and $50 million may benefit from modified implementation of such a control system. In those instances where the DOE Cost and Schedule Control System Criteria are to be utilized, the contracting officer shall provide for this by including the "Cost and Schedule Control Systems Criteria for Contract Performance Measurement—Implementation Guide," Office of the Controller Publication CR–0015, in the solicitation and shall include the following clause in the contract:

Cost and Schedule Control Systems (Apr 1984)

(a) In the performance of this contract, the contractor shall establish, maintain, and use cost and schedule control systems (management control systems) meeting the criteria set forth in the contract and as described in detail in DOE/CR–0015, "Cost and Schedule Control Systems Criteria for Contract Performance Measurement—Implementation Guide," annexed hereto and hereinafter referred to as the "Guide." Prior to acceptance by the contracting officer and within —— calendar days after contract award, the contractor shall be prepared to demonstrate systems operation to the Government to verify that the proposed systems meet the designated criteria. As a part of the review procedures, the contractor shall furnish the Government a description of the cost and schedule control systems applicable to this contract in such form and detail as indicated by the Guide, or as required by the contracting officer. The contractor agrees to provide access to all pertinent records, data, and plans as requested by representatives of the Government for the conduct of systems review.

(b) The description of the management control systems accepted by the contracting officer, identified by title and date, shall be referenced in the contract. Such systems shall be maintained and used by the contractor in the performance of this contract.

(c) Contractor changes to the reviewed systems shall be submitted for review and approval as required by the contracting officer. When contracting officer approval is required, the contracting officer shall advise the contractor of the acceptability of such changes within sixty (60) days after receipt

from the contractor. When systems existing at the time of contract award do not comply with the designated criteria, adjustments necessary to assure compliance will be made at no change in contract price or fee.

(d) The contractor agrees to provide access to all pertinent records and data requested by the contracting officer, or duly authorized representative, for the purpose of permitting Government surveillance to insure continuing application of the accepted systems to this contract. Deviations from the systems description identified during contract performance shall be corrected as directed by the contracting officer.

(e) The contractor shall require that each selected subcontractor, as mutually agreed to between the Government and the contractor and as set forth in the schedule of this contract, meet the criteria for cost and schedule control systems as set forth in subcontract and shall incorporate in all such subcontracts adequate provisions for review and surveillance of subcontractor's systems to be carried out by the prime contractor, or by the Government when requested by either the prime or subcontractor.

952.214 Clauses related to formal advertising.

952.214-27 Price reduction for defective cost or pricing data—modifications—formal advertising.

As prescribed in 914.201-7(b)(1), when contracting by formal advertising insert the clause at FAR 52.214-27, Price Reduction For Defective Cost or Pricing Data—Modifications—Formal Advertising, in solicitations and contracts unless this requirement is waived pursuant to FAR 14.201-7(b)(2).

952.215 Clauses related to contracting by negotiation.

952.215-18 Order of precedence.

Use this clause in place of the clause provided at FAR 52.215-18:

Order of Precedence (Apr 1984)

In the event of an inconsistency between provisions of this contract, the inconsistency shall be resolved by giving precedence as follows: (a) schedule; (b) contract clauses; or (c) other provisions of the contract, whether incorporated by reference or otherwise.

952.215-22 Price reduction for defective cost or pricing data.

As prescribed in 915.804-8(a), when contracting by negotiation, include the clause at FAR 52.215-22, Price Reduction for Defective Cost or Pricing Data, in contracts when certified cost or pricing data was obtained.

952.215-23 Price reduction for defective cost or pricing data—modifications.

As prescribed in 915.804-8(b), insert the clause at FAR 52.215-23, Price Reduction for Defective Cost or Pricing Data—Modifications, in solicitations and contracts when the clause at FAR 52.215-22 has not been included, unless the contractor will otherwise not be required to submit certified cost or pricing data pursuant to 915.804-2(a).

952.215-70 Required subcontractor representations and certifications.

In accordance with 914.201-5(b) or 915.406-5(b), include the following notice at Section L of the uniform contract format in solicitations which contemplate award of contracts expected to include any of the clauses entitled Small Business and Small Disadvantaged Business Concern Subcontracting Plan, FAR 52.219-9, Organizational Conflicts of Interest-General, 952.209-71 of this chapter, Organizational Conflicts of Interest-Special Clause, 952.209-72 of this chapter, Equal Opportunity, FAR 52.222-26, Clean Air and Water, FAR 52.223-1, Buy America Act-Supplies, FAR 52.225-3, or Buy America Act-Construction Materials, FAR 52.225-5.

Notice—Subcontractor Representations and Certifications

Bidders or offerors are required to obtain the representations and certifications listed below from subcontractors prior to the award of any subcontract for furnishing supplies or services under the prime contract:

(1) Small Business Concern Representation, FAR 52.219-1, Small Disadvantaged Business Concern Representation, FAR 52.219-2, if the prime contract contains the Small Business and Small Disadvantaged Business Subcontracting Plan clause from FAR 52.219-9;

(2) Organizational Conflicts of Interest Disclosure and Representation, DEAR 952.209-70, if the prime contract contains either of the clauses entitled Organizational Conflicts of Interest-General, DEAR 952.209-71, or Organizational Conflicts of Interest-Special Clause, DEAR 952.209-72;

(3) Certification of Nonsegregated Facilities, FAR 52.222-21, if the prime contract includes the clause entitled Equal Opportunity, FAR 52.222-26;

(4) Previous Contracts and Compliance Reports, FAR 52.222-22, if the prime contract contains the clause entitled Equal Opportunity, FAR 52.222-26;

(5) Clean Air and Water Certification, FAR 52.223-1, if the prime contract contains the clause entitled Clean Air and Water, FAR 52.223-2.

(6) Buy America Act Certification, FAR 52.225-1, if the prime contract contains either of the clauses entitled Buy America Act-Supplies, FAR 52.225-3, Buy America Act-Construction Materials, FAR 52.225-5.

952.216 Clauses related to types of contracts.

952.216-7 Allowable cost and payment.

Alternate I: If the contract is with a nonprofit organization, other than an educational institution; or a State or local government, modify the clause at FAR 52.216-7 Allowable Cost and Payment by deleting from paragraph (a) the phrase "Subpart 31.2" and substituting for it "Subpart 31.7."

Alternate II: When contracting with a commercial organization modify paragraph (a) of the clause at FAR 52.216-7 by adding the phrase "as supplemented by Subpart 931.2 of the Department of Energy Acquisition Regulations (DEAR)," after the acronym "(FAR)".

952.216-15 Predetermined indirect cost rates.

Alternate: As prescribed in 916.307(j), modify paragraph (c) of the clause at FAR 52.216-15, Predetermined Indirect Cost Rates, by deleting the words "Subpart 31.3" and substituting for them "Supbart 31.6" and insert the clause in solicitations and contracts when a cost-reimbursement research and development contract with a State or local government is contemplated and predetermined indirect cost rates are to be used.

952.217-70 Acquisition of real property.

Insert the following clause when required by 917.7403(c).

Acquisition of Real Property (Apr 1984)

(a) Notwithstanding any other provision of the contract, the prior approval of the contracting officer shall be obtained when, in performance of this contract, the contractor acquires or proposes to acquire use of real property by:

(1) Purchase, on the Government's behalf or in the contractor's own name, with title eventually vesting in the Government.

(2) Lease, and the Government assumes liability for, or will otherwise pay for the obligation under the lease as a reimbursable contract cost.

(3) Acquisition of temporary interest through easement, license or permit, and the Government funds the entire cost of the temporary interest.

(b) Justification of and execution of any real property acquisitions shall be in accordance and compliance with directions provided by the contracting officer.

(c) The substance of this clause, including this paragraph (c), shall be included in any subcontract occasioned by this contract under which property described in paragraph (a) of this clause shall be acquired.

952.219 Clauses related to small business.

952.219-9 Small business and small disadvantaged business subcontracting plan.

Alternate: When the clause at FAR 52.219-9 is used, modify it to substitute the following alternate paragraph (d)(10).

(d)(10) Assurances that the offeror will (i) cooperate in any studies or surveys as may be required, (ii) submit periodic reports in order to allow the Government to determine the extent of compliance by the offeror with the subcontracting plan, (iii) submit Standard Form (SF) 294 only, (DOE contractors need not submit SF 295) on a quarterly basis as of

the last day of March, June, September and December, and upon contract completion, in accordance with the instructions on the form except the report shall be submitted quarterly rather than semiannually and additionally shall indicate at the remarks block the number and dollar amount of awards made to labor surplus area concerns to the extent such reporting is required by the terms of their contract, and (iv) ensure that its subcontractors agree to submit SF 294 in accordance with the instructions at (iii) above.

952.223 Clauses related to environment, conservation, and occupational safety.

952.223-71 Safety and health (Government-owned or leased facility).

The clause set forth at 970.5204-2 shall be included in all contracts and subcontracts for, and be made applicable to, work to be performed at a government-owned or leased facility where DOE has elected to assert its statutory authority to establish and enforce occupational safety and health standards applicable to the work conditions of contractor and subcontractor employees, and to the protection of the public health and safety.

952.223-72 Radiation protection and nuclear criticality.

The clause set forth herein shall be included in those contracts or subcontracts for, and be made applicable to, work to be performed at a facility where DOE does not elect to assert its statutory authority to enforce occupational safety and health standards applicable to the working conditions of contractor and subcontractor employees, but does need to enforce radiological safety and health standards pursuant to provisions of the contract or subcontract rather than by reliance upon Nuclear Regulatory Commission licensing requirements (including agreements with states under section 274 of the Atomic Energy Act).

Radiation Protection and Nuclear Criticality (Apr. 1984)

The contractor shall take all reasonable precautions in the performance of work under this contract to protect the safety and health of employees and of members of the public against the hazards of ionizing radiation and radioactive materials and shall comply with all applicable radiation protection and nuclear criticality safety standards and requirements (including reporting requirements) of DOE. The contractor shall submit a management program and implementation plan to the contracting officer for review and approval within 30 days after the effective date of this contract or modification. In the event that the contractor fails to comply with said standards and requirements of DOE, the contracting officer may, without prejudice to any other legal or contractual rights of DOE, issue an order stopping all or any part of the work. Thereafter, a start order for resumption of the work may be issued at the discretion of the contracting officer. The contractor shall make no claim for an extension of time or for compensation or damages by reason of or in connection with such work stoppage.

952.223-73 [Reserved]

952.223-74 Nuclear facility safety applicability.

The clause set forth in 970.5204-26 shall be included in all contracts and subcontracts for, and be made applicable to, work to be performed at or involving the construction, startup, operation; and decommissioning of DOE-owned nuclear facilities deemed to be exempt from nuclear regulatory licensing requirements. Any deviation in substance affecting the meaning, intent, or basic principles of this clause must be referred to the Procurement Executive for approval. Minor changes in wording which may become necessary in negotiations may be approved by the contracting officer after consultation with the General Counsel.

952.223-75 Preservation of individual occupational radiation exposure records.

This clause shall be included in all contracts containing the DOE standard clause entitled "Safety and Health" at 952.223-71 or "Radiation and Nuclear Criticality" at 952.223-72 or Nuclear Safety at 952.223-74.

Preservation of Individual Occupational Radiation Exposure Records (Apr 1984)

Individual occupational radiation exposure records generated in the performance of work under this contract shall be subject to inspection by DOE and shall be preserved by the contractor until disposal is authorized by DOE or at the option of the contractor delivered to DOE upon completion or termination of the contract. If the contractor exercises the foregoing option, title to such records shall vest in DOE upon delivery.

952.223-76 [Reserved]

952.224-70 Paperwork Reduction Act.

Insert the following clause if it is anticipated that information collection from 10 or more persons will be necessary under the contract.

Paperwork Reduction Act (Apr 1984)

(a) In the event that it subsequently becomes a contractual requirement to collect or record information calling either for answer to identical questions from 10 or more persons other than Federal employees, or information from Federal employees which is to be used for statistical compilations of general public interest, the Federal Reports Act will apply to this contract. No plan, questionnaire, interview guide, or other similar device for collecting information (whether repetitive or single-time) may be used without first obtaining clearance from the Office of Management and Budget (OMB).

(b) The contractor shall request the required OMB clearance from the contracting officer before expending any funds or making public contacts for the collection of data. The authority to expend funds and to proceed with the collection of data shall be in writing by the contracting officer. The contractor must plan at least 90 days for OMB clearance. Excessive delay caused by the Government which arises out of causes beyond the control and without the fault or negligence of the contractor will be considered in accordance with the clause entitled "Excusable Delays," if such clause is applicable. If not, the period of performance may be extended pursuant to this clause if approved by the contracting officer.

952.227 Provisions and clauses related to patents, technical data and copyrights.

952.227-70 [Reserved]

952.227-71 Patent rights—small business firms or nonprofit organizations.

The following clause shall be used in contracts for research, development or demonstration work with small businesses or domestic nonprofit organizations as directed in 927.300(b).

Patent Rights—Small Business Firms or Nonprofit Organizations (March 1982)

(a) *Definitions.*

(1) "Invention" means any invention or discovery which is or may be patentable or otherwise protectable under Title 35 of the United States Code (U.S.C.).

(2) "Subject Invention" means any invention of the contractor conceived or first actually reduced to practice in the performance of work under this contract.

(3) "Practical Application" means to manufacture in the case of a composition or product, to practice in the case of a process or method, or to operate in the case of a machine or system; and, in each case, under such conditions as to establish that the invention is utilized and that its benefits are, to the extent permitted by law or Government regulations, available to the public on reasonable terms.

(4) "Made" when used in relation to any invention means the conception or first actual reduction to practice of such invention.

(5) "Small Business Firm" means a small business concern as defined at Section 2 of Pub. L. 85-536 (15 U.S.C. 632) and implementing regulations of the Administrator of the Small Business Administration. For the purpose of this clause, the size standard for small business concerns involved in Government procurement, contained in 13 CFR 121.3-8, and in subcontracting, contained in 13 CFR 121.3-12, will be used.

(6) "Nonprofit Organization" means a university or other institution of higher education or an organization of the type described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)) and exempt from taxation under section 501(a) of the Internal Revenue Code (26 U.S.C. 501(a))

or any nonprofit scientific or educational organization qualified under a state nonprofit organization statute.

(7) "Patent Counsel" means the Department of Energy (DOE) patent counsel assisting the DOE contracting activity.

(b) *Allocation of principal rights.* The contractor may retain the entire right, title, and interest throughout the world to each subject invention subject to the provisions of this clause and 35 U.S.C. 203. With respect to any subject invention in which the contractor retains title, the Federal Government shall have a nonexclusive, nontransferable, irrevocable, paid-up license to practice or have practiced for or on behalf of the United States the subject invention throughout the world.

(c) *Invention disclosure, election of title and filing of patent applications by contractor.*

(1) The contractor will disclose each subject invention to the Patent Counsel within two months after the inventor discloses it in writing to contractor personnel responsible for the administration of patent matters. The disclosure to the Patent Counsel shall be in the form of a written report and shall identify the contract under which the invention was made and the inventor(s). It shall be sufficiently complete technical detail to convey a clear understanding, to the extent known at the time of the disclosure of the nature, purpose, operation, and the physical, chemical, biological or electrical characteristics of the invention. The disclosure shall also identify any publication, on sale or public use of the invention and whether a manuscript describing the invention has been submitted for publication and, if so, whether it has been accepted for publication at the time of disclosure. In addition, after disclosure to the Patent Counsel, the contractor will promptly notify the Patent Counsel of the acceptance of any manuscript describing the invention or of any on sale or public use planned by the contractor.

(2) The contractor will elect in writing whether or not to retain title to any such invention by notifying the Patent Counsel within twelve months of disclosure to the contractor; provided that in any case where publication, on sale or public use has initiated the one year statutory period wherein valid patent protection can still be obtained in the United States, the period for election of title terminates sixty days prior to the end of the statutory period.

(3) The contractor will file its initial patent application on an elected invention within two years after election or, if earlier, prior to the end of any statutory period wherein valid patent protection can be obtained in the United States after a publication, on sale, or public use. The contractor will file patent applications in additional countries within either ten months of the corresponding initial patent application or six months from the date permission is granted by the Commissioner of Patents and Trademarks to file foreign patent applications where such filing has been prohibited by a Secrecy Order.

(4) Requests for extention of the time for disclosure to the Patent Counsel, election, and filing, may, at the discretion of the Patent Counsel be granted.

(d) *Conditions* when the Government may obtain title.

(1) The contractor will convey the DOE, upon written request, title to any subject invention:

(i) If the contractor fails to disclose or elect the subject invention within the times specified in (c) above, or elects not to retain title.

(ii) In those contries in which the contractor fails to file patent applications within the times specified in (c) above; provided, however, that if the contractor has filed a patent application in a country after the times specified in (c) above but prior to its receipt of the written request of the Patent Counsel, the contractor shall continue to retain title in that country; or

(iii) In any country in which the contractor decides not to continue the prosecution of any application for, to pay the maintenance fees on, or defend in a reexamination or opposition proceeding on, a patent on a subject invention.

(e) *Minimum rights to contractor.*

(1) The contractor will retain a nonexclusive, royalty-free license throughout the world in each subject invention to which the Government obtains title except if the contractor fails to disclose the subject invention within the times specified in (c) above. The contractor's license extends to its domestic subsidiaries and affiliates, if any, within the corporate structure of which the contractor is a part and includes the right to grant sublicenses of the same scope to the extent the contractor was legally obligated to do so at the time the contract was awarded. The license is transferable only with the approval of DOE except when transferred to the successor of that part of the contractor's business to which the invention pertains.

(2) The contractor's domestic license may be revoked or modified by DOE to the extent necessary to achieve expeditious practical application of the subject invention pursuant to an application for an exclusive license submitted in accordance with 10 CFR Part 781 and 41 CFR 101–4. This license will not be revoked in that field of use or the geographical areas in which the contractor has achieved practical application and continues to make the benefits of the invention reasonably accessible to the public. The license in any foreign country may be revoked or modified at the discretion of DOE to the extent the contractor, its licensees, or its domestic subsidiaries or affiliates have failed to achieve practical application in that foreign country.

(3) Before revocation or modification of the license, DOE will furnish the contractor a written notice of its intention to revoke or modify the license, and the contractor will be allowed thirty days (or such other time as may be authorized by DOE for good cause shown by the contractor) after the notice to show cause why the license should not be revoked or modified. The contractor has the right to appeal, in accordance with 10 CFR Part 781, any decision concerning the revocation or modification of its license.

(f) *Contractor action to protect Government's interest.*

(1) The contractor agrees to execute or to have executed and promptly deliver to the Patent Counsel all instruments necessary to:

(i) Establish or confirm the rights the Governement has throughout the world in those subject inventions for which the contractor retains title, and

(ii) Convey title to DOE when requested under (d) above and to enable the Government to obtain patent protection throughout the world in that subject invention.

(2) The contractor agrees to require, by written agreement, its employees, other than clerical and nontechnical employees, to disclose promptly in writing to personnel identified as responsible for the administration of patent matters and in a format suggested by the contractor each subject invention made under this contract in order that the contractor can comply with the disclosure provisions of (c) above and to execute all papers necessary to file patent applications on subject inventions. The disclosure format should require, as a minimum, the information requested by (c)(1) above. The contractor shall instruct such employees through the employee agreements or suitable educational programs on the importance of reporting inventions in sufficient time to permit the filing of patent applications prior to United States or foreign statutory bars.

(3) The contractor will notify the Patent Counsel of any decision not to continue prosecution of a patent application, pay maintenace fees, or defend in a reexamination or opposition proceeding on a patent, in any country, not less than thirty days before the expiration of the response period required by the relevant patent office.

(4) The contractor agrees to include, within the specification of any United States patent application and any patent issuing thereon covering a subject invention, the following statement, "This invention was made with Government support under (identify the contract) awarded by the Department of Energy. The Government has certain rights in this invention."

(5) The contractor agrees to:

(i) Provide a report prior to the close-out of the contract listing all subject inventions;

(ii) Provide notification of all subcontracts under this contract for experimental, developmental, demonstration, or research work, the identity of the patent rights clause therein, and copy of each subcontract upon request;

(iii) Provide promptly a copy of the patent application, filing date, serial number, patent number and issue date for any subject invention in any country in which the contractor has applied for a patent.

(g) *Subcontracts.*

(1) The contractor will include this clause, suitably modified to identify the parties, in all subcontracts, regardless of tier, for experimental, developmental or research work to be performed by a small business firm or a domestic nonprofit organization. The subcontractor will retain all rights provided for the contractor in this clause, and the contractor will not, as part of the consideration for awarding the subcontract,

obtain rights in the subcontractor's subject inventions.

(2) The contractor will include in all other subcontracts, regardless of tier, for experimental, developmental, demonstration, or research work the patent rights clause of 41 CFR 9–9.107–5(a) or 9–9.107–6 as appropriate, modified to identify the parties.

(3) In the case of a subcontract at any tier, DOE, the subcontractor, and the contractor agree that the mutual obligations of the parties created by this clause constitute a contract between the subcontractor and DOE with respect to those matters covered by this clause.

(h) *Reporting on utilization of subject inventions.* The contractor agrees to submit on request periodic reports no more frequently than annually on the utilization of a subject invention or on efforts at obtaining such utilization that are being made by the contractor or its licensees or assignees. Such reports shall include information regarding the status of development, date of first commercial sale or use, gross royalties received by the contractor, and such other data and information as DOE may reasonably specify. The contractor also agrees to provide additional reports as may be requested by DOE in connection with any march-in proceeding undertaken by DOE in accordance with paragraph (j) of this clause. To the extent data or information supplied under this section is considered by the contractor, its licensee or assignee to be privileged and confidential and is so marked, DOE agrees that, to the extent permitted by 35 U.S.C. 202(c)(5), it will not disclose such information to persons outside the Government.

(i) *Preference for United States industry.* Notwithstanding any other provision of this clause, the contractor agrees that neither it nor any assignee will grant to any person the exclusive right to use or sell any subject invention in the United States unless such person agrees that any products embodying the subject invention or produced through the use of the subject invention will be manufactured substantially in the United States. However, in individual cases, the requirement for such an agreement may be waived by DOE upon a showing by the contractor or its assignee that reasonable but unsuccessful efforts have been made to grant licenses on similar terms to potential licensees that would be likely to manufacture substantially in the United States or that under the circumstances domestic manufacture is not commercially feasible.

(j) *March-in rights.* The contractor agrees that with respect to any subject invention in which it has acquired title, DOE has the right in accordance with the procedures in OMB Circular A–124 to require the contractor, an assignee or exclusive licensee of a subject invention to grant a nonexclusive, partially exclusive, or exclusive license in any field of use to a responsible applicant or applicants, upon terms that are reasonable under the circumstances, and if the contractor, assignee, or exclusive licensee refuses such a request, DOE has the right to grant such a license itself if DOE determines that:

(1) Such action is necessary because the contractor or assignee has not taken, or is not expected to take within a reasonable time, effective steps to achieve practical application of the subject invention in such field of use;

(2) Such action is necessary to alleviate health or safety needs which are not reasonably satisfied by the contractor, assignee, or their licensees;

(3) Such action is necessary to meet requirements for public use specified by federal regulations and such requirements are not reasonably satisfied by the contractor, assignee, or licensees; or

(4) Such action is necessary because the agreement required by (i) of this clause has not been obtained or waived or because a licensee of the exclusive right to use or sell any subject invention in the United States is in breach of such agreement.

(k) *Special provisions for contracts with nonprofit organizations.*

If the contractor is a non profit organization, it agrees that:

(1) Rights to a subject invention in the United States may not be assigned without the approval of DOE, except where such assignment is made to an organization which has as one of its primary functions the management of inventions and which is not, itself, engaged in or does not hold a substantial interest in other organizations engaged in the manufacture or sale of products or the use of processes that might utilize the invention or be in competition with embodiments of the invention (provided that such assignee will be subject to the same provisions as the contractor);

(2) The contractor may not grant exclusive licenses under United States patents or patent applications in subject inventions to persons other than small business firms for a period in excess of the earlier of:

(i) Five years from first commercial sale or use of the invention; or

(ii) Eight years from the date of the exclusive license excepting that time before regulatory agencies necessary to obtain premarket clearance, unless on a case-by-case basis, DOE approves a longer exclusive license. If exclusive field of use licenses are granted, commercial sale or use in one field of use will not be deemed commercial sale or use as to other fields of use, and a first commercial sale or use with respect to a product of the invention will be deemed to end the exclusive period to different subsequent products covered by the invention;

(3) The contractor will share royalties collected on a subject invention with the inventor; and

(4) The balance of any royalties or income earned by the contractor with respect to subject inventions, after payment of expenses (including payments to inventors) incidental to the administration of subject inventions, will be utilized for the support of scientific research or education.

(l) *Communications.* The DOE central point of contact for communications on matters relating to this clause is the Patent Counsel.

952.227–72 [Reserved]

952.227–73 Additional technical data requirements.

The following clause shall be used in contracts for research, development, or demonstration work and in other contracts as directed in 927.402–3(b).

Additional Technical Data Requirements (Apr. 1984)

(a) In addition to the technical data specified elsewhere in this contract to be delivered, the contracting officer may at any time during the contract performance or within one year after final payment call for the contractor to deliver any technical data first produced or specifically used in the performance of this contract, except technical data pertaining to items of standard commercial design.

(b) The provisions of the Rights in Technical Data clause included in this contract are applicable to all technical data called for under this Additional Technical Data Requirements clause. Accordingly, nothing contained in this clause shall require the contractor to actually deliver any technical data, the delivery of which is excused by paragraph (e) of the Rights in Technical Data clause.

(c) When technical data are to be delivered under this clause, the contractor will be compensated for appropriate costs for converting such data into the prescribed form for reproduction, and for delivery.

952.227–74 [Reserved]

952.227–75 Rights in technical data—long form.

As directed by 927.402–3(e), the following clause shall be used in all contracts having as a purpose the conduct of research, development, or demonstration, or in contracts for supplies, or in any other contract where technical data are specified to be delivered in the contract, or where the contract contains the Additional Technical Data Requirements clause at 952.227–73.

Rights in Technical Data—Long Form (Apr. 1984)

(a) *Definitions.*

(1) "Technical data" means recorded information regardless of form or characteristic, of a scientific or technical nature. It may, for example, document research, experimental, developmental, or demonstration, or engineering work, or be usable or used to define a design or process, or to procure, produce, support, maintain, or operate material. The data may be graphic or pictorial delineations in media such as drawings or photographs, text in specifications or related performance or design type documents or computer software (including computer programs, computer software data bases, and computer software documentation). Examples of technical data include research and engineering data, engineering drawings and associated lists,

specifications, standards, process sheets, manuals, technical reports, catalog item identification, and related information. Technical data as used herein do not include financial reports, cost analyses, and other information incidental to contract administration.

(2) "Proprietary data" means technical data which embody trade secrets developed at private expense, such as design procedures or techniques, chemical composition of materials, or manufacturing methods, processes, or treatments, including minor modifications thereof, provided that such data:

(i) Are not generally known or available from other sources without obligation concerning their confidentiality;

(ii) Have not been made available by the owner to others without obligation concerning its confidentiality; and

(iii) Are not already available to the Government without obligation concerning the confidentiality.

(3) "Contract data" means technical data first produced in the performance of the contract in technical data which are specified to be delivered under the contract; technical data that may be called for under the Additional Technical Data Requirements clause of the contract, if any, or technical data actually delivered in connection with the contract.

(4) "Unlimited rights" means rights to use, duplicate, or disclose technical data, in whole or in part, in any manner and for any purpose whatsoever, and to permit others to do so.

(b) *Allocation of rights.*

(1) The Government shall have:

(i) Unlimited rights in contract data except as otherwise provided below with respect to proprietary data;

(ii) The right to remove, cancel, correct or ignore any marking not authorized by the terms of this contract on any technical data furnished hereunder, if in response to a written inquiry by DOE concerning the propriety of the markings, the contractor fails to respond thereto within 60 days or fails to substantiate the propriety of the markings. In either case, DOE will notify the contractor of the action taken;

(iii) No rights under this contract in any technical data which are not contract data.

(2) The contractor shall have:

(i) The right to withhold proprietary data in accordance with the provisions of this clause; and

(ii) The right to use for its private purposes, subject to patent, security or other provisions of this contract data it first produces in the performance of this contract, provided the data requirements of this contract have been met as of the date of the private use of such data. The contractor agrees that to the extent it receives or is given access to proprietary data or other technical, business or financial data in the form of recorded information from DOE or a DOE contractor or subcontractor, the contractor shall treat such data in accordance with any restrictive legend contained thereon, unless use is specifically authorized by prior written approval of the Contracting Officer.

(3) Nothing contained in this Rights of Technical Data clause shall imply a license to the Government under any patent or be construed as affecting the scope of any licenses or other rights otherwise granted to the Government under any patent.

(c) *Copyrighted material.*

(1) The contractor shall not, without prior written authorization of the Patent Counsel, establish a claim to statutory copyright in any contract data first produced in the performance of the contract. To the extent such authorization is granted, the Government reserves for itself and others acting on its behalf a royalty-free, nonexclusive, irrevocable, worldwide license for Governmental purposes to publish, distribute, translate, duplicate exhibit and perform any such data copyrighted by the contractor.

(2) The contractor agrees not to include in the technical data delivered under the contract any material copyrighted by the contractor and not to knowingly include any material copyrighted by others, without first granting or obtaining at no cost a license therein for the benefit of the Government of the same scope as set forth in paragraph (c)(1) above. If such royalty-free license is unavailable and the contractor nevertheless determines that such copyrighted material must be included in the technical data to be delivered, rather than merely incorporated therein by reference, the contractor shall obtain the written authorization of the Contracting Officer to include such copyrighted material in the technical data prior to its delivery.

(d) *Subcontracting.* It is the responsibility of the contractor to obtain from its subcontractors technical data and rights therein, on behalf of the Government, necessary to fulfill the contractor's obligations to the Government with respect to such data. In the event of refusal by a subcontractor to accept a clause affording the Government such rights, the contractor shall:

(1) Promptly submit written notice to the Contracting Officer setting forth reasons for the subcontractor refusal and other pertinent information which may expedite disposition of the matter; and

(2) Not proceed with the subcontract without the written authorization of the Contracting Officer.

(e) *Withholding of proprietary data.* Notwithstanding the inclusion of the Additional Technical Data Requirements clause in this contract or any provision of this contract specifying the delivery of technical data, the contractor may withhold proprietary data from delivery, provided that the contractor furnishes in lieu of any such proprietary data so withheld technical data disclosing the source, size, configuration, mating and attachment characteristics, functional characteristics, and performance requirements ("Form, Fit and Function" data, e.g., specification control drawing, catalog sheets, envelope drawings, etc.), or a general description of such proprietary data where "Form, Fit and Function" data are not applicable. The Government shall acquire no rights to any proprietary data so withheld except that such data shall be subject to the "inspection rights" provisions of paragraph (f), and, if included, the "Limited rights in proprietary data" provisions of paragraph (g) and the "Contractor licensing" provisions of paragraph (h).

(f) *Inspection rights.* Except as may be otherwise specified in this contract for specific items of proprietary data which are not subject to this paragraph, the Contracting Officer's representatives, at all reasonable times up to three years after final payment under this contract, may inspect at the contractor's facility any proprietary data withheld under paragraph (e) and not furnish under paragraph (g), if this contract includes such paragraph, for the purposes of verifying that such data properly fell within the withholding provision of paragraph (e), or for evaluating work performance.

Alternate I: Additional paragraph (g), limited rights. The following paragraph (d) shall be added to the basic clause at 952.227–75 above when it is determined in accordance with 927.402–3(e)(2) that delivery of proprietary data is necessary with limited rights in the Government.

(g) *Limited rights in proprietary data.* Except as may be otherwise specified in this contract as technical data which are not subject to this paragraph, the contractor shall, upon written request from the Contracting Officer at any time prior to three years after final payment under this contract, promptly deliver to the Government any "proprietary data" withheld pursuant to paragraph (e) of the Rights in Technical Data clause of this contract. The following legend and no other is authorized to be affixed on any "proprietary data" delivered pursuant to this provision, provided the "proprietary data" meets the conditions for initial withholding under paragraph (e) of the Rights in Technical Data clause. The Government will thereafter treat the "proprietary data" in accordance with such legend.

Limited Rights Legend (Apr 1984)

This technical data contains "proprietary data," furnished under "Contract No. ————" with the U.S. Department of Energy (and Purchase Order No. ———— if applicable) which may be duplicated and used by the Government with the express limitations that the "proprietary data" may not be disclosed outside the Government or be used for purposes of manufacture without prior permission of the contractor, except that further disclosure or use may be made solely for the following purposes:

(a) This "proprietary data" may be disclosed for evaluation purposes under the restriction that the "proprietary data" be retained in confidence and not further disclosed;

(b) This "proprietary data" may be disclosed to other contractors participating in the Government's program of which this contract is part, for information or use in connection with the work performed under their contracts and under the restriction that the "proprietary data" be retained in confidence and not be further disclosed; or

(c) This "proprietary data" may be used by the Government or others on its behalf for emergency repair or overhaul work under the restriction that the "proprietary data" be

retained in confidence and not be further disclosed.

This legend shall be marked on any reproduction of this data in whole or in part.

Alternate II: Additional paragraph (h), contractor licensing. The following paragraph (b) shall be added to the basic clause at 952.227–75 above when it is determined in accordance with 927.402–3(e)(3) that the Government should obtain on behalf of third parties and itself limited license rights in and to proprietary contract data.

(h) *Contract licensing.* Except as may be otherwise specified in this contract as technical data not subject to this paragraph, the contractor agrees that upon written application by DOE, it will grant to the Government and responsible third parties, for purpose of practicing a subject of this contract, a nonexclusive license in any contract data which are proprietary data, on terms and conditions reasonable under the circumstances including appropriate provisions for confidentiality; provided, however, the contractor shall not be obligated to license any such data if the contractor demonstrates to the statisfaction of the Head of the Agency or designee that:

(1) Such data are not essential to the manufacture or practice of hardware designed or fabricated, or processes developed, under this contract;

(2) Such data, in the form of results obtained by their use, have a commercially competitive alternative available or readily introducible from one or more other sources;

(3) Such data, in the form of results obtained by their use, are being supplied by the contractor or its licensees in sufficient quantity and at reasonable prices to satisfy market needs, or the contractor or its licensees have taken effective steps or within a reasonable time are expected to take effective steps to so supply such data in the form of results obtained by their use; or

(4) Such data, in the form of results obtained by their use, can be furnished by another firm skilled in the art of manufacturing items or performing processes of the same general type and character necessary to achieve the contract results.

952.227-76 Rights in data—special works.

The following clause shall be included in contracts having as a principal purpose or task the production of copyrightable works as discussed in 927.402–3(f).

Rights in Data—Special Works (Apr. 1984)

(a) The term "Data" as used herein means recorded information regardless of form or characteristic, such as writings, sound recordings, pictorial reproductions, drawings, or other graphic representations, and works of similar nature (whether or not copyrighted) which are specified to be delivered under this contract. The term includes data such as management studies and data produced under support services contracts but does not include financial reports, cost analyses, and other information incidental to contract administration.

(b) All data first produced or composed in the course of or under this contract shall be the sole property of the Government. Except with the prior written permission of the contracting officer, the contractor agrees not to assert any rights at common law or in equity or establish any claim to statutory copyright in such data. The contractor shall not publish or reproduce such data in whole or in part or in any manner of form, or authorize others so to do, without the written consent of the Contracting Officer or until such time as the Government may have released such data to the public.

(c) The contractor hereby grants to or will obtain for the Government a royalty-free, nonexclusive and irrevocable license throughout the world (1) to publish, translate, reproduce, deliver, perform, use, and dispose of, in any manner, any and all data which are not first produced or composed in the performance of this contract but which are incorporated in the work furnished under this contract; and (2) to authorize others so to do.

(d) The contractor shall indemnify and save and hold harmless the Government, its officers, agents, and employees acting within the scope of their official duties against any liability, including costs and expenses, (1) for violation of proprietary rights, copyrights, or rights of privacy, arising out of the publication, translation, reproduction, delivery, performance, use, or disposition of any data furnished under this contract; or (2) based upon any libelous, defamatory, or other unlawful matter contained in such data.

(e) Nothing contained in this clause shall imply a license to the Government under any patent, or be construed as affecting the scope of any licenses or other rights otherwise granted to the Government under any patent.

952.227-77 Rights in technical data clause—short form.

As discussed in 927.402–3(g), the following clause may be used in contracts for basic research with educational institutions and in contracts with consultants and in other contracts of a similar nature. The clause shall not be used in any contract where proprietary information of the contractor may be utilized in performance of work under the contract.

Rights in Technical Data—Short Form (Apr. 1984)

(a) *Definitions.* The definitions of terms set forth in DEAR 927.401 apply to the extent these terms are used herein.

(b) *Allocation of rights.*

(1) The Government shall have:

(i) Unlimited rights in technical data first produced or specifically used in the performance of this contract;

(ii) The right of the contracting officer or his representative to inspect at all reasonable times up to three years after final payment under this contract all technical data first produced or specifically used in the contract (for which inspection the contractor or its subcontractor shall afford proper facilities to DOE); and

(iii) The right to have any technical data first produced or specifically used in the performance of this contract delivered to the Government as the contracting officer may from time to time direct during the progress of the work, or in any event as the contracting officer shall direct upon completion or termination of this contract.

(2) The contractor shall have:

The right to use for its private purposes, subject to patent, security or other provisions of this contract, technical data it first produces in the performance of this contract provided the data requirements of this contract have been met as of the date of the private use of such data. The contractor agrees that to the extent it receives or is given access to proprietary data or other technical, business or financial data in the form of recorded information from DOE or a DOE contractor or subcontractor, the contractor shall treat such data in accordance with any restrictive legend contained thereon, unless use is specifically authorized by prior written approval of the contracting officer.

(c) *Copyrighted material.*

(1) The contractor agrees to, and does hereby grant to the Government, and to its officers, agents, servants and employees acting within the scope of their duties:

(i) A royalty-free, nonexclusive, irrevocable license to reproduce, translate, publish, use, and dispose of and to authorize others to do so, all copyrightable material first produced or composed in the performance of this contract by the contractor, its employees or any individual or concern specifically employed or assigned to originate and prepare such material; and

(ii) A license as aforesaid under any and all copyrighted or copyrightable works not first produced or composed by the contractor in the performance of this contract but which are incorporated in the material furnished under the contract, provided that such license shall be only to the extent the contractor now has, or prior to completion or final settlement of the contract may acquire, the right to grant such license without becoming liable to pay compensation to others solely because of such grant.

(2) The contractor agrees that it will not knowingly include any material copyrighted by others in any written or copyrightable material furnished or delivered under this contract without a license as provided for in paragraph (c)(1)(ii) hereof, or without the consent of the copyright owner, unless it obtains specific written approval of the contracting officer for the inclusion of such copyrighted material.

952.227-78 Rights in technical data—facility

As discussed in 970.2702 the following clause is to be used in contracts for the operation of Government-owned facilities (GOCO's).

Rights in Technical Data—Facility (Apr 1984)

(a) *Definitions.*

(1) "Technical data" means recorded information, regardless of form or characteristic, of a scientific or technical nature. It may, for example, document research, experimental, developmental, or

demonstration, or engineering work or be usable or used to define a design or process or to procure, produce, support, maintain, or operate material. The data may be graphic or pictorial delineations in media such as drawings or photographs, text in specifications or related performance or design type documents, or computer software (including computer programs, computer software data bases and computer software documentation). Examples of technical data include research and engineering data, engineering drawings and associated lists, specifications, standards, process sheets, manuals, technical reports, catalog item identification, and related information. Technical data as used herein does not include financial reports, cost analyses, and other information incidental to contract administration.

(2) "Proprietary data" means technical data which embody trade secrets developed at private expense, such as design procedures or techniques, chemical composition of materials, or manufacturing methods, processes, or treatments, including minor modifications thereof, provided that such data:

(i) Are not generally known or available from other sources without obligation concerning their confidentiality;

(ii) Have not been made available by the owner to others without obligation concerning their confidentiality; and

(iii) Are not already available to the Government without obligation concerning their confidentiality.

(3) "Unlimited rights" means rights to use, duplicate, or disclose technical data, in whole or in part, in any manner and for any purpose whatsoever, and to permit others to do so.

(b) *Allocation of rights.*

(1) The Government shall have:

(i) Ownership in all technical data first produced in the performance of the contract;

(ii) The right to inspect technical data first produced or specifically used in the performance of the contract at all reasonable times (for which inspection the proper facilities shall be afforded DOE by the contractor and its subcontractors);

(iii) The right to have all technical data first produced or specifically used in the performance of the contract delivered to the Government or otherwise disposed of by the contractor, either as the contracting officer may from time to time direct during the progress of the work or in any event as the contracting officer shall direct upon completion or termination of this contract, provided that nothing contained in this paragraph shall require the contractor to actually deliver any technical data, the delivery of which is excused by this Rights in Technical Data clause;

(iv) Unlimited rights in technical data specifically used in the performance of this contract, except technical data pertaining to items of standard commercial design; the contractor agrees to leave a copy of such technical data at the facility or plant to which such data relate, and to make available for access or to deliver to the Government such data upon request by the contracting officer; provided, that if such data are proprietary, the rights of the Government in such data shall be governed solely by the provisions of optional paragraph (e) hereof—"Limited Rights in Proprietary Data;"

(v) The right to remove, cancel, correct, or ignore any marking not authorized by the terms of this contract on any technical data furnished hereunder if, in response to a written inquiry by DOE concerning the propriety of the markings, the contractor fails to respond thereto within 60 days or fails to substantiate the propriety of the markings. In either case DOE will notify the contractor of the action taken.

(2) The contractor shall have:

(i) The right to withhold its proprietary data in accordance with the provisions of this clause; and

(ii) The right to use for its private purposes, subject to patent, security or other provisions of this contract, technical data it first produces in the performance of this contract, provided the data requirement of this contract have been met as of the date of the private use of such data. The contractor agrees that to the extent it receives or is given access to proprietary data or other technical, business or financial data in the form of recorded information from DOE or a DOE contractor or subcontractor, the contractor shall treat such data in accordance with any restrictive legend contained thereon, unless use is specifically authorized by prior written approval of the contracting officer.

(3) Nothing contained in this clause shall imply a license to the Government under any patent or be construed as affecting the scope of any licenses or other rights otherwise granted to the Government under any patent.

(c) *Copyrighted material.*

(1) The contractor shall not, without prior written authorization of the Patent Council establish a claim to statutory copyright in any technical data first produced in the performance of this contract. To the extent such authorization is granted, the Government reserves for itself and others acting on its behalf, a royalty-free, nonexclusive, irrevocable, world-wide license for Governmental purposes to publish, distribute, translate, duplicate, exhibit, and perform any such data copyrighted by the contractor.

(2) The contractor agrees not to include in the technical data delivered under the contract any material copyrighted by the contractor and not to knowingly include any material copyrighted by others without first granting or obtaining at no cost a license therein for the benefit of the Government of the same scope as set forth in paragraph (c)(1) above. If the contractor believes that such copyrighted material for which the license cannot be obtained must be included in the technical data to be delivered, rather than merely incorporated therein by reference, the contractor shall obtain the written authorization of the contracting officer to include such material in the technical data prior to its delivery.

(d) *Subcontracting.*

(1) Unless otherwise directed by the contracting officer, the contractor agrees to use in subcontracts having as a purpose the conduct of research, development, and demonstration work or in subcontracts for supplies, the contract clause provisions in 48 CFR 952.227–75 in accordance with the policy and procedures of 48 CFR 927.402–1, 927.402–2 and 927.402–3.

(2) It is the responsibility of the contractor to obtain from its subcontractors technical data and rights therein, on behalf of the Government, necessary to fulfill the contractor's obligations to the Government with respect to such data. In the event of refusal by a subcontractor to accept a clause affording the Government such rights, the contractor shall:

(i) Promptly submit written notice to the contracting officer setting forth reasons for the subcontractor's refusal and other pertinent information which may expedite disposition of the matter; and

(ii) Not proceed with the subcontract without the written authorization of the contracting officer.

952.227–79 Limited rights in proprietary data.

As discussed in 970.2702(c) the following paragraph may be used as a supplement to the clause at 952.227–78 where it is determined that delivery of proprietarty data is necessary with limited rights in the Government.

(e) Except as may be otherwise specified in this contract as technical data which are not subject to this paragraph, the contractor agrees to and does hereby grant to the Government an irrevocable, nonexclusive paid-up license and right to use by or for the Government, any proprietary data of the contractor specifically used in the performance of this contract; provided, however, that to the extent that any proprietary data when furnished or delivered is specifically indentified by the contractor at the time of initial delivery to the Government or a representative of the Government, such data shall not be used within or outside the Government, except as provided in the "Limited Rights Legend" set forth below. All such proprietary data shall be marked with the following "Limited Rights Legend":

Limits Rights Legend (Apr 1984)

This Technical data contains "proprietary data," furnished under contract No. ——— with the U.S. Department of Energy (and purchase order No. ——— if applicable) which may be duplicated and used by the Government with the express limitations that the "proprietary data" may not be disclosed outside of the Government or be used for purposes of manufacture without prior permission of the following purposes:

(a) This " proprietary data" may be disclosed for evaluation purposes under the restriction that the "proprietary data" be retained in confidence and not be further disclosed;

(b) This "proprietary data" may be disclosed to other contractors participating in the Government's program of which this contract is a part for information for use in connection with the work performed under their contracts and under the restriction that the "proprietary data" be retained in confidence and not be further disclosed; or

(c) This "proprietary data" may be used by the Government or others on its behalf for emergency repair or overhaul work under the restriction that the "proprietary data" be retained in confidence and not be further disclosed.

This legend shall be marked on any reproduction of this data in whole or in part.

952.227-80 Technical data certification.

In soliciations which may involve the acquisition of technical data, obtain the following certification and include the legend at FAR 52.215-12 and, where appropriate, the provision at 952.227-83.

Technical Data Certification (Apr 1984)

(a) The offeror certifies that it has not delivered or is not obligated to deliver to the Government under any contract or subcontract the same or substantially the same technical data included in its offer, except as set forth below:

( ) none

( ) Contract No. (and Subcontract No., if applicable)

Agency name and place of delivery ——

(b) The work to be performed and the known requirements for technical data as set forth in the solicitation have been reviewed. To the best of my knowledge:

/ / There will be no technical data withheld from delivery as being proprietary data.

/ / The technical data listed on page —— of the proposal will likely be used in conjunction with the performance of work under the contract and is represented as being proprietary data to be protected from unauthorized use and disclosure and therefore to be withheld from delivery in a report not having a restrictive legend.

952.227-81 Royalty Payments Certification

If the nature of the acquisition suggests that royalty payments may be involved, include the following certification in the solicitation.

Royalty Payments (Apr 1984)

In order that DOE may be informed regarding royalty payments to be made by a contractor in connection with any acquisition, construction, or operation where the amount of the royalty payment is reflected in the contract price, or is to be reimbursed by the Government, check one of the following:

( ) The Contract price includes no amount representing the payment of royalty by the offeror directly to others in connection with the performance of the contract.

( ) The contract price includes an amount for royalty payment expected to be made in connection with the proposed award. The Offeror shall set forth below: (1) the amount of each payment, (2) the names of the licensor, (3) either the patent numbers involved or such other information as will permit identification of the patents and patent applications and the basis on which royalties will be paid.

952.227-82 Rights to proposal data.

Pursuant to 927.7002(d), include this clause in any contract which the decision to make the award included consideration of a technical proposal.

Rights to Proposal Data (Apr 1984)

Except for technical data contained on pages —— of the contractor's proposal dated —— which are asserted by the contractor as being proprietary data, it is agreed that, as a condition of the award of this contract, and notwithstanding the provisions of any notice appearing on the proposal, the Government shall have the right to use, duplicate, disclose and have others do so for any purpose whatsover, the technical data contained in the proposal upon which this contract is based.

952.227-83 Rights in technical data solicitation representation.

Pursuant to 927.7004-1 and 927.7004-2, include this provision, the legend at FAR 52.215-12 and the certification at 952.227-80 in solicitations which may result in contracts for research, development, or demonstration work or contracts for supplies in which delivery of required technical data is contemplated.

Rights in Technical Data Solicitation Instruction (Apr 1984)

The section of this solicitation which describes the work to be performed also sets forth DOE's know requirements for technical data. The Additional Technical Data Requirements clause, if included in this solicitation, provides the Government with the option to order additional technical data, the requirements for which are not known at the time of contracting. There is, however, a built-in limitation on the kind of technical data which may be required. This limitation provides that the contractor may withhold delivery of proprietary data. Accordingly, it is necessary that your proposal state that the work to be performed and the known requirements for technical data as set forth in the solicitation have been reviewed, and either state that, to the best of your knowledge, not data will be withheld, or submit a list identifying the proprietary data which, to the best of your knowledge, will likely be used in the contract performance and will be withheld.

952.227-84 Notice of right to request patent waiver.

Pursuant to 927.7005, include this provision in all solicitations which may result in contracts calling for research, development, or demonstration work.

Right To Request Patent Waiver (Apr 1984)

Offerors and prospective contractors, in accordance with applicable statutes and the Department of Energy Acquisition Regulation, have the right to request, in advance of or within 30 days after the effective data of contracting, a waiver of all or any part of the rights of the United States in subject inventions. Small business firms and domestic nonprofit organizations normally will receive the Patent Rights clause of 952.227-71 which permits the contractor to retain title to subject inventions, except in contracts for management or operation of a Government-owned research or production facility and in contracts involving exceptional circumstances or intelligence activities. Therefore small business firms and nonprofit organizations normally need not request a waiver.

952.231-70 Date of incurrence of cost.

In accordance with 931.205-30, insert the following clause when advance understandings have been negotiated regarding costs incurred prior to the contract effective date:

Date of Incurrence of Cost (Apr 1984)

The Contractor shall be entitled to reimbursement for costs incurred in an amount not to exceed $ —— on or after —— which, if incurred after this contract has been entered into, would have been reimbursable under the provisions of this contract.

952.232 Clauses related to contract financing.

952.232-1 Payments.

As prescribed in 932.7107-2(a)(1), replace the word "upon" with "after" in the clause at FAR 52.232-1.

952.232-2 Payments under fixed-price research and development contracts.

As prescribed in 932.7107-2, replace the word "upon" with the word "after" in the clause at FAR 52.232-2.

952.232-3 Payments under personal service contracts.

As prescribed in 932.7107-2 replace the word "upon" with "after" in the clause at FAR 52.232-3.

952.232-4 Payments under transportation contracts and transportation-related services contracts.

As prescribed in 932.7107-2, replace the word "upon" with "after" in the clause at FAR 52.232-4.

952.232-5 Payments under fixed-price construction contracts.

As prescribed in 932.7107-2 modify paragraph (e) of the clause cited at FAR 52.232-5 by replacing the words "upon request" with "after receipt of a proper invoice".

952.232-6 Payments under communication service contracts with common carriers.

As prescribed in 932.7107-2, replace the word "upon" with "after" in the clause at FAR 52.232-6.

952.232-7 Payments under time-and-materials and labor-hour contracts.

As prescribed in 932.7107-2, modify the introductory sentence and paragraph (e) of the clause cited at FAR 52.232-7 by replacing the word "upon" with the word "after".

952.232-8 Discounts for prompt payment.

As prescribed in 932.7107-2, modify the clause cited at FAR 52.232-8 to substitute the word "proper" for the word "correct" in the seventh line and delete the last sentence and add the following sentence—"For the purpose of computing the discount earned, payment shall be considered to have been made on the date the Government check was dated or an electronic funds transfer payment was made."

952.232-10 Payments under fixed-price architect-engineer contracts.

As prescribed in 932.7107-2, modify paragraphs (b) and (c) of the clause cited at FAR 52.232-10 by replacing the words "upon" with "after".

952.232-70 Payment due dates, invoice requirements and penalties.

As prescribed in 932.7107(a)[1), insert the following clause in solicitations and contracts containing the clause at FAR 52.232-1, Payments, FAR 52.232-2, Payment under Fixed-Price Research and Development Contracts, or FAR 52.232-4, Payments under Transportation Contracts and Transportation-Related Services Contracts, all as modified by 932.7107-2;

Payment Due Dates, Invoice Requirements and Penalities (Apr 1984)

(a) Notwithstanding the payment provisions stated elsewhere in this contract, payment due dates, invoice requirements and penalties for overdue payment, if any, shall be determined under this contract as provided herein.

(b) Payments for complete delivered supplies, services or work accepted under this contrct shall be due on the *Calendar day after the later of:

(1) the date of actual receipt of a proper invoice by the Government office designated in this contract for invoice receipt; or

(2) The date the supplies, services or work were accepted by the Government.

(c) For purposes of determining payment due dates and for no other purpose, the Government agrees to inspect and determine the acceptability of items delivered under the terms of this contract within ** calendar days after the date of receipt or completion of work. If actual acceptance occurs later, constructive acceptance will be deemed to occur on the last day of the above stated inspection period.

(d) If a delivered item or completed work is rejected for failure to conform to the technical requirements of the contract, or for damage in transit or otherwise, the provisions of paragraph (c) will apply to the replacement item(s) delivered or be reapplied upon Contractor correction of the defect(s).

(e) Progress payments, if provided, shall be due on the * calendar day after the date of receipt of each progress payment request by the Government office designated for invoice receipt.

(f) Proper invoices shall be submitted in an original and *** copies to the Government office designated in this contract, and shall include the Contractor's name and invoice date; contract or order number; payment terms; other documentation or information as required by the contract; name (where practicable), title, phone number, office name and complete mailing address of the responsible official to whom payment may be made. Proper invoices for completed supplies, services or work shall also include the description, price and quantity of item(s) actually delivered or services rendered; and, if applicable, shipping terms.

(g) For complete delivered supplies, services or work, the Government shall pay an interest penalty when the payment check or electronic funds transfer is dated more than fifteen (15) calendar days after the payment due date as established by the provisions herein provided such delays are not due to contractor failure to provide proper payee designations in accordance with the requirements stated elsewhere in this contract; or a discount is taken after expiration of the discount period and the underpayment is not corrected within fifteen (15) calendar days of the expired period.

(h) Interest penalities due under the provisions of this clause shall be calculated in accordance with the provisions of the Prompt Payment Act (31 U.S.C. 3901 et seq.); based on the interest rate(s) established by the Secretary of the Treasury under section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611). Claims for failure to pay interest penalties may be filed under Section 6 of the Contract Disputes Act of 1978 (41 U.S.C. 605). Interest penalties under this clause shall not accrue for more than one year or after the timely filing of a claim for such penalties under the Contract Disputes Act.

(i) Claims concerning disputes, and any interest which may be payable with respect to the period while such dispute is being resolved, shall be subject to the provisions specified in the disputes clause of this contract.

(j) Interest penalties shall not apply when the contractor is notified that an invoice is defective or improper provided the Contractor is notified within fifteen (15) calendar days after actual invoice receipt or acceptance of delivered contract item, whichever is later, that payment is delayed because of a disagreement between the Government and the Contractor concerning contract compliance or amounts invoiced; or the penalty amounts to less than one dollar; nor are they required when payments are made for progress payment purposes, payments are made in advance, or for a period when amounts are withheld temporarily in accordance with the contract. In the event the Government fails to provide notification of a defective invoice within fifteen (15) calendar days, the due date for the corrected invoice will be the normal payment due date less the difference between the fifteenth (15) calendar day and the day notification was made.

**Contracting officer to insert appropriate number of days.*

***Contracting officer to insert a number of calender days which constitutes the estimated number of days necessary for inspection, acceptance, and other necessary action.*

****Contracting officer to insert required number of copies.*

Alternate I: For solicitations and contracts containing the clause at FAR 52.232-3, Payments under Personal Sevices Contracts, or FAR 52.232-7, Payments under Time-and-Materials and Labor-Hours Contracts, as modified by 932.7107-2 respectively, insert the basic clause and add the following paragraph (k):

(k) In the event of an overdue payment, interest penalties shall not be applied to payment of cost-reimbursement amounts, if any, claimed pursuant to the reimbursable cost provisions of this contract.

Alternate II: For solicitations and contracts containing the clause at FAR 52.232-5, Payments under Fixed-Price Construction Contracts, or FAR 52.232-10, Payments under Fixed-Price Architect-Engineer Contracts, as modified by 932.7102-2, respectively, insert the basic clause revised as follows:

(1) Replace paragraph (b) with

(b) Payments for complete delivered property, services or work accepted under this contract shall be due on the —* calendar day after the later of the date the property, services or work were accepted by the Government; the date of actual receipt of a proper invoice by the Government office designated in this contract for invoice receipt; or where applicable, the date the contractor's release of claims is received by the contracting officer.

(2) For a construction contract, add the following to revised paragraph (b):

Payment for reimbursement of premiums paid by the contractor for performance and payment bonds shall be due —* calendar days after the date of initial receipt of a proper invoice in the Government designated office or the date satisfactory evidence of full payment to the surety is received by the contracting officer, whichever is later.

Alternate III: For solicitations and contracts containing the clause at FAR 52.232-6, Payment under Communication Service Contracts with Common Carriers, as modified by 932.7107-2, insert the basic clause revised essentially as follows:

(1) Replace paragraph (b) with:

(b) Payments under this contract shall be due on the —* calendar day after the date of actual receipt of a proper invoice by the Government office designated in this contract for invoice receipt.;

(2) Delete paragraphs (c) through (e) and (g) through (j);

(3) Redesignate paragraph (f) as paragraph (c); and

(4) Add the following as paragraph (d):

(d) Overdue payments, if any, are subject to late payment charges established by tariffs or the applicable State Regulatory Commission(s).

952.232-71 Payment due dates and invoice requirements.

As prescribed in 932.7107-1(b) insert the following clause in all cost-reimbursement contract solicitations and awards containing the clause at FAR 52.216-7, Allowable Cost and Payment, or FAR 52.216-13 Allowable Cost and Payment-Facilities:

Payment Due Dates and Invoice Requirements (Apr 1984)

(a) Payments pursuant to the provisions of the allowable cost and payment clause of this contract pursuant to the allowable cost and payment provision of this contract shall be due—* calendar days after the date of actual receipt of a proper invoice or public voucher by the Government office designated in this contract for invoice receipt, provided the amounts claimed are reimbursable in accordance with other terms and conditions of the contract.

(b) Final payment of any balance of allowable costs and that part of the fee, if any, not previously paid as included in the completion invoice or voucher submitted by the contractor shall be due —* calendar days after the later of the date that invoice or voucher is approved for payment by the contracting officer, or the date all the terms of this contract are complied with by the Contractor.

(c) When discounts for early payments are offered by the contractor, the discount period will be calculated from the date a proper invoice was actually received by the Government office designated for invoice receipt or the date the costs were incurred, whichever is the later.

(d) Payment will be considered to have been made on the date the Government check was dated or an electronic funds transfer payment was made.

(e) Notwithstanding any other directions pursuant to the allowable cost and payment clause of this contract, proper invoices or public vouchers shall be submitted in an original and —** copies to the Government office designated in this contract and shall include the Contractor's name and invoice date; contract number; cost amounts by elements of cost and fee amounts, if any, claimed currently; cumulative amounts of costs by element of cost and fee amounts claimed from inception of the contract through the current period; total estimated contract cost amount, fee amount, total contract amount and fee amount not subject to contract specified withholding, as appropriate; payment terms; other substantiating documentation or information required by the contract; and name (where practicable), title, phone number and complete mailing address of responsible official to whom payment may be made.

** Contracting officer to insert appropriate number of days.*

*** Contracting officer to insert the number of copies required.*

952.232-72 Fixed-price purchase order payment provisions.

As prescribed in 932.7107-1(c), incorporate the following payment provisions in fixed price purchase orders and, if more than one (1) calendar day is required, specify the appropriate number of calendar days established for Government inspection/acceptance of deliverables:

Payment due dates—Unless otherwise provided herein, payments for accepted supplies or services shall be due thirty (30) calendar days after the later of the date of actual receipt of a proper invoice by the Government official designated herein for the receipt of invoices or the date the delivered items are accepted by the Government. For purposes of determining payment due dates and for no other purpose, constructive acceptance shall be deemed to occur on the date of receipt at the specified delivery point. If upon inspection a delivered item is found defective, the provisions of this paragraph will apply to the replacement item(s) or will be reapplied upon correction of the defect.

Discounts—In connection with any discount offered for early payment, time will be computed from date of delivery of the supplies to carrier when delivery and acceptance are at point of origin, or from date of delivery at destination or port of embarkation when delivery and acceptance are at either of these points, or from the date a proper invoice is received in the office specified by the Government if the latter date is later than the date of delivery. For the purpose of computing the discount earned, payment shall be considered to have been made on the date the Government check was dated.

Vendor's billing instructions—Proper invoices shall include the vendor's name and invoice date; order number; description, price and quantity of item(s) actually delivered or services rendered; shipping and payment terms; and name (where practicable), title, phone number, office name and complete mailing address of responsible official to whom payment is to be made.

Bill of lading number and weight of shipping will be shown for shipments made on Government bills of lading. Prepaid shipping costs will be indicated as a separate item on the invoice. Where shipping costs exceed $10.00 (except for parcel post) the billing must be supported by a bill of lading or receipt.

Interest on overdue payments—Interest penalties determined in accordance with provisions of the Prompt Payment Act (31 U.S.C. 3901 et seq.) and Office of Management and Budget Circular A-125 shall be paid by the Government when the payment check is dated more than fifteen (15) calendar days after the payment due date as established by the provisions herein, or a discount is taken after the expiration of a discount period and the underpayment is not corrected within fifteen (15) calendar days of the expired discount period.

952.232-73 Payment methods.

As prescribed in 932.7107-1(d), insert the following clauses in all solicitations and contracts:

Payment Methods (Apr 1984)

(a) Payments due for amounts properly invoiced in accordance with the terms and conditions specified elsewhere in the contract shall be made either by Treasury check(s) payable to the contractor or designee or by electronic funds transfer(s) to a financial institution designated by the contractor for that purpose. The method of payment shall be determined by the Government at the time of payment in accordance with applicable Treasury Department requirements.

(b) After award but no later than fourteen (14) days before an invoice or bill is submitted for payment, the contractor shall designate a financial institution for the receipt of electronic funds transfer payments hereunder; and provide the appropriate Government representative (contracting officer or finance official as determined by the Government) with the name of the designated financial institution, financial institution's or correspondent financial institution's 9-digit American Bankers Association identifying number, telegraphic abbreviation of such financial institution, and account number at the designated financial institution to be credit with funds.

(c) In the event the contractor during the performance of this contract elects to designate a different financial institution for the receipt of any payment made using electronic funds transfer procedures, notification of such change and the information as specified in paragraph (b) above must be received by the appropriate Government representative thirty (30) days prior to the date such change is to become effective.

(d) The document furnishing the information required in paragraphs (b) and (c) above must be dated and contain the signature, title, and telephone number of the contractor official authorized to provide it, as well as the contractor's name and contract number.

(e) Contractor failure to properly designate a financial institution or to provide appropriate payee bank account information may delay payments of amounts otherwise properly due.

952.235-70 Key personnel.

In accordance with 935.070, insert this clause.

Key Personnel (Apr 1984)

The personnel specified in an attachment to this contract are considered to be essential to the work being performed hereunder. Prior to diverting any of the specified individuals to other programs, the Contractor shall notify the Contracting Officer reasonably in advance and shall submit justification (including proposed substitutions) in sufficient detail to permit evaluation of the impact on the program. No diversion shall be

made by the Contracting Officer: Provided, that the Contracting Officer may ratify in writing such diversion and such ratification shall constitute the consent of the Contracting Officer required by this clause. The attachment to this contract may be amended from time to time during the course of the contract to either add or delete personnel, as appropriate.

952.236 Construction and architect-engineer contracts.

952.236-70 Administrative terms for architect-engineer contracts.

As prescribed at 936.702(a) the following additional terms shall be included in Standard Form 252, Item 6:

(a) *Description of project.* The contracting officer shall include. (As full a description as is feasible should be inserted. If the architect-engineer services are to be furnished for a construction project, describe the facilities involved, including any auxiliary facilities that may be required.)

(b) *Statement of architect-engineer services.* The contractor shall, within the time specified in the contract, or if not specified therein, in the shortest reasonable time, furnish for the construction project the architect-engineer services described below, subject to such further detailed requirements as may be appended to this contract by agreement of the parties.

Note A.—This form of contract provides for completion of the architect-engineer services "within the shortest reasonable time." The form may be modified to provide for completion of separable parts of the work at different times.

Note B.—When title I, II, or III services are to be furnished, the following language may be used to describe such services. Modifications in the text of the language may be made to omit inappropriate items or, where necessary, to meet particular circumstances.

Title I—Preliminary Services

(1) Conduct or arrange for, by subcontract or otherwise as approved by the Contracting Officer, and supervise all necessary topographical and other field surveys, the preparation of maps, and necessary test boring and other surface investigations.

(2) Consult and collaborate with DOE to determine the requirements which will govern the design of the project and to establish architectural and engineering criteria for such design.

(3) Conduct preliminary studies, and prepare preliminary sketches, drawings, layout plans, outline specifications, and reports showing features and characteristics of the design proposed to meet DOE's requirements. If more than three studies, including sketches, drawings, plans, outline specifications, or documents are required because of changes initiated by DOE, an equitable adjustment in the lump-sum compensation will be made in accordance with provisions of the Changes clause.

(4) The drawings, plans, and outline specifications and documents shall be prepared in such form and furnished in such quantity as directed by DOE.

Note.—Specific quantities of the drawings, plans, outline specifications, and documents should be indicated here or elsewhere in the contract.

(5) Prepare preliminary estimates of cost and time schedule for (i) completion of the design, working drawings, and specifications, and (ii) construction.

(6) Prepare preliminary estimates of material quantities required for construction.

Title II—Design Services

(1) Upon approval by DOE of preliminary plans and estimates, undertake the design of the construction project.

(2) Undertake restudy and redesign work due to minor deviations from the approved preliminary work as may be required by DOE.

(3) Prepare and revise, for the approval of DOE, and furnish complete sets of contract bidding documents, including working drawings, details, and specifications for construction, in such form and quantity and including such provisions as may be required by law or the directions of DOE.

Note.—Specific quantities of drawings and specifications should be indicated here or elsewhere in the contract.

(4) Prepare, or when directed by DOE, participate with others in the preparation of a detailed estimate of the cost of construction based on the approved design and working drawings and specifications.

(5) Assist DOE in securing, analyzing, and evaluating construction bids or proposals.

(6) When requested, consult with and advise DOE on any questions which may arise in connection with the architect-engineer services described in this contract.

Title III—Supervision of Construction

(1) Furnish and maintain governing lines and benchmarks to provide horizontal and vertical controls to which construction progress may be referred.

(2) Check approved or require revision of, all vendors' shop drawings to assure conformity with the approve design and working drawings and specifications.

(3) Inspect the execution of construction so as to assure adherence to approved working drawings and specifications.

(4) Inspect construction workmanship and materials, and equipment, and report to DOE as to their conformity or nonconformity to the approved working drawings and specifications.

(5) Make or acquire such field or laboratory tests of construction workmanship, materials, and equipment, as DOE may require or approve.

(6) Prepare estimates of reasonable amounts of increase or decrease in contract price and/or contract completion time for contract modification, evaluate proposal submitted by the constructor for such contract adjustment and make recommendations to the Contracting Officer for use in negotiating.

(7) Prepare reports and make recommendations on status of deliveries or materials and equipment as DOE may require or approve.

(8) Prepare monthly and other reports of the progress of construction, as may be required, and partial, interim, and final estimates and reports of quantities and values of construction work performed, for payment or other purposes.

(9) Furnish ——— set(s) of reproducible "as-built" records drawings of the type specified by DOE ——— set(s) of marked-up specifications, showing construction as actually accomplished.

952.236-71 Inspection in Architect-Engineer contracts.

As prescribed at 936.609-3 insert the following clause.

Inspection (Apr 1984)

The Government, through any authorized representatives, has the right at all reasonable times, to inspect, or otherwise evaluate the work peformed or being performed hereunder and the premises in which it is being performed. If any inspection, or evaluation is made by the Government on the premises of the Contractor or a subcontractor, the Contractor shall provide and shall require his subcontractors to provide all reasonable facilities and assistance for the safety and convenience of the Government representatives in the performance of their duties. All inspections and evaluations shall be performed in such a manner as will not unduly delay the work.

952.236-72 Nonrefundable fee for plans and specifications.

In accordance with the requirement at 936-202 include the following in solicitations for construction.

Nonrefundable Fee for Plans and Specifications (Apr 1984)

A fee of $——— is required for the plans and specifications referenced in this solicitation. Send check or money order to ———. The fee is not refundable. Plans and specifications need not be returned.

952.245 Clauses related to government property.

952.245-2 Government property (fixed-price contracts).

Modify FAR 52.245-2 by adding "and the DOE Acquisition Regulation Subpart 945.5," after the reference to FAR Subpart 45.5 in the first sentence of paragraph (e)(1) and (e)(2) of the clause.

952.245-5 Government property (cost reimbursement, time-and-materials, or labor-hour contracts.)

Modify FAR 52.245-5 by adding "and DOE Acquisition Regulation Subpart 945.5" after the reference to FAR Subpart 45.5 in paragraphs (e)(1) and (e)(2) of the clause.

952.247-70 Foreign travel.

When foreign travel may be required under the contract insert the following clause.

Foreign Travel (Apr 1984)

(a) Foreign travel, when charged directly, shall be subject to the prior approval of the contracting officer for each separate trip regardless of whether funds for such travel are contained in an approved budget. Foreign travel is defined as any travel outside of Canada and the United States and its territories and possessions.

(b) Request for approval shall be submitted at least 45 days prior to the planned departure date, be on a Request for Approval of Foreign Travel form, and when applicable, include a notification of proposed soviet-bloc travel.

952.249 Clauses related to termination.

952.249–70 Termination clause for cost-reimbursement architect-engineer contracts.

In accordance with the provisions prescribed at 949.505 include the following clause in a cost-reimbursement architect-engineer contract.

Termination (Apr 1984)

(a) Notice of termination for default or convenience. The Contracting Officer may at any time terminate performance of the work under this contract in whole or from time to time in part for the default of the architect-engineer or for the convenience of the Government by written notice to the architect-engineer stating the ground for termination. Such termination shall be effective in the manner and upon the date specified in said notice and shall be without prejudice to any claims which the Government may have against the architect-engineer. Upon receipt of such notice and except as otherwise directed by the contracting officer, the architect-engineer shall:

(1) Stop work under the contract on the date and to the extent specified in the notice of termination;

(2) Place no further orders or subcontracts for materials, services, or facilities, except as may be necessary for completion of such portion of the work under the contract as is not terminated; and

(3) Terminate all orders and subcontracts to the extent they relate to the performance of work terminated by the notice of termination.

(b) Termination for default.

(1) If the architect-engineer refuses or fails to prosecute the work, or any separable part thereof, with such diligence as will ensure its completion within the time specified in this contract, or any extension thereof; or fails to complete said work within such time; or if the architect-engineer fails to perform any of the other requirements of this contract, and does not cure such failure within a period of 10 days (or such longer period as the contracting officer may authorize in writing) after receipt of notice from the contracting officer specifying such failure, the contracting officer may terminate for default the architect-engineer's right to proceed with the work as to which there has been delay, provided that the performance of the work shall not be terminated for default because of any delays in the completion of work due to unforeseeable causes beyond the control and without the fault or negligence of the architect-engineer, including, but not restricted to, acts of God, or the public enemy, acts of the Government in either its sovereign or contractual capacity, acts of another architect-engineer in the performance of a contract with the Government, fires, floods, epidemics, quarantine restrictions, strikes, freight embargoes, and unusually severe weather or delay of subcontractors or suppliers arising from unforeseeable causes beyond the control and without the fault or negligence of both the architect-engineer and subarchitect-engineers or suppliers; and if the architect-engineerwithin ten (10) days from the beginning of any such delay (unless the contracting officer grants a further period of time prior to the date of final settlement of the contract) notifies the contracting officer in writing of the causes of delay. The contracting officer shall ascertain the facts and the extent of the delay and extend the time for completing the work when, in his judgment, the findings of fact justify such an extension, and his findings of fact thereon shall be final and conclusive on the parties hereto, subject only to appeal by the architect-engineer to the head of the agency or his designee in accordance with "Disputes" clause of this contract.

(2) If, after notice of termination of this contract for default under (1) above, it is determined for any reason that the architect-engineer was not in default pursuant to (1), or that the architect-engineer failure to perform or to make progress in performance is due to causes beyond the control and without the fault to perform or to make progress in performance is due to causes beyond the control and without the fault or negligence of the architect-engineer pursuant to the provisions of this clause relating to excusable delays, the notice of termination shall be deemed to have been issued for the convenience of the Government under this clause, and the rights and obligations to the parties hereto shall in such event be governed accordingly.

(c) *Liability for costs on default.* If performance of the work under this contract is terminated for the default of the architect-engineer, the Government may complete or employ any other person or persons to complete the work, and the architect-engineer shall be liable to the Government for increased costs occasioned the Government by the default.

(d) *Terms of settlement.* Upon the termination of performance of work under this contract, full and complete settlement of all claims of the architect-engineer with respect to the terminated work shall be made as follows:

(1) *Assumption of contractor's obligations.* The Government shall have the right in its decision to assume all obligations, commitments, and claims that the architect-engineer may have theretofore in good faith undertaken or incurred in connection with the terminated work, the cost of which would be allowable in accordance with the provisions of this contract; and the architect-engineer shall, as a condition of receiving the payments mentioned in this article, execute and deliver all such papers and take all such steps as the contracting officer may require for the purpose of fully vesting in the Government all the rights and benefits of the architect-engineer, related to such obligations, commitments, and claims.

(2) *Payments for allowable costs.* The Government shall treat as allowable costs all expenditures made in accordance with the clause herein entitled "Allowable cost and Payment," not previously so allowed or otherwise credited.

(3) *Payment for termination expense.* If performance of work under the contract is terminated for the convenience of the Government, the Government shall reimburse the architect-engineer for such further expenditures made after the date of termination for the protection of Government property and for such legal and accounting services in connection with settlement as are required or approved by the contracting officer.

(4) *Payments on account of fixed fee.* If performance work under the contract is terminated for the convenience of the Government, the architect-engineer shall be paid that portion of the fixed fee which the work actually completed, as determined by the contracting officer, bears to the entire work under this contract less payments previously made on account of the fee. If performance of the work under the contract is terminated for the default of the architect-engineer, no further payment beyond that amount due on completed work with appropriate fee payment, shall accrue on account of the fixed price.

(5) *Computation of amount due.* In arriving at the amount, if any, due the architect-engineer under this article, there shall be deducted from what would otherwise be due (i) all unliquidated advances and all other unliquidated payments on account theretofore made to the contractor, (ii) any claims of the Government against the contractor in connection with this contract, and (iii) all deductions due under the terms of this contract and not otherwise recovered by or credited to the Government.

(6) *Property accounting and release.* The architect-engineer shall furnish the accounting for Government-owned property required by the clause entitled "Property" and the assignment, closing financial statement, and release required by the clause entitled "Allowable Cost and Payments."

(e) *Rights and remedies of the Government.* The rights and remedies of the Government provided in this article are in addition to any other rights and remedies provided by law or under this contract.

952.250 Clauses related to indemnification of contractors.

952.250–70 Nuclear hazards indemnity.

In accordance with the provisions prescribed in Subpart 950.7 include the following clause in applicable contracts.

Nuclear Hazards Indemnity (Apr 1984)

(a) This clause is incorporated into this contract pursuant to the authority contained in subsection 170(d) of the Atomic Energy Act

of 1954, as amended (hereinafter called the Act.)

(1) The definitions set out in the Act shall apply to this article.

(2) The term "contract location" means any DOE facility, installation, or site at which contractual activity under this contract is being carried on, and any contractor-owned or controlled facility, installation, or site at which the contractor is engaged in the performance of contractural activity under this contract.

(3) The term "extraordinary nuclear occurrence" means an event which DOE has determined to be an extraordinary nuclear occurrence as defined in the Act. A determination of whether or not there has been an extraordinary nuclear occurrence will be made in accordance with the procedures in Subpart E of 10 CFR 140.

(b) Except as hereafter permitted or required in writing by DOE, the contractor will not be required or provide or maintain, and will not provide or maintain at Government expense, any form of financial protection to cover public liability. DOE may at any time require in writing that the contractor provide and maintain financial protection of such a type and in such amount as DOE shall determine to be appropriate to cover public liability, arising out of or in connection with the contractual activity, provided that the costs of such financial protection will be reimbursed to the contractor by DOE.

(c)(1) To the extent that the contractor and other persons indemnified are not compensated by any financial protection, permitted or required by DOE or the Nuclear Regulatory Commission (NRC), DOE will indemnify the contractor and other persons indemnified against (i) claims for public liability as described in subparagraph (2) of this paragraph (c); and (ii) the reasonable cost of investigating and settling claims and defending suits for damage for such public liability, provided that DOE's liability, excluding such reasonable costs, under all indemnity agreements entered into by DOE under section 170 of the Act, including this contract, shall not exceed $500 million in the aggregate for each nuclear incident occurring within the United States or $100 million in the aggregate for each nuclear incident occurring outside the United States, irrespective of the number of persons indemnified in connection with this contract.

(2) The public liability referred to in paragraph (c)(1) of this section is public liability which (i) arises out of or in connection with the contractual activity; and (ii) arises out of results from:

(A) A nuclear incident which takes place at a contract location; or

(B) A nuclear incident which takes place at any other location and arises out of or in the course of the performance of contractual activity under this contract by the contractor's employees, individual consultants, borrowed personnel or other persons for the consequence of whose acts or omissions the contractor is liable, provided that such incident is not covered by any other indemnity agreement entered into by DOE or the NRC pursuant to section 170 of the Act: or

(C) A nuclear incident which arises out of or in the course of transportation of source, special nuclear, or by-product materials to or from a contract location, provided such incident is not covered by any indemnity agreement entered into by DOE with the transporting carrier, or with a carrier's organization acting for the benefit of the transporting carrier, or with a licensee of NRC, pursuant to section 170 of the Act; or

(D) A nuclear incident which involves items (such as equipment, material, facilities, or design or other data) produced or delivered under this contract, provided such incident is not covered by any other indemnity agreement entered into by DOE or NRC pursuant to section 170 of the Act.

(d) In the event of an extraordinary nuclear occurrence which:

(1) Arises out of or results from or occurs in the course of the construction, possesson, or operation of a production or utilization facility, or

(2) Arises out of or results from or occurs in the course of transportation of source material, by-product material, or special nuclear material to or from a production or utilization facility, or

(3) During the course of the contract activity, arises out of or results from the possession, operation, or use by the contractor or a subcontractor of a device utilizing special nuclear material or by-product material. DOE and the contractor on behalf of itself and other persons indemnified, insofar as their interests appear, each agrees to waive:

(i) Any issue or defense as to the conduct of the claimant or fault of persons indemnified, including, but not limited to:

(A) Negligence;

(B) Contributory negligence;

(C) Assumption of risk; or

(D) Unforeseeable intervening causes, whether involving the conduct of a third person or an act of God.

As used herein, "conduct of the claimant" includes conduct of persons through whom the claimant derives its cause of action;

(ii) Any issue or defense as to charitable or governmental immunity;

(iii) Any issue or defense based on any statute of limitations, if suit is instituted within 3 years from the date on which the claimant first knew, or reasonably could have know, of his injury or change and the cause thereof, but in no event more than 20 years after the date of the nuclear incident. The waiver of any such issue or defense shall be effective regardless of whether such issue or defense may otherwise be deemed jurisdictional or relating to an element in the cause of action. The waiver shall be judicially enforceable in accordance with its terms by the claimant against the person indemnified.

(e) The waivers set forth in paragraph (d) of this clause:

(1) Shall not preclude a defense based upon a failure to take reasonable steps to mitigate damages;

(2) Shall not apply to injury or damage to a claimant or to a claimant's property which is intentionally sustained by the claimant or which results from a nuclear incident intentionally and wrongfully caused by the claimant;

(3) Shall not apply to injury to a claimant who is employed at the site of and in connection with the activity where the extraordinary nuclear occurrence takes place, if benefits therefore are either payable or required to be provided under any workmen's compensation or occupational disease law;

(4) Shall not apply to any claim for punitive or exemplary damages, provided, with respect to any claim for wrongful death under any State law which provides for damages only punitive in nature, this exclusion does not apply to the extent that the claimant has sustained actual damages, measured by the pecuniary injuries resulting from such death but not to exceed the maximum amount otherwise recoverable under such law;

(5) Shall not apply to any claim resulting from a nuclear incident occurring outside the United States;

(6) Shall be effective only with respect to those obligations set forth in this agreement and in insurance policies, contracts or other proof of financial protection; and

(7) Shall not apply to, or prejudice the prosecution or defense of, any claim or portion of claim which is not within the protection afforded under (i) the limit of liability provisions under subsection 170e of the Atomic Energy Act of 1954, as amended, and (ii) the terms of this agreement and the terms of insurance policies, contracts, or other proof of financial protection.

(f) The contractor shall give immediate written notice to DOE of any known action or claim filed or made against the contractor or other person indemnified for public liability as defined in paragraph (c)(2). Except as otherwise directed by DOE, the contractor shall furnish promptly to DOE, copies of all pertinent papers received by the contractor or filed with respect to such actions or claims. When DOE shall determine that the Government will probably be required to make indemnity payments under the provisions of (c) above, DOE shall have the right to, and shall collaborate with, the contractor and any other person indemnified in the settlement or defense of any action or claim and shall have the right (1) to require the prior approval of DOE for the payment of any claim that DOE may be required to indemnify hereunder, and (2) to appear through the Attorney General on behalf of the contractor or other person indemnified in any action brought upon any claim that DOE may be required to indemnify hereunder, take charge of such action, and settle or defend any such action. If the settlement or defense of any such action or claim is undertaken by DOE, the contractor or other person indemnified shall furnish all reasonable assistance in effecting a settlement or asserting a defense.

(g) The indemnity provided by this clause shall not apply to public liability arising out of, or in connection with, any activity that is performed at a licensed facility, and that is covered by a Nuclear Regulatory Commission indemnity agreement authorized by section 170 of the Act.

(h) The obligations of DOE under this clause shall not be affected by any failure on the part of the contractor to fulfill its obligation under this contract and shall be unaffected by the death, disability, or termination of existence of the contractor, or

by the completion, termination or expiration of this contract.

(i) The parties to this contract enter into this clause upon the condition that this clause may be amended at any time by the mutual written agreement of DOE and the contractor, and that such amendment may, by its express terms, provide that it will apply to any nuclear incidents which occur thereafter.

(j) The provisions of this clause shall not be limited in any way by, and shall be interpreted without reference to, any other clause of this contract, including the Disputes clause provided, however, that the following provisions of the contract: Clause entitled, Covenant Against Contingent Fees; the clause entitled, Officials Not to Benefit; and the clause entitled, Examination of Records by Comptroller General; and any provisions later added to this contract which under applicable Federal law, including statutes, executive orders and regulations, are required to be included in agreements of the type contained in this article, shall apply to this clause.

Alternate I: The following paragraph will be included in for those contracts containing the indemnity clause executed under the general contract authority of DOE.

(k) To the extent that the Contractor is compensated by any financial protection, or is indemnified pursuant to this clause or is effectively relieved of public liability by an order or orders limiting same, pursuant to section 170e of the Atomic Energy of 1954, as amended, the provisions of clause providing General Authority Indemnity, shall not apply.

952.250-71 Nuclear hazards indemnity—product liability.

Include the following clause as prescribed by the provisions of Subpart 950.70.

Nuclear Hazards Indemnity—Product Liability (Apr. 1984)

(a) This clause is incorporated into this contract pursuant to the authority contained in section 170d of the Atomic Energy Act of 1954, as amended (hereinafter called the Act).

(1) The definitions set out in the Act shall apply to this article.

(2) The term "product delivered under the contract" means any material, equipment, device, drawing, specification, or technical data made, prepared, or acquired by the contractor in the course of performance of the contract and delivered to DOE or to any other persons as directed or approved by DOE.

(b) Except as hereafter permitted or required in writing by DOE, the contractor will not be required to provide or maintain, and will not provide or maintain at Government expense, any form of financial protection to cover public liability. DOE may at any time require in writing that the contractor provide and maintain financial protection of such a type and in such amount as DOE shall determine to be appropriate to cover public liability against which the contractor is indemnified hereunder, provided that the costs of such financial protection will be reimbursed to the contractor by DOE.

(c)(1) To the extent that the contractor and other persons indemnified are not compensated by any financial protection permitted or required by DOE or the Nuclear Regulatory Commission, (NRC), DOE will indemnify the contractor, and other persons indemnified, against (i) claims for public liability as described in subparagraph (2) of this paragraph (c); and (ii) the reasonable costs of investigating and settling claims, and defending suits for damages for such public liability, provided that DOE's liability, excluding such reasonable costs, under all indemnity agreements entered into by DOE under section 170 of the Act, including this contract, shall not exceed $500 million in the aggregate for each nuclear incident occurring within the United States or $100 million in the aggregate for each nuclear incident occurring outside the United States, irrespective of the number of persons indemnified in connection with this contract.

(2) The public liability referred to in subparagraph (1) of this section is public liability which (i) arises out of, or in connection with, the contractual activity; and (ii) arises out of, or results from, a product delivered under the contract, but does not include liability for a nuclear incident which is covered by any other indemnity agreement entered into by DOE or NRC pursuant to section 170 of the Act.

(d) The contractor shall give immediate written notice to DOE of any known action or claim filed or made against the contractor or other person indemnified for public liability as defined in paragraph (c)(2). Except as otherwise directed by DOE, the contractor shall furnish promptly to DOE copies of all pertinent papers received by the contractor or filed with respect to such actions of claims. When DOE shall determine that the Government will probably be required to make indemnity payments under the provisions or (c) above; DOE shall have the right to, and shall collaborate with, the contractor and any other person indemnified in the settlement or defense of any action or claim and shall have the right, (1) to require the prior approval of DOE for payment of any claim that DOE may be required to indemnify hereunder, and (2) to appear through the Attorney General on behalf of the contractor or other person indemnified in any action brought upon any claim that DOE may be required to indemnify hereunder, take charge of such action, and settle or defend any such action. If the settlement or defense of any such action or claim is undertaken by DOE, the contractor or other person indemnified shall furnish all reasonable assistance in effecting a settlement or asserting a defense.

(e) The obligations of DOE under this clause shall not be affected by any failure on the part of the contractor to fulfill its obligations under this contract, and shall be unaffected by the death, disability, or termination of existence of the contractor or by the completion, termination, or expiration of this contract.

(f) The parties to this contract enter into this article upon the condition that this clause may be amended at any time by the mutual written agreement of DOE and the contractor and that such amendment may, by its express terms, provide that it will apply to any nuclear incidents which occur thereafter.

(g) The provisions of this clause shall not be limited in any way by, and shall be interpreted without reference to, any other clause of this contract, including the Disputes clause, provided, however, that the following provisions of the contract: Clause entitled, Convenant Against Contingent Fees; Clause entitled, Officials Not to Benefit; Clause entitled, Assignment of Claims; and Clause entitled, Examination of Records by Comptroller General; and any provisions later added to this contract which, under applicable Federal law, inlcuding statutes, executive orders, and regulations, are required to be included in agreements of this type contained in this clause, shall apply to this clause.

Alternate I: The following section will be added for in those contracts containing indemnity agreements executed under the general contract authority of DOE:

(h) To the extent that the contractor is compensated by any financial protection, or is indemnified pursuant to this clause, or is effectively relieved of public liability by an order or orders limiting same pursuant to section 170e of the Atomic Energy Act of 1954, as amended, the provisions of clause providing General Authority Indemnity, shall not apply.

952.250-72 Indemnity assurance to architect-engineer or supplier prior to operation of a production or utilization facility.

Include the following clause in accordance with the provisions of Subpart 950.70.

Indemnity Assurance to Architect-Engineer or Supplier Prior to Operation of a Production or Utilization Facility (Apr 1984)

(a)(1) The definitions set out in the Atomic Energy Act of 1954, as amended (hereinafter called the Act), shall apply to this clause.

(2) The services or supplies furnished under this agreement are intended to be used in connection with the construction and/or operation of a production or utilization facility.

(3) DOE will use its best efforts to include in any contract for the operation of such facility, an agreement based on the then current approved form of indemnity agreement under section 170d of the Atomic Energy Act of 1954, as amended, whereby DOE will indemnify all persons indemnified, including the contractor, against public liability for nuclear incidents arising out of or in connection with contractual activities under the contract for the operation of said facility in accordance with the authority provided in subsection 170d of the Act.

(4)(i) DOE will enter into an indemnity agreement in accordance with the authority provided in subsection 170d of the Act with the contractor, without further consideration from the contractor, at any time all of the following circumstances are present:

(A) The services or supplies furnished under this contract are being used in connection with any activity or situation

which involves a risk of substantial nuclear incident; and

(B) there is not in effect an indemnity agreement as described in subparagraph (3) of this clause; and

(C) DOE's authority to enter into agreements of indemnification under section 170(d) of the Act has not expired or been so amended as to deprive DOE of authority to enter into such an agreement.

(b) In that agreement, DOE will indemnify the contractor and other persons indemnified against public liability arising out of, or in connection with, the contractual activity of this contract.

(c) Such agreement will be based on the then current approved form of section 170d indemnity agreement used in contracts between DOE and its contractors, and shall further include an obligation to indemnify the contractor, and persons indemnified for such public liability arising out of, or resulting from, nuclear incidents occurring between the time when the services or supplies furnished under this contract are used in connection with any activity or situation which involves risk of a substantial nuclear incident and the time when such agreement is executed.

(d) The indemnity provided by DOE under all indemnity agreements entered into by DOE under section 170 of the Act, including this agreement, shall not exceed $500 million in the aggregate for each nuclear incident, without regard to the number of persons indemnified, excluding the reasonable costs of investigating and settling claims and defending suits for damages, provided, however, that with respect to incidents occurring outside the United States, such aggregate indemnity shall not exceed $100 million, including such reasonable costs.

PART 970—DOE MANAGEMENT AND OPERATING CONTRACTS

Sec.

970.0000 Scope of part.
970.0001 Renewal of management and operating contracts.

Subpart 970.03—Ethics

970.0304 Contingent fees.

Subpart 970.04—Administrative Matters

970.0404 Safeguarding classified information.
970.0404–1 Definitions.
970.0404–2 General.
970.0404–3 Responsibilities of contracting officers.
970.0404–4 Contract clauses.
970.0407 Record retention requirements.

Subpart 970.08—Required Sources of Supplies and Services

970.0801 Excess personal property.
970.0803 Acquisition of utility services.
970.0811 Leasing of motor vehicles.
970.0870 Strategic and critical materials.
970.0871 Procurement of special items.
970.0872 Purchase or lease determinations.

Subpart 970.09—Contractor Qualifications

970.0902 Qualified products.
970.0905 Organizational conflicts of interest.

Subpart 970.10—Specifications, Standards and Other Statement of Work Descriptions

970.1001 General.
970.1002 Statement of work.

Subpart 970.15—Contracting by Negotiation

970.1508 Price negotiation.
970.1508–1 Cost or pricing data.
970.1509 Fees for management and operating contracts.
970.1509–1 Fee policy.
970.1509–2 Special considerations—educational institutions.
970.1509–3 Special considerations—nonprofit organizations (other than educational institutions).
970.1509–4 Considerations and techniques for determining fees.
970.1509–5 Limitations.
970.1509–6 Fee base.
970.1509–7 Special equipment purchases.
970.1509–8 Special considerations—award fee.

Subpart 970.19—Small Business and Small Disadvantaged Business Concerns

970.1901 General.

Subpart 970.20—Labor Surplus Area Concerns

970.2001 General.

Subpart 970.22—Application of Labor Policies

970.2201 Basic labor policies.
970.2202 Convict labor.
970.2203 Contract Work Hours and Safety Standards Act (other than construction contracts).
970.2204 Labor standards for contracts involving construction.
970.2206 Walsh-Healey Public Contracts Act.
970.2208 Equal employment opportunity.
970.2210 Service Contract Act.
970.2213 Special disabled and Vietnam Era Veterans.
970.2214 Employment of the handicapped.
970.2270 Unemployment compensation.
970.2271 Workers' compensation insurance.
970.2272 Conduct of employees and consultants of DOE management and operating contractors.
970.2273 Administrative controls and criteria for application of the Davis-Bacon Act in operational or maintenance activities.

Subpart 970.23—Environmental, Conservation, and Occupational Safety Programs

970.2303 Hazardous materials identification and material safety.
970.2303–1 General.
970.2303–2 Clauses.

Subpart 970.25—Foreign Acquisitions

970.2501 Buy American Act.

Subpart 970.27—Patents, Data, and Copyrights

970.2701 General.
970.2702 Procedures.

Subpart 970.28—Bonds and Insurance

970.2800 Scope.
970.2801 Performance bonds.
970.2803 Payment bonds.
970.2804 Execution and administration of bonds.
970.2805 Corporate co-sureties.
970.2870 Indemnification.

Subpart 970.29—Taxes

970.2901 Exemptions from Federal excise taxes.
970.2902 State and local taxes.
970.2903 Contract clauses.

Subpart 970.30—Cost Accounting Standards

970.3001 General.
970.3001–1 Applicability.
970.3001–2 Limitations.

Subpart 970.31—Contract Cost Principles and Procedures

970.3100 Scope and applicability of subpart.
970.3100–1 Definitions.
970.3100–2 Responsibilities.
970.3100–3 Deviation.
970.3101 General policy.
970.3101–1 Actual cost basis.
970.3101–2 Direct and indirect costs.
970.3101–3 General basis for reimbursement of costs.
970.3101–4 Cost determination based on audit.
970.3101–5 Contractor's system of accounting.
970.3101–6 Advance understandings on particular cost items.
970.3102 Application of cost principles.
970.3102–1 General and administrative expenses.
970.3102–2 Compensation for personal services.
970.3102–3 Cost of money.
970.3102–4 Depreciation.
970.3102–5 Employee morale, health, welfare, food service, and dormitory costs.
970.3102–6 Facilities (plant and equipment).
970.3102–7 Lobbying costs.
970.3102–8 Membership in trade, business and professional organizations.
970.3102–9 Outside technical and professional consultants.
970.3102–10 Overtime, shift, and holiday premiums.
970.3102–11 Page charges in scientific journals.
970.3102–12 Plant reconversion costs.
970.3102–13 Precontract costs.
970.3102–14 Preparatory and make-ready costs.
970.3102–15 Procurement: subcontracts and contractor-controlled sources.
970.3102–16 Relocation costs.
970.3102–17 Travel costs.
970.3102–18 Special funds in the construction industry.
970.3103 Contract clauses.

Subpart 970.32—Contract Financing

970.3201 General.
970.3202 Advance payments.
970.3270 Clauses.
970.4406 [Reserved]
970.3271 Special bank account agreement.

Subpart 970.36—Construction and A–E Contracts

970.3600 Scope of subpart.
970.3601 Government estimates.
970.3602 Specifications.
970.3603 Labor standards.
970.3604 Agreement for rental of third-party owned construction equipment.
970.3605 Davis-Bacon Act.
970.3606 Special construction clause for operating contracts.
970.3607 Architect-engineer/construction services.
970.3608 Inspection.

Subpart 970.44—Contractor Procurement

970.4401 General.
970.4402 Responsibility of contracting officers.
970.4403 Policies.
970.4404 Procurement from contractor-controlled sources.
970.4405 Procedures for handling mistakes under management and operating contractor procurement.
970.4407 Review and approval.
970.4408 Advance notification.
970.4409 Nuclear material transfers.

Subpart 970.46—Quality Assurance

970.4601 General.

Subpart 970.49—Termination of Contracts

970.4901 General principles.
970.4902 Termination clause.

Subpart 970.51—Use of Government Sources by Contractors

970.5101 Use of Government supply sources.
970.5102 Use of interagency motor pool vehicles and related services.

Subpart 970.52—Contract Clauses for Management and Operating Contracts

970.5201 General policy.
970.5202 Deviations.
970.5203 Modifications and notes to FAR clauses.
970.5203–1 Covenant against contingent fees.
970.5203–2 Examination of records by Comptroller General.
970.5203–3 Buy American Act.
970.5204 Clauses to be used in addition to or in place of the contract clauses set forth in FAR Part 52 and DEAR Part 952.
970.5204–1 Security.
970.5204–2 Safety and health (Government-owned or leased).
970.5204–3 Buy American Act—construction materials.
970.5204–4 [Reserved]
970.5204–5 Disclosure of information.
970.5204–6 Nuclear hazards indemnity.
970.5204–7 Nuclear hazards indemnity—product liability.
970.5204–8 Indemnity assurance to architect-engineer or supplier prior to operation of a production or utilization facility.
970.5204–9 Accounts, records, and inspection.
970.5204–10 Foreign ownership, control, or influence over contractors (FOCI).
970.5204–11 Changes.
970.5204–12 Contractor's organization.
970.5204–13 Allowable costs and fixed-fee (CPFF management and operating contracts).
970.5204–14 Allowable costs and fixed-fee (support contracts).
970.5204–15 Obligation of funds.
970.5204–16 Payments and advances.
970.5204–17 [Reserved]
970.5204–18 [Reserved]
970.5204–19 Printing clause for management and operating contracts.
970.5204–20 [Reserved]
970.5204–21 Property.
970.5204–22 Contractor procurement.
970.5204–23 Taxes.
970.5204–24 Subcontractor cost or pricing data.
970.5204–25 Workmanship and materials.
970.5204–26 Nuclear facility safety.
970.5204–27 Consultant or other comparable employment services of contractor employees.
970.5204–28 Assignment.
970.5204–29 Permits or licenses.
970.5204–30 Notice of labor disputes.
970.5204–31 Litigation and claims.
970.5204–32 Required bonds and insurance-exclusive of Government property (cost-type contracts).
970.5204–33 Priorities, allocations, and allotments.
970.5204–34 Sensitive foreign nations control.
970.5204–35 Controls in the national interest (unclassified contracts with educational institutions).
970.5204–36 Organizational conflicts of interest (contracts with universities where DOE has major investments in facilities but does not own or lease the land).
970.5204–37 Statement of work (management and operating contracts).
970.5204–38 Special clause for procurement of construction.
970.5204–39 [Reserved]
970.5204–40 [Reserved]
970.5204–41 Preservation of individual occupational radiation exposure records.
970.5204–42 Key personnel.
970.5204–43 Other Government contractors.
970.5204–44 [Reserved]
970.5204–45 Termination.
970.5204–46 [Reserved]
970.5204–50 Cost of schedule control systems.
970.5204–51 [Reserved]
970.5204–52 Foreign travel.

Subpart 970.70—Use of DOE Facilities for Work for Others

970.7000 Mission-oriented solicitation.

Authority: Section 644 of the Department of Energy Organization Act, Pub. L. 95–91 (42 U.S.C. 7254); and section 148 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2168).

970.0000 Scope of part.

This part provides Departmental requirements and provisions regarding award and administration of management and operating contracts as defined at FAR Subpart 17.6 and Subpart 917.6 of this chapter. Use of a management and operating contract must be authorized by the Secretary, Deputy or Undersecretary. For administrative convenience, the subparts of this part are arranged in the same numeric sequence as the parts of the FAR. Thus, for example, requirements regarding Small Business are found at 970.19 and guidance regarding Contract Clauses is found at 970.52. To the extent possible the same subpart section and subsection Titles of the FAR are applied in this part 970. There are some difference for convenience. When there is no specific guidance of a FAR part/ section or applicability of a FAR part/section to DOE management and operating contracts a subpart or section will not be included.

970.0001 Renewal of management and operating contracts.

(a) In accordance with applicable law, rules, or regulations and FAR 17.605, competition of existing management and operating contracts will be sought whenever it appears likely that the Government's position may be meaningfully improved in terms of cost or performance, unless it is determined that to change a contractor would be contrary to the best interest of the Government. Except in those cases where the contract specifically permits the Government to bring in a replacement contractor, it is not practical in most instances to compete a management and operating contract which includes major Government-owned facilities on contractor-owned or leased sites. In such cases, the alternatives would be to extend the contract or to allow the contract to expire and, if the work is to be continued, place all or some part of the work with another contractor at a different site.

(b) The following factors, as a minimum, shall effect whether an existing management and operating contract should be completed.

(1) Overall performance of an incumbent contractor including specific consideration of the contractor's administrative, environmental, safeguards and security, safety, health, site planning, maintenance and construction, facility management, energy conservation program considerations, cost, schedule and technical performance.

(2) Potential impact of change in contractors on programmatic activities.

(3) The likelihood that qualified industrial firms or other organizations will compete for the contract.

Subpart 970.03—Ethics

970.0304 Contingent fees.

The policies and requirements of FAR Subpart 3.4 shall be applied to all procurement actfvities of management and operating contractors.

Subpart 970.04—Administrative Matters

970.0404 Safeguarding classified information.

970.0404–1 Definitions.

"Classified Information" means any information or material that is owned by or produced for, or is under the control of the United States Government, and determined pursuant to provisions of Executive Order 12356, April 2, 1982 (47 FR 14874, April 6, 1982), or prior orders, or as authorized under the Atomic Energy Act of 1954, as amended, to require protection against unauthorized disclosure, and is so designated.

"Restricted Data" means data which is defined in section II, of the Atomic Energy Act of 1954, as amended, as "all data concerning: (1) Design, manufacture, or utilization of atomic weapons; (2) the production of specifical nuclear material; or (3) the use of special nuclear material in the production of energy, but shall not include data declassified or removed from the Restricted Data category pursuant to section 142."

970.0404–2 General.

(a) The basis of DOE's security requirements is the Atomic Energy Act of 1954, as amended.

(b) DOE regulations concerning national security information are codified at 10 CFR Part 1045 and Part 710. Supplemental security material is found in the DOE Directives and Orders system. Foreign ownership, control, or influence over contractors as it relates to security and discussed at 904.70 also applies to management and operating contracts Regulations pertaining to the protection of restricted data is found under 10 CFR Part 1016.

(c) Statutory requirements to be observed in connection with the release of Restricted Data to foreign governments are contained in the Atomic Energy Act of 1954, Sections 141 and 144.

(d) Section 148 of the Atomic Energy Act (42 U.S.C. 2168) prohibits the unauthorized dissemination of unclassified nuclear information with respect to the atomic energy defense programs pertaining to:

(1) The design of production facilities or utilization facilities;

(2) Security measures (including security plans, procedures, and equipment) for the physical protection of: (i) Production or utilization facilities, (ii) nuclear material contained in such facilites, or (iii) nuclear materials in transit; or

(3) The design, manufacture, or utilization of any atomic weapon or component if the design, manufacture, or utilization of such weapon or component was contained in any information declassified or removed from the Restricted Data category pursuant to Section 142 of the Atomic Energy Act.

970.0404–3 Responsibilities of contracting officers.

(a) If access to Restricted Data may be required, during the solicitation process for a management and operating contract security clearances shall be obtained as noted in DOE Order 5631.2

(b) Management and operating contracts which may require the processing or storage of Restricted Data or Special Nuclear Material require application of the provisions of DOE Orders 5634.1; 5635.1; and 5632.2.

970.0404–4 Contract clauses.

(a) The security clauses to be used in DOE management and operating contracts are found at 970.5204. They are:

(1) *Security, 970.5204–1.* This clause is required in contracts under section 41 (ownership and operation of production facilities) of the Atomic Energy Act of 1954, as amended.

(2) *Classification, 970.5204–53.* This clause is to be used in all management and operating contracts which involve classified information.

(3) *Sensitive foreign nation controls, 970.5204–34.* This clause is required in all management and operating contracts.

(4) *Foreign ownership, control, or influence, 970.5204–10.* The clause is required in all management and operating contracts.

(b) The clause at 970.5204–4, Disclosure of Information may be used in place of the clauses entitled "Security" and "Classification" in contracts for work that are not likely to produce classified information or restricted data.

(c) Include the clause at 952.204–73 in a solicitation for a management and operating contract.

970.0407 Record retention requirements.

The requirements of FAR Subpart 4.7 do not apply to management and operating contractors and cost-reimbursement type subcontracts thereunder. The contract shall include clause at 970.5204–9.

Subpart 970.08—Required Sources of Supplies and Services

970.0801 Excess personal property.

The provisions of FAR Subpart 8.1, FPMR 41 CFR 101–43, and DOE–PMR 41 CFR 109–43 apply.

970.0803 Acquisition of utility services.

The requirements of FAR Subpart 8.3 shall be applied to management and operating contractors who are authorized to procure utility services.

(a) All utility services (except telecommunications) that are required for Government-owned and contractor-operated facilities shall generally be procured directly by DOE and not by the contractors that manage and operate these facilities for DOE.

(b) However, when it is economically advantageous or otherwise in the best interest of the Government, and subject to the provisions of 970.803–7(b), Heads of Contracting Activities may authorize a contractor that manages or operates a DOE facility to procure utility services on a subcontract basis. When a contractor is authorized to subcontract for utility services under the authority of this paragraph (b), a copy of the authorization, together with a statement of justification, shall be sent to the Project and Facilities Management Office, Headquarters. Heads of Contracting Activities shall require contractors which they authorize to subcontract for utility services to comply with the requirements of 970.803–7, dealing with the prior review of certain proposed acquisitions.

(c) Heads of Contracting Activities shall submit, to the utility element in the Office of Project and Facilities Management for Headquarters' review and approval, proposed contracts for utility services (except telecommunications), including proposed authorizations under applicable GSA area-wide contracts, and proposed memoranda of understanding for consolidated purchase, joint use, or cross-service by DOE with other Government agencies, when one of the circumstances described at FAR 8.307 applies or if the contract term is to exceed one year.

(d) Section 164 of the Atomic Energy Act of 1954 establishes special authorities relative to the acquisition of electric utility services for the Oak Ridge, Paducah, and Portsmouth installations.

970.0811 Leasing of motor vehicles.

The provisions of FAR 8.11 and 908.11 apply.

970.0870 Strategic and critical materials.

Management and operating contractors who use strategic and critical materials shall fulfill their requirements in accordance with 908.70.

970.0871 Procurement of special items.

The following items are to be procured by management and operating contractors in accordance with the provisions of the DEAR as shown.

Item	DEAR
(a) Motor vehicles	908.7101.
(b) Aircraft	908.7102.
(c) Office machines	908.7103.
(d) Office furniture and furnishings	908.7104.
(e) Filing cabinets	908.7105.
(f) Security cabinets	908.7106.
(g) Alcohol	908.7107.
(h) Helium	908.7108.
(i) Fuels and packaged petroleum products	908.7109.
(j) Coal	908.7110.
(k) Arms and ammunition	908.7111.
(l) Materials handling equipment replacement standards.	908.7112.
(m) Calibration services	908.7113.
(n) Wiretapping and eavesdropping equipment.	908.7114.
(o) Government forms	908.7115.
(p) Electronic data processing tapes	908.7116.
(q) Rental of post office boxes	908.7118.
(r) Precious metals	908.7121(b).
(s) Heavy water	908.7121(a).
(t) Lithium	908.7121(c).
(u) Products made in Federal penal and correctional institutions.	FPMR 41 CFR 101-26.702.
(v) Products and services of the blind and other severely handicapped.	FPMR 41 CFR 101-26.701.

970.0872 Purchase or lease determinations.

The guidelines in FPMR 41 CFR 101–25.5 for making purchase or lease determinations shall be applied to management and operating contractor acquisitions of all types of equipment. These guidelines shall be used in making lease-versus-purchase determinations at time of original acquisition, when lease renewals are being considered, or at other times as circumstances warrant.

Subpart 970.09—Contractor Qualifications

970.0902 Qualified products.

(a) Heads of Contracting Activities may authorize use of procedures in FAR Subpart 9.2 by contractors.

(b) Qualified products lists (QPL) shall be distributed to all management and operating contractors.

970.0905 Organizational conflicts of interest.

(a) All management and operating contracts shall contain an appropriate organizational conflict of interest clause. The disclosure or representation requirement of 909.5706 and an appropriate clause such as those found at 952.209–71 and 952.209–72 shall be included in solicitations and resulting contracts. The contracting officer shall consider provisions which assure appropriate restraints on intercorporate relations between the contractor's organization and personnel operating the Department's facility and its parent corporate body and affiliates, including personnel access to the facility, technical transfer of information from the facility, and the availability from the facility of other advantages flowing from performance of the contract. The subcontractors and consultants of management and operating contractors should be, to the extent feasible, made subject to the requirements of this subpart as if they were performing the work as prime contractors to the Department.

(b) FAR Subpart 9.5 and 909.570 of this chapter shall apply to procurements by management and operating contractors.

Subpart 970.10—Specifications, Standards and Other Statement of Work Descriptions

970.1001 General.

Department of Energy management and operation contracts provide for the operation, maintenance, or support, on behalf of the Department, Government-owned or controlled research, development, special production or testing facilities established wholly for or principally devoted to one or more major programs of the Department.

970.1002 Statement of work.

(a) While it is not feasible to set forth standard language which would apply to every contract situation, language must be designed for inclusion in a management and operating contract to describe clearly the work being undertaken; the controls, as appropriate, to be exercised by DOE over the performance of that work; and the relationship contemplated between the parties.

(b) The language shall also include the following with respect to subcontracting performance of the work described pursuant to (a) above: "The contractor shall, when directed by DOE and may; but only when authorized by DOE, enter into subcontracts for the performance of any part of the work under this clause".

(c) In management and operating contracts when the contractor is expected to perform no Davis-Bacon work with his own forces, the special clause in 970.5204–38 shall be included in the language.

(d) The provisions required above shall be set forth in a Statement of work clause to be included in the contract.

Subpart 970.15—Contracting by Negotiation

970.1506 Price negotiation.

(a) Management and operating contract prices (fee) and DOE obligations to support contract performance shall be governed by:

(1) The level of activity authorized and the amount of funds appropriated for DOE approved programs by specific program legislation;

(2) Congressional budget and reporting limitations;

(3) The amount of funds apportioned to DOE;

(4) The amount of obligational authority allotted to program officials and Approved Funding Program limitations; and

(5) The amount of funds actually available to the DOE operating activity as determined in accordance with applicable financial regulations and directives.

(b) Funds shall be obligated and made available by contract provision or modification after the funds become available for obligation for payment to support performance of DOE approved projects, tasks, work authorizations, or services.

(c) Management and operating contracts shall contain appropriate provisions to limit contractor expenditures to the overall amount of funds available and obligated. The clause at 970.5204–15 shall be used for this purpose.

970.1508–1 Cost or pricing data.

(a) The certification requirements of FAR 15.804–2, are not applied to DOE cost-reimbursement management and operating contracts.

(b) Management and operating contractors and their subcontractors shall be required to:

(1) Obtain certified cost or pricing data prior to the:

(i) Award of a negotiated subcontract at any tier when the subcontract price is expected to exceed $500,000; or

(ii) Modification of any subcontract when the modification is expected to exceed $500,000, unless unrelated and separately priced changes, for which certified cost of pricing data would not otherwise be required, are included.

(2) Incorporate appropriate contract provisions that provide for the reduction of a negotiated subcontract price by any significant amount that the subcontract price was increased because of submission of subcontractor defective cost or pricing data, at any tier.

(3) The exemptions to certified cost or pricing data identified by FAR 15.804–3

shall also apply in implementing the above cost/pricing data requirements.

(c) the clause at 970.5204–24 shall be included in subcontracts under management and operating contracts as described therein.

970.1509 Fees for management and operating contracts.

970.1509–1 Fee policy.

(a) DOE mangement and operating contractors, except educational institutions, may be paid a fee. The fee for a management and operating contract shall be an amount commensurate with the difficulty of the work and the level of required skills, demonstrated excellence in performance, and where applicable, an amount which recognizes contractor contributions or utilizations of their own facilities or other investment capital.

(b) Fee objectives and amounts are to be determined for each contract. Standard fees or across the board agreements will not be used or made. Due to the nature of funding management and operating contracts, it is anticipated that fees shall be established in accordance with the funding cycle; however, a longer period may be used, particulary for production efforts.

(c) Fee amounts payable on contracts for administration, management, operation, and on-site support of Government-owned facilities shall be established in accordance with this part. Amounts payable shall not exceed maximum amounts derived from the appropriate fee schedule established for this purpose. Request to pay fees in excess of the maximum will be sent to the Procurement Executive, for review and approval.

(d) Maximum fees for those management and operating contracts that provide support services shall be determined using the schedule(s) most closely related to the service(s) to be performed. This may be either the production and/or R&D schedules (in some cases this could be both schedules) or the maximum fee schedules for construction or construction management cited in 915.971. If architect-engineer services are involved, the weighted guidelines, profit-fee technique cited in 915.970 shall be applied.

(e) When a contract subject to this part requires a contractor to use its own facilities or equipment, or other resources to make its own cost investment for contract performance; e.g., when there is no letter-of-credit financing, consideration will be given to approval of fee amounts based on assigning weights to appropriate fee factors. The weighted guidelines factors developed in 915.970 may be applied for this purpose. However maximum fees as are discussed in 970.1509–1(c) and (d) shall not be exceeded without the Procurement Executives approval.

970.1509–2 Specal considerations—eductional institutions.

(a) DOE policy is generally not to pay fees for management and operating contracts with educational institutions.

(b) Notwithstanding paragraph (a) of this section it may be, under special circumstances, permissible to reimburse or pay a management allowance to any educational institution provided such allowance can be justified and has the approval of the Head of the Contracting Activity.

970.1509–3 Special consideration—nonprofit organizations (other than educational institutions).

(a) Unless there is reason to do otherwise, it is the general policy of DOE to pay fees for a mangement and operating contract with a nonprofit organization; however, it is a matter of negotiation whether a fee will be paid in a given case.

(b) In computing the amounts to be paid, the tax status of the nonprofit organization should be considered. It is difficult to establish the degree to which the fee contributes to an organization's overall net profit since the fee compensates for certain unallowable costs and certain general and administrative expenses. It should be assumed, however, there is an element of profit in the fees paid under management and operating contracts.

(c) In order to assure consideration of the tax benefits of nonprofit organizations the maximum payable fixed fee cited in the fee schedules of this subpart should be reduced by at least 25%. However, depending upon the circumstances and with appropriate justification, fees may be paid between this reduced amount and the fee amount established by the fee schedule.

970.1509–4 Considerations and techniques for determining fees.

(a) The intent of the fee policy stated in 970.1509–1 reflects recognition that a fee is remuneration to contractors for the entrepreneurial function of organizing and managing resources, the use of contractor resources (including capital resources), and the assumption of risk that all incurred costs (operating and capital) may not be reimbursable.

(b) Use of a purely cost-based structured approach for determining fee objectives and amounts for typical DOE management and operating contracts is inappropriate considering the limited level of contractor cost, capital goods, and operating capital outlays for performance of such contracts. Instead of being solely cost-based, the desirable approach calls for a structure that allows judgmental evaluation and consideration of such significant factors, as outlined below, and the selection of and assignment of appropriate fee values therefor:

(1) Management risk relating to performance, including: (i) The quality and diversity of principal work tasks required to do the job, (ii) the labor intensity of the job, (iii) the special control problems, and (iv) the advance planning, forecasting and other such requirements;

(2) The presence or absence of financial risk, including the type and terms of the contract;

(3) The relative difficulty of work, including consideration of technical and administrative knowledge, skill, experience and clarity of technical specifications;

(4) Degree and amount of contract work required to be performed by and with the contractor's own resources, including the extent to which the contractor contributes plant, equipment, computers, or working capital (labor, etc.);

(5) Duration of project;

(6) Size and operation (number of locations, plants, differing operation, etc.);

(7) Influence of alternative investment opportunities available to the contractor (i.e., the extent to which undertaking a task for the Government displaces a contractor's opportunity to make a profit with the same staff and equipment in some other field of activity).

(8) The relationship of a proposed fee to fees being paid for similar work;

(9) The extent to which the activity contemplated is fundamentally a service being furnished to the Government or is an activity in which the contractor has substantial independent interest, a factor especially pertinent to research work which is closely allied to a contractor's own program and to operations which involve furnishing research facilities which would otherwise not be available because of their large cost;

(10) Benefits which may accrue to the contractor from gaining experience and knowledge of how to do something, from establishing or enhancing a reputation, or from being enabled to hold or expand a staff whose loyalties are primarily to the contractor; and

(11) Other special considerations, including support of Government

programs such as those relating to small and minority business in subcontracting, energy conservation, etc.

(c) The fee objective and amount for a particular negotiation is established by judgmental considerations of the above factors, assigning fee values as deemed appropriate for each factor, and totaling the resulting amounts.

(d) In recognition of the complexities of this fee determination process, and to assist in promoting a reasonable degree of consistency and uniformity in its application, the fee schedules in 970.1509–5 set forth the maximum amounts of fee that contracting activities are allowed to award for a particular transaction without obtaining prior approval of the Procurement Executive. In addition the fee amount established in accordance with 970.1509–4 (a), (b) and (c) shall not be exceeded without prior approval of the Procurement Executive. To facilitate application of the schedules to a contract, the payable fee amounts thereunder are related to the total expected level of cost expenditures under the contract which is defined as the fee base.

§ 970.1509–5 Limitations.

(a) Fee schedules representing the maximum allowable fee to be paid under operating and management contracts have been established for the following management and operating contract tasks or efforts.

(1) Production/Manufacturing and

(2) Research and Development

(b) The applicable schedules and maximum fees are:

PRODUCTION EFFORTS

Fee base	Fee	Fee (percent)	Increment (percent)
Up to $1 million		7.00	7.00
1,000,000	$70,000	7.00	6.05
3,000,000	191,000	6.37	5.25
5,000,000	296,000	5.92	4.18
10,000,000	509,000	5.09	3.30
15,000,000	680,000	4.53	3.30
25,000,000	1,010,000	4.04	2.88
40,000,000	1,439,000	3.60	2.41
60,000,000	1,921,000	3.20	2.07
80,000,000	2,336,000	2.92	1.50
100,000,000	2,635,000	2.64	1.10
150,000,000	3,185,000	2.12	.80
200,000,000	3,485,000	1.74	.50
300,000,000	3,985,000	1.33	.40
400,000,000	4,385,000	1.10	.30
500,000,000	4,685,000	.94	
Over 500M	4,685,001	[1]+.30	

[1] Excess.

RESEARCH AND DEVELOPMENT EFFORTS

Fee base	Fee	Fee (percent)	Increment (percent)
$25,000	$2,500	10.00	9.74
50,000	4,938	9.87	9.07
100,000	9,420	9.42	8.22
200,000	17,640	8.82	7.84
400,000	32,920	8.23	7.28
600,000	47,480	7.91	6.92
800,000	61,320	7.67	6.06
1,000,000	74,700	7.47	6.36
3,000,000	202,300	6.74	6.11
5,000,000	324,500	6.49	5.53
10,000,000	601,000	6.01	4.82
15,000,000	842,000	5.61	4.15
25,000,000	1,257,000	5.03	3.60
40,000,000	1,797,000	4.49	3.10
60,000,000	2,417,000	4.03	2.40
80,000,000	2,897,000	3.62	1.88
100,000,000	3,273,000	3.27	1.12
150,000,000	3,833,000	2.56	.65
200,000,000	4,158,000	2.08	.55
300,000,000	4,708,000	1.57	.45
400,000,000	5,158,000	1.29	.35
500,000,000	5,508,000	1.10	
Over 500M	5,508,001	[1]+.35	

[1] Excess.

970.1509–6 Fee base.

(a) The fee base is an estimate of necessary allowable costs to which a fee factor has been applied to determine the maximum fee allowance. It represents the cost of the production or R&D work to be performed, exclusive of the cost of source and special nuclear materials; estimated costs of land, buildings and facilities whether to be leased, purchased or constructed; depreciation of Government facilities; and any estimate of effort for which a separate fee is to be negotiated.

(b) The fee base, in addition to the above adjustments, shall exclude:

(1) Any part of the following types of costs which are of such magnitude or nature as to distort the technical and management effort actually required of the contractor:

(i) Estimated cost of capital equipment (other than special equipment) which the contractor procures by subcontract;

(ii) Estimated cost or price of subcontracts and other major contractor procurements; and

(iii) Other simular costs.

(2) Special equipment as defined in 970.1509–7.

(3) Estimated cost of Government-furnished materials, services and equipment;

(4) All estimates of costs not directly incurred by or reimbursed to the operating contractor;

(5) Estimates of home office or corporate general and administrative expenses that shall be reimbursed through the operating contract;

(6) Estimates of any independent research and development cost or bid and proposal expenses that may be approved under the operating contract.

(c) In calculating the fee base for application of the production schedule, the estimated cost of research and development work and of process development work which goes beyond normal technical support required to ensure continuity of operation shall be excluded. The maximum fee for such R&D and process development work is calculated separately, starting at the beginning of the R&D schedule.

(d) The schedules in this part are not intended to reflect compensation for unusual architect-engineer or construction services provided by the management and operating contractor. Such services are normally covered by special agreements based on the policies applying to architect-engineer or construction contracts. Fees paid for such services shall be in addition to the operating fees and should be calculated using the provisions of 915.9 relating to architect-engineer or construction fees.

(e) The fee schedules provide the maximum fees payable within the authority of the Head of Contracting Activity. There may be times however, when the fee schedule does not reflect an adequate compensation to the contractor (such as the use of its own facilities and capital). Proposals to compensate a contractor in excess of the maximum fee schedules shall be submitted to the Procurement Executive. Requests should contain documentation and state specifically why the contractor is entitled to additional fees. (See also, 970.1509–1(c)).

970.1509–7 Special equipment purchases.

(a) Special equipment is sometimes procured in conjunction with management and operating contracts. When a contractor procures special equipment, the DOE negotiating official shall determine separate fees for the equipment and use the schedule in 915.971–5(f).

(b) In determining appropriate fees, factors such as complexity of equipment, ratio of procurement transactions to volume of equipment to be purchased and completeness of services should be considered. Where possible, the reasonableness of the fees should be checked by their relationship to actual costs of comparable procurement services.

(c) The maximum allowable fee for such services shall not exceed the fee schedule set forth in 915.971–5(f) for such services as performed by construction contractors. The fee is based on the estimated price of the equipment being purchased.

(d) For purposes of this part, special equipment is equipment for which the

purchase price is of such a magnitude compared to the cost of installation as to distort the amount of technical direction and management effort required of the contractor. Generally, special equipment is considered to be a capital-asset-type of equipment (typically equipment costing more than $1,000 and having a service life of more than two years) for which the cost of installation and handling (including unloading, hauling and warehousing) is 5%, or less, of the purchase price of the equipment. However, the determination of specific items of equipment in this category requires application of judgment and careful study of the circumstances involved in each project. This category of equipment would generally include:

(1) Major items of prefabricated process or research equipment.

(2) Major items of preassembled equipment such as packaged boilers, generators, machine tools, and large electrical equipment. In some cases, it would also include special apparatus or devices such as reactor vessels and reactor charging machines.

970.1509-8 Special considerations—award fee.

(a) When a management and operating contract is to be awarded on an award-fee basis, several special considerations are appropriate.

(b) In management and operating contracts, the base fee portion of the fee objective should not normally exceed 50% of the otherwise applicable fixed fee. However, the base amount may range from 0 to 50% of the fixed fee amount. In the event 50% is exceeded, appropriate documentation shall be entered into the contract file. In no event shall the base fee exceed 60% of the fixed fee amount.

(c) The base fee plus the amount included in the award fee pool should normally not exceed the fixed fee (as subjectively determined or as developed from the fee schedule) by more than 50%. However, in the event that the base fee is to be less than 50% of the fixed fee, the maximum potential award fee may be increased proportionately with the decreases in base fee amounts.

(d) The following maximum potential award fees shall apply in award fee contracts: (percent is stated as percent of fee schedule amounts).

Base fee (percent)	Award fee (percent)	Maximum total (percent)
50	100	150
40	120	160
30	140	170
20	160	180
10	180	190
0	200	200

(e) Prior approval of the Procurement Executive, is required for total fee (based plus award fee pool) exceeding the guidelines in paragraph (d), above. Additionally, in the event use of the award fee guidelines in (d), above, result in total fees which exceed or are expected to exceed the statutory limitations imposed by 10 U.S.C. 2306(d) and 41 U.S.C. 254(b), prior approval of the Procurement Executive shall be obtained.

Subpart 970.19—Small Business and Small Disadvantaged Business Concerns

970.1901 General.

(a) The policies and procedures in the following FAR sections shall be applied to the acquisition activities of management and operating contractors.

19.301, 19.302, 19.502-2, 19.502-3, 19.508(b), 19.508(c), 19.508(d)

(b) Protests received by management and operating contractors regarding small business status or questions concerning small disadvantaged business shall be referred to the Small Business Administration through the DOE contracting officer.

(c) Procurements of $10,000 or less awarded through small purchase procedures shall be reserved exclusively for small business where there is a reasonable expectation that bids will be obtained from two or more responsible small business concerns that are competitive with market prices, quality and delivery.

(d) Acquisition by management and operating contractor of construction estimated to cost $3 million or less, including new construction, and repair and alteration of structures, shall be required to be set aside on a class basis for small business concerns. When, in the judgment of the contractor, a particular acquisition falling within these dollar limits is determined to be unsuitable for a small business set-aside, notification to SBA shall be made through the DOE contracting officer. Unless SBA appeals the decision, the contractor shall proceed to process the acquisition on an unrestricted basis. Small business set-aside preferences should be considered on a case-by-case basis, for acquisition of construction in excess of $3 million favoring the preferential participation of small business, whenever appropriate.

(e) Initiation of set-asides by contractors shall be made on a unilateral basis.

(f) Contracting activities shall require management and operating contractors to prepare quarterly reports on small business, small disadvantaged business, women-owned small business and contracts placed in labor surplus areas.

(g) To expand participation of small and small disadvantaged business sources, management and operating contractors shall publicize proposed actions of $100,000 and above in accordance with FAR subpart 5.2. This procedure will be followed unless approval by the contracting officer to waive the requirements of this provision is obtained.

(h) The clause at FAR 52.219-9 as modified by 952.219-9 shall be included in management and operating contracts.

Subpart 970.20—Labor Surplus Area Concerns

970.2001 General.

(a) Management and operating contractors shall be authorized to employ total labor surplus area (LSA) set-asides where there is a reasonable expectation that bids or proposals will be obtained from a sufficient number of responsible LSA concerns so as to ensure that awards will be made at reasonable prices. The priorities set forth in FAR 19.504 shall be utilized in determining the type of set-aside to be employed.

(b) Protests received or questions raised by contractors regarding LSA status shall be handled with the Department of Labor through the DOE contracting officer.

(c) LSA set-aside acquisitions awarded by management and operating contractors shall be reported quarterly in accordance with "A Guide to Preparation of DOE Quarterly Procurement and Financial Assistance Reports."

(d) Initiation of set-asides by management and operating contractors shall be on a unilateral basis.

Subpart 970.22—Application of Labor Policies

970.2201 Basic labor policies.

(a) Contracting officers shall in appropriate circumstances, follow the guidance in FAR subpart 22.1 except as provided below in award and management of management and operating contracts.

(b) The extent of Government ownership of the nation's energy plant and materials, and the overriding concerns of national defense and

security, impose special conditions on personnel and labor relations in the energy program, namely, continuity of vital operations at DOE installations must be assured; DOE must retain absolute authority on all questions of security; DOE reviews labor expenses under management and operating contracts as a part of its responsibility for assuring judicious expenditure of public funds. It is the intent of DOE, that personnel and labor policies throughout the energy program should reflect the best experience of American industry in aiming to achieve the type of stable labor-management relations essential to the proper development of the energy program. The following enunciates the principles upon which the DOE policy is based:

(1) *Employment standards.* (i) Management and operating contractors are expected to bring experienced, proven personnel from their private operations to staff key positions on the contract work and to recruit other well-qualified personnel as needed. Such personnel should be employed and treated during employment without discrimination by reason of race, color, religion, sex, or national origin. Contractors shall be required to take affirmative action to achieve these objectives.

(ii) The job qualifications and suitability of prospective employees should be established by the contractor prior to employment by careful personnel investigations. Such personnel investigations should include, as appropriate: a credit check; verification of high school degree/diploma or degree/diploma granted by an institution of higher learning within the last 5 years; contacts with listed personal references; contacts with listed employers for the past 3 years (excluding employment of less than 60 days duration, part-time employments, and craft/union employments); and local law enforcement checks *when* such checks are not prohibited by state or local law, statute, or regulation, and when the individual had resided in the jurisdiction where the contractor is located. Where a security clearance will be required, the applicant's job qualifications and suitability must be established before a request is made to DOE for a security clearance. When an applicant is being hired specifically for a position which shall require a DOE security clearance, the applicant shall not be placed in that position prior to the security clearance being granted by the DOE unless an exception has been obtained from the Head of the Contracting Activity or designee.

(iii) The contractor is responsible for maintaining satisfactory standards for employee qualifications, performance, conduct, and business ethics under its own personnel policies.

(2) *Security.* On all matters of security at its installations, DOE retains absolute authority and neither the security rules nor their administration are matters for collective bargaining between management and labor. Insofar as DOE security regulations affect the collective bargaining process, the security policies and regulations will be made known to both parties. To the fullest extent feasible, DOE will consult with representatives of management and labor in formulating security rules and regulations that affect the collective bargaining process.

(3) *Wages, salaries, and employee benefits.* (i) Wages, salaries, and employee benefits shall be administered in a manner designated to adapt normal industry or university practices and conditions to the contract work and to provide for appropriate review by DOE. Area practices, valid patterns, and well-established commerical or academic practices of the contractors, as appropriate, form the criteria for the establishment and adjustment of compensation schedules.

(ii) The aspects of wages, hours, and working conditions which are the substance of collective bargaining in normal organized industries will be left to the orderly processes of negotiation and agreement between DOE contractor managements and employee representatives with maximum possible freedom from Government interference.

(4) *Employee relations.* The handling of employee relations on contract work, including such matters as the conduct and discipline of the work force and the handling of employee grievances, is part of the normal management responsibility of the contractor.

(5) *Collective bargaining.* (i) DOE review of collective bargaining practices will be premised on the view that management's trusteeship for the operation of the Government facilities includes the duty to adopt practices which are fundamental to the friendly adjustment of disputes, and which experience has shown promote orderly collective bargaining relationships. Practices inconsistent with this view may be objected to, if not found to be otherwise clearly warranted.

(ii) In line with the policy of assuring continuity of operation of vital facilities, all collective bargaining agreements at Government-owned energy installations should provide that grievances and disputes involving the interpretation or application of the agreement will be settled without resorting to strike, lockout, or other interruption to normal operations. For this purpose, each collective bargaining agreement should provide an effective grievance procedure with arbitration as its final step, unless the parties mutually agree upon some other method of assuring continuity of operations for the term of the agreement.

(iii) DOE expects its management and operating contractors and the unions representing contractor employees to cooperate fully with the Federal Mediation and Conciliation Service.

(6) *Personnel training.* DOE encourages and supports personnel training programs aimed at improving work efficiency or developing needed skills which are not otherwise obtainable.

(7) *Working conditions.* Accident, fire, health, and occupational hazards associated with DOE activities will be held to a practical minimum level and controlled in the interest of maintenance of health and prevention of accidents. To this end, contractors shall be required to maintain comprehensive continuous preventive and protective programs appropriate to the particular activities throughout all operations subject to DOE control. Appropriate financial protection in case of occupational disability must be provided employees on DOE projects.

(c) Title to payroll and associated records under certain contracts for the management and operation of DOE facilities, and for necessary miscellaneous construction incidental to the function of these facilities, shall vest in the Government. Such records are to be disposed of in accordance with DOE directions. For such contracts, the Solicitor of Labor has granted a tolerance from the Department of Labor Regulations to omit from the prescribed labor clauses the requirement for the retention of payrolls and associated records for a period of three years after completion of the contract. Under this tolerance, the records retention requirements for all labor clauses in the contract and the Fair Labor Standards Act is satisfied by disposal of such records in accordance with DOE directives.

970.2202 Convict labor.

The provisions of FAR Subpart 22.2 shall apply to procurement by management and operating contractors.

970.2203 Contract Work Hours and Safety Standards Act (other than construction contracts).

The requirements of FAR Subpart 22.3 shall apply to procurements by management and operating contractors to the same extent and under the same conditions such requirements apply to direct DOE procurements. Paragraph (c) of the clause in FAR 52.222–4 should be revised to provide for the withholding of moneys from the subcontractor by the contractor as directed by the contracting officer.

970.2204 Labor standards for contracts involving construction.

The requirements of FAR Subpart 22.4 apply to subcontracts involving construction awarded by DOE management and operating contractors to the same extent that they would if the subcontract had been directly awarded by DOE. Subpart 922.4 provides guidance, including examples of work situations, to assist in determining the applicability of these standards.

970.2206 Walsh-Healey Public Contracts Act.

(a) The requirements of FAR Subpart 22.6 and this section shall apply to procurements by management and operating contractors to the same extent and under the same conditions such requirements apply to direct DOE procurements.

(b) Because DOE has safety and health standards compatible with those of 41 CFR Part 50–204, the Department of Labor has agreed to accept DOE's program for inspection and evaluation of compliance, in lieu of establishing its own program of inspection and evaluation to the extent the Walsh-Healey safety and health standards are applicable to operations conducted for DOE at Government-owned and/or controlled sites and facilities.

970.2208 Equal employment opportunity.

The equal employment opportunity provisions of FAR Subpart 22.8 and Subpart 922.8 of this chapter, including E.O. 11246 and 41 CFR Part 60, are applicable to DOE management and operating contracts and to subcontracts awarded by DOE management and operating contractors as a result of the management or operating contracts. The DOE contracting officer shall furnish any needed assistance to assure that the management or operating contractor is familiar with these requirements and that its purchasing system extends these requirements to subcontracts.

970.2210 Service Contract Act.

(a) The Service Contract Act of 1965 is not applicable to contracts for the management and operation of DOE facilities. However, subcontracts awarded by contractors operating and managing DOE facilities are subject to the Act to the same extent and under the same conditions as contracts awarded directly by DOE, under which the contractor is acting on the Government's behalf.

(b) Subcontracts awarded by contractors operating and managing DOE facilities shall include the applicable clause in FAR 22.10 with such modifications as would otherwise be appropriate had this clause been included in the prime contract.

970.2213 Special disabled and Vietnam Era Veterans.

The provisions of FAR Subpart 22.13 shall apply to procurements by management and operating contractors.

970.2214 Employment of the handicapped.

The provisions of FAR Subpart 22.14 shall apply to procurement by management and operating contractors.

970.2270 Unemployment compensation.

(a) Each state has its own unemployment compensation system to provide payments to workers who become unemployed involuntarily and through no fault of their own. Funds are provided for unemployment compensation benefits through a payroll tax on employers. Most DOE contractors are subject to the unemployment compensation tax laws of the states in which they are located. It is the policy to assure, both in the negotiation and administration of cost-reimbursement type contracts, that economical and practical arrangements are made and practiced with respect to unemployment compensation.

(b) *Contract exempt from state laws.* (1) Some contractors are exempt from state unemployment compensation laws, usually on grounds that they are nonprofit organizations or subdivisions of State governments. Most states, however, permit such employers to elect unemployment compensation coverage on a voluntary basis. Under such circumstances, all existing or prospective cost-reimbursement contractors shall be encouraged to provide unemployment compensation coverage or equivalent substitutes.

(2) It is also DOE policy that, prior to the award or extension of a management and operating contract, exempt contractors or prospective contractors shall be required to submit to the contracting officer a statement that they will either elect coverage or provide equivalent substitutes for unemployment compensation, or in the alternative, submit evidence that it is impractical to do so. If any exempt contractor or prospective contractor submits that it is impractical to elect coverage or to provide an equivalent substitute, appropriate Headquarters Labor Relations staff shall review that position prior to recommending an award or extension of the contract. If there are substantial reasons for not electing coverage or for not providing equivalent substitutes, a contract may be awarded or extended. Headquarters' staff review and recommendation shall be based on such factors as:

(i) The specific provisions of the unemployment compensation law of the State;

(ii) The extent to which the establishment of special conditions on DOE work may have an adverse effect on the contractor's general policies and operating costs in its private operations;

(iii) The numerical relationship between the contractor's private work force and its employees performing only work for DOE;

(iv) The contractor's record with respect to work force stability and the general outlook with respect to future work force stability;

(v) In a replacement contractor situation, whether or not the prior contractor had coverage or suitable substitutes; and

(vi) The particular labor relations implications involved.

970.2271 Workers' compensation insurance.

(a) *Policies and Requirements.* (1) *Workers' compensation insurance protects employers against liability imposed by workers' compensation laws for injury or death to employees arising out of, or in the course of, their employment.* This type of insurance is required by state laws unless employers have acceptable programs of self-insurance.

(2) *Special requirements.* Certain workers' compensation laws contain provisions which result in limiting the protection afforded persons subject to such laws. The policy with respect to these limitations as they affect persons employed by, management and operating contractors is set forth below:

(i) *Elective provisions.* Some worker's compensation laws permit an employer to elect not to be subject to its provisions. It is DOE policy to require these contractors to be subject to workers' compensation laws in jurisdictions permitting election.

(ii) *Statutory immunity.* Under the provisions of some workers'

compensation laws, certain types of employers; e.g., nonprofit educational institutions, are relieved from liability. If a contractor has a statutory option to accept liability, it is DOE policy to require the contractor to do so.

(iii) *Limited medical benefits.* Some workers' compensation laws limit the liability of the employer for medical care to a maximum dollar amount or to a specified period of time. In such cases, a contractor's workers' compensation insurance policy should contain a standard extrastatutory medical coverage endorsement.

(iv) *Limits on occupational disease coverage; and employers' liability.* Some workers' compensation laws do not provide coverage for all occupational diseases. In such situations, a contractor's workers' compensation insurance policy should contain voluntary coverage for all occupational diseases.

(3) *Contractor "employees' benefit plan"—self-insurers.* The policies and requirements set forth in paragraph (2) apply where management and operating contractors purchase workers' compensation insurance. With respect to self-insured contractors, the objectives specified in paragraph (a)(2) also shall be met through primary or excess workers' compensation and employers' liability insurance policy(ies) or an approved combination thereof. "Employees' benefit plans" which were established in prior years may be continued to contrast termination at existing benefit levels.

(b) *Assignment of responsibilities.* (1) Headquarters' Labor Relations and other officials and Heads of Contracting Activities, consistent with their delegations of responsibility, shall assure management and operating contracts are consistent with the policies and requirements of (a), above.

(2) In discharging assigned responsibility, Heads of Contracting Activities shall:

(i) Periodically review workers' compensation insurance programs of management and operating contractors in the light of applicable workers' compensation statutes to assure conformance with the requirements of (a), above;

(ii) Evaluate the adequacy of coverage of "self-insured" workers' compensation programs;

(iii) Provide arrangements for the administration of any existing "employees' benefit plans until such plans" are terminated; and

(iv) Submit to the Office of Industrial Relations, Headquarters, all proposals for the modification of existing "employees' benefit plans."

(3) The Office of Industrial Relations, Headquarters, is responsible for approving management and operating contractor "employees' benefit plans."

970.2272 Conduct of employees and consultants of DOE management and operating contractors.

(a) *Scope of subsection.* This subsection establishes the policies for maintaining satisfactory standards of conduct on the part of employees and consultants employed on DOE contract work by its management and operating contractors. Contracts with colleges and universities, which have adopted conflict-of-interest policies consistent with ACE–AAUP standards and do not involve the operation of Government-owned facilities on Government-owned or Government-leased land, are governed by the "Policy of the Federal Council for Science and Technology Relating to Conflicts of Interest by Staff Members of Colleges and Universities" (adopted March 29, 1966), and are not subject to this subsection.

(b) *Applicability.* (1) These policies are applicable to DOE management and operating contractors to the extent that their contracts with DOE contain provisions making this subsection applicable; or instructions have been issued under appropriate provisions of their contracts with DOE directing compliance with this subpart.

(2) The contract clause contained in 970.5204–12 requiring the contractor to establish such procedures as are necessary to effectively implement the provisions of this subsection, subject to the approval of the Contracting Officer, shall be included in all new DOE management and operating contracts.

(3) The contract clause contained in 970.5204–27(a) concerning necessary approvals to be obtained by contractor employees before performing consultant or similar services for another DOE contractor shall be included in:

(i) All new DOE management and operating contracts except those identified in paragraph (b)(4) below; and

(ii) Major modifications (involving change in scope or other significant substantive changes) or extensions of existing contracts within the foregoing category.

(4) The contract clause contained in 970.5204–27(b) concerning necessary approvals to be obtained by contractor employees before performing consultant or similar services for another DOE contractor, or in the energy field for another organization, shall be included in:

(i) All new DOE management and operating contracts for research or operations of DOE program work where a substantial portion of the land or buildings used for such research or in such operations is owned or controlled by the Government; and

(ii) Major modifications (involving change in scope or other significant substantive changes) or extensions of existing contracts within the foregoing category.

(5) Exceptions to the requirements of paragraphs (b)(2), (3), and (4) will be permitted only with the approval of the Procurement Executive.

(c) *Gratuities.* A management and operating contractor or its employees or consultants shall not, under circumstances which might reasonably be interpreted as an attempt to influence the recipients in the conduct of their duties, accept any gratuity or special favor from individuals or organizations with whom the contractor is doing business, or proposing to do business, in accomplishing the work under the contract. Reference should be made to the provisions of 41 U.S.C. 51–54.

(d) *Use of privileged information.* Employees and consultants of a management and operating contractor shall not use for personal gain or make other improper use of privileged information which is acquired in connection with their employment on contract work. In this connection, the term "Privileged information" includes but is not limited to, unpublished information relating to technological and scientific developments; medical, personnel, or security records of individuals; anticipated materials' requirements or pricing action; possible new sites for DOE program operations; and knowledge of selections of contractors or subcontractors in advance of official announcement.

(e) *Outside employment of contractor employees.* Employees of a management and operating contractor are entitled to the same rights and privileges with respect to outside employment as other citizens. Therefore, there is no general prohibition against employees having outside employment. However, no employee of a contractor performing work on a full-time basis under a DOE management and operating contract may engage in employment outside official hours of duty or while on leave if such employment will:

(1) In any manner interfere with the proper and effective performance of the duties of the position;

(2) Appear to create a conflict-of-interest situation, or

(3) Appear to subject DOE or the contractor to public criticism or embarrassment.

(f) *Information statement concerning consultant or other employment service.* If a consultant or other outside employment service of the employee involves the use of information in the area of the employee's contract employment, the contractor will be responsible for requiring that the employee file with the contractor, an information statement containing such information concerning the outside employment as the contractor may prescribe. As a minimum, the information statement shall include a description of any patent agreements that may be involved and the following acknowledgement:

I acknowledge that I have read and am familiar with the published policy of the DOE contained in:

(a) Subpart 970.2273 "Conduct of employees and consultants of DOE management and operating contractors and

(b) DOE publication entitled, "Reporting Results of Scientific and Technical Work Funded by DOE," which states in part that significant new results produced in DOE-funded scientific and technical work agree not to withhold or delay reporting information acquired through my employment with ——— in favor of ——— with whom I have made or am contemplating making a consulting agreement. I have also read and am familiar with the requirements of my employer's contract with DOE relating to patents. To the best of my knowledge or belief, the activities to be performed under this consulting agreement will not conflict with the policy set forth in 970.5204–27, the patent provisions of my employer's contract with DOE, or with the responsibility of my employer to report fully and promptly to DOE all significant research and development information. If in the course of my activities under this consulting agreement, it appears that such a conflict may arise, I will promptly notify and consult with my primary employer ——— concerning such possible conflict.

(g) *Incompatibility between regular duties and private interests.* Employees and consultants of a management and operating contractor shall not be permitted to make or influence any decisions on behalf of the contractor which directly or indirectly affect the interest of the Government, if the employee's or consultant's personal concern in the matter may be incompatible with the interest of the Government. For example: (1) An employee or consultant of a contractor will not negotiate, or influence the award of, a subcontract with a company in which the individual has an employment relationship or significant financial interest; and (2) an employee or consultant of a contractor will not be assigned the preparation of an evaluation for DOE or for any DOE contractor of some technical aspect of the work of another organization with which the individual has an employment relationship, or significant financial interest, or which is a competitor of an organization (other than the contractor who is the individual's regular employer) in which the individual has an employment relationship or significant financial interest. The contractor shall be responsible for informing employees and consultants that they are expected to disclose any incompatibilities between duties performed for the contractor and their private interests and to refer undecided questions to the contractor.

970.2273 Administrative controls and criteria for application of the Davis-Bacon Act in operational or maintenance activities.

(a) Particular work items falling within one or more of the following criteria normally will be classified as noncovered by the Davis-Bacon Act.

(1) Individual work items estimated to cost $2,000 or less. The total dollar amount of the operating contract is not a factor to be considered and bears no relation to individual work items classified as construction, alteration and/or repair, including painting and decorating. However, no item of work, the cost of which is estimated to be in excess of $2,000, shall be artificially divided into portions less than $2,000 for the purpose of avoiding the application of the Act.

(2) Work and services that are a part of operational and maintenance activities or which, being very closely and directly involved therewith, are more in the nature of operational activities than construction, alteration, and/or repair work. This includes work and services which would involve a material risk to continuity of operations, to life or property, or to DOE operating requirements, if performed by persons other than the operating contractor's regular production and maintenance forces. However, any decision that contracts or work items are noncovered for these reasons must be made by the Head of the Contracting Activity and the authority to make such a decision cannot be redelegated.

(3) Assembly, modification, setup, installation, replacement, removal, rearrangement, connection, testing, adjustment, and calibration of machinery and equipment. It should be noted, however, that these activities are covered if they are part of or would be a logical part of the construction of a facility, or if construction type work, other than defined as "incidental" in 922.403–71(c) is involved.

(4) Experimental development of equipment, processes, or devices including assembly, fitting, installation, testing, reworking, and disassembly. This refers to equipment, processes and devices which are assembled for the purpose of conducting a test or experiment. The design may be only conceptual in character, and professional personnel responsible for the experiment participate in the assembly. Specifically excluded from the category of experimental development are buildings and building utility services—as distinguished from temporary connections thereto. Also specifically excluded from this category is equipment to be used for continuous testing, e.g., a machine to be continuously used for testing the tensile strength of structural members. (See 922.403–7302 (g) and (h)).

(5) Experimental work in connection with peaceful uses of nuclear energy. This refers to equipment, processes and devices which are assembled and/or set in place and interconnected for the purpose of conducting a test or experiment. The nature of the test or experiment is such that professional personnel responsible for the test or experiment and/or data to be derived therefrom necessarily must participate in the assembly and interconnections. Specifically excluded from experimental work are buildings, building utility services, structural changes, drilling, tunneling, excavation, and back-filling work which can be performed according to customary drawings and specifications, and utility services of modifications to utility services—as distinguished from temporary connections thereto. Work in this category may be performed in mines or in other locations specifically constructed for tests or experiments. (See 922.403–7302 (g) and (h).)

(6) Emergency work to combat the effects of fire, flood, earthquake, equipment failure, accident or other casualties, and to restart the operational activity following the casualty. Work which is not directly related to restarting the activity or which involves rebuilding or replacement of structure or structural components or equipment is excluded from this category. (See 922.403–7302(g) and (h)).

(7) Decontamination, including washing, scrubbing, and scraping to remove contamination; removal of contaminated soil or other material; and painting or other resurfacing, provided that such painting or resurfacing is an intergral part of the decontamination activity and performed by the employees of the contractors performing the decontamination.

(8) Burial of contaminated soil waste or contained liquid; however, initial preparatory work readying the burial ground for use (for example, any grading or excavating that is a part of initial site preparation, fencing, drilling wells for continued monitoring of contamination, construction of guard or other office space) is covered. Likewise, work subsequent to burial which involves the placement of concrete or other like activity is covered.

(b) The calssification of a contract as a contract for operational or maintenance activities does not necessarily mean that all work and activities at the contract location are classifiable as outside Davis-Bacon Act coverage, since it may be necessary to separate out work which should be classified as covered. Therefore, Heads of Contracting Activities shall establish and maintain controls for the careful scrutiny of proposed work assignements under such a contract to assure that:

(1) Contractors whose contracts do not contemplate the performance of covered work with the contractor's own forces are neither asked nor authorized to perform work within the scope of the Davis-Bacon Act. If the actual work assignments do involve coverd work, the contract should be modified to include applicable provisions of the Davis-Bacon Act.

(2) Where covered work is performed by a contractor whose contract contains provisions required by the Davis-Bacon Act, such work is performed as required by law and the contract. After such contractor has been informed, as provided in paragraph (b)(3) of this section, that certain work is covered work, the Head of the Contracting Activity's responsibility to assure compliance is the same as it would be if the work were being performed under a separate construction contract.

(3) Controls provided for above include consideration by the Head of the Contracting Activity and the contractor, before work is begun or contracted out, of the relation of the Davis-Bacon Act to (i) the annual programming of work, (ii) the contractor's work orders, and (iii) work contracted out in excess of $2,000. The Head of the Contracting Activity may, if he concludes that it is consistent with DOE's responsibilities as described in this section, prescribe from time to time classes of work as to which applicability or nonapplicability of the Davis-Bacon Act is clear, for which he will require no further DOE determination on coverage in advance of the work. For all work, controls to be established by the Head of the Contractng Activity should provide for notification to the contractor before work is begun as to whether such work is covered.

The Head of the Contracting Activity is responsible for submitting to the Wage and Hours Division, Employment Standards Administration, Department of Labor, Washington, D.C. 20210, all DOE requests for project area or installation wage determinations, or individual determinations, or extensions or modification thereto. Requests for such determinations shall be made on Standard Form 308, at least 30 calendar days before they are required for use in advertising for bids or requests for proposals.

(c) *Experimental installations.* Within DOE programs, a variety of experiments are conducted involving materials, fuels, coolants, processes equipment. Certain types of situations where tests and experiments have sometimes presented coverage questions are described below.

(1) *Set-ups of device and/or processes.* The proving out of investigative findings and theories of a scientific and technical nature may require the set-up of various devices and/or processes at an early, pre-prototype stage of development. These may range from laboratory bench size to much larger set-ups. As a rule, these set-ups are made within established facilities (normally laboratories); required utility connections are made to services provided as a part of the basic facilities; and the activity as a whole falls within the functional purpose of the facility. Such set-ups are generally not covered. However, the erection of structures which are public works is covered if construction type work, other than an "incidental amount" as defined in 922.403–71(c) is involved. Preparatory work for the set-up requiring structural changes or modifications of basic utility services—as distinguished from connections thereto—is covered. Following are illustrations of noncovered set-ups of devices and/or processes:

(i) Assembly of piping and equipment within existing "hot cell" facilities for proving out a conceptual design of a chemical processing unit;

(ii) Assembly of equipment, including adaptation and modification thereof, in existing "hot cell" facilities to prove out a conceptual design for remotely controlled machining equipment;

(iii) Assembly of the first graphite pile in a stadium at Stagg Field in Chicago;

(iv) Assemby of materials and equipment for particular aspects of the direct current thermonuclear experiments to explore feasibility and to study other ramifications of the concept of high energy injection and to collect data thereon.

(2) *Loops.* Many experiments are carried on in equipment assemblies called loops in which liquids or gases are circulated under monitored and controlled conditions. For purposes of determining Davis-Bacon coverage, loops may be classed as loop facilities or as loop set-ups. Both of these classes of loops can include in-reactor loops and out-of-reactor loops. In differentiating between clearly indentified loop set-ups and loop facilities, an area exists in which there have been some questions of coverage, such as certain loops at the Material Test Reactor and at Engineering Test Reactor and the Idaho National Engineering Laboratory site. Upon clarification of this area, further illustrations will be added. In the meantime, the differentiation between loop set-ups and loop facilities must be made on a case-by-case basis, taking into account the total criteria set forth in this subpart.

(i) *Loop set-ups.* The assembly, erection, modification, and disassembly of a loop set-up is noncovered. A noncontroversial example of a loop set-up is one which is assembled in a laboratory, e.g., Oak Ridge National Laboratory, Argonne National Laboratory, or Lawrence Livermore National Laboratory, for a particular test and thereafter disassembled. However, preparatory work for a loop set-up requiring structural changes or modifications of basic utility services—as distinguished from connections thereto—is covered, as are material and equipment that are installed for a loop set-up which is a permanent part of the facility or which is use for a succession of experimental programs.

(ii) *Loop facilities.* A loop facility differs from a loop set-up in that it is of a more permanent character. It is usually, but not always, of greater size. It normally involves the building or modification of a structure. Sometimes it is installed as a part of construction of the facility. It may be designed for use in a succession of experimental programs over a longer period of time. Examples of loop facilities are the in-reactor "K" loops at Hanford and the large Aircraft Nuclear Propulsion loop at the Idaho National Engineering Laboratory site. The on-site assembly and erection of such loop facilities are covered. However, once a loop facility is completed and becomes operational, the criteria set forth above for operational and maintenance activities apply.

(3) *Reactor component experiments.* Other experiments are carried on by insertion of experimental components within reactor systems without the use of a loop assembly. An example of reactor facilities erected for such experimental purposes are the special power excursion test reactors (SPETRs) at the National Reactor Test Site which are designed for studying reactor behavior and performance characteristics of certain reactor components. Such a facility may consist of a reactor vessel, pressurizing tank, coolant loops, pumps, heat exchangers, and other auxiliary equipment as needed. The facility also may include sufficient shielding to permit work on the reactor to proceed following a short period of power interruption, and buildings as needed to house the reactor and its auxiliary

equipment. The erection and on-site assembly of such a reactor facility is covered, but the components whose characteristics are under study are excluded from coverage. To illustrate, one of the SPETRs planned for studies of nuclear reactor safety is designed to accommodate various internal fuel and control assemblies. The internal structure of the pressure vessel is designed so that cores of different shapes and sizes may be placed in the vessel for investigation, or the entire internal structure may be easily removed and replaced by a structure which will accept a different core design. Similarly, the control rod assembly is arranged to provide for flexibility in the removal of instrument leads and experimental assemblies from within the core.

(4) *Tests or experiments in peaceful uses of nuclear energy.* These tests or experiments are varied in nature and some are only in a planning stage. They consist of one or more nuclear or nonnuclear detonations for the purposes of acquiring data. The data can include seismic effects, radiation effects, amount of heat generated, amount of material moved and so forth. Some of these tests are conducted in existing mines, while others are conducted in facilities specifically constructed for the tests or experiments. In general, all work which can be performed in accordance with customary drawings and specifications, as well as other work in connection with preparation of facilities is treated as covered work. Such work includes tunneling, drilling, excavation and back-filling, erection of buildings or other structures, and installation of utilities. The installation of the nonnuclear material or nuclear device to be detonated, and the instrumentation and connection between such material or device and the instrumentation are treated as noncovered work.

(5) *Tests or experiments in military uses of nuclear energy.* As in 922.403–7302(h)(4), these tests or experiments can be varied in nature. However, under this category it is intended to include only detonation of nonnuclear material or nuclear devices. The material or devices can be detonated either underground, at ground level, or above the ground. These tests or experiments have been conducted in, on, or in connection with facilities specifically constructed for such tests or experiments. As in tests or experiments in peaceful uses of nuclear energy, all work which can be performed in accord with customary drawings and specifications, as well as other work in connection with preparation of facilities are treated as covered work. Such work includes building towers or similar structures, tunneling, drilling, excavation and backfilling, erection of buildings or other structures, and installation of utilities. The installation of the nonnuclear material or nuclear devices and instrumentation are treated as noncovered work.

(d) *Construction site contiguous to an established manufacturing facility.* As DOE-owned property sometimes enbraces several thousand acres of real estate, a number of separate facilities may be located in areas contiguous to each other on the same property. These facilities may be built over a period of years, and established manufacturing activities may be regularly carried on at one site at the same time that construction of another facility is underway at another site. On occasion, the regular manufacturing activities of the operating contractor at the first site may include the manufacture, assembly, and reconditioning of components and equipment which in other industries would normally be done in established conmmercial plants. While the manufacture of components and equipment in the manufacturing plant is noncovered, the installation of any such manufactured items on a construction job is covered.

Subpart 970.23—Environmental, Conservation, and Occupational Safety Programs

970.2303 Hazardous materials identification and material safety.

970.2303–1 General.

(a) The Department of Energy regulates the nuclear safety of its major facilities under its own statutory authority derived from the Atomic Energy Act and other legislation. The Department also regulates, under certain specific conditions, the use by its contractors of radioactive materials and ionizing radiation producing machines.

(b) The inclusion of environmental, safety and health clauses in DOE contracts shall be made by the contracting officer in consultation with appropriate environmental, safety and health program management personnel.

970.2303–2 Clauses

(a) When work under management and operating contracts and subcontracts thereunder is to be performed at a facility where DOE will exercise its statutory authority to enforce occupational safety and health standards applicable to the working conditions of the contractor and subcontractor employees at such facility, the clause at 970.5204–2 shall be used in such contract or subcontract and made applicable to the work if conditions (a)(1) through (3), are satisfied:

(1) DOE work is segregated from the contractor's or subcontractor's other work;

(2) The operation is of sufficient size to support its own safety and health services; and

(3) The facility is government-owned, or leased by or for the account of the government.

(b) The clause set forth in 952.223–72 shall be included in those contracts or subcontracts for, and be made applicable to, work to be performed at a facility where DOE does not elect to assert its statutory authority to enforce occupational safety and health standards applicable to the working conditions of contractor and subcontractor employees, but does need to enforce radiological safety and health standards pursuant to provisions of the contract or subcontract rather than by reliance upon Nuclear Regulatory Commission licensing requirements (including agreements with states under section 274 of the Atomic Energy Act).

(c) The clause set forth at 970.5204–26 shall be included in all contracts and subcontracts for, and be made applicable to, work to be performed at or involving the construction, startup, operation, and decommissioning of DOE-owned nuclear facilities deemed to be exempt from Nuclear Regulatory Commission licensing requirements. Any deviation in substance affecting the meaning, intent, or basic principles of this clause must be referred to the Procurement Executive, for approval.

(d) The clause at 970.5204–41 shall be included in all contracts containing the DOE standard clause entitled "Safety and Health" at 970.5204–2 or "Radiation and Nuclear Criticality" at 952.223–72 or Nuclear Safety at 970.5204–26.

Subpart 970.25—Foreign Acquisitions

970.2501 Buy American Act.

Management and operating contractors are required, through the contract clauses prescribed at 970.5203–3 and 970.5204–3, to comply with the provisions of the Buy American Act. The list at FAR 25.108(d) lists excepted articles, materials, and supplies which have been determined to be unavailable in the United States in sufficient and reasonably available commercial quantities of a satisfactory quality.

Subpart 970.27—Patents, Data, and Copyrights

970.2701 General.

(a) The provisions of 41 CFR 9–9.1 remain in effect for the management and operation of Government-owned research or production facilities.

(b) A management and operating contractor's obligations for protection of information and data received from DOE and other contractors or subcontractors, and for the contractor's private use of contract data first produced in the performance of the contract, are set forth in subparagraph (b)(2) of each Rights in Technical Data clause in 952.227. This subparagraph provides that the contractor may, subject to patent, security, or other provisions of the contract, use for its private purposes, contract data it first produces in the performance of the contract, provided that the contractor has met its data requirements (e.g., delivery of data in the form of progress

or status reports specified to be delivered) as of the date of private use of such data. It is not necessary that a "Final Report" be submitted in order to privately use data if all required progress and interim reports and other technical data than due have been delivered. Paragraph (b)(2) further provides that technical or other data received by the contractor in the performance of the contract must be held in confidence by the contractor in accordance with restrictions accompanying the data.

(c) Contractors should be aware that technical information which is reported to DOE by DOE contractors may be disseminated by DOE to others, subject to the restrictions included in the "Rights to Technical Data" clause.

(d) Employees of contractors operating DOE facilities may not be used to assist in the preparation of a proposal or bid for the performance of private commercial services similar or related to those being performed under the DOE contract unless such employee has been separated, with DOE approval, from performance of work under the DOE contract for such period as the Head of the Contracting Activity or designee shall direct consistent with the purpose of this section.

(e) Contractors operating DOE facilities and performing services as a part of their contract work for other Government agencies or private organizations should not be permitted to utilize information which is furnished by such customers for their own private activities unless it is generally available to others, or unless the customer authorizes such use.

970.2702 Procedures.

(a) *General.* It is essential that DOE maintain continuity in its programs which are implemented by contracts for the operation of Government-owned facilities. Contract data first produced or specifically used in the performance of such contracts must be considered as integral to and remaining with the facility or plant after termination of such contracts and thus available to DOE and its future contractors for the continued use of the facility or plant. However, it is recognized that these contracts by their nature cannot always be subject to one set of prescribed contract provisions which will always apply. Accordingly, the Rights in Technical Data-Facility clause set forth in 952.227–78 is to be used as a basic or minimal clause which may be modified or expanded with the concurrence of patent counsel to meet particular contract situations.

Whenever a contract has as a purpose the operation of a Government-owned research or production facility, the clause set forth at 952.227–78 shall normally be included in the contract. Inasmuch as this clause secures to the Government ownership, access to, and, if requested, delivery of all technical data first produced in the performance of the contract and access to and delivery of technical data which are specifically used in the performance of the contract, there is no need to include the Additional Technical Data Requirements Clause of 952.227–73.

(b) *Subcontracting.* Unless otherwise directed by the contracting officer, the contractor shall be required to follow the policy and procedures of 927.402–1, 927.402–2, and 927.402–3 and shall employ the provisions of the Additional Technical Data Requirements Clause of 952.227–73 and the Rights in Technical Data (Long Form) clause of 952.227–75, where appropriate, except in subcontracts for the design of special production plants or facilities or specially designed equipment for facilities or plants, in which instances contractors shall include the provisions of the Rights in Technical Data—Facility Clause of 952.227–78.

(c) *Optional clause—Limited rights in proprietary data.* In contracts where it is determined that delivery of proprietary data is necessary with limited rights in the Government, the Rights in Technical Data clause of this section shall be supplemented by the additional paragraph (e), set forth in 952.227–79. Paragraph (e) provides that technical data may be specified in the contract as being excluded from the delivery requirements thereof. Alternatively, paragraph (e) may be limited or made applicable to only those classes of proprietary data determined as being necessary for delivery with limited rights. In addition, when furnishing proprietary data with the limited rights legend, paragraphs (a), (b) and (c) thereunder may be modified as follows. When proprietary data is to be furnished only for evaluation, paragraph (a) of the limited rights legend shall be used, and paragraphs (b) and (c), if otherwise inapplicable, may be deleted. When there is a programmatic requirement that proprietary data be disclosed to other DOE contractors only for information or use in connection with work performed under their contracts, paragraph (b) of the limited rights legend shall be used, and paragraphs (a) and (c) may be deleted if otherwise inapplicable. In either of the foregoing examples, the contractor may, if it can show the possibility of a conflict of interest because of disclosure of such data to certain contractors or evaluators, exclude contractors or evaluators from paragraphs (a) or (b). If the data is required solely for emergency repair or overhaul, paragraph (c) of the limited rights legend shall be retained, and paragraphs (a) and (b) may, unless otherwise applicable, be deleted. In the event that it is determined that all of the paragraphs (a), (b) and (c) of the limited rights legend are to be deleted, the word "none" shall be inserted in the legend after the colon (:).

(d) For contracts involving access to certain categories of DOE-owned restricted data, as set forth in 10 CFR Part 725, see 927.402–1(h).

Subpart 970.28—Bonds and Insurance

970.2800 Scope.

Policies and procedures of FAR 28, shall be applied to procurements by management and operating contractors, except that the provisions of FAR 28.1 shall be applied only to construction subcontracts.

970.2801 Performance bonds.

(a) *Construction subcontracts.* A performance bond on Standard Form 25 (modified to name the contractor as well as the United States of America as obligees) shall be required for all fixed price and unit price construction subcontracts in excess of $25,000 and sub-subcontracts under cost-reimbursement type subcontracts. The penal amounts are set forth in FAR 28.102–2.

(b) *Other than construction subcontracts.* (1) Situations which may warrant requiring a performance bond are listed in FAR 28.103–2(a). Other such situations are:

(i) Where doubt exists as to the financial or technical ability of all possible suppliers.

(ii) Where the contractor's talent is overly concentrated in a few key personnel whose illness or departure could seriously impair the contractor's ability to perform the proposed work.

(iii) Where other commitments of the contractors might delay performance.

(iv) Where performance of the proposed work might disrupt other operations of the contractor and impair its overall efficiency; or

(v) Where the item being manufactured is a component for another article and is required by a particular date in order to avoid delay in delivery of the end product.

970.2803 Payment bonds.

(a) *Construction subcontracts.* A management and operating contractor shall be required to seek from the subcontracts, a payment bond on Standard Form 25A modified to name

the operating contractor (as well as the United States of America as obligees) required for all fixed-price and unit-price construction subcontracts in excess of $25,000. The management and operating contractor shall be required to include such a requirement in its cost reimbursement subcontract to apply to subcontracting in excess of $25,000. The penal amounts shall be set forth in FAR 28.102–2.

(b) *Other than construction subcontracts.* The contracting officer may make a determination that it is in the best interest of the Government on an individual subcontract to require payment bonds in connection with other than construction work, subject to the approval of Head of the Contracting Activity. In the case of either advertised or negotiated procurement, wherever the contracting officer has reason to believe that work under a proposed action might be delayed because of the concern of the subcontractor or supplier over the credit standing of the management and operating contractor, they should consider the advisability of requiring a payment bond.

970.2804 Execution and administration of bonds.

(a) *Bid bonds.* Prior to award of a construction subcontract, the contracting officer or, the contractor with contracting officer approval, shall obtain review of the bid bond furnished with the successful bid as to legal form and sufficiency and as to acceptability of the surety and adequacy of the bond.

(b) *Performance and payment bonds.* Prior to award of a construction subcontract, the contracting officer or the contractor with the contracting officer's approval, shall obtain review of the performance and payment bonds furnished with the successful bid as to legal form and sufficiency and as to aceptability of the surety and adequacy of the bonds.

(c) *Clauses.* The contract clause pertaining to bonds is set forth in 970.5204–32.

970.2805 Corporate co-sureties.

More than one corporate surety may be accepted as surety upon recognizance, stipulation, bond, or undertaking in connection with either construction or other contracts, provided that in no case will the liability of any such co-surety exceed the maximum penal sum in which the corporate surety is qualified to any one obligation. On bonds covering contracts other than construction contracts, where the amount of the bond is greater than the limitation of the corporate surety, the latter may reinsure with a corporation on the acceptable list of corporate sureties having the required underwriting capacity. Reinsurance agreements are not acceptable in connection with construction contracts. Corporate co-sureties need not obligate themselves for the full amount of the bond. Each corporate surety may, by setting forth the limit of its liability in the bond as a definite and specified sum, limit such liability. The co-sureties must, however, bind themselves "jointly and severally" for the purpose of allowing a joint action or actions against any or all of them.

970.2870 Indemnification.

(a) DOE Policies provide for indemnification of DOE management and operating contractors against public liability for a nuclear incident arising out of or in connection with operation of production or utilization facilities, and work which entails the risk of public liability for a substantial nuclear incident.

(b) Details of these policies are discussed at 950.70 Indemnification of DOE contractors.

(c) Section 170d of the Atomic Energy Act of 1954, as amended, authorizes DOE "to enter into agreements of indemnification with its management and operating contractors for the construction or operation of production or utilization facilities or other activities under contracts for the benefit of the United States involving activities under the risk of public liability for a substantial nuclear incident."

(d) Heads of Contracting Activities are authorized to negotiate statutory indemnity agreements with management and operating contractors following the procedures at 950.70. They may enter into a statutory indemnity agreement whenever it has been determined that a contractor that is engaged in activities involving the risk of public liability for a substantial nuclear incident.

(e) The contract clause contained in 970.5204–6 shall be incorporated in management and operating contracts in which a statutory indemnity agreements is to be included upon a determination that the contractor is under risk of public liability for the occurrence of a substantial nuclear incident in the course of performance of the contract work. The contract clause contained in 970.5204–7 shall be incorporated in management and operating contracts in which a statutory indemnity agreement is to be included upon a determination that the contractor is under risk of public liability for a substantial nuclear incident caused by a product delivered to or for DOE under the contract where such product is expected to be used in connection with a facility or device not covered by a statutory indemnity agreement.

(f) A DOE contractor with whom a statutory indemnity agreement has been executed in the form contained in 970.5204–6 may include in any of its subcontracts and purchase orders a representation that the work under the prime contract is covered by a statutory indemnity agreement with the DOE, and that this indemnity covers all persons who may be liable for public liability for any nuclear incident arising out of or in connection with the activity under the prime contract. A suggested form of "representation" that may be provided to the contractor follows:

Statutory Indemnity

The contractor represents that there is included in its prime contract with DOE an indemnity agreement, entered into by DOE under the authority of section 170 of the Atomic Energy Act of 1954, as amended by Public Law 85–256 (the "Price-Anderson Act"), a copy of which may be obtained from the contractor (or is attached hereto); that, under said agreement, DOE has agreed to indemnify the contractor and other persons indemnified, including the subcontractor, against claims for public liability (as defined in said Act) arising out of or in connection with the contractual activity; that the indemnity applies to covered nuclear incidents which (1) take place at a "contract location" (which term, as defined in the indemnity agreement, does not include the location of the subcontractor's plant and facilities); or (2) arise out of or in the course of transportation of source, special nuclear or by-product material to or from a "contract location;" or (3) involve items produced or delivered under the prime contract. The obligation of DOE to indemnify is subject to the conditions stated in the indemnity agreement.

(g) DOE shall not approve the inclusion, in the subcontracts and purchase orders of an indemnified management and operating contractor, of any provision whereby the management and operating contractor indemnifies the subcontractor or supplier against public liability for a nuclear incident because any such liability will be covered by the statutory indemnity agreement of the prime contractor.

(h) Management and operating contractors with whom statutory indemnity agreements under the authority of section 170d of the Atomic Energy Act of 1954, as amended, are executed will not normally be required or permitted to furnish financial protection by purchase of insurance to cover public liability for nuclear incidents, except (1) that DOE contractors now covered by insurance

against such liability, with the approval of the DOE, may continue to carry such insurance; and (2) with the approval of the Office of Industrial Relations, contractors engaged in the operation of DOE facilities may be required or permitted to furnish financial protection in an amount not to exceed $1 million.

Subpart 970.29—Taxes

970.2901 Exemptions from Federal excise taxes.

(a) The exemption respecting taxes on communication services or facilities has been held to extend to such services when furnished to DOE management and operating contractors who pay for such services or facilities from advances made to them by DOE under their contracts.

(b) Where it is considered that a request for an additional exemption in the performance of a management and operating contract would be justified, a recommendation that such a request be made should be forwarded to the Controller.

(c) Where tax exemption certificates are required in connection with the foregoing taxes, the Head of the Contracting Activity will supply standard Government forms (SF 1094, U.S. Tax Exemption Certificate) on request.

970.2902 State and local taxes.

It is DOE policy to secure those immunities or exemptions from state and local taxes to which it is entitled under the Federal Constitution or state laws. In carrying out this policy, Heads of Contracting Activities shall:

(a) Take all necessary steps to preclude payment of any taxes for which any of the foregoing immunities or exemptions are available. Advice of Counsel should be sought as to the availability of such immunities or exemptions;

(b) Acquire directly and furnish to contractors as Government furnished property, equipment, material, or services when, in the opinion of the Head of the Contracting Activity:

(1) Such direct acquisition will result in substantial savings to the Government, taking into consideration any additional administrative costs;

(2) Such direct acquisition will not have a substantial adverse effect on the relationship between DOE and its contractor; and

(3) Such direct acquisition will not have a substantial adverse effect on the DOE program or schedules.

970.2903 Contract clauses.

(a) Contracting officers shall include an appropriate clause in management and operating contracts and require a similar inclusion in cost-type subcontracts where the higher-tier contracts and subcontracts are cost-type which will require the contractor to take certain actions with regard to nonpayment, payment, protest, or other treatment of specific taxes. Such a clause is included in 970.5204–23.

(b) Contracting officers should assure that tax matters are appropriately treated in their review and approval of management and operating contractor's procurement system and in their review and approval of individual subcontracts by such contractor. An appropriate tax clause shall be required for inclusion in all fixed-price purchase orders and subcontracts and should contain provisions covering all tax matters which may require special consideration.

Subpart 970.30—Cost Accounting Standards

970.3001 General.

970.3001–1 Applicability.

The provisions of FAR Part 30 shall be followed for management and operating contracts.

970.3001–2 Limitations.

Cost of money as an element of the cost of facilities capital (CAS 414) and as an element of the cost of capital assets under construction (CAS 417) is not recognized as an allowable cost under contracts subject to 970 (See 970.3102–10).

Subpart 970.31—Contract Costs Principles and Procedures

970.3100 Scope and applicability of subpart.

The cost principles, procedures and general policy for the determination of reimbursable costs applicable to the administration of management and operating contracts are set for in this subpart. The terms "reimbursement" and "reimbursable" are used interchangeably in relation to "allowable costs" as a matter of editorial convenience. No "reimbursement" is actually involved in those situations where the cost-type contractor makes payments for "allowable cost" from Government funds advanced to him by the DOE.

970.3100–1 Definitions.

"Off-site work" is contract required work (under a contract covered by FAR Subpart 17.6) performed in contractor-owned facilities, such as a central or branch office.

"On-site work" (under a contract covered by FAR Subpart 17.6) is work performed at the Government-site.

"Direct costs" of a management and operating contract are defined as follows:

(a) With respect to on-site work, "direct costs" technically include all performance costs; that is, such costs are identified specifically for, or account of, the contract. However, in some circumstances it may be desirable or necessary because of the requirements of the contract to distinguish between direct and indirect types of costs. "Direct costs," when the foregoing circumstances apply, are those which are identified as having been incurred specifically for, or on account of a designated cost objective, such as a particular product (or groups of similar products), work order, job, project, program or contract. Materials, labors or expenses which relate specifically and solely to the manufacture of a particular product or to the performance of a distinct job or work are broad examples of direct costs. Direct costs are not limited to items incorporated in an end product.

(b) With respect to "off-site" work, "direct costs" are as defined in FAR 31.202 and discussed in other sections of this subpart.

"Indirect costs" of a management and operating contract are defined as follows:

(a) With respect to "on-site" work, when it is desirable or necessary to distinguish them from direct costs, "indirect costs" are those items of material, labor, and expenses not directly identified with a single final cost accumulation point, but identified with applicability to two or more objectives or with at least one intermediate cost objective.

(b) With respect to "off-site" work, "indirect cost" are as defined in FAR 31.203 and discussed in other sections of this subpart.

970.3100–2 Responsibilities.

(a) The Procurement Executive is responsible for developing and revising the policy and procedures for the determination of allowable costs reimbursable under a management and operating contract, and for seeing that they are properly coordinated with other Headquarters' offices having joint interests.

(b) The Head of the Contracting Activity is responsible for following the policy, principles and standards set forth herein in establishing the compensation provisions of contracts and subcontracts and for submission of

deviations for Headquarters consideration.

970.3100-3 Deviation.

Deviations from the policy and principles set forth in this subpart shall not be made unless such action is authorized by the Procurement Executive, on the basis of a written justification stating clearly the special circumstances involved. Where appropriate, any approved deviation shall be reflected in the compensation provisions of the contract.

970.3101 General policy.

The cost policies of the DOE regarding management and operating contracting are as discussed in this section:

970.3101-1 Actual cost basis.

(a) DOE shall reimburse its contractors for costs incurred in the performance of a management and operating contract in accordance with its terms and the provisions of this subpart. Such costs are those allowable costs provided for in the contract to the extent that they are necessary or incident, and either directly attributable or equitably allocable to the work under the contract. This broad expression of the DOE's cost-reimbursement policy is further developed and elaborated upon throughout this subpart.

(b) DOE uses retrospective or after-the-fact determination, usually called the actual cost basis, to establish the amount reimbursable. This general policy precludes the use of predetermined fixed percentage rates except for provisional payments.

(c) When a fixed compensation for any otherwise allowable cost is separately negotiated, the items of such costs covered by the fixed amount shall be identified with maximum clarity and set forth in an appropriate appendices to the contract as an amount otherwise excludable from other reimbursable costs (this is done in order to distinguish between those allowable costs subject to reimbursement and those costs which are covered by the negotiated fixed amount).

970.3101-2 Direct and indirect costs.

(a) Direct costs identified specifically with a management and operating contract are direct cost of performing that contract and are to be charged directly thereto. All costs specifically identified with other final cost objectives of the management and operating contractor are direct cost of those cost objectives and are not to be charged to the contract directly or indirectly. For reasons of practicality, any direct cost of minor dollar amount may be treated as an indirect cost if the accounting treatment—

(1) Is consistently applied; and

(2) Produces substantially the same results as treating the cost as a direct cost.

(b) Indirect cost are not subject to treatment as a direct cost and thus directly chargeable to a contract. After direct costs have been determined and charged directly to the contract or other work, indirect costs are those remaining to be allocated from an appropriate indirect cost accumulation account. The following principles and procedures shall apply to indirect costs to the extent that they are incurred under management and operating contracts.

(1) Indirect costs to the extent required to be or otherwise incurred in the accounting system of the operating contractor shall be accumulated by logical cost groupings with due consideration of the reasons for incurring such costs. Each grouping should be determined so as to permit distribution of the grouping on the basis of the benefits accruing to the cost objectives to which it is to be allocated. Generally, overhead and general and administrative (G&A) expenses are separately grouped. Similarly, the particular case may require subdivision of these groupings; e.g., building occupancy costs might be separable from those of personnel administration within a specific overhead group such as manufactoring overhead. This necessitates selecting a distribution base common to all cost objectives to which the grouping is to be allocated. The base should be selected so as to permit allocation of the grouping on the basis of the benefits accruing to the cost objectives. The number and composition of cost groupings should be governed by practical considerations and should not unduly complicate the allocation.

(2) Once an appropriate base for distributing indirect costs has been accepted, it shall not be fragmented by removing individual elements. For example, when a cost input base is used for the distribution of G&A costs, all items that would properly be part of the costs input base, whether allowable or unallowable, shall be included in the base and bear their pro rata share or G&A costs.

(3) The method of allocating indirect costs shall be in accordance with generally accepted accounting principles which are consistently applied.

(4) A base period for allocating indirect costs is the cost accounting period during which such costs are incurred and accumulated for distribution to work performed in that period.

970.3101-3 General basis for reimbursement of costs.

(a) The total reimbursable cost of a DOE management and operating contract is the sum of the allowable direct costs necessary or incident to the performance of the contract, plus any properly allocable portion of allowable indirect costs, (including corporate or home office G&A expense, or branch office indirect expenses), if any, less applicable income and other credits. In determining allowability and reimbursability of costs, the following shall be considered:

(1) Reasonableness, including the exercise of prudent business judgment;

(2) Allocability of a cost to management and operating contract. A cost is allocable if it is assignable or chargeable for work and performance of the contract in accordance with the relative benefits received or other equitable relationship;

(3) Application of generally accepted accounting principles and practices appropriate to identifying and measuring costs of performing the contract in accordance with this subpart;

(4) All exclusions of and limitations of types and amounts of items of cost set forth in the contract;

(5) Approvals by the contracting officer required under the contract terms; and

(6) Cost accounting standards if applicable.

970.3101-4 Cost determination based on audit.

(a) The amount reimbursable under management and operating contracts shall be determined in accordance with the principles set forth in this subpart and in accordance with the terms of the respective contract on the basis of audit. In the event that the contractual terms differ, or are inconsistent with (see 970.3100-3 for approval of deviations) the principles stated herein, the contractual terms control. It is expected however, contractual terms to be based on the principles therein. The audit may be performed directly by DOE (or by the cognizant Federal agency pursuant to arrangements made by the DOE). Contracting officers shall assure that management and operating contractors assume the responsibility for audit of subcontractors (and provide for the audit of lower tier subcontractors by the subcontractor immediately preceding in the contractual chain) except as noted in this paragraph. Exceptions may be made to this general principle of subcontractors being audited by the next higher-tier contractor, where the

latter, interrelated with the subcontractor involved, does not have the necessary audit facilities, or for other reasons, is not in a position to perform the subcontract audit in a manner satisfactory to the DOE. In the event of such exception, the subcontract audit responsibility shall rest with the successively higher-tier contractor (or ultimately DOE), but responsibility for determining the costs reimbursable to the subcontractor remains with the next higher-tier contractor on the basis of such audit.

(b) Where the amount of cost-type work to be performed for the DOE in a particular facility is less than that being performed at the same facility for other Federal agencies, arrangements may be made to have the cognizant agency perform the audit of the subcontract in support of DOE. These arrangements shall be made administratively between DOE and the other agency involved, and wherever possible, shall provide for the cognizant agency to audit against the DOE cost principles. In no case, however, shall the arrangements preclude determination by the DOE contracting officer of the allowable and unallowable costs in accordance with 970.5204–13 and 970.5204–14. Steps appropriate in the light of the magnitude and nature of the costs shall be taken by the contracting officer to ascertain that the audit results properly reflect the application of DOE cost principles (particularly as to types and amounts of items of cost including incidence, allocability, and equitable distribution thereof).

970.3101–5 Contractor's system of accounting.

(a) Careful DOE study of a management and operating contractor's usual accounting procedures shall be made prior to arriving at an understanding with the contractor as to the accounting system to be employed by the contractor during the period of contract performance.

(b) A contractor's customary accounting practices are usually accepted for management and operating contracts if they conform to generally accepted accounting principles, produce equitable results, are consistently applied, are not in conflict with the provisions of this subpart, are conducive to accurate costing of the contract work, and produce reports required by the DOE.

970.3101–6 Advance understandings on particular cost items.

(a) It is important that agreement between DOE and its management and operating contractors be reached in advance of the incurrence of costs in categories where reasonableness as to amounts or allocability to the management and operating contract are difficult to determine in order to avoid possible subsequent disallowance or dispute. Any such agreement should be incorporated in the contract. But the absence of such agreement on any element of cost will not, in itself, serve to make the element either allowable or unallowable. Examples of costs on which advance agreements may be particularly important are:

(1) Deferred maintenance costs;
(2) Precontract costs;
(3) Professional or technical counseling services;
(4) Reconversion costs;
(5) Research and development costs;
(6) Royalties;
(7) Selling and distribution costs;
(8) Unemployment insurance experience ratings; and
(9) Employee compensation, including amounts of money or percentage of payment authorized to be expended annually for groups of employees for all types of wage and salary increases, travel, relocation expenses and other personnel costs.

(b) DOE generally utilizes two basic methods of achieving and recording understandings with contractors as to the allowability of employee compensation, travel, relocation, and other personnel costs: (1) Negotiation of a personnel appendix to the contract, which sets forth the policies, programs, and schedules which are accepted as the basis for determining the allowability of costs; or (2) reviewing and reaching agreements on established policies, programs, and schedules (and any changes thereto during the contract term) applicable to contractor's private operations which are acceptable for contract work and which will be consistently followed throughout the contractor's organization. A personnel appendix to the contract setting forth advance understandings covering compensation for personal services shall be utilized in management and operating contracts (as defined in FAR 17.601) when one or more of the following circumstances exist: when policies, programs, and schedules are established specifically for contract work; when the contractor's work is predominantly or exclusively made up of negotiated Government contract work; when contract work is so different from the organization's private work that existing established policies, programs, and schedules cannot reasonably be extended to and consistently applied on contract work; or, when established policies, programs, and schedules proposed for contract work are not sufficiently definitive to permit a clear advance mutual understanding of allowable costs and to provide a basis for audit. The Head of the Contracting Activity is authorized to select the alternative method of achieving and recording advance understanding that they find most appropriate, after considering the facts of the particular contract situation. As used in this paragraph:

(c) With regard to the costs at (a)(9) above:

(1) Compensation for personal services includes wages and salaries, bonuses and incentives, premium payments, pay for time not worked, and supplementary compensation and benefits, such as pension and retirement, group insurance, severance pay plans, and other forms of compensation covered by 970.3102–2.

(2) Employee travel costs include transportation expenses incurred while on official business, within the U.S. or outside the U.S. as necessary. Travel of executive officers is covered in 970.3102–17. Contractor travel policies must be acceptable to the Department, and result in reasonable cost necessary for contract performance. To avoid disputes and to clearly state the treatment that applies to travel cost, advance understandings should be reached with the management and operating contractor. They should be sufficiently definitive to evidence the contractor's responsibility to minimize costs consistent with contract performance. The allowability to certain travel costs, such as air travel, are specifically limited by Department policy. For example, the added cost of first class air travel is prohibited as a reimbursable cost, except under stringent conditions, which must be justified in writing. Contractually enforceable understandings concerning the allowability and reimbursement of other potentially significant travel costs (such as the use of Government-furnished automobiles or Government-contract provided rental automobiles) should be reached with the contractor. A reasonable basis for such understandings is the Federal travel policy applicable to Government and directly paid contractor employees.

(3) Other personnel costs include:

(i) Morale, health, welfare, food service and dormitory costs covered in 970.3102–5;

(ii) Training and education costs covered in 970.5204–13 and 970.5204–14;

(iii) Relocation costs for relocating employees as discussed in 970.3102–16;

and special or mass personnel movement covered in 970.3102–2(i).

970.3102 Application of cost principles.

The incurred costs of performing management and operating contracts shall be reimbursed to the extent they are reasonable, allocable, and determined to be allowable under the provisions of this subpart and the terms of the contract. The DOE principles on allowability of selected items or classification of cost or situations expected to be associated with the performance of contract work as stated in this section.

970.3102–1 General and administrative expenses.

(a) For on-site work, the DOE considers that its fee allowance for management and operating contracts provides for the recognition of appropriate compensation for home or corporate office general and administrative expenses incurred in the general management of the contractor's business as a whole.

(b) The above policy is intended to preclude the payment of general and administrative expenses merely because they are incurred or accounted for at or by a contractor's home or corporate office and not the operating site. The DOE recognizes some benefit of such cost to the DOE program. The basis of recognition through fee allowance is associated with the difficulty of determining and assessing the dollar value of such expenses that might be applicable to or have benefit to a management and operating contract. Conventional allocation techniques; i.e., total operating costs, labor dollars or hours, etc., are generally not considered appropriate because they normally distribute such expenses over a base representative or contractor investment (in terms of its own resources, including labor, material, overhead, etc.). Contractor investments and home office contributions are minimal under DOE's operating and management contracts in as much as they are totally financed and supported by DOE advance payments under the letter-of-credit method and by DOE's provision of government-owned and project-exclusive facilities, property, and other needed resources.

(c) Notwithstanding the concept in (a) above, it is recognized that from time to time the fee amounts established for a management and operating contract, to meet the purpose cited in 970.1509–1 and consideration of the factors in 970.1509–4, may be considered insufficient to adquately recognize a contractor's general and administrative expenses incurred in general management and administration of the contractor's business as a whole and which appear to have a directly benefiting relationship to the DOE program. Such recognitions may be the basis of requesting fee amounts in excess of the limitations set forth in 970.1509–5 or alternatively, in any particular case, the contractor may be compensated on the basis of cost in accordance with 970.3101–1 if the Head of the Contracting Activity or other approving contract official authorizes or approves the procedure and a fair and reasonable amount can be agreed upon. Such amount shall normally be in addition to the applicable fee amounts.

(d) The DOE allows company general and administrative expenses under off-site architect-engineer, supply and research contracts with commercial contractors performing the work in their own facilities. Contractor's general and administrative expenses, may, however, be included for reimbursement under such DOE off-site architect-engineer, supply and research contracts, only to the extent that they are established, after careful examination, to be allowable in nature an properly allocable to the work. Work performed in a contractor's own facilities under a management and operating or construction contract may likewise be allowed to bear the properly allocable portion of allowable company general and administrative expense.

§ 970.3102–2 Compensation for personal services.

(a) *General.* Compensation for personal services includes all remuneration paid currently or accrued, in whatever form and whether paid immediately or deferred, for services rendered by employees to the contractor during the period of contract performance (except as otherwise provided for severance pay costs in paragraph (b)(4)(i) below and for pension cost in paragraph (b)(1) below). It includes, but is not limited to, salaries; wages; directors' and executive committee members' fees; bonuses (including stock bonuses); incentive awards; employee stock options, stock appreciation rights, and stock ownership plans; employee insurance; fringe benefits; contributions to pension, annuity, and management employee incentive compensation plans; and allowances for off-site pay, incentive pay, location allowances, hardship pay, severance pay, and cost of living differential.

(b) *Allowability.* Reimbursable costs for compensation for personal services are to be set forth in a personnel appendix in the contract as discussed at 970.3101–6. This personnel appendix shall be negotiated using the principles and policies of this 970.3102–2, and other pertinent parts of the DEAR. However, costs that are unallowable pursuant to other paragraphs of 970.3102 or contract terms shall not be allowable under this 970.3102–2 on the basis they constitute compensation for personnel services. Costs of compensation for personal services are reimbursable to the extent that:

(1) The compensation is for personal services work performed by the employee in the current year and must not represent a retroactive adjustment of prior year's salaries or wages (but see 970.3102 (i), (j), (l), (m), and (n));

(2) The compensation in total is reasonable for the work performed; however, specific restrictions on individual compensation elements must be observed where they are prescribed;

(3) The compensation is based upon and conforms to the terms and conditions of the contractor's established compensation plan or practice followed so consistently as to imply, in effect, an agreement to make the payment;

(4) Any approvals prescribed by this 970.3102–2 are obtained. No assumption of allowability will exist where the contractor introduces major revisions of existing compensation plans or new plans and the contractor—

(i) Has not notified the cognizant contracting officer of the changes either before their implementation, or within a reasonable period after their implementation, and

(ii) Has not provided the Government, either before implementation or within a reasonable period after it, an opportunity to review the allowability of the changes.

(5) Costs that are unallowable under the contract terms or other paragraphs of this 970.3102 shall not be allowable under this 970.3102–2 solely on the basis that they constitute compensation for personal services.

(c) *Reasonableness.* Subject to 970.3102–2(d) of this section compensation for personal services will be considered reasonable if the total compensation conforms generally to compensation paid by other firms of the same size, in the same industry, or in the same geographic area for similar services or work performed. This does not preclude the Government from challenging the reasonableness of an individual element of compensation where costs are excessive in comparison with compensation paid by other firms of the same size, same industry, or in the same geographic area for similar services. In administering this principle,

it is recognized that not every compensation case need be subjected in detail to the above tests. The tests need be applied only when a general review reveals amounts or types of compensation that appear unreasonable or unjustified. In questionable cases, the contractor has responsibility to support the reasonableness of compensation in relation to the effort performed. Compensation costs under certain conditions give rise to the need for special consideration. Among such conditions are the following:

(1) Compensation to (i) owners of closely held corporations, partners, sole proprietors, or members of their immediate families, or (ii) persons who are contractually committed to acquire a substantial financial interest in the contractor's enterprise. Determination should be made that salaries are reasonable for the personal services rendered rather than being a distribution of profits. Compensation in lieu of salary for services rendered by partners and sole proprietors will be allowed to the extent that it is reasonable and does not constitute a distribution of profits. For closely held corporations, compensation costs covered by this subparagraph shall not be recognized in amounts exceeding those costs that are deductible as compensation under the Internal Revenue Code and its regulations.
